[Docket No. MT99–1–000]

Destin Pipeline Company, L.L.C.; Notice of Tariff Filing

November 3, 1998.

Take notice that on October 29, 1998, Destin Pipeline Company, L.L.C. (Destin) tendered for filing certain modifications to its FERC Gas Tariff, Original Volume No. 1 to become effective on December 1, 1998.

Destin states that the purpose of this filing is to update Section 20 of the General Terms and Conditions of its Tariff relating to marketing affiliates, as more particularly described in Destin's October 29, 1998 filing.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP99–109–000]

East Tennessee Natural Gas Company; Notice of Tariff Filing

November 3, 1998.

Take notice that on October 30, 1998, East Tennessee Natural Gas Company (East Tennessee), tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the revised tariff sheets listed on Appendix A to the filing, to become effective November 30, 1998.

East Tennessee states that this filing proposes new tariff provisions that would enable East Tennessee and a shipper under certain limited circumstances to enter into different types of discount agreements without such agreements receiving prior approval from the Federal Energy Regulatory Commission as material deviation agreements. East Tennessee further states that the proposed tariff provisions would allow East Tennessee and a shipper to enter into agreements for specific discounts on specified volumes, during specified periods of time, and at designated points, zones or geographical areas. East Tennessee requests an effective date of November 30, 1998.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP99–110–000]

East Tennessee Natural Gas Company; Notice of Transportation Cost Rate Adjustment Filing

November 3, 1998.

Take notice that on October 30, 1998, East Tennessee Natural Gas Company (East Tennessee), tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, Fourteenth Revised Sheet No. 4, with an effective date of December 1, 1998.

East Tennessee states that because it has not incurred any demand or commodity Account 858 costs since its last Transportation Cost Rate Adjustment Filing, for the period December 1, 1998 through November 30, 1999, Fourteenth Revised Sheet No. 4 reflects a demand and commodity surcharges of $0.0 to the FT–A and FT–GS rates. East Tennessee further states that for the minimal over-recovery it has received, it will credit the actual net balance over collected as of November 30, 1998 to shipper invoices under the Affected Rate Schedules for activity in the month of December, 1998. Such crediting will include interest through the date of the invoice and will be in lieu of implementing the de minimus surcharge.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP99–119–000]

East Tennessee Natural Gas Company; Notice of Tariff Filing

November 3, 1998.

Take notice that on October 30, 1998, East Tennessee Natural Gas Company (East Tennessee), tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, Second Revised Sheet No. 167, to become effective December 1, 1998.

East Tennessee states that this filing proposes to implement a new tariff provision which would allow shippers to "check the appropriate box" on their monthly invoices and submit with their monthly payments voluntary contributions to the Gas Research Institute ("GRI"). East Tennessee further states that the proposed tariff provision is consistent with the Stipulation and Agreement approved by the Commission in Gas Research Institute, 83 FERC ¶ 61,093 (1998), order on rehearing, 83 FERC ¶ 61,331 (1998), in which signatory pipelines agreed to be voluntary collection agents for GRI.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP99–101–000]

Florida Gas Transmission Company; Notice of Proposed Changes in FERC Gas Tariff

November 3, 1998.

Take notice that on October 29, 1998, Florida Gas Transmission Company (FGT) tendered for filing to become part of its FERC Gas Tariff, Third Revised Volume No. 1, the following tariff sheet, to become effective January 1, 1999:

First Revised Sheet No. 193

FGT states that in the instant filing, FGT is making revisions to its Gas Research Institute Charge Adjustment Provisions to comply with the January 21, 1998, Stipulation and Agreement Concerning GRI Funding (Settlement) as approved by the Commission's order issued April 29, 1998 in Docket No. RP97–199–003. Under the terms of the Settlement, Gas Research Institute (GRI) interstate pipeline company members agreed to be voluntary collection agents for shippers who voluntarily choose to contribute to GRI programs. Such voluntary contributions shall be made via a "check-the-box" mechanism allowing shippers to specify amounts they are contributing and the specific project(s) or project area(s) to which the amount are applicable.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Granite State Gas Transmission Company; Notice of Reconversion Reserve Status Report

November 3, 1998.

Take notice that on September 30, 1998, Granite State Gas Transmission, Inc. (Granite State) tendered for filing a report and reconciliation relating to Granite State's reconversion reserve related to the lease extensions with Portland Pipe Line Corporation. The report reflects an undercollection of $101,419 which Granite State proposes to bill to its firm customers.

Granite State states that copies of its filing have been mailed to all of its firm transportation customers and to the regulatory agencies of the states of Maine, Massachusetts and New Hampshire.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed on or before November 10, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Great Lakes Gas Transmission Limited Partnership; Notice of Tariff Filing

November 3, 1998.

Take notice that on October 30, 1998, Great Lakes Gas Transmission Limited Partnership (Great Lakes) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets to become effective January 1, 1999:

Ninth Revised Sheet No. 7

Second Revised Sheet No. 47
Fourth Revised Sheet No. 48

Great Lakes asserts that the purpose of this filing is to comply with the Commission's Order issued April 29, 1998, in Docket Nos. RP97–149–003, RP97–149–004, RP97–391–001, and RP97–391–002 and Docket No. RM97–3–001 (not consolidated), 83 FERC ¶61,093 (1998). That Order requires the above-described tariff sheets to be filed to reflect the Gas Research Institute's (GRI) future funding methodology. The following changes are reflected on the proposed tariff sheets:

The decrease to the GRI funding surcharges for 1999, as approved by the Commission, is shown on Ninth Revised Sheet No. 7;

A "check the box" procedure for voluntary GRI contributions is reflected on Second Revised Sheet No. 47.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP99–112–000]

Iroquois Gas Transmission System, L.P.; Notice of Proposed Changes In FERC Gas Tariff

November 3, 1998.

Take notice that on October 30, 1998, Iroquois Gas Transmission System, L.P. (Iroquois) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, Original Sheet No. 75E. The proposed effective date of this tariff sheet is January 1, 1999.

Iroquois states that it is submitting the filing in accordance with the Commission's April 29, 1998 order in Gas Research Institute, Docket Nos. RP97–149–003, et al., (83 FERC ¶ 61,093) authorizing pipelines to become collection agents for shippers wishing to voluntarily contribute to GRI. Pursuant to that order, Iroquois states that it is implementing a check-the-box mechanism to permit shippers to make such contributions and to specify specific projects or project areas to which the amounts collected should be applied. According to Iroquois, any funds collected are in addition to amounts collected under Section 12.1 of its tariff and will not be part of Iroquois jurisdictional rates or reviewed by the Commission.

Iroquois further requests a waiver of section 154.207 of the Commission's regulations to permit the tariff sheet to become effective as proposed.

Iroquois states that copies of its filing were served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Sections 385.214 or 385.211of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP99–103–000]

KN Interstate Gas Transmission Company; Notice of Tariff Filing

November 3, 1998.

Take notice that on October 30, 1998, KN Interstate Gas Transmission Company (KNI) tendered for filing to become a part of KNI's FERC Gas Tariff, the following revised tariff sheet(s) to be effective on January 1, 1999:

Third Revised Volume No. 1–B

First Revised Sheet No. 38
First Revised Sheet No. 39
Original Sheet No. 39A

Third Revised Volume No. 1–D

First Revised Sheet No. 30
Second Revised Sheet No. 31
Original Sheet No. 31A
Second Revised Sheet No. 32

KNI is making this filing pursuant to the January 21, 1998 Stipulation and Agreement (Settlement) approved by the FERC's order issued April 29, 1998 in Docket Nos. RP97–149–003, et al. In the Settlement, KNI and other pipelines have agreed to be voluntary collection agents for shippers who voluntarily choose to contribute to GRI programs through "check-the-box" approach on pipelines' invoices. Therefore, KNI proposed revised tariff language in Section 21.1 (Third Revised Volume No. 1–B) and Section 21.1 (Third Revised Volume No. 1–D) of the General Terms and Conditions of its Tariff to implement the "check-the-box" mechanism.

KNI states that copies of the filing were served upon all affected firm customers of KNI and applicable state agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

KN Wattenberg Transmission Liability Co.; Notice of Tariff Filing

November 3, 1998.

Take notice that on October 30, 1998, KN Wattenberg Transmission Limited Liability Co. (KNW) tendered for filing to become a part of KNW's FERC Gas Tariff, First Revised Volume No. 1, the following revised tariff sheets, to be effective January 1, 1999:

First Revised Sheet No. 65
First Revised Sheet No. 66
Original Sheet No. 66A

KNW is making this filing pursuant to the January 21, 1998 Stipulation and Agreement (Settlement) approved by the FERC's order issued April 29, 1998 in Docket Nos. RP97–149–003, *et al.* In the Settlement, KNW and other pipelines have agreed to be voluntary collection agents for shippers who voluntarily choose to contribute to GRI programs through "check-the-box" approach on pipelines' invoices. Therefore, KNW proposed revised tariff language in Section 21 of the General Terms and Conditions of its Tariff to implement the "check-the-box" mechanism.

KNW states that copies of the filing were served upon all affected firm customers of KNW and applicable state agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP99–111–000]

Koch Gateway Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

November 3, 1998.

Take notice that on October 30, 1998, Koch Gateway Pipeline Company (Koch) tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, the following tariff sheets, to become effective December 1, 1998:

Twenty-fourth Revised Sheet No. 20
Twenty-first Revised Sheet No. 21
Twenty-second Revised Sheet No. 22
Twenty-fifth Revised Sheet No. 24
Second Revised Sheet No. 719
Original Sheet No. 719A
Fourth Revised Sheet No. 1414
Fifth Revised Sheet No. 1806
Seventh Revised Sheet No. 1807

Koch states that the purpose of this filing is to establish a just and reasonable incremental transportation rate associated with Koch's extension of the Bastian Bay Line to the Vesco Processing Plant. The Commission specifically denied Koch's proposal to roll in the cost of Bastian Bay in its last rate case (RP97–373) and required Koch to develop an incremental rate to recover these costs. Koch has developed an incremental transportation rate that will provide it with the opportunity to recover the cost for these facilities. This incremental rate shall apply to all firm, NNS, and interruptible transportation nominated from SLN #464 (tailgate at the Vesco Processing Plant). Koch proposes that, for those firm customers that were utilizing this receipt point prior to the extension, the incremental rate shall be discounted to zero for the remaining term of their agreement while those customers that are now using this point and the new facilities will be paying a just and reasonable incremental rate for the use of these facilities.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Natural Gas Pipeline Company of America; Notice of Proposed Change in FERC Gas Tariff

November 3, 1998.

Take notice that on October 30, 1998, Natural Gas Pipeline Company of America (Natural) tendered for filing as part of its FERC Gas Tariff, Sixth Revised Volume No. 1, Eleventh Revised Sheet No. 22, to be effective December 1, 1998.

Natural states that the filing is submitted pursuant to Section 21 of the General Terms and Conditions of Natural's FERC Gas Tariff, Sixth Revised Volume No. 1 (Section 21), as the eleventh semiannual limited rate filing under Section 4 of the Natural Gas Act and the Rules and Regulations of the Commission promulgated thereunder. The rate adjustments filed for are designed to recover Account No. 858 stranded costs incurred by Natural under contracts for transportation capacity on other pipelines. Costs for any Account No. 858 contracts specifically excluded under Section 21 are not reflected in this filing.

Natural requested specific waivers of Section 21 and the Commission's Regulations, including the requirements of Section 154.63, to the extent necessary to permit Eleventh Revised Sheet No. 22 to become effective December 1, 1998.

Natural states that copies of the filing are being mailed to its customers and interested state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed on or before November 10, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Northern Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

November 3, 1998.

Take notice that on October 28, 1998, pursuant to the Carlton Resolution in Docket No. RP96–347, Northern Natural Gas Company (Northern) has tendered for filing to become part of Northern's FERC Gas Tariff, Fifth Revised Volume No. 1 Tariff Sheet Nos. 263H and 263H.1 to reflect the Sourcers' flow obligation after the Appendix B customers' year 3 election to source or buyout.

Northern states that copies of the filing were served upon Northern's customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP99–117–000]

Northern Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

November 3, 1998.

Take notice that on October 30, 1998, Northern Natural Gas Company (Northern) tendered for filing changes in its FERC Gas Tariff, Fifth Revised Volume No. 1 the following tariff sheets, proposed to be effective January 1, 1999:

First Revised Sheet No. 272
First Revised Sheet No. 273

Northern states that the above-referenced tariff sheets are being filed to revise Northern's Gas Research Institute (GRI) tariff provisions to comply with the Stipulation and Agreement Concerning GRI Funding, dated January 21, 1998 in Docket Nos. RP97–391–000, et al. (GRI Settlement).

Northern further states that copies of the filing have been mailed to each of its customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. CP99–33–000]

Northwest Pipeline Corporation; Notice of Request Under Blanket Authorization

November 3, 1998.

Take notice that on October 23, 1998, Northwest Pipeline Corporation (Northwest), 295 Chipeta Way, Salt Lake City, Utah 84108, filed a request with the Commission in Docket No. CP99–33–000, pursuant to Sections 157.205 and 157.211 of the Commission's Regulations under the Natural Gas Act (NGA) for authorization to construct and operate upgraded facilities at North Selah Meter Station in Yakima County, Washington authorized in blanket certificate issued in Docket No. CP82–433–000, all as more fully set forth in the request on file with the Commission and open to public inspection.

Northwest proposes to upgrade the North Selah Meter Station at the request of Cascade Natural Gas Company (Cascade) for additional delivery capabilities. Northwest states that by installing a 4-inch turbine meter and appurtenances and converting the existing meter to operate as a bypass that the maximum design capacity of the meter station would increase from 2,333 Dth per day at a 200 psig to approximately 5,206 Dth per day at 290 psig. Northwest further states that the total cost of the proposed upgrade of the North Selah Meter Station is estimated to be $41,901, which would be reimbursed by Cascade.

Any person or the Commission's staff may, within 45 days after the Commission has issued this notice, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the

NGA (18 CFR 157.205) a protest to the request. If no protest is filed within the allowed time, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the NGA.

[Docket No. RP99–107–000]

Panhandle Eastern Pipe Line Company; Notice of Proposed Changes in FERC Gas Tariff

November 3, 1998.

Take notice that on October 30, 1998, Panhandle Eastern Pipe Line Company (Panhandle) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the tariff sheets listed on Appendix A to the filing, to become effective December 1, 1998.

Panhandle states that this filing removes the Stranded Transportation Cost Volumetric Surcharge applicable to Rate Schedules IT and EIT for the reconciliation recovery period established in Docket No. RP97–536–000. In accordance with Section 18.13(c)(5) of the GT&C the reconciliation recovery period will terminate on November 30, 1998. Accordingly, Panhandle proposes to remove the 3.00¢ per Dt. Section 18.13 Stranded Transportation Cost Volumetric Surcharge.

Panhandle further states that this filing removes from its currently effective rates the Miscellaneous Stranded Cost Reservation Surcharge applicable to Rate Schedules FT, EFT and LFT and the Miscellaneous Stranded Cost Volumetric Surcharge applicable to Rate Schedule SCT established in a February 12, 1997 Stipulation and Agreement (February 12, 1997 Settlement) in Docket No. RP96–260–000. Accordingly, pursuant to Article I, Section 3(d)(ii) of the February 12, 1997 Settlement Panhandle proposes to remove the $0.02 per Dt. Initial Docket No. RP96–260–000 Settlement Reservation Surcharge applicable to Rate Schedules FT, EFT and LFT and the 0.13¢ per Dt. Initial Docket No. RP96–260–000 Settlement Volumetric Surcharge applicable to Rate Schedule SCT.

Panhandle also states that this filing removes from its currently effective rates the Carryover GSR Settlement Interruptible Rate Component applicable to interruptible transportation service provided under Rate Schedules IT and EIT. The Carryover GSR Settlement Interruptible Rate Component, which was established in Docket No. RP98–27–000, was approved by Commission letter order issued November 28, 1997. In accordance with the Commission's letter order issued November 28, 1997 the GSR Settlement Carryover Period will terminate on November 30, 1998.

Accordingly, Panhandle proposes to remove the 8.44¢ per Dt. Carryover GSR Settlement Interruptible Rate Component applicable to Rate Schedules IT and EIT.

Panhandle states that copies of this filing are being served on all affected customers and applicable state regulatory agencies.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. GT99–4–000]

Tennessee Gas Pipeline Company; Notice of Tariff Filing

November 3, 1998.

Take notice that on October 29, 1998, Tennessee Gas Pipeline Company (Tennessee), filed the following: (1) a Blanket Authorization Agreement among Tennessee, Boston Gas Company ("Boston Gas") and Enron Capital & Trade Resources Corporation ("Enron"); (2) a Blanket Authorization Agreement among Tennessee, Boston Gas and El Paso Energy Marketing Company ("El Paso Marketing"); (3) a Blanket Authorization Agreement among Tennessee, Essex County Gas Company ("Essex") and Enron; (4) a Blanket Authorization Agreement among Tennessee, Essex and El Paso Marketing; (5) First Revised Sheet No. 413 of Tennessee's FERC Gas Tariff, Fifth Revised Volume No. 1 ("Volume No. 1 Tariff"); and (6) Alternate First Revised Sheet No. 413 of Tennessee's Volume No. 1 Tariff.

Tennessee states that the four Blanket Authorization Agreements are being submitted for Commission approval because the Blanket Authorization Agreements contain language which differs from Pro Forma Blanket Authorization Agreement contained in Tennessee's Volume No. 1 Tariff. Tennessee further states that, pursuant to Section 154.112(b) of the Commission's regulations, it is submitting First Revised Sheet No. 413 with an effective date of December 1, 1998. However, Boston Gas and Essex strongly desire that they be able to effectuate the terms of the four Blanket Authorization Agreements by November 1, 1998. Therefore, at their behest, Tennessee is also submitting with this filing Alternate First Revised Sheet No. 413 with an effective date of November 1, 1998 in the event that the Commission approves these customers' deemed request for a waiver of the 30-day notice requirement of the Commission's regulations.

Tennessee submits that the four Blanket Authorization Agreements contain provisions which differ from the Pro Forma Blanket Authorization Agreement in several respects. First, the Blanket Authorization Agreements allow Boston Gas and Essex (the "Contract Holders"), to delegate agency authority to both Enron and El Paso Marketing (the "Blanket Agents"), rather than to a single agent. Second, the Blanket Authorization Agreements allow the Contract Holders to delegate only some of the Contract Holders' service agreements on the Tennessee's system and for specified contract quantities for each agreement. Third, the term provisions of the Blanket Authorization Agreements have been modified to reflect an automatic termination of the Blanket Authorization Agreements on March 31, 1999. Finally, the term provision of the Blanket Authorization Agreements has also been modified to allow any Party to terminate the Blanket Authorization Agreements upon twenty-four hours written notice to the other parties, such termination to be effective upon receipt of the termination notice.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed on or before November 10, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Federal Energy Regulatory Commission

[Docket No. RP99–113–000]

Tennessee Gas Pipeline Company; Notice of Tariff Filing

November 3, 1998.

Take notice that on October 30, 1998, Tennessee Gas Pipeline Company (Tennessee), tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, Second Revised Sheet No. 385, to become effective December 1, 1998.

Tennessee states that this filing proposes to implement a new tariff provision which would allow shippers to "check the appropriate box" on their monthly invoices and submit with their monthly payments voluntary contributions to the Gas Research Institute (GRI). Tennessee further states that the proposed tariff provision is consistent with the Stipulation and Agreement approved by the Commission in Gas Research Institute, 83 FERC (¶ 61,093 (1998)), order on rehearing, 83 FERC (¶ 61,331 (1998)), in which signatory pipelines agreed to be voluntary collection agents for GRI.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Secretary.

[FR Doc. 98–29889 Filed 11–6–98; 8:45 am]

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP98–411–001]

Transcontinental Gas Pipe Line Corporation; Notice of Proposed Changes in FERC Gas Tariff

November 3, 1998.

Take notice on October 29, 1998, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing certain revised tariff sheets to its FERC Gas Tariff, Third Revised Volume No. 1, which tariff sheets are enumerated in the filing. The proposed effective date for the tariff sheets is November 2, 1998.

Transco states that the purpose of the instant filing is to comply with the Commission's letter order issued on October 14, 1998, as modified by the Commission's October 19, 1998 "Notice of Extension of Time," (October 14 Order). The October 14 Order directed Transco to file revised tariff sheets to rectify exceptions found in Transco's September 18, 1998 filing made to comply with the Commission's Order No. 587–H issued July 15, 1998. Specifically, the revised tariff sheets include bumping notice procedures consistent with those in Transco's OFO procedures, and remove the phrase "in advance of each day" from all its Part 284 and Part 157 rate schedules in order to make these rate schedules consistent with the intra-day procedures adopted by Order No. 587–H.

In addition, Transco states that the instant filing contains revised tariff language to clarify that Transco does not propose to limit shippers to one intraday nomination per nomination cycle per contract. Transco further states that no waivers of non-critical daily penalties are required as Transco's tariff contains no non-critical daily penalties that would apply to an interruptible transportation shipper whose scheduled volumes are bumped by a firm intra-day nomination.

Transco requests a waiver of Section 154.203(b) of the Commission's regulations in order that the conforming revisions to Transco's services performed under Part 157 of the Commission's regulations, as described in the filing, may be included in the instant filing.

Transco is serving copies of the instant filing to customers, State Commissions and other interested parties.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public

inspection in the Public Reference Room.

4. Northern Indiana Public Service Company

[Docket No. ER99–301–000]

Take notice that on October 26, 1998, Northern Indiana Public Service Company (Northern Indiana), tendered for filing a Service Agreement pursuant to its Power Sales Tariff with El Paso Energy Marketing Company (EPEM).

Northern Indiana has requested an effective date of September 30, 1998.

Copies of this filing have been sent to EPEM, to the Indiana Utility Regulatory Commission, and to the Indiana Office of Utility Consumer Counselor.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

5. Northern Indiana Public Service Company

[Docket No. ER99–302–000]

Take notice that on October 26, 1998, Northern Indiana Public Service Company (Northern), tendered for filing an executed Standard Transmission Service Agreement for Non-Firm Point-to-Point Transmission Service between Northern Indiana Public Service Company and Statoil Energy Trading, Inc., (SETI).

Under the Transmission Service Agreement, Northern Indiana Public Service Company will provide Point-to-Point Transmission Service to SETI pursuant to the Transmission Service Tariff filed by Northern Indiana Public Service Company in Docket No. OA96–47–000 and allowed to become effective by the Commission.

Northern Indiana Public Service Company has requested that the Service Agreement be allowed to become effective as of October 30, 1998.

Copies of this filing have been sent to the Indiana Utility Regulatory Commission and the Indiana Office of Utility Consumer Counselor.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

6. Northern Indiana Public Service Company

[Docket No. ER99–303–000]

Take notice that on October 26, 1998, Northern Indiana Public Service Company (Northern), tendered for filing an executed Standard Transmission Service Agreement for Non-Firm Point-to-Point Transmission Service between Northern Indiana Public Service Company and Northern States Power Company (Transmission Customer).

Under the Transmission Service Agreement, Northern Indiana Public Service Company will provide Point-to-Point Transmission Service to Transmission Customer pursuant to the Transmission Service Tariff filed by Northern Indiana Public Service Company in Docket No. OA96–47–000 and allowed to become effective by the Commission.

Northern Indiana Public Service Company has requested that the Service Agreement be allowed to become effective as of October 30, 1998.

Copies of this filing have been sent to the Indiana Utility Regulatory Commission and the Indiana Office of Utility Consumer Counselor.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

7. Northern Indiana Public Service Company

[Docket No. ER99–304–000]

Take notice that on October 26, 1998, Northern Indiana Public Service Company, tendered for filing an executed Standard Transmission Service Agreement for Non-Firm Point-to-Point Transmission Service between Northern Indiana Public Service Company and Vitol Gas and Electric L.L.C. (Transmission Customer).

Under the Transmission Service Agreement, Northern Indiana Public Service Company will provide Point-to-Point Transmission Service to Transmission Customer pursuant to the Transmission Service Tariff filed by Northern Indiana Public Service Company in Docket No. OA96–47–000 and allowed to become effective by the Commission.

Northern Indiana Public Service Company has requested that the Service Agreement be allowed to become effective as of October 30, 1998.

Copies of this filing have been sent to the Indiana Utility Regulatory

Commission and the Indiana Office of Utility Consumer Counselor.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

8. Northern Indiana Public Service Company

[Docket No. ER99–305–000]

Take notice that on October 26, 1998, Northern Indiana Public Service Company (Northern Indiana), tendered for filing a Service Agreement pursuant to its Power Sales Tariff with Vitol Gas and Electric L.L.C., (Vitol Gas and Electric).

Northern Indiana has requested an effective date of October 30, 1998.

Copies of this filing have been sent to Vitol Gas and Electric, to the Indiana Utility Regulatory Commission, and to the Indiana Office of Utility Consumer Counselor.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

9. Metropolitan Edison Company and Pennsylvania Electric Company

[Docket No. ER99–307–000]

Take notice that on October 26, 1998, Metropolitan Edison Company and Pennsylvania Electric Company submitted for filing an Electric Generation Supplier Coordination Tariff applicable to persons and/or entities licensed as electric generation suppliers to serve retail electricity customers under the Commonwealth of Pennsylvania's retail choice program.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

10. Ameren Services Company

[Docket No. ER99–308–000]

Take notice that on October 26, 1998, Ameren Services Company (ASC), tendered for filing a Service Agreement for Market Based Rate Power Sales between ASC and St. Joseph Light and Power Company (SJL&P). ASC asserts that the purpose of the Agreement is to permit ASC to make sales of capacity and energy at market based rates to SJL&P pursuant to ASC's Market Based Rate Power Sales Tariff filed in Docket No. ER98–3285–000.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

11. Ameren Services Company

[Docket No. ER99–309–000]

Take notice that on October 26, 1998, Ameren Services Company (ASC), tendered for filing Service Agreements for Non-Firm Point-to-Point Transmission Services between ASC and Florida Light & Power and TransAlta Energy Marketing (U.S.), Inc. ASC asserts that the purpose of the Agreements is to permit ASC to provide transmission service to the parties pursuant to Ameren's Open Access Transmission Tariff filed in Docket No. ER96–677–004.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

12. Ameren Services Company

[Docket No. ER99–310–000]

Take notice that on October 26, 1998, Ameren Services Company (ASC), the transmission provider, tendered for filing Service Agreements for Long-Term Firm Point-to-Point Transmission Services between ASC and Ameren CIPS, Entergy Power Marketing Corporation and Wabash Valley Power Association. ASC asserts that the purpose of the Agreements is to permit ASC to provide transmission service to the parties pursuant to Ameren's Open Access Transmission Tariff filed in Docket No. ER 96–677–004.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

13. Ameren Services Company

[Docket No. ER99–311–000]

Take notice that on October 26, 1998, Ameren Services Company (ASC), tendered for filing Service Agreements for Firm Point-to-Point Transmission Services between ASC and Florida Power & Light, Consumers Energy Company and the Detroit Edison Company referred to collectively as the Michigan Companies, and TransAlta Energy Marketing (U.S.), Inc. ASC asserts that the purpose of the Agreements is to permit ASC to provide transmission service to the parties pursuant to Ameren's Open Access Transmission Tariff filed in Docket No. ER96–677–004.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

14. Ameren Services Company

[Docket No. ER99–312–000]

Take notice that on October 26, 1998, Ameren Services Company (ASC), tendered for filing Service Agreements for Long-Term Firm Point-to-Point Transmission Services between ASC and Entergy Power Marketing Corporation (EPM). ASC asserts that the purpose of the Agreement is to permit ASC to provide transmission service to EPM pursuant to Ameren's Open Access Transmission Tariff filed in Docket No. ER96–677–004.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

15. Northern States Power Company (Minnesota Company) and Northern States Power Company (Wisconsin Company)

[Docket No. ER99–313–000]

Take notice that on October 26, 1998, Northern States Power Company (Minnesota) and Northern States Power Company (Wisconsin) (collectively known as NSP), tendered for filing an Electric Service Agreement between NSP and PG&E Energy Trading & Power LP (Customer). This Electric Service Agreement is an enabling agreement under which NSP may provide to Customer the electric services identified in NSP Operating Companies Electric Services Tariff original Volume No. 4.

NSP requests that this Electric Service Agreement be made effective on September 28, 1998.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

16. Tampa Electric Company

[Docket No. ER99–314–000]

Take notice that on October 26, 1998, Tampa Electric Company (Tampa Electric), tendered for filing a Contract for the Purchase and Sale of Power and Energy (Contract) between Tampa Electric and Virginia Electric and Power Company (VEPCO). The Contract provides for the negotiation of individual transactions in which Tampa Electric will sell power and energy to VEPCO.

Tampa Electric proposes an effective date of October 27, 1998, for the Contract, and therefore requests waiver of the Commission's notice requirement.

Copies of the filing have been served on VEPCO and the Florida Public Service Commission.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

17. New England Power Company

[Docket No. ER99–315–000]

Take notice that on October 26, 1998, New England Power Company (NEP), tendered for filing a Notice of Cancellation for its FERC Rate Schedule No. 439.

NEP requests an effective date for the cancellation of September 1, 1998.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

18. Duke Energy Corporation

[Docket No. ER99–316–000]

Take notice that on October 26, 1998, Duke Power, a division of Duke Energy Corporation (Duke), tendered for filing a Market Rate Service Agreement (the MRSA) between Duke and DTE Energy Trading, Inc., dated as of October 7, 1998. The parties have not engaged in any transactions under the MRSA as of the date of filing.

Duke requests that the MRSA be made effective as of October 7, 1998.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

19. Virginia Electric and Power Company

[Docket No. ER99–317–000]

Take notice that on October 26, 1998, Virginia Electric and Power Company (Virginia Power), tendered for filing a Service Agreement for Firm Point-to-Point Transmission Service with Southern Company Energy Marketing, L.P., under the Open Access Transmission Tariff to Eligible Purchasers dated July 14, 1997. Under the tendered Service Agreement, Virginia Power will provide firm point-to-point service to the Transmission Customer under the rates, terms and conditions of the Open Access Transmission Tariff.

Virginia Power requests an effective date of October 26, 1998, the date of filing the Service Agreement.

Copies of the filing were served upon Southern Company Energy Marketing, L.P., the Virginia State Corporation Commission and the North Carolina Utilities Commission.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

20. Dynegy Power Services, Inc.

[Docket No. ER99–318–000]

Take notice that on October 26, 1998, Dynegy Power Services, Inc., tendered for filing a notice of succession regarding Destec Power Services, Inc., Rate Schedule FERC No. 1, effective June 18, 1998.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

21. Peco Energy Company

[Docket No. ER99–319–000]

Take notice that on October 26, 1998, PECO Energy Company (PECO), filed a Service Agreement dated September 29, 1998 with CL Power Sales Seven, L.L.C. (CL SEVEN), under PECO's FERC Electric Tariff Original Volume No. 1 (Tariff). The Service Agreement adds CL SEVEN as a customer under the Tariff.

PECO requests an effective date of September 29, 1998, for the Service Agreement.

PECO states that copies of this filing have been supplied to CL SEVEN and to the Pennsylvania Public Utility Commission.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

22. PP&L, Inc.

[Docket No. ER99–320–000]

Take notice that on October 26, 1998, PP&L, Inc. (PP&L), filed with the Federal Energy Regulatory Commission a Form of Service Agreement for Sale of Capacity Credits.

PP&L requests an effective date of October 27, 1998, for the Form of Service Agreement For Sale of Capacity.

PP&L states that a copy of this filing has been provided to the Pennsylvania Public Utility Commission and the PJM Office of Interconnection.

Comment date: November 10, 1998, in accordance with Standard Paragraph E at the end of this notice.

23. New York State Electric & Gas Corporation

[Docket No. ER99–321–000]

Take notice that on October 26, 1998, New York State Electric & Gas Corporation (NYSEG), tendered for filing pursuant to Section 205 of the Federal Power Act and Section 35.13 of the Federal Energy Regulatory Commission's (FERC or Commission) Regulations, an amendment to Rate Schedule 72 filed with FERC corresponding to an Agreement with the Municipal Board of the Village of Bath (the Village). The proposed amendment would increase revenues by $40.49 based on the twelve month period ending December 31, 1999.

This rate filing is made pursuant to Section 2 (a) through (c) of Article IV of the December 1, 1977, Facilities Agreement between NYSEG and the Village, filed with FERC. The annual charges for routine operation and maintenance and general expenses, as well as revenue and property taxes are revised based on data taken from NYSEG's Annual Report to the Federal Energy Regulatory Commission (FERC Form 1) for the twelve month period ending December 31, 1997. The revised facilities charge is levied on the cost of the tap facility constructed and owned by NYSEG to connect its 34.5 kV transmission line located in the Village to the Village's Fairview Drive Substation.

NYSEG requests an effective date of January 1, 1999.

Copies of the filing were served upon the Municipal Board of the Village of Bath and the Public Service Commission of the State of New York.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

24. Illinois Power Company

[Docket No. ER99–322–000]

Take notice that on October 26, 1998, Illinois Power Company (Illinois Power), 500 South 27th Street, Decatur, Illinois 62522, tendered for filing a Netting Agreement between Southern Company Energy Marketing, L.P. (Southern) and Illinois Power. The Netting Agreement principally provides that, during each month in which payments for wholesale power services are due, Illinois Power and "Company" will net the amounts owed by each party to the other, such that the only payment to be made will be by the party owing the difference between the two amounts.

Illinois Power has requested an effective date of October 13, 1998.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

25. New York State Electric & Gas Corporation

[Docket No. ER99–323–000]

Take notice that on October 26, 1998, New York State Electric & Gas Corporation (NYSEG), tendered for filing pursuant to Section 205 of the Federal Power Act and Section 35.13 of the Federal Energy Regulatory Commission's (FERC or Commission) Regulations, an amendment to Rate Schedule 117 filed with FERC corresponding to an Agreement with the Delaware County Electric Cooperative (the Cooperative). The proposed amendment would increase revenues by $641.18 based on the twelve month period ending December 31, 1999.

This rate filing is made pursuant to Section 1(c) and Section 3 (a) through (c) of Article IV of the June 1, 1977 Facilities Agreement between NYSEG and the Cooperative, filed with FERC. The annual charges for routine operation and maintenance and general expenses, as well as revenue and property taxes are revised based on data taken from NYSEG's Annual Report to the Federal Energy Regulatory Commission (FERC Form 1) for the twelve month period ending December 31, 1997. The revised facilities charge is levied on the cost of the 34.5 kV tie line from Taylor Road to the Jefferson

Substation, constructed by NYSEG for the sole use of the Cooperative.

NYSEG requests an effective date of January 1, 1999.

Copies of the filing were served upon the Delaware County Electric Cooperative, Inc. and the Public Service Commission of the State of New York.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

26. Leslie H. Everett, Linda Y.H. Cheng, Eric A. Montizambert, Gabriel B. Togneri

[Docket Nos. ID–3145–002, ID–3146–002, ID–3148–002 and ID–3149–002]

Take notice that on October 23, 1998, Pacific Gas and Electric Company filed a Notice of Changes, with respect to the above-captioned dockets, pursuant to 18 CFR 45.5. The changes are as follows:

Leslie H. Everett, PG&E Energy Trading, Secretary

Linda Y.H. Cheng, PG&E Energy Trading, Assistant Secretary

Eric A. Montizambert, PG&E Energy Trading, Assistant Secretary

Gabriel B. Togneri, PG&E Energy Trading, Assistant Treasurer

Comment date: November 23, 1998, in accordance with Standard Paragraph E at the end of this notice.

27. Consolidated Edison Company of New York, Inc.

[Docket No. OA96–138–006]

Take notice that on October 27, 1998, Consolidated Edison Company of New York, Inc. tendered for filing with the Commission its report of refunds made in compliance with the Commission's September 18, 1998 letter order in this proceeding. The letter order approved settlement rates for open access transmission service by Con Edison effective on July 9, 1996.

Comment date: November 27, 1998, in accordance with Standard Paragraph E at the end of this notice.

28. Vulcan/BN Geothermal Power Company (Vulcan Facility)

[Docket No. QF85–199–005]

On October 26, 1998, Vulcan/BN Geothermal Power Company, 302 South 36th Street, Omaha, Nebraska 68131, filed with the Federal Energy Regulatory Commission an application for recertification of a facility as a qualifying small power production facility pursuant to § 292.207(b) and (d)(2) of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The facility was previously self-certified as a qualifying small power production facility in 1985 in Docket No. QF85–199–000. The Commission certified the facility in 1988, in Docket No. QF85–199–001. The facility was self-recertified in Docket Nos. QF85–199–003 and 004. Recertification is being sought to reflect a change in status of the owner of the facility.

Comment date: 30 days after publication of this notice in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

29. Elmore, L.P.

[Docket No. QF86–647–005]

On October 26, 1998, Elmore, L.P., 302 South 36th Street, Omaha, Nebraska 68131, filed with the Federal Energy Regulatory Commission an application for rectification of a facility as a qualifying small power production facility pursuant to § 292.207(b) and (d)(2) of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The facility was previously self-certified as a qualifying small power production facility in 1986, in Docket No. QF86–647–000. The Commission certified the facility in 1988, in Docket No. QF86–647–001. The facility was self-recertified in Docket Nos. QF86–590–002, –003 and –004. Recertification is being sought to reflect a change in status of the owner of the facility.

Comment date: 30 days after publication of this notice in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

30. Del Ranch, L.P.

[Docket No. QF86–727–006]

On October 26, 1998, Del Ranch, L.P., 302 South 36th Street, Omaha, Nebraska 68131, filed with the Federal Energy Regulatory Commission an application for recertification of a facility as a qualifying small power production facility pursuant to § 292.207(b) and (d)(2) of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The facility was previously self-certified as a qualifying small power production facility in 1986 in Docket No. QF86–727–000. The Commission certified the facility in 1988 in Docket No. QF86–727–001. The facility was later self-recertified in Docket No. QF86–727–002 and –005. Recertification is being sought to reflect a change in status of the owner of the facility.

Comment date: 30 days after publication of this notice in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

31. Power Resources, Inc. (PRI Project)

[Docket No. QF86–930–005]

On October 26, 1998, Power Resources, Inc., 302 South 36th Street, Omaha, Nebraska 68131, filed with the Federal Energy Regulatory Commission an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207(b) and (d)(2) of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The Commission previously certified the facility as a qualifying cogeneration facility on October 10, 1986 in Docket No. QF86–930–000 and recertified the facility on March 14, 1989 in Docket No. QF86–930–003. Recertification is being sought to reflect a change in status of the owner of the facility.

Comment date: 30 days after publication of this notice in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

32. Salton Sea Power Generation L.P. (Salton Sea III Facility)

[Docket No. QF86–1043–004]

On October 26, 1998, Salton Sea Power Generation L.P., 302 South 36th Street, Omaha, Nebraska 68131, filed with the Federal Energy Regulatory Commission an application for recertification of a facility as a qualifying small power production facility pursuant to § 292.207(b) and (2) of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The facility was previously self-certified as a qualifying small power production facility in 1986 in Docket No. QF86–1043–000 and again self-certified in Docket Nos. QF86–1043–002 and 003. Recertification is being sought to reflect a change in status of the owner of the facility.

Comment date: 30 days after publication of this notice in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

33. Salton Sea Power Generation L.P. (Salton Sea I Facility)

[Docket No. QF87–511–005]

On October 26, 1998, Salton Sea Power Generation L.P., 302 South 36th Street, Omaha, Nebraska 68131, filed with the Federal Energy Regulatory Commission an application for recertification of a facility as a qualifying small power production facility pursuant to § 292.207(b) and (d)(2) (1998) of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The Facility was previously self-certified as a qualifying small power production facility in 1987 in Docket No. QF87–511–000 and self-recertified in Docket Nos. QF87–511–003 and 004. Recertification is being sought to reflect a change in status of the owner of the facility.

Comment date: 30 days after publication of this notice in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

34. Leathers, L.P.

[Docket No. QF88–543–003]

On October 26, 1998, Leathers, L.P., 302 South 36th Street, Omaha, Nebraska 68131, filed with the Federal Energy Regulatory Commission an application for recertification of a facility as a qualifying small power production facility pursuant to § 292.207(b) and (d)(2) of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The Commission previously certified the facility as a qualifying small power production facility in 1989 in Docket No. QF88–543–000. The facility was self-recertified in Docket Nos. QF88–543–001 and –002. Recertification is being sought to reflect a change in status of the owner of the facility.

Comment date: 30 days after publication of this notice in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

35. Saranac Power Partners L.P.

[Docket No. QF90–114–006]

On October 26, 1998, Saranac Power Partners L.P., 302 South 36th Street, Omaha, Nebraska 68131, filed with the Federal Energy Regulatory Commission an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207(b) and (d)(2) of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The Commission previously certified the facility as a qualifying cogeneration facility on June 5, 1990, in Docket No. QF90–114–000 and recertified the facility in Docket Nos. QF90–114–002. The Facility was self-recertified in Docket Nos. QF90–114–003, –004 and –005. Recertification is being sought to reflect a change in the status of one of the owners of the facility.

Comment date: 30 days after publication of this notice in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

36. Yuma Cogeneration Associates

[Docket No. QF90–143–003]

On October 26, 1998, Yuma Cogeneration Associates, 302 South 36th Street, Omaha, Nebraska 68131, filed with the Federal Energy Regulatory Commission an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207(b) and (d)(2) of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The Commission previously certified the facility as a qualifying cogeneration facility on January 27, 1992 in Docket No. QF90–143–000 and recertified the facility on November 10, 1993 in Docket No. QF90–143–001. Recertification is being sought to reflect a change in the status of one of the owners of the facility.

Comment date: 30 days after publication of this notice in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

37. Salton Sea Power Generation, L.P. Fish Lake Power Company (Salton Sea IV Facility)

[Docket No. QF95–9–002]

On October 26, 1998, Salton Sea Power Generation, L.P., and Fish Lake Power Company, 302 South 36th Street, Suite 400, Omaha, Nebraska 68131, filed with the Federal Energy Regulatory Commission an application for recertification of a facility as a qualifying small power production facility pursuant to § 292.207(b) of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

Notices of qualifying status of a small production facility were previously filed in connection with this facility in Docket Nos. QF95–9–000 and QF95–9–001. Recertification is being sought in contemplation of changes in the ownership of the facility.

Comment date: 30 days after publication of this notice in the **Federal Register**, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of these filings are on file with the Commission and are available for public inspection.

David P. Boergers,

Secretary.

BILLING CODE 6717–01–U

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER99–324–000, et al.]

Wisconsin Electric Power Company, et al.; Electric Rate and Corporate Regulation Filings

October 30, 1998.

Take notice that the following filings have been made with the Commission:

1. Wisconsin Electric Power Company

[Docket No. ER99–324–000]

Take notice that on October 26, 1998, Wisconsin Electric Power Company (Wisconsin Electric), tendered for filing a form of network integration transmission service agreement between itself and its merchant, Wisconsin Electric Power Marketing (WEPM). The agreement updates a similar agreement submitted in Docket No. ER97–4198, which established WEPM as a customer under Wisconsin Energy Corporation Operating Companies' transmission service tariff (FERC Electric Tariff, Original Volume No. 1).

Wisconsin Electric respectfully requests an effective date sixty days after filing. Wisconsin Electric is authorized to state that WEPM joins in the requested effective date.

Copies of the filing have been served on WEPM, the Michigan Public Service Commission, and the Public Service Commission of Wisconsin.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

2. MAC Power Marketing, L.L.C., Minnesota Power, Inc., NRG Power Marketing Inc., Wilson Power & Gas Smart, Inc., First Energy Trading and Power Marketing, Inc., Micah Tech Industries, Inc., Energetix, Inc. and IEP Power Marketing, LLC

[Docket Nos. ER98–575–002, ER99–326–000, ER97–4281–004, ER95–751–015, Docket No. ER95–1295–010, ER98–1221–001, ER97–3556–005, and ER95–802–014]

Take notice that the following informational filings have been made with the Commission and are available for public inspection and copying in the Commission's Public Reference Room:

On October 26, 1998, MAC Power Marketing, L.L.C. filed certain information as required by the Commission's December 16, 1997 order in Docket No. ER98–575–000.

On October 26, 1998, Minnesota Power, Inc. filed certain information as required by the Commission's July 15, 1996 order in Docket No. ER96–1823–000.

On October 26, 1998, NRG Power Marketing Inc. filed certain information as required by the Commission's November 12, 1997 order in Docket No. ER97–4281–000.

On October 26, 1998, Wilson Power & Gas Smart, Inc. filed certain information as required by the Commission's April 25, 1996 order in Docket No. ER95–751–000.

On October 26, 1998, FirstEnergy Trading and Power Marketing, Inc. filed certain information as required by the Commission's September 27, 1996 order in Docket No. ER95–1295–000.

On October 26, 1998, Micah Tech Industries, Inc. filed certain information as required by the Commission's March 19, 1998 order in Docket No. ER98–1221–000.

On October 26, 1998, Energetix, Inc. filed certain information as required by the Commission's September 12, 1997 order in Docket No. ER97–3556–000.

On October 26, 1998, IEP Power Marketing, LLC filed certain information as required by the Commission's March 11, 1995 order in Docket No. ER95–802–000.

3. Eastern Pacific Energy, Eastern Pacific Energy, Zapco Power Marketers, Inc., American Energy Trading, Inc., PanCanadian Energy Services Inc., Bangor Energy Resale, Inc., Indeck-Pepperell Power Associates, Inc., Rochester Gas and Electric Corporation, Westchester RESCO Company, L.P., Florida Power & Light Company, NGE Generation, Inc., Wicor Energy Services, Inc., Global Energy Services, LLC, Burlington Resources Trading, Inc., Global Petroleum Corp. and PS Energy Group, Inc.

[Docket Nos. ER98–1829–002, ER98–1829–003, ER98–689–003, ER97–360–008, ER90–168–039, ER98–459–004, ER96–1635–007, ER99–338–000, ER99–337–000, ER99–336–000, ER99–330–000, ER96–34–012, ER97–1177–006, ER96–3112–008, ER96–359–013, and ER95–266–015]

Take notice that the following informational filings have been made with the Commission and are available for public inspection and copying in the Commission's Public Reference Room:

On October 27, 1998, Eastern Pacific Energy filed certain information for the second and third quarter as required by the Commission's March 25, 1998 order in Docket No. ER98–1829–000.

On October 27, 1998, Zapco Power Marketers, Inc. filed certain information as required by the Commission's December 29, 1998 order in Docket No. ER98–689–000.

On October 27, 1998, American Energy Trading, Inc. filed certain information as required by the Commission's December 5, 1996 letter order in Docket No. ER97–360–000.

On October 27, 1998, PanCanadian Energy Services Inc. filed certain information as required by the Commission's March 20, 1990 order in Docket No. ER90–168–000.

On October 27, 1998, Bangor Energy Resale, Inc. filed certain information as required by the Commission's December 23, 1997 order in Docket No. ER98–459–000.

On October 27, 1998, Indeck-Pepperell Power Associates, Inc. filed certain information as required by the Commission's July 15, 1996 letter order in Docket No. ER96–1635–000.

On October 27, 1998, Rochester Gas and Electric Corporation filed certain information as required by the Commission's September 12, 1997 order in Docket No. ER97–3553–000.

On October 27, 1998, Westchester RESCO Company, L.P. filed certain information as required by the Commission's June 18, 1998 order in Docket No. ER98–3030–000.

On October 27, 1998, Florida Power & Light Company filed certain information as required by the Commission's October 29, 1997 order in Docket No. ER97–3359–000.

On October 27, 1998, NGE Generation, Inc. filed certain information as required by the Commission's June 9, 1997 order in Docket No. ER97–2518–000.

On October 27, 1998, Wicor Energy Services, Inc. filed certain information as required by the Commission's November 9, 1995 letter order in Docket No. ER96–34–000.

On October 27, 1998, Global Energy, Services, LLC filed certain information as required by the Commission's March 12, 1997 letter order in Docket No. ER97–1177–000.

On October 27, 1998, Burlington Resources Trading Inc. filed certain information as required by the Commission's November 14, 1996 letter order in Docket No. ER96–3112–000.

On October 27, 1998, Global Petroleum Corp. filed certain information as required by the Commission's December 20, 1995 letter order in Docket No. ER96–359–000.

On October 27, 1998, PS Energy Group, Inc. filed certain information as required by the Commission's January 18, 1995 letter order in Docket No. ER95–266–000.

4. Indiana Michigan Power Company

[Docket No. ER99–325–000]

Take notice that on October 26, 1998, Indiana Michigan Power Company (I&M), tendered for filing with the Commission a Facilities and Operations Agreement between the City of Sturgis, Michigan (Sturgis), and I&M (Agreement).

I&M requests that the Agreement be made effective as of May 23, 1998, and states that a copy of its filing was served upon Sturgis, the Indiana Utility Regulatory Commission, and the Michigan Public Service Commission.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

5. PJM Interconnection, L.L.C.

[Docket No. ER99–327–000]

Take notice that on October 26, 1998, PJM Interconnection, L.L.C. (PJM), tendered for filing signature pages of parties to the Reliability Assurance Agreement among Load Serving Entities in the PJM Control Area (RAA), and an amended Schedule 17 listing the parties to the RAA.

PJM states that it served a copy of its filing on all parties to the RAA, including each of the parties for which a signature page is being tendered with this filing, and each of the state regulatory commissions within the PJM Control Area.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

6. American Electric Power Service Corporation as Agent for the AEP Operating Companies, Ohio Power Company

[Docket No. ER99–328–000]

Take notice that on October 27, 1998, American Electric Power Service Corporation, as agent for the AEP Operating Companies (AEP), tendered for filing with the Commission executed Service Agreements with each of the following Ohio Municipal Resale Service (MRS) customers of Ohio Power Company: Arcadia, Bloomdale, Carey, Cygnet, Plymouth, Republic, St. Clairsville, Shiloh, Sycamore, Wapakoneta, Wharton, Greenwich, Ohio City, Clyde, Bryan and Deshler, under the Wholesale Market Tariff of the AEP Companies; and that Ohio Power Company (OPCO) tendered for filing with the Commission: (1) a request for waiver of the Commission's fuel adjustment clause regulations to effectuate an agreement between OPCO and the MRS customers governing the remainder of the MRS customers' service contracts with OPCO; and (2) a notice of cancellation of Ohio Power Company's Municipal Resale Electric Tariff MRS, which is on file with the Commission as FERC Rate Schedule OPCO No. 001. AEP requests that each Service Agreement be made effective as of the date following the expiration of each MRS customer's current service contract with OPCO. OPCO requests that the notice of cancellation be made effective January 1, 2000, the day after the latest termination date of OPCO's service contracts with the MRS customers.

AEP states that a copy of its filing was served upon the MRS customers, the Indiana Utility Regulatory Commission, the Public Service Commission of Kentucky, the Michigan Public Service Commission, the Public Utilities Commission of Ohio, the Tennessee Regulatory Authority, the Virginia State Corporation Commission, and the Public Service Commission of West Virginia.

Comment date: November 16, 1998, in accordance with Standard Paragraph E at the end of this notice.

7. Mississippi Power Company

[Docket No. ER99–329–000]

Take notice that on October 27, 1998, Mississippi Power Company and Southern Company Services, Inc., its agent, tendered for filing an amendment to its Service Agreement, pursuant to the Southern Companies Electric Tariff Volume No. 4—Market Based Rate Tariff, with South Mississippi Electric Power Association for the Wellman Delivery Point to Coast Electric Power Association. The amendment relates to wholesale electric service to South Mississippi Electric Power Association.

Copies of the filing were served upon South Mississippi Electric Power Association, the Mississippi Public Service Commission, and the Mississippi Public Utilities Staff.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

8. Northern States Power Company (Minnesota) and Northern States Power Company (Wisconsin)

[Docket No. ER99–331–000]

Take notice that on October 27, 1998, Northern States Power Company (Minnesota) and Northern States Power Company (Wisconsin) (jointly NSP), tendered for filing a Non-Firm Point-to-Point Transmission Service Agreement and a Short-Term Firm Transmission Service Agreement between NSP and UtiliCorp United Inc.

NSP requests that the Commission accept both the agreements effective September 30, 1998, and requests waiver of the Commission's notice requirements in order for the agreements to be accepted for filing on the date requested.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

9. Washington Water Power Company

[Docket No. ER99–332–000]

Take notice that on October 27, 1998, Washington Water Power (WWP), tendered for filing, with the Federal Energy Regulatory Commission pursuant to 18 CFR 35.13, an executed Service Agreement under WWP's FERC Electric Tariff First Revised Volume No. 9, with WPS Energy Services.

WWP requests waiver of the prior notice requirement and requests an effective date of July 9, 1998.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

10. South Carolina Electric & Gas Company

[Docket No. ER99–334–000]

Take notice that on October 27, 1998, South Carolina Electric & Gas Company (SCE&G), submitted service agreements establishing Columbia Energy Power Marketing Corporation (CEPMC), and Merchant Energy Group of the Americas, Inc. (MEGA), as customers under the terms of SCE&G's Negotiated Market Sales Tariff.

SCE&G requests an effective date of one day subsequent to the filing of the service agreements. Accordingly, SCE&G requests waiver of the Commission's notice requirements.

Copies of this filing were served upon CEPMC, MEGA, and the South Carolina Public Service Commission.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

11. Maine Public Service Company

[Docket No. ER99–335–000]

Take notice that on October 27, 1998, Maine Public Service Company (Maine Public), tendered for filing an executed Service Agreement for non-firm point-to-point transmission service under Maine Public's open access transmission tariff with Constellation Power Source, Inc.

Comment date: November 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

12. Commonwealth Electric Company

[Docket No. ES99–5–000]

Take notice that on October 20, 1998, Commonwealth Electric Company filed an application under Section 204 of the Federal Power Act, seeking authorization to issue not more than $80 million of short-term debt during a two year period commencing on the effective authorization date and maturing less than one year after the date of issuance.

Comment date: November 27, 1998, in accordance with Standard Paragraph E at the end of this notice.

13. Northwestern Corporation

[Docket No. ES99–6–000]

Take notice that on October 22, 1998 Northwestern Corporation submitted an application under Section 204 of the Federal Power Act for authorization to issue short-term debt in an aggregate principal amount of not more than $500 million during the period of two years starting with the date of the letter order.

Comment date: November 24, 1998, in accordance with Standard Paragraph E at the end of this notice.

14. Oklahoma Gas and Electric Company

[Docket No. ES99–7–000]

Take notice that on October 26, 1998, Oklahoma Gas and Electric Company filed an application with the Federal Energy Regulatory Commission under Section 204 of the Federal Power Act requesting authorization to issue not more than $400,000,000 of short-term

debt on or before December 31, 2000, with a final maturity no later than December 31, 2001.

Comment date: November 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

15. PECO Energy Company

[Docket No. OA97–440–002]

Take notice that on October 27, 1998, pursuant to the Order on Standards of Conduct, issued by the Federal Energy Regulatory Commission on September 29, 1998, PECO Energy Company (PECO) submitted its compliance filing. PECO identifies all senior transmission/reliability and wholesale merchant function employees, as well as energy management system information its wholesale merchant arm receives.

Comment date: November 27, 1998, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of these filings are on file with the Commission and are available for public inspection.

David P. Boergers,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Application Ready for Environmental Analysis

November 3, 1998.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Application:* Major New License.

b. *Project No.:* P–2004–073.

c. *Date Filed:* September 2, 1997.

d. *Applicant:* Holyoke Water Power Company.

e. *Name of Project:* Holyoke Hydroelectric Project.

f. *Location:* On the Connecticut River in Hampden, Hampshire, and Franklin Counties, Massachusetts.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. §§ 791(a)–825(r).

h. *Applicant Contact:*

William J. Nadeau, Vice President, Holyoke Water Power Company, P.O. Box 270, Hartford, CT 06141–0270, (860) 665–5315.

James J. Kearns, Project Manager, Northeast Utilities Service Company, P.O. Box 270, Hartford, CT 06141–0270, (860) 665–5936.

Catherine E. Shively, Counsel, Public Service Company of New Hampshire, 1000 Elm Street, Manchester, NH 03105, (603) 634–2326.

i. *FERC Contact:* Allan Creamer (202) 219–0365.

j. *Comment Date:* See attached paragraph D10.

k. *Status of Environmental Analysis:* This application has been accepted, and, pursuant to § 4.30(b)(25), is ready for environmental analysis at this time—see attached paragraph D10. The Commission acknowledges that information related to water quality studies in the project's bypassed reach has not been filed. However, the study itself has been completed, and is currently being reviewed by various resource agencies. This information, including agency comments, is expected to be filed by November 15, 1998. The results of the water quality study, as well as any other information asked for during the environmental analysis, will be considered during the preparation of the environmental impact statement once it's been filed with the Commission. The application and additional information is substantially complete, and the environmental analysis will proceed on the issues as set forth in Scoping Document 2 and in the application materials.

l. *Description of Project:* The proposed run-of-river project would consist of the following features: (1) an approximately 1,000-foot-long masonry dam to elevation 97.47 feet National Geodetic Vertical datum, topped with a 3.1-foot-high rubber dam; (2) upstream and downstream fish passage facilities; (3) a 2,290-acre reservoir that extends approximately 25 miles upstream; (4) a three-level canal system adjacent to the river with headgates at the dam; (5) six separate hydroelectric facilities, named Hadley Falls Station, Riverside Station, Boatlick Station, Beebe-Holbrook Units, Skinner Unit and Chemical Units, and except for the Hadley Falls Station which has its intake structure adjacent to the canal headgate structure, the facilities withdraw water from the canal system; (6) a total nameplate capacity of 43,756 kilowatts; (7) transmission line connections; and (8) appurtenant facilities. The estimated average annual generation is about 223,389 megawatt-hours.

m. *Purpose of Project:* The power generated by the project is used for station service on site and sold to industrial customers in Holyoke, with the remainder transmitted to other utilities for resale outside of Holyoke.

n. *This notice also consists of the following standard paragraphs:* D10.

o. *Available Locations of Application:* A copy of the application, as supplemented, is available for inspection and reproduction at the Commission's Public Reference and Files and Maintenance Branch, located at 888 First Street, N.E., Room 2A–1, Washington, D.C. 20426, or by calling (202) 208–2326. A copy is also available for inspection and reproduction at Holyoke Water Power Company, 1 Canal Street, Holyoke, Massachusetts 01040, (413) 536–9428.

D10. Filing and Service of Responsive Documents—The application is ready for environmental analysis at this time, and the Commission is requesting comments, reply comments, recommendations, terms and conditions, and prescriptions.

The Commission directs, pursuant to Section 4.34(b) of the Regulations (see Order No. 533 issued May 8, 1991, 56 FR 23108, May 20, 1991) that all comments, recommendations, terms and conditions and prescriptions concerning the application be filed with the Commission within 60 days from the issuance date of this notice. All reply comments must be filed with the Commission within 105 days from the date of this notice.

Anyone may obtain an extension of time for these deadlines from the Commission only upon a showing of good cause or extraordinary circumstances in accordance with 18 CFR 385.2008.

All filings must (1) bear in all capital letters the title "COMMENTS", "REPLY COMMENTS", "RECOMMENDATIONS", "TERMS AND CONDITIONS", or "PRESCRIPTIONS"; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person submitting the filing; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. An additional copy must be sent to Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, at the above address. Each filing must be accompanied by proof of service on all persons listed on the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b), and 385.2010.

David P. Boergers,

Secretary.

[FR Doc. 98–29883 Filed 11–6–98; 8:45 am]

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice Application for Non-Project Use of Project Lands and Waters

November 3, 1998.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Application:* Non-Project Use of Project Lands and Waters.

b. *Project Name:* Catawba-Wateree Project.

c. *Project No.:* FERC Project No. 2232–375.

d. *Dote Filed:* October 1, 1998.

e. *Applicant:* Duke Energy Corporation.

f. *Location:* Iredell County, North Carolina on Lake Norman.

g. *Filed pursuant to:* Federal Power Act, 16 U.S.C. § 791(a)–825(r).

h. *Applicant Contact:* Mr. E.M. Oakley, Duke Energy Corporation, P.O. Box 1006 (EC12Y), Charlotte, NC 28201–1006, (704) 382–5778.

i. *FERC Contact:* Brian Romanek, (202) 219–3076.

j. *Comment Date:* December 12, 1998.

k. *Description of the filing:* Duke Energy Corporation proposes to lease to the Pointe on Lake Norman, LLC (The Pointe) four parcels containing a total of 25.2516 acres of project land for the construction of twenty four commercial/residential marinas with a total of 558 boat slips. The marinas would provide access to the reservoir for residents of The Pointe Subdivision. Constructing the marinas would require the dredging of 121,911 cubic yards of material and installing 9,486 linear feet of rip rap for stabilization of shoreline areas. An approximately 500-foot-long, 24-inch-diameter irrigation pipe connected to an existing pump station is also proposed to be installed into the lake bottom. The pump station (capable of withdrawing 2,000 gallons per minute) would withdraw water from the Lake to irrigate the golf course.

l. *This notice also consists of the following standard paragraphs:* B, C1, D2.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C1. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

David P. Boergers,

Secretary.

Notice of Competing Application Ready for Environmental Analysis

November 3, 1998.

a. *Type of Application:* Major New License.

b. *Project No.:* P–11607–000.

c. *Date Filed:* August 29, 1997, as amended on January 30, 1998.

d. *Competing Applicant(s):* Holyoke Gas & Electric Department, Ashburnham Municipal Light Plant, and Massachusetts Municipal Wholesale Electric Company.

e. *Name of Project:* Holyoke Hydroelectric Project.

f. *Location:* On the Connecticut River in Hampden, Hampshire, and Franklin Counties, Massachusetts.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. §§ 791(a)–825(r).

h. *Competing Applicant(s) Contact:*

George E. Leary, Manager, Holyoke Gas & Electric Department, 99 Suffolk Street, Holyoke, MA 01040 (413) 536–9311.

Roger W. Bacon, Director, Power Services Division, Mass. Municipal Wholesale Elec. Company, Randall Road, P.O. Box 426, Ludlow, MA 01056, (413) 589–1041

Stanley Herriott, General Manager, Ashburnham Municipal Light Plant, 78 Central Street, P.O. Box 823, Ashburnham, MA 01430, (508) 827–4423.

i. *FERC Contact:* Allan Creamer (202) 219–0365.

j. *Comment Date:* See attached paragraph D10.

k. *Status of Environmental Analysis:* This application, as amended, has been accepted, and, pursuant to § 4.30(b)(25), is ready for environmental at this time—see attached paragraph D10. The Commission acknowledges that information related to water quality studies in the project's bypassed reach has not been filed. However, the study itself has been completed, and is currently being reviewed by various resource agencies. This information, including agency comments, is expected to be filed by November 15, 1998. The results of the water quality study, as well as any other information asked for

during the environmental analysis, will be considered during the preparation of the environmental impact statement once it's been filed with the Commission. The application and additional information is substantially complete, and the environmental analysis will proceed on the issues as set forth in Scoping Document 2 and in the application materials.

l. *Description of Project:* The proposed run-of-river project would consist of the following features: (1) an approximately 1,000-foot-long masonry dam to elevation 97.47 feet National Geodetic Vertical datum, topped with a 3.1-foot-high rubber dam; (2) upstream and downstream fish passage facilities; (3) the Fish Lift Park adjoining the dam; (4) a 2,290-acre reservoir that extends approximately 25 miles upstream; (5) a three-level canal system adjacent to the river with headgates at the dam; (6) six separate hydroelectric facilities, named Hadley Falls Station, Riverside Station, Boatlock Station, Beebe-Holbrook Units, Skinner Unit and Chemical Units, and except for the Hadley Falls Station which has its intake structure adjacent to the canal headgate structure, the facilities withdraw water from the canal system; (7) a total nameplate capacity of 58,756 kilowatts (kW), consisting of the existing 43,756 kW project plus a 15,000 kW expansion at the Hadley Falls Station; (8) transmission line connections; and (9) appurtenant facilities. The estimated average annual generation is about 212,000 megawatt-hours (MWh), which would increase to about 262,750 MWh after completing the expansion in 2006.

m. *Purpose of Project:* The power generated by the project would be used within the Holyoke Gas & Electric Department's distribution system, with a portion sold to the Massachusetts Municipal Wholesale Electric Company.

n. *This notice also consists of the following standard paragraphs:* D10.

o. *Available Locations of Application:* A copy of the application, as amended and supplemented, is available for inspection and reproduction at the Commission's Public Reference and Files and Maintenance Branch, located at 888 First Street, N.E., Room 2A–1, Washington, D.C. 20426, or by calling (202) 208–2326. Copies are also available for inspection and reproduction at the Holyoke Gas & Electric Department, 99 Suffolk Street, Holyoke, Massachusetts, 01040.

D10. Filing and Service of Responsive Documents—The application is ready for environmental analysis at this time, and the Commission is requesting comments, reply comments, recommendations, terms and conditions, and prescriptions.

The Commission directs, pursuant to Section 4.34(b) of the Regulations (see Order No. 533 issued May 8, 1991, 56 FR 23108, May 20, 1991) that all comments, recommendations, terms and conditions and prescriptions concerning the application be filed with the Commission within 60 days from the issuance date of this notice. All reply comments must be filed with the Commission within 105 days from the date of this notice.

Anyone may obtain an extension of time for these deadlines from the Commission only upon a showing of good cause or extraordinary circumstances in accordance with 18 CFR 385.2008.

All filings must (1) bear in all capital letters the title "COMMENTS", "REPLY COMMENTS", "RECOMMENDATIONS," "TERMS AND CONDITIONS," or "PRESCRIPTIONS;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person submitting the filing; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. An additional copy must be sent to Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, at the above address. Each filing must be accompanied by proof of service on all persons listed on the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b), and 385.2010.

David P. Boergers,

Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL–6186–7]

Notice of Availability of Draft RCRA Waste Minimization PBT Chemical List

AGENCY: Environmental Protection Agency.

ACTION: Notice of data availability.

SUMMARY: Today's notice makes available for public comment a list of 53 persistent, bioaccumulative, and toxic (PBT) chemicals and chemical categories which may be found in hazardous wastes regulated under the Resource Conservation and Recovery Act (RCRA). This notice responds to States, industry organizations, environmental groups, and individuals who commented on the EPA's national RCRA waste minimization policy, and it will be used to promote voluntary waste minimization efforts which reduce the generation of PBT chemicals found in RCRA hazardous waste by at least half by the year 2005.

EPA requests comment on today's RCRA Waste Minimization PBT Chemical List (also referred to as the RCRA PBT List) and the methodology used to develop today's List. EPA is not seeking comment on the Waste Minimization Prioritization Tool (WMPT), which is discussed in today's notice, because the Agency has sought extensive public review and comment on the WMPT in a previous notice. Particular issues for comment are identified in the discussion that follows.

EPA will publish a final RCRA PBT List in 1999. This notice and the final RCRA PBT List are a significant component of an overall PBT strategy being developed by Agency. The overall strategy will encompass the PBT priorities and programs identified by other EPA offices, particularly those that cannot be addressed by single media controls and approaches.

DATES: Please submit written comments by January 8, 1999 to the address below.

TO OBTAIN COPIES: Copies of the draft list and all documents cited in this notice can be obtained by calling the RCRA/Superfund/CERCLA Hotline at (800) 424–9346, TDD (800) 553–7672 (hearing impaired), or (703) 412–9810 in the Washington, DC metropolitan area, from 9:00 a.m. until 6:00 p.m. Eastern time.

The draft list and supporting documents are also available in electronic format on the Internet, and can be obtained by accessing:

WWW: http://www.epa.gov/wastemin
FTP: ftp.epa/gov
Login: anonymous
Password: your Internet address

TO SUBMIT COMMENTS: Please send an original and two copies of comments, referencing docket number F–98–MMLP–FFFFF, to: RCRA Docket Information Center, Office of Solid Waste (5305G), U.S. Environmental Protection Agency Headquarters (EPA, HQ), 401 M Street, SW, Washington, DC 20460. Hand deliveries of comments should be made to the Arlington, VA, address provided below. Comments may also be submitted electronically by sending electronic mail through the Internet to: rcra-docket@epamail.epa.gov. Comments in electronic format should also be identified by the docket number F–98–MMLP–FFFFF. All electronic comments must be submitted as an ASCII file that contains no special characters or any form of encryption.

Commenters should not submit electronically any confidential business information (CBI). CBI submissions must be sent under separate cover, and must include an original and two copies. CBI must be addressed to: RCRA CBI Document Control Officer, Office of Solid Waste (5305W), U.S. EPA, 401 M Street SW, Washington, DC 20460.

Public comments (not including CBI) and supporting materials are available for viewing in the RCRA Information Center (RIC), located at Crystal Gateway I, First Floor, 1235 Jefferson Davis Highway, Arlington, VA. The RIC is open from 9 a.m. to 4 p.m., Monday through Friday, excluding federal holidays. To review docket materials, it is recommended that the public make an appointment by calling (703) 603–9230. The public may copy a maximum of 100 pages from any regulatory docket at no charge. Additional copies cost $0.15/page.

FOR FURTHER INFORMATION CONTACT: For further information on waste minimization, specific aspects of this notice, or public meetings regarding this notice, contact the RCRA/Superfund/EPCRA Hotline at the address and telephone numbers cited above, or Newman Smith at the U.S. Environmental Protection Agency, Office of Solid Waste, Waste Minimization Branch, 401 M Street, SW (5302W), Washington, DC 20460; telephone: (703) 308–8757, fax: (703) 308–8433.

SUPPLEMENTARY INFORMATION:

I. Background

A. Why Is EPA Taking This Action?

EPA regulates thousands of chemicals and wastes under its multiple environmental authorities, and has worked with States, the regulated community, environmental groups, and individuals to make significant progress in controlling harmful chemical releases to the environment. Notwithstanding this important progress, recent national and international attention has focused on persistent, bioaccumulative and toxic (PBT) chemicals which can pose long-term problems when released to the environment. Today's notice focuses national attention on identifying ways to reduce the generation of PBT chemicals which may be found in hazardous wastes regulated under RCRA.

Today's notice provides a mechanism for implementing the national waste minimization policy of RCRA—to reduce or eliminate the generation of hazardous waste, wherever feasible, and as expeditiously as possible. This national policy sets a clear preference for source reduction and recycling methods over end-of-pipe waste treatment and disposal methods to reduce releases of harmful chemicals to the environment. In 1988, the General Accounting Office (GAO) encouraged EPA to focus on reducing the toxicity as well as the volume of hazardous waste, and recommended that EPA "establish specific, quantifiable waste minimization goals.[1]"

Congress expanded this national policy in the Pollution Prevention Act of 1990, and in Clean Air Act amendments of 1990. As Congress stated in the Pollution Prevention Act, "there are significant opportunities for industry to reduce or prevent pollution at the source through cost effective changes in production, operation, and raw materials use. Such changes offer industry substantial savings in reduced raw material, pollution control, and liability costs as well as help protect the environment and reduce risks to worker health and safety." The Clean Air Act promotes pollution prevention as a national goal, and includes pollution prevention as an important element in setting and achieving industrial emissions control standards.

EPA recognizes that progress has been made in reducing volumes of hazardous wastes. However, today's notice expands EPA's focus to reducing the toxicity of hazardous wastes, in addition to the volume, by reducing RCRA PBT chemical generation at the source, rather than relying on reducing the volume and/or toxicity of hazardous waste through waste treatment alone. This "PBT chemical" approach, which is now being addressed at the international level, recognizes that small releases of PBT chemicals, even releases that are in compliance with existing regulations, may nevertheless cause a build up of human health or ecological problems over the long term.

Today's notice also responds to extensive comments EPA received from industry organizations, environmental groups, government agencies, and individuals during stakeholder meetings held during 1993 and 1994 to develop RCRA's Waste Minimization National Plan. Six principles for reducing hazardous waste generation on a national level emerged from those discussions:

- Focus on source reduction as the preferred means of environmental management, and recycling as the second preference, over treatment and disposal of hazardous wastes;
- Set environmental priorities based on risk;
- Focus on reducing the chemical composition of hazardous waste, not the volume of hazardous wastes, and carefully consider the interrelationships between hazardous waste reduction and the reduction of toxic releases to air and water;
- Set environmental goals for source reduction and recycling of priority chemicals, and track progress toward these goals. Promote accountability and recognition for regulated companies, government agencies, and other stakeholders involved in the process;
- Provide flexibility to industry and States in the selection of chemical priorities, goals for source reduction and recycling of priority chemicals, and in selecting approaches for achieving source reduction and recycling goals; and
- Involve the public.

As a result of these discussions, EPA published the Waste Minimization National Plan[2] (WMNP), which commits the Agency to implementing a national waste minimization program centered around these principles. Most importantly, the WMNP sets national goals to:

- Reduce, as a nation, the presence of the most persistent, bioaccumulative, and toxic (PBT) chemicals in RCRA hazardous wastes 10% by the year 2000, and at least 50 percent by the year 2005 (from a 1991 baseline);
- Promote source reduction (and recycling where RCRA PBT chemicals can not be reduced at the source) over treatment and disposal technologies; and

[1] New Approach Needed to Manage the Resource Conservation and Recovery Act; p. 57; United States General Accounting Office Report to Congress; July 1988.

[2] Waste Minimization National Plan, US EPA, 1994. EPA530–R–94–045.

• Avoid the transfer of RCRA PBT chemicals across environmental media.

EPA believes today's notice provides a strong foundation for achieving these goals. The next section describes more specifically how EPA, State governments, industry organizations, environmental groups and citizens may participate in achieving these goals.

B. What Are Persistent, Bioaccumulative, and Toxic (PBT) Chemicals, and Why Are They an Environmental Concern?

PBT chemicals exhibit varying degrees of three properties: Persistent (P) chemicals do not readily break down in the environment; bioaccumulative (B) chemicals are not easily metabolized and can accumulate in human or ecological foodchains through consumption or uptake; toxic (T) chemicals may be hazardous to human health or the environment in a variety of ways, depending on the chemical and the organism that is exposed. Examples of toxic effects include cancer and birth defects in humans and reduced populations and altered community structures within ecosystems. Individual chemicals may exhibit none, some, or all of these characteristics. Chemicals which exhibit PBT characteristics, once released to the environment, may present increasing long-term toxic effects to human health and the environment, even when these chemicals are released in small quantities.

RCRA PBT chemicals could be released to the environment from several types of sources, including: Leaks from hazardous waste treatment, storage or disposal units, authorized releases of PBTs in treated hazardous wastes (e.g., combustion emissions or residues which must be treated to levels which minimize threats to human health and the environment prior to land disposal), or the combined effect of *de minimis* releases of PBT chemicals permitted under multiple permitting authorities. Because of the potential risks posed by these chemicals, the international community recognizes the chemicals as a global environmental concern. EPA is creating a priority in its hazardous waste minimization program for these chemicals.

C. How Will EPA and Other Stakeholders Use the RCRA PBT List?

EPA will use the RCRA PBT List to:

• Measure progress toward the national goal of reducing the generation of RCRA PBT chemicals by at least half by the year 2005. EPA will measure progress using data reported to the national Toxics Release Inventory (TRI) and other nationally available data;

• Report national progress on a periodic basis;

• Identify and acknowledge industrial sectors which contribute to national progress; and

• Promote coordinated waste minimization programs at the Federal, State, and local level.

EPA's 1986 Waste Minimization Report to Congress [3] concluded that promoting voluntary (rather than mandatory) waste minimization mechanisms would be the most effective means of reducing the volume and/or toxicity of RCRA regulated hazardous waste stream generation. Therefore, EPA will rely on voluntary activities to promote the reductions of RCRA PBT chemicals in hazardous waste, recognizing that some voluntary activities may ultimately take place in conjunction with a regulatory activity (e.g., voluntarily implementing pollution prevention measures to meet permit compliance requirements).

EPA will use the TRI as its primary source of data to measure and evaluate progress toward the national goal of reducing the presence of PBT chemicals in RCRA hazardous wastes by at least half by 2005. The BRS will be used to provide supplemental information and analysis. As discussed further below, the method for reporting progress is under development, and will build on the method described in today's notice for estimating the presence of PBT chemicals in RCRA hazardous wastes.

EPA is committing to its national RCRA PBT reduction goal to meet the requirements of the Government Performance and Results Act (GPRA). The GPRA sets government-wide requirements to improve performance of government programs by "managing for results" and linking programmatic budgets to performance. EPA believes its effort to reduce long term human health and ecological problems by reducing the generation of RCRA related PBT chemicals at the source is a crucial GPRA goal.

EPA will work with interested States, industry organizations, environmental groups, and citizens to promote a variety of source reduction opportunities and programs which reduce the generation of RCRA PBT chemicals at the source. For example, during informal discussions, some States, companies, citizens, and other interested parties indicated they could use the RCRA PBT List as a guide for setting waste minimization priorities for wastes which are currently treated or disposed. Government agencies could use the List as a starting point to identify industrial sectors or particular chemicals for focusing voluntary pollution prevention technical assistance resources. Industry trade associations or individual companies could use the list for setting waste minimization priorities and reducing waste management costs. Individual organizations or a consortium of organizations could use the RCRA PBT list to develop Project XL proposals in cases where significant reductions in the generation of RCRA PBT chemicals are possible, but regulatory flexibility is needed to achieve the reductions (information on Project XL is available on the Internet at www.epa.gov/projectxl). Citizen groups might use the RCRA PBT list to promote pollution prevention as a preferred environmental solution over waste treatment or disposal at siting hearings or other public comment or waste management forums.

EPA will also report national progress toward meeting national goals publicly, on a periodic basis, to encourage accountability.

D. How Will EPA Measure Progress Toward the National RCRA Hazardous Waste PBT Reduction Goal?

EPA is considering several alternatives for developing a national RCRA hazardous waste PBT chemical reduction measurement method. One of the key factors in developing a measurement method is the selection of an appropriate national database for reporting, storing and retrieving data on PBT chemicals found in RCRA hazardous waste. EPA considered, among others, two widely used national databases, the RCRA hazardous waste Biennial Reporting System (BRS) and the Toxics Release Inventory (TRI), and selected the TRI as the primary database for measuring national PBT chemical reductions in hazardous waste. The TRI is a publicly accepted and widely used source of data on toxic chemicals being used, manufactured, treated, transported, and/or released to the environment. TRI reports information on specific chemicals which may be contained in waste. Using chemical-specific TRI information enables EPA to measure reductions of chemical quantities found in wastes over time. In contrast, the Biennial Reporting System provides information on waste stream volumes, rather than chemical specific data, and will be used for supplemental analysis in cases for chemicals which are on the RCRA PBT List, but which are not reported in the TRI.

[3] Minimization of Hazardous Waste Report to Congress, October 1986, EPA–530–SW–86–033.

The measurement method will include only those facilities which report data to the TRI data, and who are also RCRA hazardous waste generators. EPA will publish and seek public comment on its draft measurement method in 1999.

EPA will submit national interim progress reports as part of its environmental performance reporting under the Government Performance and Results Act. A final national progress report will be submitted for the year 2005.

E. How Will EPA Encourage Progress Toward the National RCRA PBT Reduction Goals?

EPA will work with States, industry, environmental groups and other stakeholders to identify and implement a variety of implementation approaches, including workshops, technical assistance, progress reporting, partnership agreements, and regulatory reinvention and pilot projects, to promote progress toward the national RCRA PBT reduction goal. To encourage stakeholder input, EPA will conduct public meetings to listen to stakeholder comments on the List and on technical and programmatic measures which could be used to reduce the generation of PBT chemicals. Information regarding public meetings can be obtained by contacting Newman Smith by phone at (703) 308–8757, or on the Internet at smith.newman@epa.gov. EPA will combine the efforts of these interested parties into a draft national RCRA PBT reduction implementation strategy in mid-1999. EPA will solicit public comment on the draft strategy and will publish a final implementation strategy later in 1999.

After publication of the final implementation strategy, EPA will continue to work with interested parties to promote and document source reduction and recycling successes, and measure and report progress, as stated above.

F. How is Today's RCRA PBT List Different From Other Chemical Lists?

Today's draft RCRA PBT list differs from other lists, including those used in the RCRA program, because of its purpose and design. Today's draft RCRA PBT list:

• Focuses on reducing RCRA PBT chemicals at the point of generation, before they are stored, transported, treated, recycled, or disposed on the land. Other regulatory lists are often used to set treatment technology standards, or concentration based limits on chemicals after treatment;

• Focuses on long-term human health and ecological problems, rather than more short term or acute human health or ecological effects.

• Will be used as a voluntary guide for identifying national waste minimization priorities and measuring national reduction progress, and may be used flexibly by other government agencies and companies. It is not a regulatory list that must be adhered to by all stakeholders.

The basis for developing the RCRA PBT list is explained in the following sections of this notice.

G. Why Focus on the Reduction of RCRA PBT Wastes at the Point of Hazardous Waste Generation Rather Than After Treatment?

Nearly all of the regulations promulgated under the RCRA program set standards for safe management or cleanup of hazardous wastes after they are generated or managed. To meet these standards, the regulated community has frequently used "end-of-pipe" treatment and control technologies. Significant progress has been made using "end-of-pipe" technologies, even though the costs are significant, and they do not completely eliminate releases of toxic chemicals to the environment.

To address these issues, government agencies and the regulated community have increased their focus on the use of source reduction and recycling measures in place of, or as a supplement to, end-of-pipe technologies to meet or exceed regulatory requirements and to reduce the costs of waste management.

The organizations and individuals involved in the development of the Waste Minimization National Plan strongly urged EPA to promote source reduction and recycling over waste treatment and disposal to reduce or eliminate the potential long term effects of RCRA PBT chemicals which may build up in the environment. They recognized that, even with stringent waste management standards, waste management units may fail, accidents may occur during transport and handling, and *de minimis* authorized releases may, nevertheless, occur. As a result, although many sources of these chemicals may individually be in compliance with hazardous waste and other regulations, RCRA PBT chemicals may continue to be released and build up in the environment. Reducing RCRA PBT chemical generation at the source is a more certain way of reducing or eliminating potential RCRA PBT risks to the environment, while reducing or eliminating the costs of managing wastes.

H. How Will EPA Work With States, Industries, and Other Interested Parties Who Have Different Priorities?

EPA encourages Federal government agencies, States, the regulated community and other organizations to incorporate the priorities contained in today's proposed RCRA PBT list in their current environmental priorities and programs. EPA is aware that some organizations have chemical reduction priorities which differ in varying degrees from today's List. Examples of chemical priority lists from 15 State, tribal and international organizations are in the docket for today's notice. Based on a comparison of these lists with today's draft RCRA PBT List, EPA believes many organizations will find chemicals that are common to their own and today's List.

EPA believes establishing common priorities provides an opportunity for progress toward the national RCRA PBT reduction goal. Therefore, EPA will actively work with States, industry, environmental groups and other interested parties to identify and integrate, to the extent possible, common RCRA PBT reduction priorities and multimedia implementation approaches to promote progress toward the national RCRA PBT chemical reduction goals.

EPA believes States should use flexibility available through the National Environmental Performance Partnership System (NEPPS) to address priorities for multi-media, multi-programmatic environmental protection, including the priorities contained in today's List. EPA has included a goal, similar to the WMNP goal, as a Core Performance Measure in the NEPPS program. This goal seeks to "decrease the quantity of waste generated, decrease the toxicity of waste generated, and increase recycling of wastes.

II. Waste Minimization Prioritization Tool Revisions and Information Stewardship

A. What is the Waste Minimization Prioritization Tool? When and How Was it Revised?

The Waste Minimization Prioritization Tool (WMPT), a Windows-based chemical hazard screening tool developed by EPA, generates relative rankings of chemicals based on their potential to cause chronic human health and ecological problems. The WMPT generates rankings based on four sets of chemical properties, including: Chemical persistence, bioaccumulation potential, chronic human and ecological toxicity, and chemical mass. The last property,

chemical mass, is an optional variable that can be used at the user's discretion to generate rankings.

This section outlines the process EPA used to seek public review of the WMPT, an outline of comments received, and a summary of the changes made to the WMPT in response to the comments. EPA used WMPT rankings based on the first three of the four properties noted above as input to the development of the RCRA PBT List. The reasons for this are described in the following sections.

EPA released Beta Version 1.0 of the WMPT software [4] and the accompanying User's Guide [5] for public comment on June 23, 1997.[6] In addition to the public comments received in the docket, EPA received comments from several other sources during the public comment period, including: peer review comments obtained from technical experts in industry, environmental groups, and states during a focus group meeting in September 1997; comments from an intra-Agency technical workgroup that reviewed the WMPT as a means of identifying "PBT" chemicals; and comments from a WMPT pilot project conducted by EPA Region 9 in the Santa Clara Valley, California. Comments were received on many facets of the WMPT. EPA received a variety of comments, including recommendations to:

- Modify the weighting and aggregation of persistence, bioaccumulation, human toxicity, and ecological toxicity scores in the WMPT.
- Modify the WMPT to better represent actual risk, as opposed to hazard.
- Revise the data quality hierarchies for persistence and bioaccumulation data to place preference on measured data (e.g., data gathered in laboratory tests and field studies) rather than predicted data (i.e., data derived from predictive models).
- Improve the quality of data that are used as the basis for scoring by updating existing Agency data sources (e.g., the Integrated Risk Information System) and by incorporating new sources of data currently available to EPA or obtainable from non-EPA sources.
- Provide the rationale behind the "fenceline values" (i.e., thresholds) that separate low, medium, and high scores.
- Score metals based on bioavailability rather than environmental persistence.
- Modify the persistence scoring approach to consider partitioning to media other than water (e.g., to air).
- Modify the current low/medium/high "binning" approach to include more than three bins and better discriminate among chemicals in scoring.
- Provide a better indication of the uncertainty associated with chemical values and scores by providing additional information on the sources of data used in the WMPT and on the quality of the data.
- Complete a peer review of the WMPT.
- Provide a process for modifying data values and scores in the WMPT as new data become available.

An intra-Agency WMPT Workgroup was established to review the comments and provide recommendations on changes to the WMPT. With the purpose in mind of preparing chemical rankings for development of the RCRA PBT List, the Workgroup focused on addressing technical and scientific comments that would potentially affect RCRA PBT chemical scores. Comments that would not affect RCRA PBT chemical scores (e.g., comments recommending improving the user-friendliness of the Tool and User's Guide) were deferred until a later time.

EPA considered the comments and recommendations. As a result, the following changes were made to the WMPT:

- For each chemical, the higher of the human health and ecological concern scores (previously referred to as human health and ecological risk potential scores) was used to indicate overall concern for the purpose of developing the RCRA PBT List, rather than adding the two scores together.
- Measured data were given preference over predicted data in deriving persistence and bioaccumulation scores. Adjustments in data preferences were made in scoring bioaccumulation potential, (i.e., bioaccumulation factors were given preference over bioconcentration factors, and the log of the octanol-water partition coefficient was no longer used).
- New persistence, bioaccumulation, human toxicity, and ecological toxicity data (which meet our data quality standards) from a number of sources were included in the WMPT.
- The fenceline values separating low, medium, and high scores for persistence, bioaccumulation, and toxicity were better documented; in some cases, the fenceline values were recalculated.
- A multimedia partitioning model was used to estimate the partitioning of chemicals to air, water, soils, and sediments and to calculate overall environmental persistence, rather than estimating persistence in surface water alone.
- Data transparency was improved by better documenting data sources and indicating the preference levels for the underlying data used for scoring; some data that could not be sufficiently documented for the purpose of the WMPT were removed.

The comments received and EPA's responses are discussed in detail in the Waste Minimization Prioritization Tool Comment Response Document for the RCRA Waste Minimization PBT Chemical List Docket (referred to as the WMPT Comment Response Document below). This document is available in RCRA docket #F–98–MMLP–FFFFF and at EPA's Internet home page at *www.epa.gov/wastemin.*

After making the changes to the WMPT outlined above, EPA prepared spreadsheets containing revised data and scoring information. This information was used as input for developing the RCRA PBT List. As a result of the expanded and improved data used in the WMPT, approximately 2,900 chemicals receive human health or ecological concern scores, compared with approximately 1,800 chemicals in the beta version of the WMPT. Of the 2,900 chemicals, 122 chemicals score from 7 to 9 (i.e., relatively high) for human health concern and 666 score from 7 to 9 for ecological concern. Some score from 7 to 9 for both criteria. Altogether, 681 chemicals score from 7 to 9 for one or both of the two scores.

EPA has placed in the docket (*F–98–MMLP–FFFFF) a document titled Waste Minimization Prioritization Tool Spreadsheet Document for the RCRA Waste Minimization PBT Chemical List Docket (referred to below as the WMPT Spreadsheet Document) that: (1) explains changes made to the WMPT as a result of the public and peer review processes, and (2) displays spreadsheets and scoring information for 1,300 chemicals which received a score of 6 or above for human health or ecological concern. This document is also available at EPA's Internet home page at *www.epa.gov/wastemin.*

Information on the approximately 3,900 chemicals that scored from 3 to 5 or that are unscored is not included in the docket, since these chemicals did not appear to be appropriate candidates for the RCRA PBT List. Information on these chemicals will be provided in a future version of the WMPT.

[4] EPA530–C–97–003.

[5] Waste Minimization Prioritization Tool (Beta Test Version 1.0): User's Guide and System Documentation (EPA530–R–97–019).

[6] 62 FR 33868.

The WMPT Comment Response Document and WMPT Spreadsheet Document are included in today's docket to provide the reader with background information on changes made to the WMPT and its use as a foundation for the development of today's draft RCRA PBT List. The WMPT spreadsheets contained in the docket are not intended to support other applications at this time. EPA is not requesting public comment on this information, since the WMPT has already received widespread and comprehensive public review. Additional applications beyond supporting the development of today's draft RCRA PBT List will be discussed when the WMPT is re-released in 1999. That release of the WMPT revisions will include the scoring changes used in today's notice and improvements to the tool's software features.

B. How Will Ensure Stewardship of the Waste Minimization Prioritization Tool and Underlying Scientific Information?

EPA is committed to coordinating the collection of environmental data and to making it available to the public through the Agency's "Reinventing Environmental Information Initiative." In 1997,[7] EPA announced three important information management reforms, which:

- Establish key data standards to improve the value of environmental information, data sharing and integration;
- Provide universal voluntary access to electronic reporting to reduce burdens and improve data quality and timeliness; and
- Implement these data standards and electronic reporting reforms in the Agency's national systems in partnership with the states through the One Stop Program.

Consistent with these principles, EPA commits to maintaining sound scientific information as a foundation for reducing RCRA PBT generation. The EPA has taken measures to practice principles of information stewardship in the development of today's draft RCRA PBT List by:

- Identifying the most up to date and documented information that is readily available;
- Excluding undocumented scientific information;
- Seeking expert advice to make assumptions, assess data quality and weigh contradictory information;
- Making information about data sources, data quality, assumptions publicly known;
- Inviting public review and comment on the data used; and
- Making appropriate adjustments to information.

The Office of Solid Waste intends to follow these principles of information stewardship to ensure the integrity of data used in the Waste Minimization Prioritization Tool. As noted above, EPA will release an updated, user-friendly version of the WMPT in 1999, and will discuss how best to maintain stewardship of this tool and the underlying data with interested organizations and individuals at that time.

III. Development of Today's Draft RCRA PBT List

The Agency followed several steps to develop today's draft RCRA Waste Minimization PBT Chemical List (referred to as the RCRA PBT List below). Each of these steps is discussed in more detail below.

A. How Were Initial Condidates for the RCRA PBT List Identified?

The first step in developing today's draft RCRA PBT List was to assemble an initial list of candidate chemicals for further examination. EPA drew from two sources to establish this initial candidate chemical list: (1) The Waste Minimization Prioritization Tool discussed above, and (2) a composite list of PBT chemicals identified as priorities by other EPA program offices. This step is discussed below, and is described in the Chemical Screening Report for the RCRA PBT List Docket (referred to below as the Screening Report), which is located in RCRA docket number F–98–MMLP–FFFFF.

1. Candidates From the Waste Minimization Prioritization Tool

EPA selected as candidates from the WMPT those chemicals which scored 7 or higher (on a scale of 3–9) for either human health concern or ecological concern. A total of 681 chemicals scored in the WMPT met this criterion. EPA then grouped certain polycyclic aromatic hydrocarbons into a single polycyclic aromatic hydrocarbons category, and grouped individually listed polychlorinated biphenyls with the existing polychlorinated biphenyls category, resulting in a total of 660 candidate chemicals and chemical groups.

EPA selected the cut-off score of 7 for human health or ecological concern in order to ensure that chemical candidates represent at least moderately high concern for PBT. In order to attain a score of 7, a chemical must receive the highest WMPT score for at least two of the three factors (P, B and T) or the highest score for one factor and moderate scores for the other two factors. EPA believes that a higher cut-off score would be overly restrictive, eliminating from further consideration many chemicals of significant RCRA PBT concern, while a lower cut-off score would be unnecessarily expansive, drawing in many chemicals which would not represent a sufficiently high level of RCRA PBT concern for this national PBT waste minimization effort.

2. PBT Priorities Identified by Other EPA Programs

In addition to drawing candidate chemicals from the WMPT, EPA considered PBT chemical priorities identified by other EPA programs through internal PBT coordination efforts. This list of 34 chemicals included 18 chemicals which scored below 7 for human health or ecological concern in the WMPT, and 16 chemicals that were either not included in the WMPT, or were included, but were not scored because there were insufficient data. These chemicals were included in the candidate pool for development of the RCRA PBT List to determine the extent to which they may also be a RCRA PBT waste minimization candidate. Including these 34 chemicals in the candidate pool brought the total number of candidate chemicals and chemical groups to 694.

B. What Inclusion/Elimination Criteria Were First Applied to the Condidate Chemicals?

After assembling the initial candidate chemical list, EPA eliminated chemicals that would not be good candidates for RCRA waste minimization efforts because they are unlikely to be present in RCRA hazardous waste in significant quantities, or are present, but are not highly toxic. Three criteria were used to screen out these chemicals: pesticides which are banned from production and use; chemicals with zero reported quantities in waste; and chemicals with low WMPT toxicity scores. This step is summarized below, and is described in detail in the Screening Report.

1. Banned Pesticides

EPA first eliminated those chemicals that are pesticides banned from use in the United States and are not known to have other, non-pesticidal sources or uses. This screen eliminated 28 chemicals from further consideration, including a number of well-known PBT chemical priorities such as DDT. EPA

[7] Administrator Carol Browner and Deputy Administrator Fred Hansen. EPA Common Sense Initiative Meeting. July 21, 1997.

did not eliminate from further consideration pesticides that are "severely restricted," but not banned in the U.S.

2. Chemicals Not Present in RCRA Wastes

EPA also eliminated from further consideration chemicals that are not likely to be found in RCRA hazardous waste, based on quantities reported in the Agency's Toxics Release Inventory (TRI) database [8] and the National Hazardous Waste Constituent Survey (NHWCS).[9] Chemical quantities reported in the TRI were adjusted to estimate quantities present in hazardous waste streams by: including only TRI reporters who had RCRA ID numbers; in the case of underground injected wastes, including only TRI reporters with RCRA ID numbers who also had RCRA UIC (Underground Injection [well] Code) ID numbers; and excluding air and water releases from TRI production-related wastes. This screen eliminated 510 candidate chemicals, leaving 156 chemicals to be considered further in developing the RCRA waste minimization list. Some highly PBT chemicals were eliminated in this step (e.g., dioxin) because they are generated in very small quantities, which are not reported in the TRI. These were flagged and re-examined in the last step, described below in Section E.

3. Chemicals With Low Toxicity

Finally, EPA checked to ensure that none of the 156 chemicals passing the above screens became a candidate based on high P and/or B scores, but had a low score for human health or ecological toxicity. The rationale for this screen was that, even though some chemicals may persist or bioaccumulate in the environment, they should not be a candidate for the national RCRA PBT List if the chemical is not likely to be at least moderately toxic in the environment. None of the 156 candidate chemicals had low toxicity scores.

C. How Were the Remaining Candidate Chemicals Ranked?

To identify the best candidate chemicals for RCRA source reduction and recycling efforts, EPA developed four "primary" criteria for ranking the remaining chemicals. These criteria included: (1) Each chemical's PBT score from the WMPT; (2) chemical quantity and prevalence (or frequency of occurrence) in hazardous waste; (3) evidence that the chemical is present in the environment, particularly at levels of concern; and (4) the degree to which the chemical is a concern to the RCRA program.

Ranking the candidate chemicals was completed by: Summing subcriteria scores within each of the four primary criteria discussed above; converting the scores for each primary criterion to a 25 point scale (i.e., the Agency gave equal weight to the four primary criteria); summing scores for each chemical; and arranging the chemicals in rank order on a scale of 1–100. The individual subcriteria were scored on a 0, 1, 2, 3 scale (except where noted). The values on this scale were assigned to different ranges of data values by examining the underlying data distributions and using natural breaks in the distributions or creating comparably sized groups. The process used to score and rank chemicals in this step is summarized below and is described in detail in the Chemical Ranking Report for the RCRA PBT List Docket (referred to below as the Ranking Report), located in RCRA docket number F–98–MMLP–FFFFF.

1. PBT Scores

In this step, each candidate chemical was scored based on the higher of its WMPT human or ecological concern scores. The scoring approach is provided in Table 1 below. Each chemical with a WMPT score was assigned a subcriterion score from 0–3. Chemicals not scored in the WMPT were ranked by summing and normalizing scores for the remaining three primary criteria, to compensate for the missing WMPT score.

TABLE 1.—PBT CHARACTERISTICS SCORING

PBT characteristics subcriterion	Subcriterion score
Higher of WMPT human health and ecological concern scores equals 9	3
Higher of WMPT human health and ecological concern scores equals 8	2
Higher of WMPT human health and ecological concern scores equals 7	1
WMPT human health and ecological concern scores are both less than 7	0

2. Quantity and Prevalence

The Agency believes that RCRA PBT chemicals which occur in greater quantities, or are more prevalent, in hazardous waste should be given a higher national priority for RCRA waste minimization than other PBT chemicals. Therefore, EPA assigned higher scores to chemicals with greater quantity, or prevalence, in hazardous waste.

EPA used TRI and NHWCS data to determine chemical quantities in waste and used Biennial Reporting System (BRS) data [10] to determine waste stream quantities associated with each chemical. EPA also used TRI, NHWCS, and BRS data to determine the number of facilities generating or managing each chemical in hazardous waste.

TRI quantity and prevalence data were adjusted to identify and estimate chemical quantities and prevalence in RCRA hazardous waste by: (1) Including only TRI reporters who had RCRA ID numbers; (2) in the case of underground injected wastes, including only TRI reporters with RCRA ID numbers who also had RCRA UIC ID numbers; and (3) excluding air and water releases from TRI production-related waste. NHWCS quantity and prevalence data were used only where TRI quantity and prevalence data were unavailable. To estimate the quantities of BRS waste streams and number of generators associated with particular chemicals, EPA used the RCRA Chemical-Waste Code Crosswalk,[11] which identifies hazardous waste codes that may be associated with particular chemicals.

The TRI reports quantity information on both metals and metal compounds. The quantity information reported for a metal compound only includes the metal component of the compound. In keeping with this approach for metal reporting, EPA added together the quantities reported in TRI as metals and metal compounds.

The TRI/NHWCS score and the BRS score were weighted equally (i.e., were added together and divided by two) in deriving both the quantity and prevalence subcriteria scores. If the BRS score was missing for a chemical, the TRI/NHWCS score was used as the quantity or prevalence subscriterion score. The quantity subcriterion score was added to the prevalence subcriterion score in deriving the

[11] The RCRA Chemical-Waste Code Crosswalk (EPA530–D–97–005) is from the beta version of the WMPT; it is included in RCRA Docket #F–98–MMLP–FFFFF. Chemicals not listed in the crosswalk were not evaluated on the BRS-based criteria.

quantity/prevalence criterion score for each chemical. The scoring for quantity and prevalence is presented in Table 2 below.

TABLE 2.—QUANTITY AND PREVALENCE SCORING

Quantity/prevalence subcriterion	Value range	Subcriterion score
TRI chemical quantity (pounds/yr)	Greater than 10,000,000	3
	1,000,000–10,000,000	2
	1–1,000,000	1
	Less than 1	0
NHWCS chemical quantity (pounds/yr)	Greater than 1,000,000	3
	100,000–1,000,000	2
	1–100,000	1
	Less than 1	0
BRS waste stream quantity (tons/yr)	Greater than 100,000,000	3
	10,000,000–100,000,000	2
	1–10,000,000	1
	Less than 1	0
TRI number of generators	More than 99	3
	10–99	2
	1–9	1
	0	0
NHWCS number of handlers [12]	More than 10	3
	5–10	2
	1–4	1
	0	0
BRS number of generators	More than 9,999	3
	1,000–9,999	2
	1–999	1
	0	0

3. Environmental Presence[12]

The Agency believes that PBT chemicals which are detected in the environment more frequently than other chemicals should be given higher priority for reduction through source reduction and recycling. EPA ranked each chemical's "presence in the environment" using measurement indicators contained in the following three national databases: (1) EPA's Fish Advisory Database [13] (EPA used the most current year of fish advisory data in the U.S.—1997); (2) EPA's National Sediment Inventory [14] (EPA used data on sediment contamination in the U.S. for all years contained in the database; and (3) the Agency for Toxic Substances and Disease Registry's Hazdat Database [15] (EPA used data on chemicals found in the toxic cleanup sites identified on the EPA's Superfund National Priority List (NPL) covered under the Comprehensive Environmental Response, Compensation and Liability Act.

Scores were developed using the scoring approach in Table 3 below. Each environmental presence subcriterion was scored from 0–3. The scores for the three subcriteria were weighted equally (in this case being added together) in deriving an environmental presence criterion score for each PBT chemical.

TABLE 3.—ENVIRONMENTAL PRESENCE SCORING

Environmental presence subcriterion	Value range	Subcriterion score
Fish Advisory Database (1997 data)	More than 99 advisories	3
	10–99 advisories	2
	1–9 advisories	1
	No advisories	0
National Sediment Inventory (1980–1993)	More than 999 detections	3
	100–999 detections	2
	1–99 detections	1
	No detections	0
ATSDR HazDat Database (all NPL sites)	More than 499 sites	3
	100–499 sites	2
	1–99 sites	1
	No sites	0

[12] The number of handlers is the number of RCRA treatment, storage, or disposal facilities that managed a chemical, rather than the number of generators of the chemical.

[14] U.S. EPA. 1997. The Incidence and Severity of Sediment Contamination in Surface Waters of the United States; Volume 1: The National Sediment Quality Survey. Office of Science and Technology. Washington, DC. EPA/823/R–97/006.

[15] Agency for Toxic Substances and Disease Registry. 1998. Hazardous Substance Release/Health Effects Database. website: atsdr1.atsdr.cdc.gov/8080/hazdat/html.

EPA used the ATSDR data since no comparable data were readily available from RCRA corrective action sites.

4. RCRA Programmatic Concern

EPA believes PBT chemicals that are of particular concern to the RCRA program should be given higher priority in developing today's draft RCRA PBT List than PBT chemicals identified in the WMPT or other programs that are not a particular concern to the RCRA program. To identify "RCRA-relevant" PBT chemicals, EPA selected the candidate PBT chemicals which are found on one or more regulatory lists used in the RCRA hazardous waste generation, management, and corrective action programs. The scoring scheme for these chemicals is provided in Table 4 below.

EPA used a wider subcriterion scoring range (0–4) for this criterion to reflect the broad range of RCRA programmatic concerns. This wider scoring range was then normalized (i.e., was converted to a 25 point scale) so that the criterion was weighted equally with the other primary criteria.

A score of 4 was assigned to PBT chemicals that: (1) Are capable of forming dense nonaqueous phase liquids (DNAPLs) that make groundwater cleanups particularly difficult; [16] (2) are identified as "difficult to treat" chemicals under the Land Disposal Restrictions (LDR) program; [17] or (3) are targeted for co-regulation under RCRA and the Clean Air Act Section 112 in EPA's proposed maximum achievable control technology (MACT) combustion rule for hazardous waste incinerators, cement kilns or light weight aggregate kilns, or are currently regulated under the RCRA boilers and industrial furnaces (BIF) rule (since chemicals regulated under these rules could potentially be transferred to the air or soil media after combustion).[18, 19]

Chemicals which are not on any of the regulatory lists discussed in the previous paragraph, but are on the Toxicity Characteristic (TC) list (40 CFR 261.24) or the Appendix VII list of chemicals, which is used as the basis for hazardous waste listings (40 CFR part 261), are assigned a score of 3. The Agency has historically taken regulatory actions in the RCRA program based on risk assessments and damage cases involving these chemicals.

If a chemical was not on any of the lists noted above but is regulated under RCRA based on technological standards rather than risk-based standards (i.e, chemicals covered by the Universal Treatment Standards (UTS) list (40 CFR 268.48), it was assigned a score of 2. If a chemical was not on any of the lists noted above, but was on the RCRA P list of acute hazardous waste (40 CFR 261.33), the U list of toxic waste (40 CFR 261.33), the Appendix VIII hazardous waste constituent list (40 CFR part 261), or the Appendix IX ground water monitoring list (40 CFR part 264), the chemical was assigned a score of 1. These chemicals are regulated under RCRA, but are of lesser concern. For instance, Appendix IX chemicals are used to set permit parameters. However, if they are not on the lists mentioned above, are of lesser concern. In addition, although P list chemicals are of concern due to their acute hazards, they are generated infrequently and usually in small quantities.

Chemicals not found on any of the lists discussed above received a 0 score. The scoring of subcriteria for RCRA Programmatic Concern is summarized in Table 4 below.

TABLE 4.—RCRA PROGRAMMATIC CONCERN SCORING

RCRA programmatic concern subcriterion	Subcriterion score
Chemicals contained on any of the following lists: (1) Chemicals that can form dense non-aqueous phase liquids; (2) chemicals identified as "difficult to treat," or (3) chemicals regulated under the MACT rule for hazardous waste incinerators, cement kilns and light weight aggregate kilns, or the RCRA rule for boilers and industrial furnaces	4
Presence on the toxicity characteristic list or the Appendix VII list of chemicals serving as the basis for hazardous waste listings	3
Presence on the land disposal restrictions universal treatment standards list	2
Presence on the RCRA P list of acute hazardous waste, the U list of toxic waste, the Appendix VIII hazardous waste constituent list, or the Appendix IX ground water monitoring list	1
Chemical not present on any of the above RCRA lists	0

The Agency conducted limited sensitivity testing of the ranking methodology by observing changes in the rankings in response to modifying the ranking criteria. Several scenarios were tested, including eliminating each of the primary criteria in turn and eliminating both the RCRA Relevance and Environmental Presence criteria together.

In general, the methodology appeared to be fairly robust in its identification of the top ranking chemicals. Scenarios which alternatively dropped the RCRA Relevance, Quantity/Prevalence, and the PBT Score criteria each displaced roughly 10 chemicals from the top 50. Elimination of the Environmental Presence criterion had less of an impact on the rankings than dropping the other criteria. This indicates that, when one of the four criteria is removed from the ranking method, the remaining criteria and data support the ranking to a substantial degree.

In a more drastic sensitivity scenario, dropping two of the criteria, RCRA Relevance and Environmental Presence, together substantially altered the rankings—30 chemicals in the top 50 were displaced, and several chemicals changed by more than 50 rank positions. These results are not surprising considering the substantial change to the scoring method (half of the criteria are removed). For further information, see the report Revised Chemical Ranking Methodology Testing Results in RCRA docket number F–98–MMLP–FFFFF.

D. What Cutoff Was Applied to the Ranked Chemicals to Obtain the Draft RCRA PBT List?

After ranking the 150 candidate chemicals, EPA selected a cutoff value to identify the "top tier" of chemicals for tracking on a national level. EPA narrowed the candidate list to the 61 chemicals which had a score of 50 points (the half way point on the scoring scale) as a basis for inclusion in the draft RCRA PBT List proposed today. EPA determined that a national list of 50 to 60 chemicals was appropriate, given limited Agency, State, and private resources to reduce and measure these chemicals.

E. What Final Adjustments Were Made to the Draft RCRA PBT List?

As a final step, EPA added and removed certain chemicals from the list for the particular reasons described below. Adding and removing chemicals reduced the draft RCRA PBT List from 61 to 53 chemicals.

1. U.S./Canada Binational Agreement Level 1 Chemicals

EPA added dioxins, furans, and octachlorosytrene to the RCRA PBT List because of their high priority on the "Level 1" list of the U.S./Canada Binational Agreement.[20] Four other Level 1 chemicals were already among the top tier chemicals for the RCRA PBT List.[21] Nine chemicals on the Level 1 list, including eight banned pesticides and alkyl lead, are excluded because they are either no longer produced (e.g., banned pesticides), or are found in very limited quantities in wastes from only a few production processes (e.g., alkyl lead).[22] In either case, these chemicals are not very amenable to reductions through waste minimization. The Binational Agreement and the Level 1 list are available for review in RCRA docket number F–98–MMLP–FFFFF.

2. Chemicals With Low or no PBT Scores

The Agency initially added chemicals identified by other EPA programs to the candidate list to provide a comprehensive starting point in the RCRA PBT List development process. At this final step in the RCRA PBT List development process, six chemicals were removed for the following reasons. Five of the chemicals—tetrachlorethylene, trichlorethylene, methylene chloride, 1,2-dichloroethane, and 1,1,2,2-tetrachloroethane—were removed because their WMPT PBT scores are below 7. Although individual States may wish to pursue reductions in these chemicals, EPA determined they are not among the most highly toxic for a national list. The sixth, silver, was removed because it has no PBT score.

3. PCBs

The Agency removed the PCB chemical group from the RCRA PBT List because production of PCBs is banned in the U.S. and waste minimization opportunities for PCBs in process waste streams are believed to be very limited.

4. Di-n-octyl Phthalate and Butyl Benzyl Phthalate

The Agency previously removed both of these chemicals from the EPCRA Section 313 List of Toxic Chemicals in response to delisting petitions. Consequently, the Agency examined these chemicals more closely to determine whether to continue to include them on the draft RCRA PBT List. The Agency decided to remove di-n-octyl phthalate from the draft RCRA PBT List because data developed in response to that delisting petition indicated that the human and ecological toxicity data were not conclusive. However, EPA has retained butyl benzyl phthalate on the draft RCRA PBT List because the ecological toxicity criteria considered for delisting from the EPCRA list were different than the criteria used in the WMPT for determining high levels of concern for ecological toxicity.

5. Hexachlorocyclohexane Isomers

The Agency removed the alpha, beta, and delta hexachlorocyclohexane isomers and retained the gamma isomer. The gamma isomer is believed to be the predominant PBT isomer in waste streams, and achieving waste minimization for this isomer would result in reductions in the other isomers as well.

IV. EPA's Draft RCRA Waste Minimization PBT Chemical List and Issues for Public Comment

A. Which Chemicals Are Included on the Draft RCRA PBT List?

Table 5 below presents EPA's draft RCRA PBT List. The chemicals are listed in alphabetical order. No rank ordering is intended in this List, and, in fact, the List treats these chemicals as equal environmental priorities. The Chemical Abstract Service Registry Number (CASRN) is also shown, where available.

TABLE 5.—DRAFT RCRA PBT LIST

	CASRN
Dioxins and Furans:	

[20] U.S. EPA. 1997. Great Lakes Binational Toxics Strategy. Great Lakes National Program Office, Chicago, IL. www.epa.gov/grtlakes/p2/bnsintro.html

[21] These four chemicals include hexachlorobenzene, mercury and compounds, PCBs, and benzo(a)pyrene. PCBs were subsequently removed from the proposed RCRA PBT List (see discussion below), and benzo(a)pyrene was included in the category polycyclic aromatic hydrocarbons.

[22] The eight banned pesticides include aldrin, dieldrin, chlordane, DDT, DDD, DDE, toxaphene, and mirex.

TABLE 5.—DRAFT RCRA PBT LIST—Continued

	CASRN
Dioxins (PCDD)	
Furans (PCDF)	
Chlorinated Solvents:	
Chloroform	67–66–3
1,1-Dichloroethane	75–34–3
1,1,1-Trichloroethane	71–55–6
Chlorobenzenes:	
1,2-Dichlorobenzene	95–50–1
1,3-Dichlorobenzene	541–73–1
1,4-Dichlorobenzene	106–46–7
1,2,4-Trichlorobenzene	120–82–1
1,2,4,5-Tetrachlorobenzene	95–94–3
Pentachlorobenzene	608–93–5
Hexachlorobenzene	118–74–1
Other Halogenated Organics:	
4-Bromophenyl phenyl ether	101–55–3
Hexachlorobutadiene	87–68–3
Octachlorostyrene	29082–74–4
Pesticides	
alpha-Endosulfan	959–98–8
beta-Endosulfan	33213–65–9
Heptachlor	76–44–8
Heptachlor epoxide	1024–57–3
gamma-Hexachlorocyclohexane	58–89–9
Methoxychlor	72–43–5
Pentachloronitrobenzene	82–68–8
Pentachlorophenol	87–86–5
2,4,5-Trichlorophenol	95–95–4
Organonitrogens:	
Nitrobenzene	98–95–3
Nonhalogenated Phenolics:	
Phenol	108–95–2
2,4,6-tris-(1,1-Dimethylethyl)phenol	732–26–3
Phthalate esters:	
Bis-(2-ethylhexyl) phthalate	117–81–7
Butylbenzyl phthalate	85–68–7
Dibutyl phthalate	84–74–2
Polycyclic aromatic hydrocarbons**:	
Acenaphthene	83–32–9
Acenapthylene	208–96–8
Anthracene	120–12–7
Benzo(g,h,I)perylene	191–24–2
Fluoranthene	206–44–0
Fluorene	86–73–7
2-Methylnaphthalene	91–57–6
Naphthalene	91–20–3
PAH group (as defined in TRI).	
Phenanthrene	85–01–8
Pyrene	129–00–0
Metals	
Antimony	7440–36–0
Arsenic	7440–38–2
Beryllium	7440–41–7
Cadmium	7440–43–9
Chromium	7440–47–3
Copper	7440–50–8
Lead	7439–92–1
Mercury	7439–97–6
Nickel	7440–02–0
Selenium	7782–49–2
Zinc	7440–66–6
Cyanide	57–12–5

** The Toxics Release Inventory reports some polycyclic aromatic hydrocarbons (PAHs) as a group, and reports other PAHs individually. The 10 individual PAHs listed in this table are not included in the TRI PAH group. See the *Screening Report* for a list of PAHs included in the TRI PAH group.

B. What Issues is EPA Requesting Public Comment On?

The Agency welcomes public comment on any aspect of the methodology used to develop the draft RCRA PBT List, including the data sources, ranking criteria and scoring schemes, the cutoff criteria, and the final adjustments to the List. The Agency also requests comment on the specific issues listed below. The Agency is not requesting comment on the data or methodology used to develop the WMPT, or the scoring results of the WMPT. The WMPT went through a thorough, comprehensive and constructive public review and comment process. EPA has incorporated its response to those comments in the underpinnings of today's notice and therefore does not believe comments regarding the WMPT are generally pertinent to this effort.

Specific issues for comment include:

1. Banned Chemicals

Is it appropriate to eliminate chemicals from consideration for the draft RCRA PBT List because they are no longer used in production or generated in hazardous waste, or are generated in very limited quantities from very few production processes, and therefore are not good candidates for future reductions through waste minimization? Is it appropriate to eliminate banned pesticides, PCBs, and alkyl lead for this reason, as the Agency has done in developing the List?

2. Waste Minimization Feasibility

Should the agency eliminate from consideration PBT chemicals contained in hazardous waste for which there are few feasible waste minimization options available, or should the agency consider these as an incentive to encourage research and development of waste minimization methods for these chemicals?

3. "Non-measurable" Chemicals

The draft RCRA PBT List includes 16 chemicals that were reported in the National Hazardous Waste Constituent Survey but are not reported in the Toxics Release Inventory, and therefore, cannot be easily tracked over time. Is it appropriate to include on the List chemicals for that TRI data, or other annual chemical-specific data, are not readily available for tracking national chemical reduction progress? Are there other reliable national sources of chemical reporting data that could be used to track generation and reductions of these chemicals?

4. Chemicals With Very High P, B, and/or T Values

Should chemicals with very high data values for persistence, bioaccumulation potential, human toxicity, and/or ecological toxicity (e.g., with values at the top end of the data distributions) be considered for addition to the RCRA PBT List, even though TRI data are not available for tracking progress? How would progress be measured for these chemicals?

5. Chemicals With Low Reported Quantities

Several chemicals on the RCRA PBT List are estimated in the National Hazardous Waste Constituent Survey to be generated in quantities of less than 100 pounds per year. The Agency did not use a specific quantity cutoff in developing the RCRA PBT List. Should a quantity cutoff be used? If so, what is the appropriate value for the cutoff? Should different cutoffs be used for chemicals which are the most toxic compared to others which are less toxic? If so, what should those cutoffs be?

6. Priorities Identified by Other Organizations.

Should EPA add to the RCRA PBT List State or other organization's priority chemicals which do not already appear on the List? Among these chemicals, should those with low or no PBT scores (e.g., waste solvents), or those with low or no chemical quantities (e.g., some Level 1 U.S./Canada Binational Agreement chemicals) be included? A list of chemical priorities identified by several States is located in RCRA docket number F–98–MMLP–FFFFF.

7. Including Recycled Wastes in Determining Quantities of RCRA-Relevant Waste Associated with Chemicals

In considering the quantity and prevalence of candidates for the RCRA PBT List (step C.4 above), the Agency included quantities that were recycled in its scoring procedure. Should recycled quantities be included when determining the quantities of chemicals associated with hazardous wastes in developing the RCRA PBT List, or should EPA measure chemicals only at the point of generation?

Dated: October 30, 1998.

Elizabeth A. Cotsworth,

Acting Director, Office of Solid Waste.

BILLING CODE 6560–50–P

FARM CREDIT ADMINISTRATION

Farm Credit Administration Board

Sunshine Act Meeting

AGENCY: Farm Credit Administration.

SUMMARY: Notice is hereby given, pursuant to the Government in the Sunshine Act (5 U.S.C. 552b(e)(3)), of the forthcoming regular meeting of the Farm Credit Administration Board (Board).

DATE AND TIME: The regular meeting of the Board will be held at the offices of the Farm Credit Administration in McLean, Virginia, on November 12, 1998, from 9:00 a.m. until such time as the Board concludes its business.

FOR FURTHER INFORMATION CONTACT: Floyd Fithian, Secretary to the Farm Credit Administration Board, (703) 883–4025, TDD (703) 883–4444.

ADDRESS: Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102–5090.

SUPPLEMENTARY INFORMATION: Parts of this meeting of the Board will be open to the public (limited space available), and parts of this meeting will be closed to the public. In order to increase the accessibility to Board meetings, persons requiring assistance should make arrangements in advance. The matters to be considered at the meeting are:

Open Session

A. Approval of Minutes

—October 8, 1998 (Open and Closed)

B. New Business

1. Regulation

—Balloting and Stockholder Reconsideration Issues (Final) [12 CFR Part 611]

2. Other

—Statement on Regulatory Burden (Notice of Intent; Comment Period Extension)

Closed Session*

C. Report

—OSMO Report

* Session Closed—Exempt pursuant to 5 U.S.C. 552b(c)(8) and (9).

Date: November 5, 1998.

Floyd Fithian,

Secretary, Farm Credit Administration Board.

[FR Doc. 98–30102 Filed 11–5–98; 1:18 pm]

BILLING CODE 6705–01–P

FEDERAL ELECTION COMMISSION

Sunshine Act Notices

AGENCY: Federal Election Commission.

TE & TIME: *Thursday, November 12, 1998 at 10:00 a.m.*

PLACE: 999 E Street, N.W., Washington, D.C. (Ninth Floor).

STATUS: This meeting will be open to the public.

ITEMS TO BE DISCUSSED:

Correction and Approval of Minutes.

Advisory Opinion 1998–22: Leo Smith.

Advisory Opinion 1998–23: Status of Maine Green Party as State Committee.

Administrative Matters.

PERSON TO CONTACT FOR INFORMATION: Mr. Ron Harris, Press Officer; telephone: (202) 694–1220.

Marjorie W. Emmons,

Secretary of the Commission.

[FR Doc. 98–30064 Filed 11–5–98; 12:00 pm]

FEDERAL EMERGENCY MANAGEMENT AGENCY

Project Impact: Building Disaster Resistant Communities

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice of Funds and Grant Availability.

SUMMARY: FEMA gives notice of the availability of $30 million of appropriated grant funds to Project Impact communities and States with Project Impact communities.

DATES: Grant funds are available as of November 9, 1998.

ADDRESSES: Approved communities and States with approved Project Impact communities that have not already received grant application materials should contact: Sylvia Carroll, Federal Emergency Management Agency, 500 C Street, SW., room 350, Washington, DC 20472, 202–646–3503 or (email) sylvia.carroll@fema.gov.

FOR FURTHER INFORMATION CONTACT: Carol Transou, Federal Emergency Management Agency, 500 C Street, SW., room 402, Washington, DC 20472, (202) 646–3701, (telefax)(202) 646–3231, or (email) carol.transou@fema.gov.

SUPPLEMENTARY INFORMATION: Under Public Law 105–65, 111 Stat. 1376, Department of Veterans Affairs and Housing and Urban Development and Independent Agencies Appropriation Act, 1998, we are issuing today a Request for Applications (RFA) to implement a $30 million grant program that is limited to Project Impact communities and to States with Project Impact communities.

Community Grants

The community grant is available to designated Project Impact communities to facilitate the development and implementation of a comprehensive, long-term mitigation strategy through collaboration with private sector and non-profit organizations, and with local, State and Federal government partners. Within this framework, the community grant is to fund prevention projects that result in long-term reductions in property damage as well as contribute to the sustainability of the partnership.

State Grants

The State grant is available to States with a Project Impact community through the FEMA Performance Partnership Agreement/Cooperative Agreement process for activities that directly support Project Impact communities.

Who Is Eligible for Grants?

The community which a State has designated, with FEMA concurrence, as a Project Impact community is eligible for a community grant. Each State with a Project Impact community is eligible for a state grant.

What Are Mitigation Measures?

Mitigation measures generally are those projects and actions that reduce the potential losses to life and property from natural hazard events in a permanent or long-term manner. Communities shall categorize mitigation projects as: mitigation for existing structures; or mitigation of existing utility facilities or systems that are publicly owned and operated on a non-profit basis. Communities shall categorize measures to support mitigation goals as: (1) Adoption of policies or practices for mitigation in existing structures, new development, or redevelopment; (2) Activities that help build or sustain public/private partnerships; (3) Hazard identification and risk assessment; (4) Hazard mitigation planning and development of codes and standards; and (5) Personnel support.

What Is the Process for Applying?

For designated community assistance, communities must submit a grant application package to FEMA. FEMA regions will work with the communities to complete this application package. The community shall submit the application to the FEMA Regional Director by November 6, 1998. The Regional Director or his/her designee can grant an extension of up to 90 days upon receipt of a written justification/request from the community.

For State funding assistance, the State with a Project Impact community must submit a letter or memorandum to the Regional Director indicating its desire for funds to support the Project Impact community and its agreement to convene State-wide support for comprehensive mitigation.

What Criteria Will FEMA Apply to Grant Applications?

For a designated community, we will review and negotiate with the local jurisdiction to determine whether the proposed activities would: (1) reduce the likelihood of future disaster costs under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, and (2) help sustain the community's momentum in broad-based mitigation efforts. Activities the community may pursue are described in the previous section entitled "What are Mitigation Measures."

A State with a Project Impact community must agree to use the funds in direct support of the Project Impact community and to convene statewide support for comprehensive hazard mitigation. For example, a State may use the FEMA funding to support Project Impact communities:

- To fund State activities in direct support of Project Impact communities such as costs associated with logistics and meetings, staff support, and travel costs to meetings with the community or to FEMA Project Impact meetings;
- To fund training costs, including to train State officials supporting Project Impact and to develop training packages for State and local officials;
- To provide mini-grants to Project Impact communities to augment or expedite Project Impact activities;
- To fund travel of local community officials to other communities, State meetings or national conferences at State request to share Project Impact information;
- To fund State costs in information development and dissemination to support Project Impact;
- To fund expert, short-term technical assistance support to Project Impact communities.

Dated: October 29, 1998.

Michael J. Armstrong,

Associate Director, Mitigation Directorate.

BILLING CODE 6718–04–P

FEDERAL MARITIME COMMISSION

[Docket No. 98–19]

Saeid B. Maralan (aka Sam Bustani), World Line Shipping, Inc. d/b/a World Line Shipping and World Line Shipping International Shipping Co. and Atlas World Line, Inc. d/b/a Atlas World Line and Atlas World Line International Shipping Co.—Possible Violations of Sections 8(a)(1), 10(b)(1), 19(a) and 23(a) of the Shipping Act of 1984; Order of Investigation and Hearing

World Line Shipping, Inc., also doing business as World Line Shipping and World Line Shipping International Shipping Co., is a tariffed and bonded non-vessel-operating common carrier ("NVOCC"), and holds itself out as an NVOCC pursuant to its ATFI tariff FMC No. 015099–001, effective November 20, 1997. World Line Shipping, Inc. currently maintains an NVOCC bond, No. 8941513, in the amount of $50,000 with Washington International Insurance Company. World Line Shipping, Inc. was incorporated in Delaware on September 12, 1997 and in California on April 29, 1998. Saeid B. Maralan (aka Sam Bustani) ("Bustani") is the President and sole stock owner of World Line Shipping, Inc. Although Bustani uses World Line Shipping and World Line Shipping International Shipping Co. as d/b/a's, the tariff for World Line Shipping, Inc. does not list any of these company names.

Atlas World Line, Inc., also doing business as Atlas World Line and Atlas World Line International Shipping Co., is a non-tariffed and non-bonded NVOCC located at 14415 S. Main Street, Gardena, CA 90248. Atlas World Line, Inc. was incorporated in Delaware on August 29, 1996 and in California on January 6, 1997. It appears that the Delaware corporation is no longer an active entity, but the California corporation remains active. Bustani is the President and sole stock holder of Atlas World Line, Inc.

It appears that from at least March 30, 1997 until April 21, 1998, Bustani has provided ocean transportation services to the public for shipments from the United States to foreign countries, consisting mostly of household goods, personal effects and automobiles. Bustani, using numerous company names, appears to dispatch shipments via ocean common carriers, arrange for the transportation of shipments on behalf of shippers, and prepare documentation consisting of bills of lading and export documents. Shippers appear to look to Bustani and his companies for the delivery of shipments. Therefore, it appears Bustani and his companies hold themselves out to perform transportation to the public and accept responsibility for the transportation of shipments. Shipments are contracted with ocean common carriers under the names of actual shippers as well as under the names of Atlas World Line, Inc., Atlas World Line, Atlas World Line International Shipping Company, World Line Shipping, Inc., World Line Shipping and World Line Shipping International Shipping Company.

Section 8(a) of the Shipping Act of 1984 ("1984 Act"), 46 U.S.C. app. 1707(a), provides that each common carrier must file a tariff with the Commission showing all of its rates, charges, classifications, rules and practices. Section 3(6) of the 1984 Act, 46 U.S.C. app. 1702(6), in pertinent part, defines a common carrier as a person holding out to the public to provide transportation by water between the United States and a foreign country, that assumes responsibility for performing the transportation and utilizes a vessel operating on the high seas for providing the transportation. Section 3(17) of the 1984 Act, 46 U.S.C. 1702(17), defines a non-vessel-operating common carrier ("NVOCC") as a common carrier that does not operate the vessels used in providing the ocean transportation and acts as the shipper in relation with the ocean common carrier. Section 23(a) of the 1984 Act, 46 U.S.C. app. 1721(a), further provides that each NVOCC must furnish to the Commission a bond, proof of insurance or other surety, *inter alia*, to insure the financial responsibility of the carrier to pay any judgment for damages arising from its transportation-related activities. According to the records maintained by the Commission's Bureau of Tariffs, Certification and Licensing, no tariff or bond has been filed with the Commission in the name of Saeid Maralan, or his alias Sam Bustani, Atlas World Line, Inc., Atlas World Line or Atlas World Line International Shipping Company. Therefore, it appears that Bustani, by providing ocean transportation of cargo to the public for shipments between the United States and foreign countries and by contracting as a shipper for the carriage of the cargo, has acted as a NVOCC without a tariff or bond on file with the Commission, in violation of sections 8(a) and 23(a) of the 1984 Act.

Section 10(b)(1) of the 1984 Act, 46 U.S.C. app. 1709(b)(1), prohibits a common carrier from charging, collecting or receiving greater, less or different compensation for the transportation of property that the rates set forth in its tariff. It appears that World Line Shipping, Inc. failed to file a commodity rate for numerous shipments, and in other instances did not charge the rates set forth in its tariff.

Section 19(a) of the 1984 Act, 46 U.S.C. app. 1718(a), provides that no person may act as an ocean freight forwarder unless that person has obtained a license from the Commission. Section 3(19) of the 1984 Act, 46 U.S.C. app. 1702(19), defines an ocean freight forwarder as a person in the United States that dispatches shipments from the United States to a foreign country via common carriers, books or otherwise arranges space for such shipments on behalf of shippers, and processes the documentation or performs related activities incident to those shipments. In order to obtain an ocean freight forwarder license, a forwarder must furnish to the Commission a bond to insure the financial responsibility of the forwarder, and the Commission must determine that the forwarder is qualified by experience and character to render forwarding services. According to a review of records maintained by the Commission's Bureau of Tariffs, Certification and Licensing, no ocean freight forwarder license has been issued in the name of Saeid Maralan or his alias name, Sam Bustani. Therefore, it would appear that Bustani, by dispatching shipments, by booking or otherwise arranging space for the shipments, and by processing documentation incident to ocean shipments made on behalf of others from the United States, has acted as an ocean freight forwarder without a license issued by the Commission in violation of section 19(a) of the 1984 Act.

Section 13 of the 1984 Act, 46 U.S.C. app. 1712, provides that a person is subject to a civil penalty of not more than $25,000 for each violation knowingly and willfully committed, and not more than $5,000 for other violations.[1] Section 13 further provides that a common carrier's tariff may be suspended for violations of section 10(b)(1) for a period not to exceed one year.

Now therefore, it is ordered, That pursuant to sections 8, 10, 11, 13, 19 and 23 of the 1984 Act, 46 U.S.C. app. 1707, 1709, 1710, 1718 and 1721, an investigation is instituted to determine whether Saeid B. Maralan (aka Sam Bustani), World Line Shipping, Inc. d/b/a/ World Line Shipping and World

[1] The maximum penalties are raised by 10 percent for violations occurring after November 7, 1996. See Inflation Adjustment of Civil Monetary Penalties, 27 S.R.R. 809 (1996).

Line Shipping International Shipping Co. and Atlas World Line, Inc. d/b/a Atlas World Line and Atlas World Line International Shipping Co.:

(1) Violated sections 8(a) and 23(a) of the 1984 Act by acting as a NVOCC without a tariff and bond on file with the Commission;

(2) Violated section 10(b)(1) of the 1984 Act by charging, demanding, collecting or receiving less or different compensation for the transportation of property than the rates and charges showing in World Line Shipping, Inc.'s NVOCC tariff;

(3) Violated section 19(a) of the 1984 Act by acting as an ocean freight forwarder without a license issued by the Commission;

(4) Whether in the event violations of sections 8(a), 10(b)(1), 19(a) or 23(a) of the 1984 Act are found, civil penalties should be assessed against respondents, and if so, the amount of penalties to be assessed;

(5) Whether, in the event violations of section 10(b)(1) are found, the tariff of World Line Shipping, Inc. should be suspended; and

(6) Whether, in the event violations are found, an appropriate cease and desist order should be issued.

It is further ordered, That a public hearing be held in this proceeding and that this matter be assigned for hearing before an Administrative Law Judge of the Commission's Office of Administrative Law Judges in compliance with Rule 61 of the Commission's rules of practice and procedure, 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Administrative Law Judge only after consideration has been given by the parties and the Presiding Administrative Law Judge to the use of alternative forms of dispute resolution, and upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

It is further ordered, that Saeid B. Maralan (aka Sam Bustani), World Line Shipping, Inc. d/b/a World Line Shipping and World Line Shipping International Shipping Co. and Atlas World Line, Inc. d/b/a Atlas World Line and Atlas World Line International Shipping Co. are designated as Respondents in this proceeding;

It is further ordered, that the Commission's Bureau of Enforcement is designated a party to this proceeding;

It is further ordered, that notice of this Order be published in the **Federal Register**, and a copy be served on parties of record;

It is further ordered, that other persons having an interest in participating in this proceeding may file petitions for leave to intervene in accordance with Rule 72 of the Commission's rules of practice and procedure, 46 CFR 502.72;

It is further ordered, that all further notices, orders and/or decisions issued by or on behalf of the Commission in this proceeding, including notice of the time and place of hearing or prehearing conference, shall be served on parties of record;

It is further ordered, that all documents submitted by any party of record in this proceeding shall be directed to the Secretary, Federal Maritime Commission, Washington, DC 20573, in accordance with Rule 118 of the Commission's rules of practice and procedure, 46 CFR 502.118, and shall be served on parties of record; and

It is further ordered, that in accordance with Rule 61 of the Commission's rules of practice and procedures, the initial decision of the Administrative Law Judge shall be issued by November 2, 1999 and the final decision of the Commission shall be issued by March 2, 2000.

By the Commission.

Joseph C. Polking,

Secretary.

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies; Correction

This notice corrects a notice (FR Doc. 98-28023) published on pages 56033 and 56034 of the issue for Tuesday, October 20, 1998.

Under the Federal Reserve Bank of Cleveland heading, the entry for First Merit Corporation, Akron, Ohio, is revised to read as follows:

A. Federal Reserve Bank of Cleveland (Paul Kaboth, Banking Supervisor) 1455 East Sixth Street, Cleveland, Ohio 44101-2566:

1. FirstMerit Corporation, Akron, Ohio; to acquire 100 percent of the voting shares of Signal Corp., Wooster, Ohio, and thereby indirectly acquire Signal Bank, N.A., Wooster, Ohio; Summit Bank, N.A., Akron, Ohio, and NC Interim National Bank, Wooster, Ohio (in formation, successor to First Federal Savings Bank, New Castle, Pennsylvania).

In connection with this application, Applicant also has applied to acquire First Federal Savings Bank of New Castle, New Castle, Pennsylvania, and thereby engage in permissible savings association activities, pursuant to § 225.28(b)(4)(ii) of Regulation Y; Mobile Consultants, Inc., Alliance, Ohio, and thereby engage in brokering manufactured home loans to and on behalf of financial institutions and provides collection and recovery services on such loans, pursuant to §§ 225.28(b)(1) and (b)(2) of Regulation Y; and Summit Banc Investments Corp., Fairlawn, Ohio (a registered broker-dealer with NASD), and thereby engage in acting as an investment advisor, and providing securities brokerage services, pursuant to §§ 225.28(b)(6) and (b)(7) of Regulation Y.

Comments on this application must be received by November 12, 1998.

Board of Governors of the Federal Reserve System, November 3, 1998.

Robert deV. Frierson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act. Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 3, 1998.

A. Federal Reserve Bank of Philadelphia (Michael E. Collins, Senior Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105-1521:

1. Sun Bancorp, Vineland, New Jersey; to acquire 100 percent of the voting shares of Sun National Bank, Delaware, Wilmington, Pennsylvania.

B. Federal Reserve Bank of Cleveland (Paul Kaboth, Banking Supervisor) 1455 East Sixth Street, Cleveland, Ohio 44101-2566:

1. Fifth Third Bancorp, Cincinnati, Ohio; to merge with Ashland Bankshares, Inc., Ashland, Kentucky, and thereby indirectly acquire Bank of Ashland, Inc., Ashland, Kentucky.

C. Federal Reserve Bank of Richmond (A. Linwood Gill III, Assistant Vice President) 701 East Byrd Street, Richmond, Virginia 23261-4528:

1. Union Bankshares Corporation, Bowling Green, Virginia; to acquire 100 percent of the voting shares of The Bank of Williamsburg, Williamsburg, Virginia (in organization).

D. Federal Reserve Bank of San Francisco (Maria Villanueva, Manager of Analytical Support, Consumer Regulation Group) 101 Market Street, San Francisco, California 94105-1579:

1. Norwest Corporation, Minneapolis, Minnesota; Norwest Financial Services, Inc., Des Moines, Iowa; and Norwest Financial, Inc., Des Moines, Iowa; to convert Dial National Bank, Des Moines, Iowa, which currently operates as a credit card bank, pursuant to § 4(c)(8) of the Bank Holding Company Act.

Board of Governors of the Federal Reserve System, November 3, 1998.

Robert deV. Frierson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

FEDERAL RESERVE SYSTEM

Notice of Proposals to Engage in Permissible Nonbanking Activities or to Acquire Companies that are Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y, (12 CFR Part 225) to engage *de novo*, or to acquire or control voting securities or assets of a company, including the companies listed below, that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.28 of Regulation Y (12 CFR 225.28) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

Each notice is available for inspection at the Federal Reserve Bank indicated. The notice also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than November 23, 1998.

A. Federal Reserve Bank of San Francisco (Maria Villanueva, Manager of Analytical Support, Consumer Regulation Group) 101 Market Street, San Francisco, California 94105-1579:

1. Norwest Corporation, Minneapolis, Minnesota; Norwest Financial Services, Inc., Des Moines, Iowa; and Norwest Financial, Inc., Des Moines, Iowa; to acquire Mid-Penn Consumer Discount Co., Philadelphia, Pennsylvania, and thereby engage in lending activities, pursuant to § 225.28(b)(1) of Regulation Y.

Board of Governors of the Federal Reserve System, November 3, 1998.

FEDERAL TRADE COMMISSION

[File No. 9810254]

Koninklijke Ahold NV, et al.; Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Consent Agreement.

SUMMARY: The consent agreement in this matter settles alleged violations of federal law prohibiting unfair or deceptive acts or practices or unfair methods of competition. The attached Analysis to Aid Public Comment describes both the allegations in the draft complaint that accompanies the consent agreement and the terms of the consent order—embodied in the consent agreement—that would settle these allegations.

DATES: Comments must be received on or before January 8, 1999.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, Room 159, 6th St. and Pa. Ave., N.W., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: William Baer or James Fishkin, FTC/H-374, Washington, D.C. 20580. (202) 326–2932 or 326–2663.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and Section 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the above-captioned consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. The following Analysis to Aid Public Comment describes the terms of the consent agreement, and the allegations in the complaint. An electronic copy of the

full text of the consent agreement package can be obtained from the FTC Home Page (for October 20, 1998), on the World Wide Web, at "http://www.ftc.gov/os/actions97.htm." A paper copy can be obtained from the FTC Public Reference Room, Room H–130, Sixth Street and Pennsylvania Avenue, N.W., Washington, D.C. 20580, either in person or by calling (202) 326–3627. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with Section 4.9(b)(6)(ii) of the Commission's Rules of Practice (16 CFR 4.9(b)(6)(ii)).

Analysis of the Proposed Consent Order, Asset Maintenance Agreement, and the Draft Complaint To Aid Public Comment

I. Introduction

The Federal Trade Commission ("Commission") has accepted for public comment from Koninklijke Ahold nv ("Ahold"), Giant Good Inc. ("Giant"), and The 1244 Corporation ("1224") (collectively "the proposed Respondents") an Agreement Containing Consent Order ("the proposed consent order") and an Asset Maintenance Agreement. The proposed Respondents have also reviewed a draft complaint contemplated by the Commission. The proposed consent order is designed to remedy likely anticompetitive effects arising from Ahold's proposed acquisition of all of the Class AC voting stock of Giant from 1224 and all of the Class A non-voting common stock of Giant for $43.50 per share for cash. Respondent 1224 owns all of the Class AC voting stock of Giant, which elects five of the nine directors of Giant.

II. Description of the Parties and the Proposed Acquisition

Ahold, headquartered in Zaandam, The Netherlands, is one of the world's largest supermarket firms, operating approximately 3,000 stores in Europe, North and South America, and Asia. In the United States, Ahold is the seventh largest supermarket chain. Ahold has acquired nine supermarket chains during the 1980s and 1990s: Top's, Stop & Shop, BI–LO, Giant Food Stores, Edwards, Mel's Markets, Mayfair, Red Food, and Finast. Ahold had $14.29 billion in U.S. revenues in the fiscal year that ended on December 28, 1997. The acquisition of Giant would make Ahold the fifth largest supermarket firm in the United States.

Today, Ahold operates Ahold USA, Inc., a wholly-owned subsidiary, and, through various restructurings, four wholly-owned regional supermarket firms: BI–LO, Inc., Top's Markets, Inc., Giant Food Stores, Inc. ("Giant-Carlisle"), and The Stop & Shop Companies, Inc. Ahold's supermarkets that directly compete against Giant's supermarkets are part of the Giant-Carlisle division. The Giant-Carlisle division operates supermarkets in Maryland under the "Martin's" trade name and in Pennsylvania under the "Giant" trade name.

Giant, a Delaware corporation headquartered in Landover, Maryland, is the fifteenth largest supermarket chain in the United States and one of the nation's premier regional supermarket chains. Giant operates 179 supermarkets and three free-standing drug stores in Virginia, Maryland, Delaware, New Jersey, Pennsylvania, and the District of Columbia. Giant operates supermarkets under the "Giant" trade name in Maryland, Virginia, and the District of Columbia, and supermarkets under the "Super G" trade name in Delaware, New Jersey, and Pennsylvania. Giant had $4.23 billion in total sales for the fiscal year that ended on February 28, 1998.

Ahold proposes to acquire all of the Class AC and Class AL voting stock, and all of the outstanding Class A common stock of Giant, for approximately $2.7 billion. 1224, formed in 1995 after the death of Israel Cohen, the former Chairman and CEO of Giant, owns all of the Class AC voting stock of Giant, which elects five of the nine board seats. J Sainsbury, plc, a British firm that also owns the Massachusetts-based Shaw's supermarket chain, owns the Class AL voting shares, which elects four of the nine board seats. The Class A common stock is publicly traded.

III. The Draft Complaint

The draft complaint alleges that the relevant line of commerce (i.e., the product market) is the retail sale of food and grocery items in supermarkets. Supermarkets provide a distinct set of products and services for consumers who desire to one-stop shop for food and grocery products. Supermarkets carry a full line and wide selection of both food and nonfood products (typically more than 10,000 different stock-keeping units ("SKUs")), as well as a deep inventory of those SKUs. In order to accommodate the large number of food and nonfood products necessary for one-stop shopping, supermarkets are large stores that typically have at least 10,000 square foot of selling space.

Supermarkets compete primarily with other supermarkets that provide one-stop shopping for food and grocery products. Supermarkets primarily base their food and grocery prices on the prices of food and grocery products sold at nearby supermarkets. Supermarkets do not regularly price-check food and grocery products sold at other types of stores, and do not significantly change their food and grocery prices in response to prices at other types of stores. Most consumers shopping for food and grocery products at supermarkets are not likely to shop elsewhere in response to a small price increase by supermarkets.

Retail stores other than supermarkets that sell food and grocery products, such as neighborhood "mom & pop" grocery stores, convenience stores, specialty food stores (e.g., seafood markets, bakeries, etc.), club stores, military commissaries, and mass merchants, do not effectively constrain prices at supermarkets. These other stores operate significantly different retail formats. None of these stores offers a supermarket's distinct set of products and services that enable consumers to one-stop shop for food and grocery products.

According to the draft compliant, the relevant sections of the country (i.e., the geographic markets) in which to analyze the acquisition are the areas in and near the following cities and towns: (a) Bel Air, Maryland; (b) Eldersburg, Maryland; (c) Frederick, Maryland; (d) Westminster, Maryland; (e) Hilltown, Pennsylvania; (f) Norristown, Pennsylvania; (g) Warminster, Pennsylvania, and (h) Yardley, Pennsylvania.

Ahold and Giant are actual and direct competitors in and near Bel Air, Eldersburg, Frederick, Westminster, Norristown, Warminster, and Yardley. Ahold is an actual potential competitor against Giant in and near the Hilltown relevant market. But for the acquisition, Ahold and Giant would become direct competitors in the Hilltown relevant market. The acquisition will eliminate that competition.

According to the draft compliant, the Bel Air, Eldersburg, Frederick, Westminster, Norristown, Warminster, and Yardley relevant markets are highly concentrated, whether measured by the Herfindahl-Hirshman Index (commonly referred to as "HHI") or by two-firm and four-firm concentration ratios.[1] The acquisition would substantially increase concentration in each market. Ahold and Giant would have a combined market share of near or greater than 35% in each geographic market. The post-acquisition HHIs in the geographic markets range from 3,008 to 6,716.

[1] The HHI is a measurement of market concentration calculated by summing the squares of the individual market shares of all the participants.

The draft complaint further alleges that the Hilltown relevant market is also highly concentrated. The market will remain highly concentrated as a result of this acquisition, and will be significantly more concentrated than it would have been but for the acquisition.

According to the draft complaint, entry is difficult and would not be timely, likely, or sufficient to prevent anticompetitive effects in the relevant geographic markets.

According to the draft compliant, Ahold's proposed acquisition of the Class AC voting stock of Giant from 1224, and the Class A non-voting common stock of Giant, if consummated, may substantially lessen competition in the relevant markets in violation of Section 7 of the Clayton Act, as amended, 15 U.S.C. § 18, and Section 5 of the Federal Trade Commission Act, as amended, 15 U.S.C. § 45, by eliminating direct competition between supermarkets owned or controlled by Ahold and supermarkets owned or controlled by Giant, by eliminating actual potential competition between supermarkets owned or controlled by Ahold and supermarkets owned or controlled by Giant; by increasing the likelihood that Ahold will unilaterally exercise market power; and by increasing the likelihood of, or facilitating, collusion or coordinated interaction among the remaining supermarkets firms. Each of these effects increases the likelihood that the prices of food, groceries or services will increase, and the quality and selection of food, groceries or services will decrease, in the relevant sections of the country.

IV. Terms of the Agreement Containing Consent Order ("the Proposed Consent Order")

The proposed consent order will remedy the Commission's competitive concerns about the proposed acquisition. Under the terms of the proposed consent order, the proposed Respondents must divest ten specific supermarkets in the relevant markets. Four of the supermarkets that the proposed Respondents must divest are currently owned and operated by Ahold (all operating under the "Martin's" banner), and six of the supermarkets are currently owned and operated by Giant (of which one operates under the "Giant" banner and five operate under the "Super G" banner). The proposed Respondents must divest: (1) the Ahold "Martin's" in Bel Air, Maryland, to Fleming Companies, Inc. ("Fleming"), the second largest supermarket wholesaler in the United States and an operator of many company-owned supermarkets; (2) the two Ahold "Martin's" supermarkets in Frederick, Maryland, to Frederick County Foods LLC ("Frederick County Foods"), an independent operator affiliated with Supervalu Inc. ("Supervalu"), (3) the Ahold "Martin's" supermarket in Westminster, Maryland, to Richfood Holdings, Inc.'s ("Richfood") Food-A-Rama division, a wholly-owned subsidiary that operates Richfood's "Metro" supermarkets based in Baltimore; (4) Giant's "Giant" supermarket in Eldersburg, Maryland, to Safeway Inc. ("Safeway"), the second largest supermarket chain in the United States and a major supermarket chain in Maryland; and (5) five of Giant's "Super G" supermarkets in Pennsylvania to Supervalu, the largest wholesaler to supermarkets and the thirteenth largest retail operator of supermarkets in the United States. These divestitures include every Ahold supermarket or every Giant supermarket in each relevant market. Each upfront buyer owns no supermarkets in the same market where it is acquiring one or more divested supermarkets from the proposed Respondents. The specific supermarkets that the proposed Respondents must divest to Fleming, Frederick County Foods, Richfood, Safeway, and Supervalu are listed below.

The supermarket that the proposed Respondents must divest to Fleming in accordance with the agreement between Ahold and Fleming dated September 12, 1998, is the following:

1. Ahold store no. 114 operating under the "Martin's Food Market" trade name, located at 550 West McPhail Road, Bel Air, Maryland 21014 (Harford County).

The two supermarkets that the proposed Respondents must divest to Frederick County Foods in accordance with the agreement between Ahold and Frederick County Foods dated September 11, 1998, are the following:

1. Ahold store no. 40 operating under the "Martin's Food Market" trade name, located at 66 Waverly Drive in the Frederick Towne Mall Shopping Center, Frederick, Maryland 21701 (Frederick County); and

2. Ahold store no. 96 operating under the "Martin's Food Market" trade name, located at 1305 West 7th Street in the Frederick Shopping Center, Frederick, Maryland 21701 (Frederick County).

The supermarket that the proposed Respondents must divest to Richfood in accordance with the agreement between Ahold and Richfood dated September 14, 1998, is the following:

1. Ahold store no. 36 operating under the "Martin's Food Market" trade name, located at 551 Jermor Lane, Westminster, Maryland 21157 (Carroll County).

The supermarket that the proposed Respondents must divest to Safeway in accordance with the agreement between Ahold and Safeway dated September 12, 1998, is the following:

1. Giant store no. 238 operating under the "Giant" trade name, located at 1313 Londontowne Boulevard in the Londontowne Square Shopping Center, Eldersburg, Maryland 21784 (Carroll County).

The five supermarkets that the proposed Respondents must divest to Supervalu in accordance with the agreement between Ahold and Supervalu dated September 14, 1998, are the following:

1. Giant store no. 242 operating under the "Super G" trade name, located at 1601 Big Oak Road in the Oxford Oaks Shopping Center, Lower Makefield Township, Pennsylvania 19067 (Bucks County);

2. Giant store no. 249 operating under the "Super G" trade name, located at 942 West Street Road in the Towne Square Shopping Center, Warminster, Pennsylvania 18974 (Bucks County);

3. Giant store no. 237 operating under the "Super G" trade name, located at 1591 Bethlehem Pike in the Hilltown Crossings Shopping Center, Hilltown Township, Pennsylvania 19440 (Montgomery County);

4. Giant store no. 243 operating under the "Super G" trade name, located at 2775 West Main Street in the Park-Ridge Shopping Center, Lower Providence Township, Pennsylvania 19403 (Montgomery County); and

5. Giant store no. 250 operating under the "Super G" trade name, located at 55 Germantown Pike in the Norriton Square Shopping Center, East Norriton Township, Pennsylvania 19401 (Montgomery County).

The proposed consent order specifically requires that the divestitures occur no later than twenty days after Ahold acquires the Class AC voting stock from 1224 or four months after the proposed Respondents signed the proposed consent order (September 18, 1998), whichever is earlier.[2] The proposed consent agreement also requires Ahold to include rescission provisions in its upfront buyer agreements that allow it to rescind the transaction(s) if the Commission, after

[2] Acceptance of the proposed consent agreement for public comment terminated the Hart-Scott-Rodino premerger waiting period and enables Ahold to acquire the Giant stock immediately.

the comment period, decides to reject any of the upfront buyers. If Ahold divests the supermarkets to be divested prior to the date the proposed consent order becomes final, and if, at the time the Commission decides to make the proposed consent order final, the Commission notifies Ahold that any of the upfront buyers is not an acceptable acquirer or that any of the upfront buyer agreements is not an acceptable manner of divestiture, then Ahold must immediately rescind the transaction in question and divest those assets within three months after the proposed consent order becomes final. At that time, Ahold must divest those assets only to an acquirer that receives the prior approval of the Commission and only in a manner that receives the prior approval of the Commission. In the event that any Commission-approved buyer is unable to take or keep possession of any of the supermarkets identified for divestiture, a trustee that the Commission may appoint has the power to divest any of the supermarkets or properties in the markets alleged in Paragraph 16 of the complaint that the proposed Respondents own to remedy the anticompetitive effects alleged in the complaint.

The Commission's goal in evaluating possible purchasers of divested assets is to maintain the competitive environment that existed prior to the acquisition. When divestiture is an appropriate remedy for a supermarket merger, the Commission requires the merging parties to find a buyer for the divested stores. A proposed buyer must not itself present competitive problems. For example, the Commission is less likely to approve a buyer that already has a large retail presence in the relevant geographic area than a buyer without such a presence. The Commission is satisfied that the purchasers presented by the parties are well qualified to run the divested stores and that divestiture to these purchasers poses no separate competitive issues.

For a period of ten years from the date the proposed consent order becomes final, the proposed Respondents are required to provide notice to the Commission prior to acquiring supermarkets assets located in, or any interest (such as stock) in any entity that owns or operates a supermarket located in, Carroll, Frederick, or Harford counties in Maryland, or Bucks or Montgomery counties in Pennsylvania. Respondents may not complete such an acquisition until they have provided information requested by the Commission. This provision does not restrict the proposed Respondents from constructing new supermarket facilities on their own; nor does it restrict the proposed Respondents from leasing facilities not operated as supermarkets within the previous six months.

For a period of ten years, the proposed consent order also prohibits the proposed Respondents from entering into or enforcing any agreement that restricts the ability of any person that acquires any supermarket, any leasehold interest in any supermarket, or any interest in any retail location used as a supermarket on or after January 1, 1998, to operate a supermarket at that site if such supermarket was formerly owned or operated by the proposed Respondents in Carroll, Frederick, or Harford counties in Maryland, or Bucks or Montgomery counties in Pennsylvania. In addition, the proposed Respondents may not remove fixtures or equipment from a store or property owned or leased in Carroll, Frederick, or Harford counties in Maryland, or Bucks or Montgomery counties in Pennsylvania, that is no longer in operation as a supermarket, except (1) Prior to a sale, sublease, assignment, or change in occupancy or (2) to relocate such fixtures or equipment in the ordinary course of business to any other supermarket owned or operated by Ahold.

The proposed Respondents are required to provide to the Commission a report of compliance with the proposed consent order within thirty days following the date on which they signed the proposed consent, every thirty days thereafter until the divestitures are completed, and annually for a period of ten years. The obligations of 1224 under the proposed consent order will terminate upon consummation of the proposed acquisition.

V. Terms of the Asset Maintenance Agreement

The proposed Respondents also entered into an Asset Maintenance Agreement. Under the terms of the Asset Maintenance Agreement, from the time Ahold acquires the Class AC voting stock of Giant from 1224 until the divestitures have been completed, the proposed Respondents must maintain the viability, competitiveness and marketability of the assets to be divested, must not cause their wasting or deterioration, and cannot sell, transfer, or otherwise impair their marketability or viability. The Asset Maintenance Agreement specifies these obligations in detail. The obligations of 1224 under the Asset Maintenance Agreement will terminate upon consummation of the proposed acquisition.

VI. Opportunity for Public Comment

The proposed consent order has been placed on the public record for sixty days for receipt of comments by interested persons. Comments received during this period will become part of the public record. After sixty days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make the proposed consent order final.

By accepting the proposed consent order subject to final approval, the Commission anticipates that the competitive problems alleged in the complaint will be resolved. The purpose of this analysis is to invite public comment on the proposed consent order, including the proposed sale of supermarkets to Fleming, Frederick County Foods, Richfood, Safeway, and Supervalu, in order to aid the Commission in its determination of whether to make the proposed consent order final. This analysis is not intended to constitute an official interpretation of the proposed consent order or the Asset Maintenance Agreement, nor is it intended to modify the terms of the proposed consent order or Asset Maintenance Agreement in any way.

By direction of the Commission.

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–M

GENERAL ACCOUNTING OFFICE

Federal Accounting Standards Advisory Board; Publication of Exposure Drafts

SUMMARY: The Federal Accounting Standards Advisory Board (FASAB) announces the publication of the following three Exposure Drafts of proposed Statements of Federal Financial Accounting Standards and solicits comments on them:

- *Standards For Management's Discussion and Analysis*, October 1, 1998. Written comments to the Board are requested by January 4, 1999. The Office of Management and Budget expects to use these concepts and standards for MD&A in revising its guidance on the "Overview" section of financial reports.
- *Concepts For Management's Discussion and Analysis*, October 1, 1998. Written comments to the Board are requested by January 4, 1999. The Office of Management and Budget expects to use these concepts and standards for MD&A in revising its guidance on the "Overview" section of financial reports.
- *Recognition Of Contingent Liabilities Arising From Litigation: An Amendment of SFFAS 5, Accounting For Liabilities Of The Federal Government.* Written comments to the Board are requested by November 30, 1998. This Exposure Draft contains proposed standards that address accounting for loss contingencies involving specific cases of pending or potential litigation.

Interested parties are encouraged to comment on any issues related to these three documents. The text of the documents can be viewed through the electronic Financenet on the FASAB Home Page www.financenet.gov/fasab.htm. Hard copies may be obtained from FASAB, 441 G St., NW, Suite 3B18, Washington, DC 20548. Telephone: 202–512–7350.

FOR FURTHER INFORMATION CONTACT: Wendy Comes, Executive Director, 441 G St., NW., Room 3B18, Washington, DC 20548, or call (202) 512–7350.

Authority: Federal Advisory Committee Act. Pub. L. 92–463, sec. 10(a)(2), 86 Stat. 770, 774 (1972) (current version at 5 U.S.C. app. section 10(a)(2) (1988); 41 CFR 101–6.1015 (1990).

Dated: November 4, 1998.

Wendy M. Comes,

Executive Director.

BILLING CODE 1610–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Ryan White Care Act Requirement—Secretary's Determination on HIV Testing of Newborns

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice and request for comments.

SUMMARY: Section 2626 of P.L. 104–146 (42 U.S.C. 300ff–34), the "Ryan White CARE Act Amendments of 1996", includes a requirement for the Secretary of HHS to make a determination whether a set of activities prescribed in section 2627 of the Public Health Service (PHS) Act (42 U.S.C. 300ff–35), have become routine practice in the United States. In making this determination, the Secretary is required to consult with the States and other public or private entities that have knowledge or expertise relevant to the determination.

The purpose of this notice is to request comments from States and such other public or private entities with knowledge or expertise relevant to the practice of activities (1) through (4) in section 2627 of the PHS Act (42 U.S.C. 300ff–35). After consideration of comments submitted, the CDC will provide a summary of comments received to the Secretary as part of the process leading to the Secretary's determination required by Section 2626 of the PHS Act (42 U.S.C. 300ff–34).

DATES: The public is invited to submit comments on the practice of activities (1) through (4) in Section 2627 of the PHS Act by November 23, 1998.

ADDRESSES: Comments should be submitted to: Technical Information and Communication Branch, Division of HIV/AIDS Prevention—Intervention, Research, and Support, National Center for HIV, STD and TB Prevention, Centers for Disease Control and Prevention (CDC), 1600 Clifton Road, NE., Mailstop E–49, Atlanta, GA 30333.

FOR FURTHER INFORMATION CONTACT: Technical Information and Communication Branch, Division of HIV/AIDS Prevention—Intervention, Research, and Support, National Center for HIV, STD and TB Prevention, Centers for Disease Control and Prevention (CDC), telephone (404) 639–2072.

SUPPLEMENTARY INFORMATION: Section 2626(d) of the Public Health Service Act (42 U.S.C. 300ff–34), directs the Secretary to publish in the **Federal Register** "a determination of whether it has become a routine practice in the provision of health care in the United States to carry out each of the activities described in paragraphs (1) through (5) of section 2627. In making the determination, the Secretary shall consult with the States and with other public or private entities that have knowledge or experience relevant to the determination." The activities described in section 2627 are as follows: "(1) In the case of newborn infants who are born in the State and whose biological mothers have not undergone prenatal testing for HIV disease, that each such infant undergo testing for such disease. (2) That the results of such testing of a newborn infant be promptly disclosed in accordance with the following, as applicable to the infant involved: (A) To the biological mother of the infant (without regard to whether she is the legal guardian of the infant). (B) If the State is the legal guardian of the infant: (i) To the appropriate official of the State agency with responsibility for the care of the infant. (ii) to the appropriate official of each authorized agency providing assistance in the placement of the infant. (iii) if the authorized agency is giving significant consideration to approving an individual as a foster parent of the infant, to the prospective adoptive parent. (iv) if the authorized agency is giving significant consideration to approving an individual as an adoptive parent of the infant to the prospective adoptive parent. (C) If neither the biological mother nor the State is the legal guardian of the infant, to another legal guardian of the infant. (D) To the child's health care provider. (3) That, in the case of prenatal testing for HIV disease that is conducted in the State, the results of such testing be promptly disclosed to the pregnant woman involved. (4) That, in disclosing the test results to an individual under paragraph (2) or (3), appropriate counseling on the human immunodeficiency virus be made available to the individual (except in the case of a disclosure to an official of a State or an authorized agency)." The requirement of Section 2627 (5) was deleted for the purposes of Section 2626 through a subsequent technical amendment enacted into law.

The term routine practice provided in section 2626 (d) was not defined within the statute of Public Law 104–146 (42 U.S.C. 300ff–34) . The joint explanatory statement of the committee on conference included the following legislative history on page 46 of the Conference Report 104–545 regarding the Secretary's determination: "(2) Within 2 years following the implementation of such a system, the Secretary will make a determination whether mandatory HIV testing of all infants born in the U.S. whose mothers have not undergone prenatal HIV testing has become a routine practice. This determination will be made in consultation with States and experts."

Section 2628 of the Public Health Service Act (42 U.S.C. 300ff–36) directs the Secretary to request that the Institute of Medicine (IOM) of the National Academy of Sciences evaluate the extent to which State efforts have been effective in reducing the perinatal transmission of HIV and an analysis of the existing barriers to the further reduction in such transmission. The IOM assembled a 14-member expert committee with combined expertise in obstetrics and gynecology, pediatrics, preventive medicine, and other relevant specialties, social and behavioral sciences, public health practice, epidemiology, program evaluation, health services research, bioethics, and public health law. The IOM committee

reviewed a wide variety of quantitative and qualitative information pertaining to the prevention of perinatal HIV transmission. To augment the committee's two public workshops and a series of site visits through which the committee consulted a wide array of state and local public health officials and other policy makers, health care providers, consumers, ethicists, advocacy groups for women and children with HIV and others affected and concerned with these policy issues.

This notice will build upon the testimony and material already provided to the IOM as part of its statutorily required evaluation by seeking any additional public comment beyond that already provided to the IOM as part of its consultative process. The purpose of this notice is not to duplicate the testimony, data or other information and background material already provided to the IOM committee through its workshops, site visits, and other information gathering and consultative activities.

Dated: November 3, 1998.

Jeffrey P. Koplan,

Director, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 98N–0633]

Approval of an Alternative Requirement of the Mammography Quality Standards Act; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a document entitled "Approval of an Alternative Requirement of the Mammography Quality Standards Act" (the MQSA). The MQSA final regulations require that the collimation of the mammography unit permit the x-ray field to extend to or beyond the edges of the image receptor. FDA has approved a request from General Electric (GE) Medical Systems for an alternative to the MQSA requirement to apply to GE Senographe mammographic systems.

ADDRESSES: Submit written requests for single copies of the "Approval of an Alternative Requirement of the Mammography Quality Standards Act" document to the Division of Mammography Quality and Radiation Programs, Center for Devices and Radiological Health (HFZ–240), Food and Drug Administration, 1350 Piccard Dr., Rockville, MD 20850. Send two self-addressed adhesive labels to assist that office in processing your request, or fax your request to 301–594–3306. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the alternative requirement.

FOR FURTHER INFORMATION CONTACT: Roger L. Burkhart, Center for Devices and Radiological Health (HFZ–240), Food and Drug Administration, 1350 Piccard Dr., Rockville, MD 20850, 301–594–3332.

SUPPLEMENTARY INFORMATION:

I. Background

The MQSA final regulations in 21 CFR part 900 will become effective on April 28, 1999. Under § 900.12(e)(5)(vii)(A) (21 CFR 900.12(e)(5)(vii)(A)), the regulations will require that the collimation of a mammography unit permit the x-ray field to extend to or beyond the edges of the image receptor. This provision was made because some facilities stressed the importance of blackening the x-ray film to the edges. These facilities stated that this would help eliminate the effect of view box light passing through the unexposed edges of the film on accuracy of interpretation. However, the current Electronic Product Radiation Control (EPRC) performance standards require that mammography units be manufactured to ensure that the x-ray field does not extend beyond the nonchest wall edges of the image receptor.

Although it is possible for a mammography unit to meet both of these sets of standards, it has come to the agency's attention that certain GE models were designed to prevent the x-ray field from reaching the nonchest wall edges of the image receptor. These models, which make up a large proportion of the mammography units currently in use in facilities, were designed to meet the EPRC standard. GE requested that an alternative requirement be approved that would allow, but not require, the x-ray field to extend to or beyond the edge of the image receptor, permitting continued use of the presently installed units without modification.

Under the provisions of 21 CFR 900.18, the agency granted the request for an alternative requirement. The alternative requirement applies to all GE Senographe mammographic systems including models 500T, 600T, 700T, 800T, and DMR.

II. Electronic Access

In order to receive a copy of the "Approval of an Alternative Requirement of the Mammography Quality Standards Act" to § 900.12(e)(5)(vii)(A) via your fax machine, call the CDRH Facts-On-Demand system at 800–899–0381 or 301–827–0111 from the touch-tone telephone. At the first voice prompt press 1 to access the Division of Small Manufacturers Assistance Facts, at second voice prompt press 2, and then enter the document number 2249 followed by the pound sign (#). Then follow the remaining voice prompts to complete your request.

Persons interested in obtaining a copy of the alternative requirement may also do so using the World Wide Web (WWW). The Center for Devices and Radiological Health (CDRH) maintains an entry on the WWW for easy access to information including text graphic, and files that may be downloaded to a personal computer with access to the WWW. Updated on a regular basis, the CDRH home page includes the "Approval of an Alternative Requirement of the Mammography Quality Standards Act" to § 900.12(e)(5)(vii)(A), device safety alerts, **Federal Register** reprints, information on premarket submissions (including lists of approved applications and manufacturers' addresses), small manufacturers' assistance, information on video conferencing and electronic submissions, mammography matters, and other device-oriented information. The CDRH home page may be accessed at "http://www. fda.gov/ cdrh". "Approval of an Alternative Requirement of the Mammography Quality Standards Act" to § 900.12(e)(5)(vii)(A) will be available at "http://www.fda.gov/cdrh/dmqrp.html".

Dated: October 28, 1998.

BILLING CODE 4160–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 97N–0447]

Protection of Human Subjects: Categories of Research That May Be Reviewed by the Institutional Review Board (IRB) Through an Expedited Review Procedure

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: On November 10, 1997, the Food and Drug Administration (FDA), in consultation with the Office for Protection from Research Risks (OPRR) at the National Institutes of Health, requested written comments relating to the proposed republication of the list that identifies certain research activities involving human subjects that may be reviewed by the Institutional Review Board (IRB) through the expedited review procedure authorized in 21 CFR 56.110. The comment period closed on March 10, 1998. FDA and OPRR received a combined total of 108 comments. After a review of the comments, FDA and OPRR are now simultaneously publishing identical revised lists of categories of research activities that may be reviewed by the IRB through the expedited review procedure.

EFFECTIVE DATE: The revised list is effective November 9, 1998.

FOR FURTHER INFORMATION CONTACT: Paul W. Goebel, Jr., Office of Health Affairs (HFY–20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–1685.

SUPPLEMENTARY INFORMATION: The FDA regulations for protection of human subjects can be found under part 50 (21 CFR part 50), and the regulations for the IRB's can be found under part 56 (21 CFR part 56). The regulations require, with limited exceptions, obtaining and documenting legally effective informed consent for all human subjects of research on FDA regulated products and review of research involving human subjects by an IRB.

Section 56.110 provides for expedited IRB review procedures for certain categories of research involving no more than minimal risk, and for minor changes in previously approved research during the period for which approval is authorized. The list that is referenced in § 56.110(a) was originally published in the **Federal Register** of January 27, 1981 (46 FR 8980), as a notice of a list of research activities that could be reviewed by the IRB through the expedited review procedures set forth in the FDA's regulations. OPRR has a separate codification that references the Expedited Review List for matters under the Department of Health and Human Services' (HHS) jurisdiction (45 CFR part 46). The HHS list was published in the **Federal Register** on January 26, 1981 (46 FR 8392). The FDA and HHS lists published in 1981 differ slightly, in that item nine on the HHS list, concerning research on individual or group behavior, pertains only to 45 CFR 46.110. Because behavioral research is not specifically regulated by FDA, that category was not included in the list published by FDA.

The comments received in response to the November 10, 1997 (62 FR 60607), proposal by FDA and OPRR to revise the 1981 expedited review list overwhelmingly supported the proposed revision of the list. Three comments indicated that there should be no expedited review available at all. These comments misunderstood the purpose of expedited review, expressing concern that allowing expedited IRB review also removes the requirement for informed consent of study subjects. FDA and OPRR disagree with these three comments and believe that expedited review is an appropriate part of the IRB review process. In addition, deleting the expedited review process would require a regulatory change to section 110 of the Federal Policy, which is beyond the scope of this revision. However, in response to these comments paragraph (E) has been added to the Applicability section I of this document to make it clear that the standard requirements for informed consent must be met regardless of the type of review—expedited or convened—utilized by the IRB.

The following discussion summarizes the 108 comments received and the resulting changes. In response to over 40 comments expressing concern that the general principles that apply to all research categories could be easily misinterpreted, the introductory paragraph to the 1981 list has been reformatted into six general principles that apply to the entire list. The parenthetical in the introductory sentence to the 1981 list "(carried out through standard methods)" has been deleted in response to comments that this phrase served no particular purpose in the 1981 list.

The reformatted general principles are set forth in paragraphs (A) through (G). Paragraph (C) makes it clear that the IRB must consider, for all categories, whether identification of the subjects or their responses would reasonably place them at risk of criminal or civil liability or be damaging to the subjects' financial standing, employability, insurability, reputation, or be stigmatizing, unless reasonable and appropriate protections will be implemented so that risks related to invasion of privacy and breach of confidentiality are no greater than minimal. At the time of the publication of the 1981 list, FDA routinely considered only the medical risk to subjects in determining whether a study imparted greater than minimal risk. Since that time, the scope of research projects that are under FDA purview has expanded to include activities that could place the subjects at risk for the harms listed in paragraph (C). Therefore, the IRB's reviewing studies of FDA regulated products may need to consider the listed nonmedical harms. For certain studies subject to regulation under 45 CFR part 46, these concerns have always been implicit in determining whether an activity is a minimal risk activity. The words "insurability" and "be stigmatizing" have been added to the new list to help ensure that the IRB's consider these potential risks during their review.

Two comments point out that classified research must be reviewed by the IRB at a convened meeting. FDA and OPRR agree and have added paragraph (D), which prohibits expedited review for classified research involving human subjects. This is in accordance with the March 27, 1997, Presidential memorandum that proposed the elimination of an expedited review procedure for all classified research involving human subjects.

Paragraph (E) serves as a reminder to the IRB's that informed consent and expedited review are two totally separate issues. This responds to concerns that allowing an increase in the scope of research eligible for expedited review would result in more waivers of informed consent. Research reviewed under the expedited review procedure is not necessarily eligible for waiver or alteration of informed consent. All research, regardless of whether it meets the conditions for expedited IRB review, must conform to the applicable requirements for obtaining and documenting informed consent. Informed consent must be obtained and documented unless the research meets one of the conditions for waiving, excepting, or otherwise altering the informed consent requirements that are set forth in 45 CFR 46.116 and 46.117, and §§ 50.23, 50.24, and 56.109(c).

The list of research eligible for expedited review continues to fall into nine categories. Category one,

enumerated as category nine on the 1981 list, addresses the availability of expedited review for marketed drugs and devices. This category now contains citations to the investigational drug and device regulations and provides when expedited review of research on marketed drugs (including biologics) would not be appropriate. This modification was in response to five comments that raised questions about these issues. FDA and OPRR on their own initiative have added wording to set out in greater detail the conditions that must be met in order for an IRB to review research with a medical device using expedited procedures.

Over 45 comments suggested certain changes to proposed category two, formerly category four in the 1981 list, addressing the collection of blood. The suggested changes include addition of many specific conditions, including limits on the amount withdrawn, collection procedures, and limits on the physical condition of the subjects. In response to these suggestions, the category has been reorganized to set general limits that the specific procedure must meet. The procedures for the collection of blood now include finger stick, heel stick, ear stick, and venipuncture. The four proposed subcategories were recombined as two separate subcategories. The critical issues to be considered include weight, physical condition, and amount of blood to be collected. The first subcategory (a) concerns healthy nonpregnant adults. The second subcategory (b) concerns all other adults and children. For this second subcategory, the IRB will need to make certain judgments including: Consideration for the age, weight, and health of the subjects in light of the amount of blood to be collected, the frequency with which it will be collected, and the collection procedure. The final sentence of subcategory (b) reads: "For these subjects, the amount drawn may not exceed the lesser of 50 mL or 3 mL per kg in an 8-week period and collection may not occur more than 2 times per week." While an expedited review of research involving pregnant women is permissible under the revised section, this last sentence makes it clear that the amount of blood that can be drawn is subject to limitations greater than those on healthy nonpregnant adults. Also in response to public comment, the proposed phrase "medically vulnerable adults" has been deleted.

More than 24 comments were received regarding category three, which was previously categories one and two in the 1981 list, addressing the collection of biological specimens. Some of the comments requested inclusion of specific procedures, such as throat cultures and pap smears. Some of the comments requested the category be rephrased as a general limit, setting out as examples the types of specimens and conditions for collection. In response to these comments, new category three has been reorganized to limit the manner of collection to noninvasive means. The list of specific types of biological specimens is now included as examples of the types of procedures that could fall within this category.

Categories four and five on the proposed list have been combined into one new category, category five, addressing research involving materials collected or which will be collected solely for nonresearch purposes. This new category five was formed in response to comments that raised questions about why the two categories separated out existing and prospectively collected materials. The term "nonresearch purposes" was maintained in new category five to describe the origins of the research materials.

An explanatory note has been added to categories five and seven to clarify that some research described in these categories may be exempt from the IRB review under 45 CFR 46.101 of the HHS regulations for the protection of human subjects. Thus, the listing of those categories refers only to nonexempt research.

Category six on the list proposed in November 1997 has become category four on the revised list and addresses the collection of data through noninvasive procedures. In response to several comments that raised concerns about the use of anesthesia and sedation with magnetic resonance imaging procedures, expedited review will not be allowed for any procedure employing anesthesia or sedation. In response to more than 24 comments, the general term "noninvasive procedures" now applies to all procedures in this category. The specific procedures to which expedited review was limited in proposed category six, are included in new category four as examples of the types of procedures that could qualify for expedited review. FDA and OPRR, on their own initiative, added wording to clarify that studies intended to evaluate the safety and effectiveness of medical devices or using medical devices that are not cleared or approved for marketing by FDA are generally not eligible for expedited review.

Category seven on the proposed list is now category six on the revised list and deals with the collection of data from voice, video, digital, or image recordings. In the proposal, the IRB was to consider certain risks to the subjects in this category before granting expedited review. In response to several comments that inquired why only this type of research should receive this consideration, it was incorporated as a guiding principle in the Applicability section I of this document and is no longer simply specific to this category.

Category eight on the proposed list is now category seven on the revised list. This category was added to the 1981 list with the proposal and concerns research on individual or group characteristics or behavior. At the time of the publication of the 1981 list, this category was not included in the FDA list because FDA routinely considered only the medical risk to subjects in determining whether a study imparted greater than minimal risk. Since that time, the scope of research projects that are under FDA purview has expanded to include activities that are listed in new category seven. Therefore, studies related to FDA-regulated products might employ such methodology.

Over 30 comments requested this category be simplified and rephrased so that researchers and IRB's could more readily determine whether their study is eligible for expedited review. In response, the following changes have been made. The condition that the research does not involve "stress" has been deleted; the subsections in the proposed list have been combined to eliminate the distinction between research involving adults and research involving children; research on oral history has been included in response to six comments; and specific research and research techniques have been noted. The category has been reorganized to include research involving motivation, identity, language, communication, cultural beliefs or practices, and social behavior as examples of research on individual or group characteristics or behavior. Methods of conducting such research are now separately listed and have been expanded to include oral history, program evaluation, human factors evaluation, and quality assurance methodologies. As in new category six, the qualification that requires consideration of certain kinds of risks to subjects has been deleted from this category, as it is now a general guiding principle, (C), which applies to the entire list.

Category nine on the proposed list, research previously approved by the convened IRB, received more than 50 comments explicitly applauding this category. It has now been divided into new categories eight and nine. New category eight identifies three situations in which research that is greater than minimal risk and has been initially reviewed by the convened IRB, could undergo subsequent continuing review by the expedited review procedure. The new category nine concerns continuing review of research that is not greater than minimal risk, but had to undergo initial review by a convened IRB because it did not meet the criteria of categories two through seven on this list.

Certain other minimal changes have been made for editorial purposes or to clarify certain words that were used in the proposed list. Accordingly, the list of categories of research which may be reviewed by the IRB through an expedited review procedure is amended as set forth:

Categories of Research That May Be Reviewed by the Institutional Review Board (IRB) Through an Expedited Review Procedure [1]

Applicability

(A) Research activites that (1) present no more than mimimal risk to human subjects, and (2) involve only procedures listed in one or more of the following categories, may be reviewed by the IRB through the expedited review procedure authorized by 45 CFR 46.110 and 21 CFR 56.110. The activities listed should not be deemed to be of minimal risk simply because they are included on this list. Inclusion on this list merely means that the activity is eligible for review through the expedited review procedure when the specific circumstances of the proposed research involve no more than minimal risk to human subjects.

(B) The categories in this list apply regardless of the age of subjects, except as noted.

(C) The expedited review procedure may not be used where identification of the subjects and/or their responses would reasonably place them at risk of criminal or civil liability or be damaging to the subjects' financial standing, employability, insurability, reputation, or be stigmatizing, unless reasonable and appropriate protections will be implemented so that risks related to invasion of privacy and breach of confidentiality are no greater than minimal.

(D) The expedited review procedure may not be used for classified research involving human subjects.

(E) IRBs are reminded that the standard requirements for informed consent (or its waiver, alteration, or exception) apply regardless of the type of review—expedited or convened—utilized by the IRB.

(F) Categories one (1) through seven (7) pertain to both initial and continuing IRB review.

Research Categories

(1) Clinical studies of drugs and medical devices only when condition (a) or (b) is met.

(a) Research on drugs for which an investigational new drug application (21 CFR Part 312) is not required.

(Note: Research on marketed drugs that significantly increases the risks or decreases the acceptability of the risks associated with the use of the product is not eligible for expedited review.)

(b) Research on medical devices for which (i) an investigational device exemption application (21 CFR Part 812) is not required; or (ii) the medical device is cleared/approved for marketing and the medical device is being used in accordance with its cleared/approved labeling.

(2) Collection of blood samples by finger stick, heel stick, ear stick, or venipuncture as follows:

(a) From healthy, nonpregnant adults who weigh at least 110 pounds. For these subjects, the amounts drawn may not exceed 550 ml in an 8 week period and collection may not occur more frequently than 2 times per week; or

(b) from other adults and children,[2] considering the age, weight, and health of the subjects, the collection procedure, the amount of blood to be collected, the frequency with which it will be collected. For these subjects, the amount drawn may not exceed the lesser of 50 ml or 3 ml per kg in an 8 week period and collection may not occur more frequently than 2 times per week.

(3) Prospective collection of biological specimens for research purposes by noninvasive means.

Examples: (a) hair and nail clippings in a nondisfiguring manner; (b) deciduous teeth at time of exfoliation or if routine patient care indicates a need for extraction; (c) permanent teeth if routine patient care indicates a need for extraction; (d) excreta and external secretions (including sweat); (e) uncannulated saliva collected either in an unstimulated fashion or stimulated by chewing gumbase or wax or by applying a dilute citric solution to the tongue; (f) placenta removed at delivery; (g) amniotic fluid obtained at the time of rupture of the membrane prior to or during labor; (h) supra- and subgingival dental plaque and calculus, provided the collection procedure is not more invasive than routine prophylatic scaling of the teeth and the process is accomplished in accordance with accepted prophylactic techniques; (i) mucosal and skin cells collected by buccal scraping or swab, skin swab, or mouth washings; (j) sputum collected after saline mist nebulization.

(4) Collection of data through noninvasive procedures (not involving general anesthesia or sedation) routinely employed in clinical practice, excluding procedures involving x-rays or microwaves. Where medical devices are employed, they must be cleared/approved for marketing. (Studies intended to evaluate the safety and effectiveness of the medical device are not generally eligible for expedited review, including studies of cleared medical devices for new indications.)

Examples: (a) physical sensors that are applied either to the surface of the body or at a distance and do not involve input of significant amounts of energy into the subject or an invasion of the subject's privacy; (b) weighing or testing sensory acuity; (c) magnetic resonance imaging; (d) electrocardiography, electroencephalography, thermography, detection of naturally occurring radioactivity, electroretinography, ultrasound, diagnostic infrared imaging, doppler blood flow, and echocardiography; (e) moderate exercise, muscular strength testing, body composition assessment, and flexibility testing where appropriate given the age, weight, and health of the individual.

(5) Research involving materials (data, documents, records, or specimens) that have been collected or will be collected solely for nonresearch purposes (such as medical treatment or diagnosis).

(Note: Some research in this category may be exempt from the HHS regulations for the protection of human subjects. *45 CFR 46.101(b)(4)*. This listing refers only to research that is not exempt.)

(6) Collection of data from voice, video, digital, or image recordings made for research purposes.

(7) Research on individual or group characteristics or behavior (including, but not limited to, research on perception, cognition, motivation, identity, language, communication, cultural beliefs or practices, and social behavior) or research employing survey, interview, oral history, focus group,

[1] An expedited review procedure consists of a review of research involving human subjects by the IRB chairperson or by one or more experienced reviewers designated by the chairperson from among members of the IRB in accordance with the requirements set forth in 45 CFR 46.110.

[2] Children are defined in the HHS regulations as "persons who have not attained the legal age for consent to treatments or procedures involved in the research, under the applicable law of the jurisdiction in which the research will be conducted." 45 CFR 46.402(a).

program evaluation, human factors evaluation, or quality assurance methodologies.

(Note: Some research in this category may be exempt from the HHS regulations for the protection of human subjects. *45 CFR 46.101(b)(2) and (b)(3).* This listing refers only to research that is not exempt.)

(8) Continuing review of research previously approved by the convened IRB as follows:

(a) Where (i) the research is permanently closed to the enrollment of new subjects; (ii) all subjects have completed all research-related interventions; and (iii) the research remains active only for long-term follow-up of subjects; or

(b) Where no subjects have been enrolled and no additional risks have been identified; or

(c) Where the remaining research activities are limited to data analysis.

(9) Continuing review of research, not conducted under an investigational new drug application or investigational device exemption where categories two (2) through eight (8) do not apply but the IRB has determined and documented at a convened meeting that the research involves no greater than minimal risk and no additional risks have been identified.

Dated: November 2, 1998.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Health Care Financing Administration, HHS.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Health Care Financing Administration (HCFA), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Type of Information Collection Request: Extension of a currently approved collection; *Title of Information Collection:* Team Composition and Workload Report and Supporting Regulations in 42 CFR 493.1–493.2001; *Form No.:* HCFA–0670 (OMB# 0938–0583); *Use:* This form requests resource utilization information on Medicare and Medicaid providers, suppliers, and CLIA laboratories. The data is used to determine Federal reimbursement for all participating health care facilities that accept Medicare and Medicaid beneficiaries.; *Frequency:* As needed; *Affected Public:* State, Local, and Tribal Government, Business or other for-profit, and Not-for-profit institutions; *Number of Respondents:* 53; *Total Annual Responses:* 449,252; *Total Annual Hours:* 71,667.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access HCFA's Web Site address at http://www.hcfa.gov/regs/prdact95.htm, or E-mail your request, including your address, phone number, OMB number, and HCFA document identifier, to Paperwork@hcfa.gov, or call the Reports Clearance Office on (410) 786–1326. Written comments and recommendations for the proposed information collections must be mailed within 60 days of this notice directly to the HCFA Paperwork Clearance Officer designated at the following address: HCFA, Office of Information Services, Security and Standards Group, Division of HCFA Enterprise Standards, Attention: Louis Blank, Room N2–14–26, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

Dated: November 2, 1998.

John P. Burke III,

HCFA Reports Clearance Officer, HCFA Office of Information Services, Security and Standards Group, Division of HCFA Enterprise Standards.

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Health Care Financing Administration.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Health Care Financing Administration (HCFA), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Type of Information Collection Request: Extension of a currently approved collection.

Title of Information Collection: Skilled Nursing Facility (SNF) Resident Assessment MDS Data and Supporting Regulations in 42 CFR 413.343 and 424.32.

Form No.: HCFA–R–250 (OMB# 0938–0739).

Use: Skilled Nursing Facilities (SNF's) are required to submit Resident Assessment Data as described at 42 CFR, 483.20 in the manner necessary to administer the payment rate methodology described in 42 CFR, 413.337. Pursuant to sections 4204(b) and 4214(d) of OBRA 1987, the current requirements related to the submission and retention of resident assessment data for the 5th, 30th and 60th days following admission, necessary to administer the payment rate methodology described in 413.337, is subject to the Paperwork Reduction Act.

Frequency: Monthly.

Affected Public: Business or other for-profit, and Not-for-profit.

Number of Respondents: 17,000.

Total Annual Responses: 204,000.

Total Annual Hours: 3,865,885.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access HCFA's Web Site address at http://www.hcfa.gov/regs/prdact95.htm, or E-mail your request, including your address, phone number, OMB number, and HCFA document identifier, to Paperwork@hcfa.gov, or call the Reports Clearance Office on (410) 786–1326. Written comments and recommendations for the proposed information collections must be mailed within 60 days of this notice directly to the HCFA Paperwork Clearance Officer designated at the following address: HCFA, Office of Information Services, Security and Standards Group, Division of HCFA Enterprise Standards, Attention: Dawn Willinghan, Room N2–14–26, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

Dated: November 2, 1998.

John P. Burke III,

HCFA Reports Clearance Officer, HCFA Office of Information Services, Security and Standards Group, Division of HCFA Enterprise Standards.

BILLING CODE 4120–03–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

[Document Identifier: HCFA–250,254]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Health Care Financing Administration (HCFA), Department of Health and Human Services, has submitted to the Office of Management and Budget (OMB) the following proposal for the collection of information. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Type of Information Collection Request: Extension of a currently approved collection; *Title of Information Collection:* Medicare Secondary Payer Information Collection and Supporting Regulations 42 CFR 489.20; *Form No.:* HCFA–250,254 OMB # 0938–0214; *Use:* This questionnaire will collect information from beneficiaries on health insurance coverage that is primary to Medicare. This information is necessary in order for HCFA to identify those Medicare beneficiaries who have group health insurance that would pay before Medicare, resulting in savings to the Medicare Trust Fund. Medicare Secondary Payer (MSP) is essentially the same concept known in the private insurance industry as coordination of benefits, and refers to those situations where Medicare does not have primary responsibility for paying the medical expenses of a Medicare beneficiary. HCFA contracts with health insuring organizations, herein referred to as intermediaries and carriers, to process Medicare claims. HCFA charges its Medicare intermediaries and carriers with various tasks to detect MSP cases; develops and disseminates tools to enable them to better perform their tasks; and monitors their performance in achievement of their assigned MSP functions. Because intermediaries and carriers are also marketing health insurance products that may have liability when Medicare is secondary, the MSP provisions create the potential for conflict of interest. Recognizing this inherent conflict, HCFA has taken steps to ensure that its intermediaries and carriers process claims in accordance with the MSP provisions, regardless of what other insurer is primary. *Frequency:* One time only; *Affected Public:* Individuals or Households; *Number of Respondents:* 14,204,000; *Total Annual Responses:* 14,204,000; *Total Annual Hours:* 773,240.

To obtain copies of the supporting statement for the proposed paperwork collections referenced above, E-mail your request, including your address and phone number, to Paperwork@hcfa.gov, or call the Reports Clearance Office on (410) 786–1326. Written comments and recommendations for the proposed information collections must be mailed within 30 days of this notice directly to the OMB Desk Officer designated at the following address: OMB Human Resources and Housing Branch, Attention: Allison Eydt, New Executive Office Building, Room 10235, Washington, D.C. 20503.

Dated: October 28, 1998.

John P. Burke III,

HCFA Reports Clearance Officer, HCFA, Office of Information Services, Security and Standards Group, Division of HCFA Enterprise Standards.

BILLING CODE 4120–03–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Inspector General

Program Exclusions: October 1998

AGENCY: Office of Inspector General, HHS.

ACTION: Notice of program exclusions.

During the month of October 1998, the HHS Office of Inspector General imposed exclusions in the cases set forth below. When an exclusion is imposed, no program payment is made to anyone for any items or services (other than an emergency item or service not provided in a hospital emergency room) furnished, ordered or prescribed by an excluded party under the Medicare, Medicaid, and all Federal Health Care programs. In addition, no program payment is made to any business or facility, e.g., a hospital, that submits bills for payment for items or services provided by an excluded party. Program beneficiaries remain free to decide for themselves whether they will continue to use the services of an excluded party even though no program payments will be made for items and services provided by that excluded party. The exclusions have national effect and also apply to all Executive Branch procurement and non-procurement programs and activities.

BILLING CODE 4150–04–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Licensing Opportunity and/or Cooperative Research and Development Agreement ("CRADA") Opportunity: Drug and Method for the Therapeutic Treatment of Leukemia, Lymphoma, Hairy Cell Leukemia, Hodgkin's Disease, and Other Hematologic Malignancies

AGENCY: National Institutes of Health, PHS, DHHS.

ACTION: Notice.

SUMMARY: The NIH is seeking Licensees to further develop, evaluate, and commercialize anti-Tac (Fv)–PE38, also known as LMB2, immunotoxin for the therapeutic treatment of refractory Leukemia, Lymphoma, Hairy Cell Leukemia, Hodgkin's disease and other hematologic malignancies. Anti-Tac (Fv)–PE38 (LMB2) is a recombinant immunotoxin composed of a single-chain Fv form of the anti-Tac (anti-CD25) monoclonal antibody, which binds to the α subunit of the IL2 receptor (also called P55, Tac, or CD25), fused to PE38, a mutant form of *Pseudomonas* Exotoxin A. Anti-TAC (Fv)–PE38 (LMB2) is very cytotoxic to normal or malignant cells expressing IL2 receptors and is being developed for the therapy of chronic lymphocytic leukemia, lymphoma, Hodgkin's disease and Hairy Cell Leukemia. The goal is to move the Anti-Tac (FV)–PE38 (LMB2) immunotoxin into Phase II and III clinical trials. The inventions claimed in USPN 4,892,827, entitled: "Recombinant *Pseudomonas* Exotoxins: Construction of an Active Immunotoxin with Low Side Effects"; USSN 07/865,722, entitled: "Recombinant Antibody-Toxin Fusion Protein"; USPN 5,696,237, entitled: "Recombinant Antibody-Toxin Fusion Protein"; and USSN 08/461,825, entitled: "Recombinant Antibody-Toxin Fusion Protein"; are available for either exclusive or non-exclusive licensing for these aforementioned applications only (in accordance with 35 U.S.C. 207 and 37 CFR Part 404).

ADDRESSES: Questions about licensing opportunities may be addressed to J.R. Dixon, Ph.D., Technology Licensing Specialist, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852–3804; Telephone: (301)–496–7056 ext. 206; Facsimile: (301)–402–0220; E-Mail: "DixonJ@OD.NIH.GOV". Information about Patent Applications and pertinent information not yet publicly described can be obtained under the terms of a Confidential Disclosure Agreement. Respondees interested in licensing the invention(s) will be required to submit an "Application for License to Public Health Service Inventions".

Depending upon the mutual interests of the Licensee(s) and the NCI, a Cooperative Research and Development Agreement (CRADA) to collaborate to improve the properties of the Anti-Tac (Fv)–PE38 may also be negotiated. Proposals and questions about this CRADA opportunity may be addressed to Dr. Patrick Twomey, Technology Development Specialist, Technology Development & Commercialization Branch, National Cancer Institute, 6120 Executive Plaza South-Room 450, Rockville, Maryland 20852; Telephone: (301)–496–0477; Facsimile: (301)–402–2117; email: twomeyp@OTD.NCI.NIH.GOV. Respondees interested in submitting a CRADA Proposal should be aware that it may be necessary to secure a license to the above-mentioned patent rights in order to commercialize products arising from a CRADA.

EFFECTIVE DATE: Respondees interested in licensing the invention(s) will be required to submit an "Application for License to Public Health Service Inventions" on or before January 8, 1999 for priority consideration.

Interested CRADA collaborators must submit a confidential proposal summary to the NCI [attention Dr. Patrick Twomey at the aforementioned address] on or before January 8, 1999,

for consideration. Guidelines for preparing full CRADA proposals will be communicated shortly thereafter to all respondents with whom initial confidential discussions will have established sufficient mutual interest. CRADA proposals submitted thereafter may be considered if a suitable CRADA Collaborator has not been selected.

SUPPLEMENTARY INFORMATION: In a Phase I trial, patients with hematologic malignancies and CD25 expression on malignant cells based on pre-screening immunocytochemistry and radiolabeled binding studies were given anti-Tac(Fv)–PE38 (LMB2) immunotoxin intravenously qod x 3. Thirty-two (32) patients received a total of fifty-three (53) cycles. Grade III non-hematologic toxicity was considered dose-limiting. Only 5 of the 32 patients developed significant neutralizing antibodies after the first cycle. The $T_{1/2}$ was 3–7 hours. Partial responses occurred in 5 patients including cutaneous T-cell Lymphoma, hairy cell leukemia, and chronic lymphocytic leukemia. Marginal responses were observed in two patient with Hodgkin's disease and in one patient with mantle cell lymphoma. Thus LMB–2 has activity in several forms of CD25+hematologic malignancies and is relatively non-immunogenic in this patient population.

A Cooperative Research and Development Agreement or CRADA means the anticipated joint agreement to be entered into by NCI pursuant to the Federal Technology Transfer Act of 1986 and Executive Order 12591 of April 10, 1987 as amended by the National Technology Transfer Advancement Act of 1995 to collaborate to improve the properties of Anti-Tac(Fv)–PE38. The expected duration of the CRADA would be from one (1) to five (5) years.

The role of the NCI in the CRADA may include, but not be limited to:

1. Providing sufficient amounts of anti-Tac (Fv)–PE38 (LMB2) for clinical trails.
2. Conducting Phase 2 and Phase 3 clinical trials.
3. Providing significant intellectual, scientific, and technical expertise or experience to the research project.
4. Planning research studies and interpreting research results.
5. Providing technical and/or financial support to facilitate scientific goals and for further design of applications of the technology outlined in the agreement.
6. Incorporating the immunotoxin into formulations in order to increase the therapeutic efficacy and decrease immunogenicity.
7. Providing immunotoxin for laboratory and animal studies.
8. Publishing research results.

The role of the CRADA Collaborator may include, but not be limited to:

1. Providing sufficient amounts of anti-Tac (Fv)–PE38 (LMB2) for clinical trials.
2. Conducting Phase 2 and Phase 3 clinical trials.
3. Providing significant intellectual, scientific, and technical expertise or experience to the research project.
4. Planning research studies and interpreting research results.
5. Providing samples of the subject compounds to create, optimize, test and develop targeted drugs for clinical studies.
6. Providing technical and/or financial support to facilitate scientific goals and for further design of applications of the technology outlined in the agreement.
7. Incorporating the immunotoxin into formulations in order to increase the therapeutic efficacy and decrease immunogenicity.
8. Providing immunotoxin for laboratory and animal studies.
9. Publishing research results.

Selection criteria for choosing the CRADA Collaborator may include, but not be limited to:

1. The ability to collaborate with NCI on further research and development of this technology. This ability can be demonstrated through experience and expertise in this or related areas of technology indicating the ability to contribute intellectually to ongoing research and development.
2. The demonstration of adequate resources to perform the research and development of this technology (e.g., facilities, personnel and expertise) and accomplish objectives according to an appropriate timetable to be outlined in the CRADA Collaborator's proposal.
3. The willingness to commit best effort and demonstrated resources to the research and development of this technology, as outlined in the CRADA Collaborator's proposal.
4. The demonstration of expertise in the commercial development and production of products related to this area of technology.
5. The level of financial support the CRADA Collaborator will provide for CRADA-related Government activities.
6. The demonstration of expertise pertinent to the development of models to evaluate and improve the efficacy of the anti-Tac (Fv)–PE38 (LMB2) immunotoxin for the treatment of leukemias and lymphomas.
7. The demonstration of expertise in the formulation of drugs.
8. The willingness to cooperate with the NCI in the timely publication of research results.
9. The agreement to be bound by the appropriate DHHS regulations relating to human subjects, and all PHS policies relating to the use and care of laboratory animals.
10. The willingness to accept the legal provisions and language of the CRADA with only minor modifications, if any. These provisions govern the distribution of patent rights to CRADA inventions. Generally, the rights of ownership are retained by the organization that is the employer of the inventor, with (1) the grant of a license for research and other Government purposes to the Government when the CRADA Collaborator's employee is the sole inventor, or (2) the grant of an option to elect an exclusive or nonexclusive license to the CRADA Collaborator when the Government employee is the sole inventor.

Dated: October 31, 1998.

Kathleen Sybert,

Acting Director, Technology Development and Commercialization Branch, National Cancer Institute, National Institutes of Health.

Dated: October 6, 1998.

Jack Spiegel,

Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

Meeting of the Cancer Advisory Panel for Complementary and Alternative Medicine

Notice is hereby given of the first meeting of the Cancer Advisory Panel for Complementary and Alternative Medicine (CAP), November 16, 1998, at the DoubleTree Hotel, 1750 Rockville Pike, Rockville, Maryland 20852. The meeting is scheduled from 8:30 am to 5 pm and is open to the public. Attendance by the public will be limited to space available.

The Panel's primary responsibility is to provide expert review and evaluation of summaries of evidence for complementary and alternative medicine cancer claims by practitioners. The information compiled and evaluated by each member of the Panel will be provided to the Office of Alternative Medicine's chartered Alternative Medicine Program Advisory Council (AMPAC) to be used during its deliberations.

The agenda includes: (1) An overview of the structure and role of the CAP; (2) a presentation on the National Cancer Institute-funded research mechanism; (3) an overview of current Office of Alternative Medicine (OAM) projects; (4) a discussion of potential future cancer clinical trials initiatives related to complementary and alternative medicine; and (5) a public comment session.

The public comment session is scheduled from 3 p.m. to 5 p.m. Each speaker will be permitted 5 minutes for their presentation. Interested individuals and representatives of organizations are requested to notify D. Geoffrey Cheung, Office of Alternative Medicine, NIH, 31 Center Drive, (MSC 2182), Building 31, Room 5B37, Bethesda, MD 20892, (301) 594–2013, FAX: (301) 594–6757. Letters of intent to present comments, along with a brief description of the organization represented, should be received no later than 5:00 p.m. on Thursday, November 12. Only one representative of an organization may present oral comments. Any person attending the meeting who does not request an opportunity to speak in advance of the meeting may be considered for oral presentation, if time permits, and at the discretion of the Chairperson. In addition, written comments may be submitted to Dr. Geoffry Cheung at the address listed above up to ten days following the meeting.

For additional information please contact Ms. Odessa Colvin, Program Assistant, OAM, 31 Center Drive, MSC 2182, Building 31, Room 5B37, Bethesda, Maryland, 20892, (301–435–5175). Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact Ms. Colvin in advance of the meeting.

Dated: November 2, 1998.

Ruth L. Kirschstein,

Deputy Director, National Institute of Health.

National Institutes of Health

National Cancer Institute; Notice of Meeting

Pursuant to section 10(a) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of a meeting of the President's Cancer Panel.

The meeting will be open to the public, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

Nome of Committee: President's Cancer Panel.

Date: November 17, 1998.

Time: 8 AM to 5 PM.

Agenda: Cancer Prevention in the 21st Century.

Place: Arizona Cancer Center, Kiewit Conference Room, 1515 North Campbell Avenue, Room 2851, Tucson, AZ 85724.

Contact Person: Maureen O. Wilson, Executive Secretary, National Cancer Institute, National Institutes of Health, 31 Center Drive, Building 31, Room 4A48, Bethesda, MD 20892.

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

National Cancer Institute; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Nome of Committee: National Cancer Institute Review Group, Subcommittee D—Clinical Studies.

Date: November 30–December 1, 1998.

Time: 8 AM to 6 PM.

Agenda: To review and evaluate grant applications.

Place: Holiday Inn—Silver Spring, 8777 Georgia Avenue, Silver Spring, MD 20910.

Contact Person: Martin H. Goldrosen, Scientific Review Administrator, Grants Review Branch, Division of Extramural Activities, National Cancer Institute, National Institutes of Health, 6130 Executive Boulevard, room 635 C, Rockville, MD 20852–7408, (301) 496–7930.

Protection of Human Subjects: Categories of Research That May Be Reviewed by the Institutional Review Board (IRB) Through an Expedited Review Procedure

AGENCY: Office for Protection from Research Risks, National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: On November 10, 1997, the Office for Protection from Research Risks (OPRR), in consultation with the Food and Drug Administration (FDA), requested written comments relating to the proposed republication of the list that identifies certain research activities involving human subjects which may be reviewed by the Institutional Review Board (IRB) through the expedited review procedure authorized in 45 CFR 46.110. The comment period closed on March 10, 1998. OPRR and FDA received a combined total of 108 comments. After a review of the comments, OPRR and FDA are now simultaneously publishing identical revised lists of categories of research activities that may be reviewed by the IRB through the expedited review procedure.

EFFECTIVE DATES: The revised list is effective as of November 9, 1998.

FOR FURTHER INFORMATION CONTACT: Michele Russell-Einhorn, Director of Regulatory Affairs, Office for Protection from Research Risks (OPRR), National Institutes of Health, 6100 Executive Blvd., Suite 3B01, Rockville, MD 20892–7507 or telephone (301) 435–5649 (not a toll-free number).

SUPPLEMENTARY INFORMATION: The Federal Policy (Common Rule) for the Protection of Human Subjects was published in the **Federal Register** on June 18, 1991 (56 FR 28003) and is employed by 17 Executive Branch agencies. This Federal Policy requires adherence to certain requirements by Federal agencies [1] and institutions receiving support from those agencies for research activities involving human subjects. The Federal Policy has three cornerstones: review of any research involving human subjects by an IRB with limited exceptions, informed consent of all research subjects; and formal, written assurance of institutional compliance with the Policy. The Department of Health and Human Services' (HHS) codification of the Federal Policy can be found at 45 CFR Part 46, Subpart A.

Section _____.110 of the Federal Policy provides for expedited review procedures for certain categories of research involving no more than minimal risk, and for minor changes in approved research. This same section gives the Secretary, HHS, the authority to amend and republish the expedited review list as needed after consultation with the departments and agencies that are subject to the Federal Policy. The expedited review list that is referenced in the Federal Policy was originally published by the Secretary, HHS in 1981 (46 FR 8392, 46 FR 8980). It listed categories of research that could be reviewed by the IRB through an expedited review procedure. The FDA also references an expedited review list (21 CFR Part 56) for matters under FDA's jurisdiction. The HHS and FDA lists have differed slightly, in that item nine (9) on the 1981 HHS expedited review list regarding certain types of behavioral research is not included in the list referenced in 21 CFR 56.110.

The comments received in response to the OPRR and FDA proposed revision of the 1981 expedited review list that was published on November 10, 1997 (62 FR 60607) overwhelmingly supported the proposed revision of the list. Three commenters suggested that there should be no expedited review available at all. OPRR and FDA disagree with these three comments and believe that expedited review is an appropriate part of the IRB review process. In addition, a deletion of the expedited review process would require a regulatory change to Section 110 which is beyond the scope of this revision. Several commenters suggested changing the exemptions found at Section 101(b), a topic also outside the scope of this revision.

[1] The following agencies have adopted the Common Rule: Department of Agriculture, Department of Energy, National Aeronautics and Space Administration, Department of Commerce, Consumer Product Safety Commission, International Development Cooperation Agency-Agency for International Development, Department of Housing and Urban Development, Department of Justice, Department of Defense, Department of Health and Human Services, Department of Education, Department of Veterans Affairs, Environmental Protection Agency, National Science Foundation, Department of Transportation, Central Intelligence Agency, Social Security Administration.

The following discussion summarizes the 108 comments received and the resulting changes. In response to over forty comments, the introductory paragraph to the 1981 list has been reformatted into five general principles. The parenthetical in the introductory sentence in the 1981 list "(carried out through standard methods)" has been deleted in response to comments that this phrase served no particular purpose.

The reformatted general principles are set forth in paragraphs (A) through (F). Paragraph (C) makes it clear that the IRB must consider, for all categories, whether identification of the subjects or their responses would reasonably place them at risk of criminal or civil liability or be damaging to the subjects' financial standing, employability, insurability, reputation, or be stigmatizing unless reasonable and appropriate protections will be implemented so that risks related to invasion of privacy and breach of confidentiality are no greater than minimal. OPRR does not consider this to be a new or additional consideration. These concerns have always been an implicit part of the determination of whether an activity is a minimal risk activity. The words "insurability" and "be stigmatizing" have been added and are designed to serve as an aid to IRBs when genetic research is presented for review in an expedited review procedure. These changes were made in response to concerns raised in several comments that genetic testing may have consequences beyond those normally considered by the IRB.

Consistent with two comments, paragraph (D) prohibits expedited review for classified research involving human subjects. This is also in accordance with a March 27, 1997 Presidential Memorandum which proposed the elimination of an expedited review procedure for all classified research involving human subjects.

Paragraph (E) serves as a reminder to IRBs that informed consent and expedited review are two totally separate issues. This responds to concerns that allowing an increase in the scope of research eligible for expedited review would result in more waivers of informed consent. Research reviewed pursuant to an expedited review procedure is not necessarily eligible for waiver or alteration of informed consent. All research, whether reviewed by the full IRB or by way of expedited review, must conform to the applicable requirements for obtaining and documenting prospective informed consent, unless the research meets the conditions for waiving, excepting, or otherwise altering the informed consent requirements that are set forth in 45 CFR 46.116 and 117, 21 CFR 50.23 and 24, or 21 CFR 56.109(c).

Category one (1) preserves category ten (10) on the 1981 list. It also contains a new sentence that addresses the availability of the expedited review procedure for marketed drugs in research as well as specific citations in response to five comments that raised questions about these issues.

The following changes have been made to category two (2) in response to over 45 comments which supported enhanced expedited review concerning collection of blood, but which suggested certain refinements. Collection of blood now includes finger stick, heel stick, or ear stick as well as venipuncture. The four proposed subcategories were recombined as two separate subcategories. The critical issues to be considered by the IRB include weight, physical condition, and amount of blood to be collected. The first subcategory (a) concerns healthy nonpregnant adults. The second subcategory, (b), concerns all other adults and children. For this second subcategory, the IRB will need to make certain judgments including: consideration for the age, weight, and health of the subjects in light of the amount of blood to be collected, the frequency with which it will be collected, and the collection procedure. The final sentence of subcategory (b) reads: For these individuals, the amount drawn may not exceed the lesser of 50 ml or 3 ml per kg in an 8 week period and collection may not occur more than 2 times per week. While an expedited review of research involving pregnant women is permissible under the revised section, this last sentence makes it clear that the amount of blood that can be drawn is subject to limitations greater than those on healthy nonpregnant adults. Also, in response to public comment, the phrase "medically vulnerable adults" that was proposed in November 1997 has been deleted.

In response to more than 24 comments, category three (3) (previously category one (1) in the 1981 list) has been changed in the following manner. The words "noninvasive means" have been added to clarify the manner of collection of research materials; and, the procedures outlined are set out as examples to the IRB of the types of procedures that could fall within this category.

Categories four (4) and five (5) on the proposed list have been combined into one new category five (5) on the 1998 list. This new section is added in response to comments that raised questions about the relationship of proposed categories four (4) and five (5) to exempt research and about separating out existing and prospectively collected materials. The term "nonresearch purposes" was maintained in new category five (5) to describe the origins of the research materials. An explanatory note has been added to categories five (5) and seven (7) to clarify that some research described in these categories may be exempt from IRB review under 45 CFR 46.101(b) of the HHS regulations for the protection of human subjects (there is no comparable exemption provision in the FDA regulations). Thus, the listing of those categories refers only to nonexempt research.

Category six (6), proposed in November 1997, is now category four (4) on the 1998 list and addresses the collection of data through noninvasive procedures. The words "noninvasive procedures" have been added and apply to all procedures that would fall within this category. Because of several comments that raised concerns about MRIs and the use of anesthesia and sedation, expedited review would not be allowed for any procedure employing either of these. In response to more than 24 comments, this category lists procedures as examples for the IRB of the types of procedures that would qualify for expedited review.

Category seven (7) on the list proposed in November 1997 is now category six (6) on the 1998 list and deals with the collection of data from voice, digital, or image recordings. The qualification that was proposed in November of 1998 requiring consideration of certain risks to subjects is now a general guiding principle. It has been incorporated into the general Applicability section in response to several comments that questioned limiting this consideration to this type of research.

Category eight (8) on the proposed list is now category seven (7) on the revised list. In response to over 30 comments, the following changes have been made. The word "stress" has been deleted; the subsections in the proposed list have been combined; research on oral history has been included in response to approximately six comments; and specific research and research techniques have been noted. As in new category six (6), the qualification that requires consideration of certain kinds of risks to subjects has been deleted as it is now a general guiding principle for the entire list.

Category nine (9) on the proposed list received more than 50 comments

explicitly applauding this additional category. It has been divided into two categories. Category eight (8) identifies three situations in which research that is greater than minimal risk and has been initially reviewed by the convened IRB, could undergo subsequent continuing review by the expedited review procedure. New category nine (9) concerns continuing review of research that is not greater than minimal risk but had to undergo initial review by a convened IRB because it did not meet the criteria of categories two (2) through seven (7) on the list.

Certain other minimal changes have been made for editorial purposes or to clarify certain words that were used in the proposed list. Accordingly, the list of categories of research which may be reviewed by the IRB through the expedited review procedure is amended as set forth below.

Categories of Research That May Be Reviewed by the Institutional Review Board (IRB) Through an Expedited Review Procedure [1]

Applicability

(A) Research activities that (1) present no more than minimal risk to human subjects, and (2) involve only procedures listed in one or more of the following categories, may be reviewed by the IRB through the expedited review procedure authorized by 45 CFR 46.110 and 21 CFR 56.110. The activities listed should not be deemed to be of minimal risk simply because they are included on this list. Inclusion on this list merely means that the activity is eligible for review through the expedited review procedure when the specific circumstances of the proposed research involve no more than minimal risk to human subjects.

(B) The categories in this list apply regardless of the age of subjects, except as noted.

(C) The expedited review procedure may not be used where identification of the subjects and/or their responses would reasonably place them at risk of criminal or civil liability or be damaging to the subjects' financial standing, employability, insurability, reputation, or be stigmatizing, unless reasonable and appropriate protections will be implemented so that risks related to invasion of privacy and breach of confidentiality are no greater than minimal.

(D) The expedited review procedure may not be used for classified research involving human subjects.

(E) IRBs are reminded that the standard requirements for informed consent (or its waiver, alteration, or exception) apply regardless of the type of review—expedited or convened—utilized by the IRB.

(F) Categories one (1) through seven (7) pertain to both initial and continuing IRB review.

Research Categories

(1) Clinical studies of drugs and medical devices only when condition (a) or (b) is met.

(a) Research on drugs for which an investigational new drug application (21 CFR Part 312) is not required. (Note: Research on marketed drugs that significantly increases the risks or decreases the acceptability of the risks associated with the use of the product is not eligible for expedited review.)

(b) Research on medical devices for which (i) an investigational device exemption application (21 CFR Part 812) is not required; or (ii) the medical device is cleared/approved for marketing and the medical device is being used in accordance with its cleared/approved labeling.

(2) Collection of blood samples by finger stick, heel stick, ear stick, or venipuncture as follows:

(a) from healthy, nonpregnant adults who weigh at least 110 pounds. For these subjects, the amounts drawn may not exceed 550 ml in an 8 week period and collection may not occur more frequently than 2 times per week; or (b) from other adults and children,[2] considering the age, weight, and health of the subjects, the collection procedure, the amount of blood to be collected, and the frequency with which it will be collected. For these subjects, the amount drawn may not exceed the lesser of 50 ml or 3 ml per kg in an 8 week period and collection may not occur more frequently than 2 times per week.

(3) Prospective collection of biological specimens for research purposes by noninvasive means.

Examples: (a) Hair and nail clippings in a nondisfiguring manner; (b) deciduous teeth at time of exfoliation or if routine patient care indicates a need for extraction; (c) permanent teeth if routine patient care indicates a need for extraction; (d) excreta and external secretions (including sweat); (e) uncannulated saliva collected either in an unstimulated fashion or stimulated by chewing gumbase or wax or by applying a dilute citric solution to the tongue; (f) placenta removed at delivery; (g) amniotic fluid obtained at the time of rupture of the membrane prior to or during labor; (h) supra- and subgingival dental plaque and calculus, provided the collection procedure is not more invasive than routine prophylactic scaling of the teeth and the process is accomplished in accordance with accepted prophylactic techniques; (i) mucosal and skin cells collected by buccal scraping or swab, skin swab, or mouth washings; (j) sputum collected after saline mist nebulization.

(4) Collection of data through noninvasive procedures (not involving general anesthesia or sedation) routinely employed in clinical practice, excluding procedures involving x-rays or microwaves. Where medical devices are employed, they must be cleared/approved for marketing. (Studies intended to evaluate the safety and effectiveness of the medical device are not generally eligible for expedited review, including studies of cleared medical devices for new indications.)

Examples: (a) Physical sensors that are applied either to the surface of the body or at a distance and do not involve input of significant amounts of energy into the subject or an invasion of the subject's privacy; (b) weighing or testing sensory acuity; (c) magnetic resonance imaging; (d) electrocardiography, electroencephalography, thermography, detection of naturally occurring radioactivity, electroretinography, ultrasound, diagnostic infrared imaging, doppler blood flow, and echocardiography; (e) moderate exercise, muscular strength testing, body composition assessment, and flexibility testing where appropriate given the age, weight, and health of the individual.

(5) Research involving materials (data, documents, records, or specimens) that have been collected or will be collected solely for nonresearch purposes (such as medical treatment or diagnosis). (Note: Some research in this category may be exempt from the HHS regulations for the protection of human subjects. *45 CFR 46.101(b)(4).* This listing refers only to research that is not exempt.)

(6) Collection of data from voice, video, digital, or image recordings made for research purposes.

(7) Research on individual or group characteristics or behavior (including, but not limited to, research on perception, cognition, motivation, identity, language, communication, cultural beliefs or practices, and social behavior) or research employing survey, interview, oral history, focus group, program evaluation, human factors evaluation, or quality assurance methodologies. (Note: Some research in this category may be exempt from the HHS regulations for the protection of human subjects *45 CFR 46.101 (b)(2) and (b)(3).* This listing refers only to research that is not exempt.)

(8) Continuing review of research previously approved by the convened IRB as follows:

(a) Where (i) the research is permanently closed to the enrollment of new subjects; (ii) all subjects have completed all research-related interventions; and (iii) the research remains active only for long-term follow-up of subjects; or

(b) Where no subjects have been enrolled and no additional risks have been identified; or

(c) Where the remaining research activities are limited to data analysis.

(9) Continuing review of research, not conducted under an investigational new drug application or investigational device exemption where categories two (2) through eight (8) do not apply but the IRB has determined and documented at a convened meeting that the research involves no greater than minimal risk and no additional risks have been identified.

Gary B. Ellis,

Director, Office for Protection from Research Risks.

[FR Doc. 98–29749 Filed 11–6–98; 8:45 am]

BILLING CODE 4140–01–P

[1] An expedited review procedure consists of a review of research involving human subjects by the IRB chairperson or by one or more experienced reviewers designated by the chairperson from among members of the IRB in accordance with the requirements set forth in 45 CFR 46.110.

[2] Children are defined in the HHS regulations as "persons who have not attained the legal age for consent to treatments or procedures involved in the research, under the applicable law of the jurisdiction in which the research will be conducted." 45 CFR 46.402(a).

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–3918–N–16]

Privacy Act of 1974; Notice of a Computer Matching Program

AGENCY: Office of the Assistant Secretary for Administration, HUD.

ACTION: Notice of a Computer Matching Program—HUD and the Internal Revenue Service (IRS).

SUMMARY: In accordance with the Privacy Act of 1974 (5 U.S.C. 552a), as amended by the Computer Matching and Privacy Protection Act of 1988 (Pub. L. 100–503), Office of Management and Budget (OMB) Guidelines on the Conduct of Matching Programs (54 FR 25818 (June 19, 1989)), and OMB Bulletin 89–22, "Instructions on Reporting Computer Matching Programs to the Office of Management (OMB), Congress and the Public," the Department of Housing and Urban Development (HUD) is issuing a public notice of its intent to conduct a computer matching program with the Internal Revenue Service (IRS). Under the terms of the agreement IRS agrees to disclose to HUD taxpayer mailing addresses as authorized by the Commissioner or her delegate pursuant to Section 6103(m)(2) of the Internal Revenue Code (IRC) for use in locating individuals to collect or compromise Federal claims in accordance with 31 United States Code (U.S.C.) 3711, 3717 and 3718. This program is called the Taxpayer Address Request Program (TAR). It was established by the IRS to facilitate the retrieval of taxpayer mailing addresses from the individual Master File on a volume basis. The volume of addresses and the method in which the IRS maintains the information make computer matching the most feasible method of extracting the data for disclosure to other agencies. Using the TAR computer matching program, current addresses can be obtained from the IRS within a one-week period, thereby avoiding the expenditure of substantial Federal resources in the manual execution of a matching process or investigations by a large workforce to ascertain the current address of individuals against whom the agency has a claim or indebtedness.

DATES: *Effective date:* Computer matching is expected to begin 40 days after publication of this notice in the **Federal Register** (December 21, 1998), unless comments are received which will result in a contrary determination, or 40 days from the date a computer matching agreement is signed, whichever is later.

COMMENTS DUE BY: December 9, 1998.

ADDRESSES: Interested persons are invited to submit comments regarding this notice to the Rules Docket Clerk, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying between 7:30 a.m. and 5:30 p.m. weekdays at the above address.

FOR PRIVACY ACT INFORMATION AND FOR FURTHER INFORMATION FROM RECIPIENT AGENCY CONTACT: Jeanette Smith, Departmental Privacy Act Officer, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410, telephone number (202) 708–2374 or FAX (202) 708–3577. (These are not toll-free numbers.)

FOR FURTHER INFORMATION FROM SOURCE AGENCY CONTACT: M.R. Taylor, Internal Revenue Service, Office of FedState Relations, 1111 Constitution Avenue, NW, Washington, DC 20224, telephone number (202) 622–5145 or Fax (202) 622–3041. (These are not toll-free numbers.)

Reporting

In accordance with Pub. L. 100–503, the Computer Matching and Privacy Protection Act of 1988, as amended, and Office of Management and Budget (OMB), Bulletin 89–22, "Instructions on Reporting Computer Matching Programs to the Office of Management and Budget (OMB), Congress and the Public;" copies of this notice and report are being provided to the Committee on Government Reform and Oversight of the House of Representatives, the Committee on Governmental Affairs of the Senate, and the Office of Management and Budget.

Authority

The matching program will be conducted under the authority of section 6103(m)(2) of the Internal Revenue Code and 31 United States Code 3711, 3717 and 3718.

Objectives to be Met by the Matching Program

HUD expects that this computer matching program will enable it to quickly and effectively identify and locate individual debtors, and to obtain current mailing addresses of defaulted debtors.

Records to be Matched

HUD will utilize its system of records entitled, Accounting Records, HUD/Dept-2. HUD will submit approximately 40,000 records annually of individuals with outstanding Federal debts for matching purposes. These records are extracted from the Privacy Act system of records, HUD/Dept-2, Accounting Records, maintained in the following programs and automated systems: (1) Title I—Debt Management Collection Systems; (2) Section 312—Loan Mortgage System; and (3) Departmental Claims—Delinquent Debt Control System. The IRS will extract taxpayer address information from Privacy Act System of Records: Individual Master File, Treas/IRS 24.030, maintained at the Martinsburg Computing Center, Martinsburg, WV. This file contains approximately 20 million records of taxpayers who have filed U.S. Individual Income Tax returns.

Notice Procedures

The IRS provides direct notice to taxpayers in the instructions to Form 1040, 1040A, and 1040EZ that information provided on U.S. Individual Income Tax Returns may be given to other Federal agencies, as provided by law. HUD agrees to ensure that each applicant, at the time of application, receives written notice that the information provided on the application is subject to verification through computer matching with other Federal agencies for the purpose of locating delinquent debtors. Direct notice consists of appropriate language printed on its application forms or a separate handout provided to the individual.

Categories of Records/Individuals Involved

The debtor records include these data elements: SSN, claim number, program code, and indication of indebtedness. Categories of records include: records of claims and defaults, repayment agreements, credit reports, financial statements, and records of foreclosures.

Period of the Match

Matching will begin at least 40 days from the date copies of the signed (by both Data Integrity Boards) computer matching agreement are sent to both Houses of Congress or at least 40 days from the date this Notice is published in the **Federal Register**, whichever is later, providing no comments are received which will result in a contrary determination. The matching program will be in effect and continue for 18 months with an option to renew for 12 additional months unless one of the parties to the agreement advises the other in writing to terminate or modify the agreement.

Dated: October 29, 1998.

Leslie H. Graham, Jr.,

Deputy Director, Office of Information Technology.

[FR Doc. 98–29983 Filed 11–6–98; 8:45 am]

BILLING CODE 4210–01–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Availability of an Environmental Assessment and Receipt of an Application for an Incidental Take Permit for the Nuevo Energy Company/ Torch Operating Company Habitat Conservation Plan, Kern County, CA

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and receipt of application.

SUMMARY: This notice advises the public that Nuevo Energy Company (Nuevo) and Torch Operating Company (Torch) have applied to the Fish and Wildlife Service (Service) for an incidental take permit pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973, as amended. The proposed permit would authorize the incidental take of 5 listed animal species and the future incidental take, should it become necessary, of 4 listed plant species, 9 unlisted animal species, and 7 unlisted plant species, resulting from oil and gas production in Kern County, California. The permit would be in effect for 30 years.

The Service also announces the availability of an Environmental Assessment for the incidental take permit application. The application includes the proposed Habitat Conservation Plan (Plan) fully describing the proposed project and mitigation and the accompanying Implementing Agreement. This notice is provided pursuant to section 10(a) of the Endangered Species Act and National Environmental Policy Act regulations (40 CFR 1506.6). All comments received, including names and addresses, will become part of the official administrative record and may be made available to the public.

DATES: Written comments on the permit application and Environmental Assessment should be received on or before December 9, 1998.

ADDRESSES: Comments regarding the application or adequacy of the Environmental Assessment, Habitat Conservation Plan, and Implementing Agreement should be addressed to the Field Supervisor, Fish and Wildlife Service, Sacramento Fish and Wildlife Office, 3310 El Camino, Suite 130, Sacramento, California 95821–6340. Individuals wishing copies of the application or Environmental Assessment for review should immediately contact the above office. Documents also will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Susan Jones or Peter Cross, Sacramento Fish and Wildlife Office, (916) 979–2728.

SUPPLEMENTARY INFORMATION: Section 9 of the Endangered Species Act and Federal regulation prohibit the "taking" of fish and wildlife species listed as endangered or threatened, respectively. That is, no one may harass, harm, pursue, hunt, shoot, wound, kill, trap, capture or collect listed animal species, or attempt to engage in such conduct (16 U.S.C. 1538). However, the Service may, under limited circumstances, issue permits to take listed fish and wildlife species incidental to, and not the purpose of, otherwise lawful activities. Regulations governing permits for threatened species are promulgated in 50 CFR 17.32; regulations governing permits for endangered species are promulgated in 50 CFR 17.22.

Section 9 of the Endangered Species Act generally does not prohibit take of federally listed plants on private lands unless the take or action resulting in take would violate State law. Nuevo/Torch have requested a permit for plants to the extent that their take would be a violation of the Endangered Species Act. Impacts to listed plants also must be addressed in the intra-Service consultation required pursuant to section 7(a) of the Endangered Species Act.

Background

The Plan addresses parcels totaling approximately 21,800 acres in western Kern County to which Nuevo/Torch holds various rights. The Plan does not address Nuevo/Torch mineral interests on Bureau of Land Management land. While the Plan Area covered by the Nuevo/Torch Plan is 21,800 acres, Nuevo/Torch estimates that only about 1,700 acres will be subject to permanent disturbance. The proposed activities addressed by the Plan include oil and gas production operations; construction, maintenance and/or abandonment of oil field equipment; maintenance and inspection of oil field equipment as required by certain regulatory agencies; and any activity required to mitigate an emergency situation, or effects of an emergency situation.

The listed species addressed in the proposed permit are the giant kangaroo rat (*Dipodomys ingens*), Tipton kangaroo rat (*Dipodomys nitratoides nitratoides*), blunt-nosed leopard lizard (*Gambelia silus*), San Joaquin kit fox (*Vulpes macrotis mutica*), and the California condor (*Gymnogyps californianus*), federally listed as endangered. The proposed permit also would authorize future incidental take of the San Joaquin antelope squirrel (*Ammospermophilus nelsoni*), short-nosed kangaroo rat (*Dipodomys nitrotoides brevinasus*), western burrowing owl (*Athene cunicularia hypugea*), San Joaquin LeConte's thrasher (*Toxostoma lecontei macmillanorum*), mountain plover (*Charadrius montanus*), California horned lizard (*Phynosoma coronatum frontale*), San Joaquin coachwhip (*Masticophis flagellum ruddocki*), Tulare grasshopper mouse (*Onychomys torridus tularensis*), and San Joaquin pocket mouse (*Perognothus inornotus inornatus*), currently unlisted species, should any of them become listed under the Endangered Species Act in the future while the permit is in effect. Nuevo/Torch has not requested authority under the Endangered Species Act for direct take of California condor. Rather, the applicants have requested that authority be given for minimal harassment of California condors that may inadvertently result if condors ever occur in the Plan Area.

Additionally, the Plan addresses avoidance, minimization, and mitigation for impacts to listed and unlisted plant species. These species are the Kern mallow (*Eremalche kernensis*), San Joaquin woolly-threads (*Lembertia congdonii*), and Bakersfield cactus (*Opuntia basilaris treleasei*), federally listed as endangered, and Hoover's eriastrum (*Eriastrum hooveri*), federally listed as threatened. The unlisted plant species are the recurved larkspur (*Delphinium recurvatum*), slough thistle (*Cirsium crassicaule*), oil neststraw (*Stylocline citroleum*), heartscale (*Atriplex cordulata*), Lost Hills crownscale (*Atriplex vallicola*), lesser saltscale (*Atriplex minuscula*), and brittlescale (*Atriplex depressa*). Collectively the listed and unlisted animal and plant species addressed in the Plan are referred to as the "covered species" for the Nuevo/Torch lands.

The Nuevo/Torch Plan is a three-fold program which includes: (1) Compensation, (2) avoidance and minimization of take, and (3) management of conservation lands. The compensation strategy for take resulting from the permanent disturbance of habitat is based on dividing Nuevo/Torch lands into four zones by a combination of habitat quality and land use. These zones are the Oil Zone, White Zone, Green Zone, and Red Zone, and are based on conservation value. The Oil Zone includes land within the administrative oil and gas field boundaries used by the California Division of Oil, Gas and Geothermal Resources. Within the Oil Zone, there is an inner area, known as the Oil Zone-Productive Area, where the currently producing wells are located and, because of the high intensity of production, where habitat value is generally low. That part of the Oil Zone which is outside the Oil Zone-Productive Area is known as the Oil Zone-Step-out Area. The Oil Zone-Step-out Area, where future oil development may occur, has much more limited current development and generally higher habitat value than the Oil Zone-Productive Area. The White Zone includes agricultural land and other areas with low habitat value; the Green Zone includes land with moderate habitat value that provides valuable linkage and corridor routes; and the Red Zone includes land with high habitat value.

While the habitat value of some Oil Zone land is such that it could be classified as Green or Red Zone land, the Oil Zone designation overrides the habitat value of the land, and the land is considered Oil Zone land for purposes of the Nuevo/Torch Plan. Most of the proposed activities covered by the Nuevo/Torch Plan are anticipated to take place in the Oil Zone-Productive Area. No compensation will be provided for permanent disturbance in the Oil Zone-Productive Area. Compensation for permanent disturbance in the Oil Zone-Step-out Area will be provided at the same rate as for White Zone land.

Nuevo/Torch will compensate for permanent habitat disturbance within the White, Green, and Red Zones by preserving high habitat value Red Zone land in the Lokern Natural Area in perpetuity. Funds will be set aside for initial improvements and long term care of preserve lands as the land is set aside to compensate for specific projects. For lands outside the Oil Zone, the Nuevo/Torch Plan assigns "conservation credits" for each acre of land disturbed and each acre acquired for preservation, based on the zone in which it is located. Lands in the Red Zone are valued at 3 credits/acre, lands in the Green Zone are valued at 2 credits/acre, and lands in the White Zone and the Oil Zone-Step-out Area are valued at 1 credit/acre. Compensation will be provided in a ratio of 3 acres of preserved land to every 1 acre of disturbed land. For example, if one acre of Red Zone land is permanently disturbed, then 3 acres of Red Zone land will be preserved in perpetuity as compensation. If 1 acre of White Zone land is permanently disturbed, then one third of an acre of Red Zone land will be preserved in perpetuity as compensation.

Nuevo/Torch estimates that 1,700 acres of habitat will be permanently disturbed, and that 81 percent of that disturbance will be in the Oil Zone-Productive Area. The remaining 29 percent of the disturbance will affect 493 acres, and be compensated for with a total of 833 Red Zone acres.

Nuevo/Torch will designate properties in the Lokern Natural Area as a preserve for use as compensation for permanent habitat disturbance. Three properties controlled by Nuevo/Torch in the Red Zone, the Mallett, Kimble, and Ransower-Vitelle properties, total 839.9 acres and would be set aside as preservation land as projects occur that require compensation. Nuevo/Torch will manage all three properties as preserve land upon initiation of the Nuevo/Torch Plan.

Nuevo/Torch will implement extensive avoidance and minimization measures which address both animal and plant species in all zones except the Oil Zone. Strict avoidance measures for covered species will be enforced by the Nuevo/Torch Environmental Department. Specific take avoidance measures are presented in Section 5 of the Nuevo/Torch Plan. Nuevo/Torch also will follow the Best Management Practices outlined in Section 5 in order to minimize effects on wildlife. In addition, Nuevo/Torch will conduct annual monitoring of both disturbed land and preservation land and provide reports to the Service and the California Department of Fish and Game.

Environmental Assessment

The Environmental Assessment considers the environmental consequences of five alternatives. Alternative 1, the proposed action, consists of the issuance of an incidental take permit to Nuevo/Torch, and implementation of the Plan and its Implementing Agreement. Alternative 2 consists of development of oil and gas facilities on the proposed preserve lands in the Lokern Natural Area. The level of incidental take under Alternative 2 would likely be greater than under the proposed action. Alternative 3 consists of development of oil production facilities on an alternative site which would have listed species concerns similar to the proposed action. Because of the presence of listed species on the lands associated with alternatives 2 and 3, an incidental take permit would be required for selection and implementation of either alternative. Alternative 4 consists of waiting until the Kern County Valley Floor Habitat Conservation Plan is approved. Under Alternative 5, the No Action Alternative, the Service would not issue an incidental take permit.

This notice is provided pursuant to section 10(a) of the Endangered Species Act and the National Environmental Policy Act of 1969 regulations (40 CFR 1506.6). The Service will evaluate the application, associated documents, and comments submitted thereon to determine whether the application meets the requirements of the National Environmental Policy Act regulations and section 10(a) of the Endangered Species Act. If it is determined that the requirements are met, a permit will be

issued for the incidental take of the listed species. The final permit decision will be made no sooner than 30 days from the date of this notice.

Dated: November 3, 1998.

Michael J. Spear,

Manager, California/Nevada Operations Office, Fish and Wildlife Service, Region 1, Sacramento, California.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Geological Survey

Privacy Act of 1974; as Amended; Revisions to the Existing System of Records

AGENCY: Geological Survey, Department of the Interior.

ACTION: Proposed revisions to an existing system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (5 U.S.C. 552a), the U.S. Geological Survey (USGS) is issuing public notice of its intent to modify an existing Privacy Act system of records notice, USGS–4, "Employee Assistance Program Records." The revisions will update the address of the System Manager(s).

EFFECTIVE DATE: 5 U.S.C. 552a(e)(11) requires that the public be provided a 30-day period in which to comment on the intended use of the information in the system of records. The Office of Management and Budget, in its Circular A–130, requires an additional 10-day period (for a total of 40 days) in which to make these comments. Any persons interested in commenting on this revised system of records may do so by submitting comments in writing to the U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, 12201 Sunrise Valley Drive, Reston, Va 20192. Comments received within 40 days of publication in the **Federal Register** (December 21, 1998), will be considered. The system will be effective as proposed at the end of the comment period, unless comments are received which would require a contrary determination.

ADDRESSES: Send written comments to U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, Reston, Virginia, 20192. Hand deliver comments to the same address.

FOR FURTHER INFORMATION CONTACT: Chief, Branch of Employee/Labor Management Relations, Office of Personnel, U.S. Geological Survey, National Center, MS–601, Reston, Virginia, 20192.

SUPPLEMENTARY INFORMATION: The USGS is proposing to amend the system notice for USGS–4, "Employee Assistance Program Records," to more accurately and clearly describe the address of the System Manager(s). The revision reflects a change of address in the Reston, Virginia, and the Atlanta, Georgia, System Managers locations.

Dated: October 28, 1998.

Paul R. Celluzzi,

Chief, Corporate Information Technology Branch, Office of Information Services.

Accordingly, the USGS proposes to amend the "Employee Assistance Program Records," USGS–4 in its entirety to read as follows:

INTERIOR/USGS–4

SYSTEM NAME:

Employee Assistance Program—Records, USGS–4.

SYSTEM LOCATION:

This system of records is located with the contractor providing counseling services.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

U.S. Geological Survey employees and their families who seek, are referred, and/or receive assistance through the Employee Assistance Program (EAP).

CATEGORIES OF RECORDS IN THE SYSTEM:

Records in this system include documentation of visits to employee counselors (Federal, State, local government, or private), the problem assessment, the recommended plan of action to correct the major issue, referral to community or private resource for assistance with personal problems, referral to community or private resource for rehabilitation or treatment, results of referral, and other notes or records of discussions held with the employee made by the EAP counselor. Additionally, records in this system may include documentation of treatment by a therapist or at a Federal, State, local government, or private institution.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

42 U.S.C. 290dd–1; 42 U.S.C. 290ee–1.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

These records are used by the Employee Assistance Program Counselor to document the nature of an individual's problem and progress made to correct the problem. The primary uses of these records are: (1) For the EAP counselor to document the nature of individual's problem and progress made to correct the problem, and, (2) record an individual's participation in and the results of community or private referrals for solution of problems, rehabilitation, or treatment programs. These records and information may be used to disclose information to qualified personnel for the purpose of conducting scientific research, management audits, financial audits, or program evaluation, but such personnel may not identify, directly or indirectly, any individual patient in any report or otherwise disclose patient identities in any manner (when such records are provided to qualified researchers employed by the Department of the Interior all patient identifying information will be removed).

Note: Disclosure of information pertaining to an individual with a history of alcohol or drug abuse must be limited in compliance with the restrictions of the confidentiality of Alcohol and Drug Abuse Patient Records Regulations, 42 CFR part 2. Disclosure of records pertaining to the physical and mental fitness of employees are, as a matter of Department policy, afforded the same degree of confidentiality.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

These records are maintained in file folders.

RETRIEVABILITY:

These records are retrieved by the name of the individual on whom they are maintained.

SAFEGUARDS:

These records are maintained in locked file cabinets with access strictly limited to those persons employed by the contractor(s) who are directly involved in the alcohol and drug abuse prevention function of the U.S. Geological Survey's Employee Assistance Program as that term is defined in 42 CFR, part 2.

RETENTION AND DISPOSAL:

Retained and disposed of according to Bureau Records Disposition Schedule, RCS/Item 405–04 a and b.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Branch of Employee/Labor Management Relations, Office of Personnel, U.S. Geological Survey, 601 National Center, Reston, Virginia 20192; Atlanta Personnel Officer, U.S. Geological Survey, 3850 Holcomb Bridge Rd., Norcross, Georgia 30092; Rolla Personnel Officer, U.S. Geological Survey, 1400 Independence Road, Rolla, Missouri 65401; Chief, Employee Relations Section, Central Region Personnel Branch, U.S. Geological Survey, Denver Federal Center, Denver, Colorado 80225; Western Region EAP Administrator, Employee Relations and Development Section, Western Region Personnel Branch, 345 Middlefield Road, Menlo Park, California 94025.

NOTIFICATION PROCEDURE:

Inquiries regarding the existence of records should be addressed to the appropriate System Manager. Individuals must furnish their name and date of birth for their records to be located and identified.

RECORD ACCESS PROCEDURES:

Same as notification above. Any individual must also follow the Department's Privacy Act Regulations regarding verification of identity and access to records (see 43 CFR 2.62).

CONTESTING RECORD PROCEDURES:

A petition for amendment shall be addressed to the appropriate System Manager. An individual must follow the Department's Privacy Act Regulations regarding and identity and amendment of records (see 43 CFR 2.71).

RECORD SOURCE CATEGORIES:

Information in this system of records comes from the individual to whom it applies, the supervisor of the individual if the individual was referred by a supervisor, the Employer Assistance Program staff who records the counseling session, and the therapists or institutions used as referrals or providing treatment.

BILLING CODE 4310–84–M

DEPARTMENT OF THE INTERIOR

Geological Survey

Privacy Act of 1974; as Amended; Revisions to the Existing System of Records

AGENCY: Geological Survey, Department of the Interior.

ACTION: Proposed revisions to an existing system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (5 U.S.C. 552a), the U.S. Geological Survey (USGS) is issuing public notice of its intent to modify an existing Privacy Act system of records notice, USGS–5, "Contract Files." The revisions will update addresses of the System Location and the System Manager.

EFFECTIVE DATE: 5 U.S.C. 552a(e)(11) requires that the public be provided a 30-day period in which to comment on the intended use of the information in the system of records. The Office of Management and Budget, in its Circular A–130, requires an additional 10-day period (for a total of 40 days) in which to make these comments. Any persons interested in commenting on this revised system of records may do so by submitting comments in writing to the U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, 12201 Sunrise Valley Drive, Reston, VA 20192. Comments received within 10 days of publication in the **Federal Register** (December 21, 1998), will be considered. The system will be effective as proposed at the end of the comment period, unless comments are received which would require a contrary determination.

ADDRESSES: Send written comments to U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, Reston, Virginia, 20192. Hand deliver comments to the same address.

FOR FURTHER INFORMATION CONTACT: Chief, Office of Acquisition & Federal Assistance, U.S. Geological Survey, National Center, MS–205, Reston, Virginia 20192.

SUPPLEMENTARY INFORMATION: The USGS is proposing to amend the system notice for USGS–5, "Contract Files," to more accurately and clearly describe the addresses of the System Location and the System Manager.

Dated: October 28, 1998.

Paul R. Celluzzi,

Chief, Corporate Information Technology Branch, Office of Information Services.

Accordingly, the USGS proposes to amend the "Contract Files," USGS–5 in its entirety to read as follows:

INTERIOR/USGS–5

SYSTEM NAME:

Contract Files—Interior, USGS–5.

SYSTEM LOCATION:

The primary location of this system of records is in the Office of Acquisition & Federal Assistance, U.S. Geological Survey, National Center, MS–205, Reston, VA 20192. These records are also maintained in several Survey administrative field offices. A listing of these locations may be obtained from the Systems Manager.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have contracts or subcontracts with the Geological Survey and certain contractor employees. The system also contains records concerning individuals in their entrepreneurial capacity, corporations and other business entities. These records are not subject to the Privacy Act.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of contract information, from inception of requirement, through contract award, contract administration and completion of the contract. Copies of contractor technical and cost proposals, including individual employee resumés and salary data, documentation pertaining to the award, contract administration, miscellaneous correspondence, and information on debts owed by a contractor as a result of overpayment, default, disallowed costs or other contractual obligation.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

40 U.S.C. 481.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

The primary use of the records is in awarding and administering contracts through their completion. Disclosure outside the Department of the Interior may be made to: (1) The U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department or, when represented by the Government, an employee of the Department is a party to litigation or anticipated litigation or has an interest in such litigation, and (b) the Department of the Interior determines that the disclosure is relevant or necessary to the litigation and is compatible with the purpose for which the records were compiled; (2) disclose pertinent information to an appropriate Federal, State, local, or foreign agency responsible for investigating, prosecuting, enforcing, or implementing a statute, regulation, rule, or order, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation; (3) a congressional office from the record of an individual in response to an inquiry the individual has made to the congressional office; (4) a Federal agency which has requested information relevant or necessary to its hiring or retention of an employee, or the issuance of a security clearance, license, contract, grant or other benefit; (5) Federal, State or local agencies

where necessary to obtain information relevant to the hiring or retention of an employee; or the issuance of a security clearance, license, contract, grant or other benefit.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Pursuant to 5 U.S.C. 552a(b)(12), disclosures may be able to a consumer reporting agency as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in manual form in file folders.

RETRIEVABILITY:

By name of individual contractor and by contract number.

SAFEGUARDS:

Maintained with safeguards meeting the requirements of 43 CFR 2.51 for manual records.

RETENTION AND DISPOSAL:

Retained and disposed of according to Bureau Records Disposition Schedule, RCS/Item 802–01.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Office of Acquisition & Federal Assistance, U.S. Geological Survey, National Center, MS–205, Reston, Virginia 20192.

NOTIFICATION PROCEDURE:

A written and signed request stating that the requester seeks information concerning records pertaining to him/her must be addressed to the System Manager. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

Requests for access shall be addressed to the System Manager, signed by the requester and meet the content requirement of 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment shall be addressed to the System Manager and meet the requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Information comes from the individual contractor.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

[FR Doc. 98–29905 Filed 11–6–98; 8:45 am]
BILLING CODE 4310–84–M

DEPARTMENT OF THE INTERIOR

Geological Survey

Privacy Act of 1974; as Amended; Revisions to the Existing System of Records

AGENCY: Geological Survey, Department of the Interior.

ACTION: Proposed revisions to an existing system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (5 U.S.C. 552a), the U.S. Geological Survey (USGS) is issuing public notice of its intent to modify an existing Privacy Act system of records notice, USGS–7, "Personal Property Accountability Records." The revisions will update addresses of the System Location and the System Manager.

EFFECTIVE DATE: 5 U.S.C. 552a(e)(11) requires that the public be provided a 30-day period in which to comment on the intended use of the information in the system of records. The Office of Management and Budget, in its Circular A–130, requires an additional 10-day period (for a total of 40 days) in which to make these comments. Any persons interested in commenting on this revised system of records may do so by submitting comments in writing to the U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, 12202 Sunrise Valley Drive, Reston, VA 20192. Comments received within two days of publication in the **Fedeal Register** (December 21, 1998) will be considered. They system will be effective as proposed at the end of the comment period, unless comments are received which would require a contrary determination.

ADDRESSES: Send written comments to U.S. Department of Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, Reston, Virginia 20192. Hand deliver comments to the same address.

FOR FURTHER INFORMATION CONTACT:

Chief, Office of Program Support, U.S. Geological Survey, National Center, MS–210, Reston, Virginia 20192.

SUPPLEMENTARY INFORMATION: The USGS is proposing to amend the system notice for USGS–7, "Personal Property Accountability Records," to more accurately and clearly describe the addresses of the System Location and the System Manager.

Dated: October 28, 1998.

Paul R. Celluzzi,

Chief, Corporate Information Technology Branch, Office of Information Services.

Accordingly, the USGS proposes to amend the "Personal Property Accountability Records," USGS–7 in its entirety to read as follows:

INTERIOR/USGS–7

SYSTEM NAME:

Personal Property Accountability Records—Interior, USGS–7.

SYSTEM LOCATION:

(1) Property Management Branch, Office of Facilities and Management Services, Administrative Division, U.S. Geological Survey, National Center, MS–210, Reston, VA 20192.

(2) Administrative offices in all or substantially all field locations. (For a listing of specific locations, contact the System Manager.)

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Geological Survey employees who are accountable for bureau-owned controlled property.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records of assignment of an internal identification number and acknowledgment of receipt by employees. Records of transfers to other accountable employees. Inventory records containing employee social security numbers and duty stations.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

40 U.S.C. 483(b).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary uses of the records are to: (a) Maintain control over bureau-owned controlled property; (b) maintain up-to-date inventory of the property and to record accountability for the property. Disclosure outside the Department of the Interior may be made: (1) To the U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department or, when represented by the Government, an employee of the Department is a party to litigation or anticipated litigation or has an interest in such litigation, and (b) the Department of the Interior determines that the disclosure is relevant or necessary to the litigation and is compatible with the purpose for which the records were compiled; (2) to disclose pertinent information to an appropriate Federal, State, local, or foreign agency responsible for investigating, prosecuting, enforcing, or implementing a statute, regulation, rule, or order, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation; (3) to a congressional office from the record of an individual in response to an inquiry the individual has made to the congressional office; (4) to a Federal agency which has requested information relevant or necessary to its hiring or retention of an employee, or issuance of a security clearance, license, contract, grant, or other benefit; (5) to Federal, State, or local agencies where necessary to obtain information relevant to the hiring or retention of an employee, or the issuance of a security clearance, license, contract, grant, or other benefit; (6) to a Federal agency for the purpose of collecting a debt owed the Federal government through administrative or salary offset and to other Federal agencies conducting computer matching programs to help eliminate fraud and abuse.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12). Disclosures may be made from this system to consumer reporting agencies as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are both manual and computerized.

RETRIEVABILITY:

By employee social security number.

SAFEGUARDS:

Access by authorized employees only.

RETENTION AND DISPOSAL:

Retained and disposed of according to Bureau Records Disposition Schedule, RCS/Item 307–10.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Property Management Branch, Office of Facilities and Management Services, Office of Program Support, U.S. Geological Survey, National Center, Mail Stop 210, Reston, VA 20192.

NOTIFICATION PROCEDURE:

Inquiries should be addressed to the System Manager. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

Same as above. See 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment should be addressed to the System Manager and must meet the content requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Individual employees.

[FR Doc. 98–29906 Filed 11–6–98; 8:45 am]
BILLING CODE 4310–84–M

DEPARTMENT OF THE INTERIOR

Geological Survey

Privacy Act of 1974; as Amended; Revisions to the Existing System of Records

AGENCY: Geological Survey, Department of the Interior.

ACTION: Proposed revisions to an existing system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (5 U.S.C. 552a), the U.S. Geological Survey (USGS) is issuing public notice of its intent to modify an existing Privacy Act system of records notice, USGS–11, "Security." The revisions will update addresses of the System Location and the System Manager.

EFFECTIVE DATE: 5 U.S.C. 552a(e)(11) requires that the public be provided a 30-day period in which to comment on the intended use of the information in the system of records. The Office of Management and Budget, in its Circular A–130, requires an additional 10-day period (for a total of 40 days) in which to make these comments. Any persons interested in commenting on this revised system of records may do so by submitting comments in writing to the U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, 12201 Sunrise Valley Drive, Reston, Va. 20192. Comments received within two days of publication in the **Federal Register** (December 21, 1998), will be considered. The system will be effective as proposed at the end of the comment period, unless comments are received which would require a contrary determination.

ADDRESS: Send written comments to U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, Reston, Virginia 20192. Hand deliver comments to the same address.

FOR FURTHER INFORMATION CONTACT: Administrative Officer, Geologic Division, U.S. Geological Survey, National Center, MS–912, Reston, Virginia 20192.

SUPPLEMENTARY INFORMATION: The USGS is proposing to amend the system notice for USGS–11, "Security," to more accurately and clearly describe the addresses of the System Location and the System Manager.

Dated: October 28, 1998.

Paul R. Celluzzi,

Chief, Corporate Information Technology Branch, Office of Information Services.

Accordingly, the USGS proposes to amend the "Security," USGS–11 in its entirety to read as follows:

INTERIOR/USGS–11

SYSTEM NAME:

Security—Interior, USGS–11.

SYSTEM LOCATION:

Office of the Chief Geologist, Geologic Division, U.S. Geological Survey, National Center, Mail Stop 912, Reston, VA 20192.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Geologic Division employees who have been granted security clearances.

CATEGORIES OF RECORDS IN THE SYSTEM:

Record of security clearance for Division personnel; contains name, title, organization, office location, social security number, place and date of birth, and type of security clearance of person being granted access.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Executive Order 10501.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary use of the records is to keep current records on security clearances in the Geologic Division. Disclosure outside the Department of the Interior may be made (1) to the U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department, or when represented by the government, an employee of the Department is a party to litigation or anticipated litigation or has an interest in such litigation, and (b) the Department of the Interior determines that the disclosure is relevant or necessary to the litigation and is compatible with the purpose for which the records were compiled; (2) to disclose pertinent information to an appropriate Federal, State, local, or foreign agency responsible for investigating, prosecuting, enforcing, or implementing a statute, regulation, rule, or order, where the disclosing agency becomes aware of an indication of a

violation or potential violation of civil or criminal law or regulation; (3) to a congressional office from the record of an individual in response to an inquiry the individual has made to the congressional office; (4) to a Federal agency which has requested information relevant or necessary to its hiring or retention of an employee; or issuance of a security clearance, license, contract, grant, or other benefit; (5) to Federal, State, or local agencies where necessary to obtain information relevant to the hiring or retention of an employee, or the issuance of a security clearance, license, contract, grant, or other benefit.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Manual systems maintained in locked files. Automated system maintained in dBase III file.

RETRIEVABILITY:

Indexed by individual name.

SAFEGUARDS:

Maintained with security meeting the requirements of 43 CFR 2.51.

RETENTION AND DISPOSAL:

Retained and disposed of according to Bureau Records Disposition Schedule, RCS/System 306–16.

SYSTEM MANAGERS(S) AND ADDRESS:

Administrative Officer, Geologic Division, U.S. Geological Survey, National Center, Mail Stop 912, Reston, VA 20192.

NOTIFICATION PROCEDURE:

Inquiries should be addressed to the System Manager. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

A request for access may be addressed to the System Manager. The request must be in writing and signed by the requester. The request must meet the content requirements of 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment should be addressed to the System manager and must meet the content requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Individual on whom the record is maintained.

[FR Doc. 98–29907 Filed 11–6–98; 8:45 am]

BILLING CODE 4310–94–M

DEPARTMENT OF THE INTERIOR

Geological Survey

Privacy Act of 1974; as Amended; Revisions to the Existing System of Records

AGENCY: Geological Survey, Department of the Interior.

ACTION: Proposed revisions to an existing system of record.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (5 U.S.C. 552a), the U.S. Geological Survey (USGS) is issuing public notice of its intention to modify an existing Privacy Act system of records notice USGS-13, "Manuscript Processing." The revisions will update the address of the System Location(s), System Manager(s), and further define Retention and Disposal.

EFFECTIVE DATE: 5 U.S.C. 552a(3)(11) that the public be provided a 30-day period in which to comment on the intended use of the information in the system of records. The Office of Management and Budget, in its Circular A-130, requires an additional 10-day period (for a total of 40 days) in which to make these comments. Any persons interested in commenting on this revised system of records may do so by submitting comments in writing to the U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center MS-807, 12201 Sunset Valley Drive, Reston, Va 20192. Comments received within 40 days of publication in the **Federal Register** (December 21, 1998), will be considered. The system will be effective as proposed at the end of the comment period, unless comments are received which would require a contrary determination.

ADDRESS: Send written comments to U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS-807, Reston, Virginia, 20192. Hand deliver comments to the same address.

FOR FURTHER INFORMATION CONTACT: Chief, Eastern Publications Group, Geological Survey, National Center, MS-903, Reston, Virginia 20192.

SUPPLEMENTARY INFORMATION: The USGS is proposing to amend the system notice for USGS-13, "Manuscript Processing," to more accurately and clearly describe the addresses of the System Location(s), System Manager(s). The revision reflects a change of address in the Reston, Virginia, Denver, Colorado; and Menlo Park, California, System Locations and Systems Managers locations. In addition, this revision further define the Retention and Disposal of records procedures.

Dated: October 28. 1998.

Paul R. Celluzzi,

Chief, Corporate Information Technology Branch, Office of Information Services.

Accordingly, the USGS proposes to amend the "Manuscript Processing," USGS-13 in its entirety to read as follows:

INTERIOR/USGS–13

SYSTEM NAME:

Manuscript Processing-Interior, GS–13.

SYSTEM LOCATION:

(1) Eastern Publications Group, Office of the Eastern Regional Geologist, Geologic Division, Reston, VA; (2) Central Publications Group, Office of the Central Regional Geologist, Geologic Division, Denver CO; (3) Western Publications Group, Office of the Western Regional Geologist, Geologic Division, Menlo Park, CA.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Geologic Division authors of Geo-Science publications.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains record by author or title on publication plans, status and location of all manuscript maps and reports in preparation or published by Geologic Division employees.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

43 U.S.C. 31, et seq.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary use of the records is to maintain knowledge of and track publication plans, status of manuscript maps and reports in preparation being entered by Geologic Division employees. Disclosure outside the Department of the Interior may be made: (1) To the U.S. Department of Justice when related to litigation or anticipated litigation; (2) of information indicating a violation or potential violation of a statute, regulation, rule, order or license, to appropriate Federal, State, local or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order or license; (3) from the record of an individual in response to an inquiry from a Congressional office made at the request of that individual; (4) to a Federal agency which has requested information relevant or necessary for its hiring or retention of an employee, or issuance of a security clearance, license, contract, grant or other benefit; (5) to Federal, State or local agencies where necessary to obtain information relevant to the hiring or retention of an employee, or the issuance of a security clearance, license, contract, grant or other benefit.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in manual form on cards.

RETRIEVABILITY:

Indexed by author and Geographic area.

SAFEGUARDS:

Maintained in accordance with 43 CFR 2.51.

RETENTION AND DISPOSAL:

Retained and disposed of according to Bureau Records Disposition Schedule, RCS/Item 303–03a.

SYSTEM MANAGER(S) AND ADDRESS:

(1) Chief, Eastern Publications Group, Geologic Division, National Center, MS–903, Reston, VA 20192; (2) Chief, Central Publications Group, MS902, Geologic Division, Denver, CO 80225; (3) Chief, Western Publications Group, Geologic Division, MS 951, Menlo Park, CA 94025.

NOTIFICATION PROCEDURE:

Inquiries should be addressed to the System Manager. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

Same as above. See 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

Same as above. See 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Authors.

BILLING CODE 4310–94–M

DEPARTMENT OF THE INTERIOR

Geological Survey

Privacy Act of 1974; as Amended; Revisions to the Existing System of Records

AGENCY: Geological Survey, Department of the Interior.

ACTION: Proposed revisions to an existing system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (5 U.S.C. 552a), the U.S. Geological Survey (USGS) is issuing public notice of its intent to modify an existing Privacy Act system of records notice, USGS–15, "Earth Science Information Customer Records." The revisions will update addresses of the System Location and the System Manager.

EFFECTIVE DATE: 5 U.S.C. 552a(e)(11) requires that the public be provided a 30-day period in which to comment on the intended use of the information in the system of records. The Office of Management and Budget, in its Circular A–130, requires an additional 10-day period (for a total of 40 days) in which to make these comments. Any persons interested in commenting on this revised system of records may do so by submitting comments in writing to the U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, 12201 Sunrise Valley Drive, Reston, Va. 20192. Comments received within two day of publication in the **Federal Register** (December 21, 1998), will be considered. The system will be effective as proposed at the end of the comment period, unless comments are received which would require a contrary determination.

ADDRESSES: Send written comments to U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, Reston, Virginia, 20192. Hand deliver comments to the same address.

FOR FURTHER INFORMATION CONTACT: Senior Program Advisor, Data Information Delivery Office, U.S. Geological Survey, National Center, MS–508, Reston, Virginia 20192.

SUPPLEMENTARY INFORMATION: The USGS is proposing to amend the system notice for USGS–15, "Earth Science Information Customer Records," to more accurately and clearly describe the addresses of the System Location and the System Manager.

Dated: October 28, 1998.

Paul R. Celluzzi,

Chief, Corporate Information Technology Branch, Office of Information Services.

Accordingly, the USGS proposes to amend the "Earth Science Information Customer Records," USGS–15 in its entirety to read as follows:

INTERIOR/USGS–15

SYSTEM NAME:

Earth Science Information Customer Records—Interior, USGS–15.

SYSTEM LOCATION:

(1) Data and Information Delivery Office, National Mapping Division, U.S. Geological Survey, 508 National Center, MS–508, Reston, Virginia 20192. (2) Earth Science Information Centers (for specific locations contact the System Manager).

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who have requested Earth Science information directly from, or whose requests have been forwarded to the Earth Science Information Office or its sponsored field centers. The system also contains records concerning individuals in their entrepreneurial capacity, corporations, and other business entities whose records are not subject to the Privacy Act.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains name, address, credit card number and expiration date (as provided), customer's inquiry, response to inquiry, orders for products, appropriate accounting entries, and information on deposits with and debts owed the Bureau as a result of customer orders.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Executive Order 3206; OMB Circular A–16; 31 U.S.C. 3512.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary use of the records if for reference by Geological Survey (GS) and GS contract employees in processing customer inquiries, orders, and complaints. Disclosure outside the Department of the Interior may be made to: (1) The U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department or, when represented by the Government, an employee of the Department is a party to litigation or anticipated litigation or has an interest in such litigation, and (b) the Department of the Interior determines that the disclosure is relevant or necessary to the litigation and is compatible with the purpose for which the records were compiled; (2) disclose pertinent information to an appropriate Federal, State, local, or foreign agency responsible for investigating, prosecuting, enforcing, or implementing a statute, regulation, rule, or order, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation; (3) a congressional office from the record of an individual in response to an inquiry the individual has made to the congressional office.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12). Pursuant to 5 U.S.C. 552a(b)(12), disclosures may be made to a consumer reporting agency as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in manual form in file folders, correspondence may be recorded on microfilm and key information recorded on magnetic disk or on magnetic tape in some instances.

RETRIEVABILITY:

Stored by account number, indexed by name and zip code.

SAFEGUARDS:

Maintained in GS or GS contract areas occupied by GS or GS contract personnel during working hours with the building locked and/or guarded during off hours.

RETENTION AND DISPOSAL:

Retained and disposed of according to Bureau Records Disposition Schedule, RCS/Item 1500–07.

SYSTEM MANAGER(S) AND ADDRESS:

Senior Program Advisor, Data and Information Delivery Office, National Mapping Division, U.S. Geological Survey, National Center, MS–508, Reston, Virginia 20192.

NOTIFICATION PROCEDURE:

Inquiries should be addressed to the System Manager. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

Same as above. See 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment should be addressed to the System Manager and must meet the content requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Customers on whom record(s) are maintained and GS or GS contract information researchers.

BILLING CODE 4310–84–M

DEPARTMENT OF THE INTERIOR

Geological Survey

Privacy Act of 1974; as Amended; Revisions to the Existing System of Records

AGENCY: Geological Survey, Department of the Interior.

ACTION: Proposed revisions to an existing system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (5 U.S.C. 552a), the U.S. Geological Survey (USGS) is issuing public notice of its intent to modify an existing Privacy Act system of records notice, USGS–18, "Computer Registration System." The revisions will update addresses of the System Location(s), add language to cover email to Categories of Individuals Covered by the System, to add a routine use authorizing data access, revising the addresses of System Manager(s), and altering the language for Notification Procedure, Record Access Procedure, and Contesting Record Procedure.

EFFECTIVE DATE: 5 U.S.C. 552a(e)(11) requires that the public be provided a 30-day period in which to comment on the intended use of the information in the system of records. The Office of Management and Budget, in its Circular A–130, requires an additional 10-day period (for a total of 40 days) in which to make these comments. Any persons interested in commenting on this revised system of records may do so by submitting comments in writing to the U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, 12201 Sunrise Valley Drive, Reston, Va. 20192. Comments received within two days of publication in the **Federal Register** (December 2, 1998), will be considered. The system will be effective as proposed at the end of the comment period, unless comments are received which would require a contrary determination.

ADDRESS: Send written comments to U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, Reston, Virginia, 20192. Hand deliver comments to the same address.

FOR FURTHER INFORMATION CONTACT: Chief, Enterprise Data Services Branch, Office of Program Support, U.S. Geological Survey, National Center, MS–815, Reston, Virginia 20192.

SUPPLEMENTARY INFORMATION: The USGS is proposing to amend the system notice for USGS–18, "Computer Registration System," to more accurately and clearly describe the addresses of the System Location(s), System Manager(s), add email address where applicable, add a routine use authorizing data access and revise language on notification, access, and contesting procedures.

Dated: October 28, 1998.

Paul R. Celluzzi,

Chief, Corporate Information Technology Branch, Office of Information Services.

Accordingly, the USGS proposes to amend the "Computer Registration System," USGS–18 in its entirety to read as follows:

INTERIOR/USGS–18

SYSTEM NAME:

Computer Registration System—Interior, USGS–18.

SYSTEM LOCATION:

Enterprise Data Services Branch (EDSB), Office of Program Support, National Center, U.S. Geological Survey, Mail Stop 815, Reston, Virginia 20192; Menlo Park Service Center, 345 Middlefield Road, Menlo Park, California 94025; Flagstaff Service Center, 2255 N. Gemini Drive, Flagstaff, Arizona 86001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Users of computer services.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, computer user number, E-mail address where applicable, telephone number, subsystem registration, account number.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

40 U.S.C. 486(c); 41 CFR part 201–7.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary use of the records is: (a) To record registration information for computer users; and (b) to contact computer users; and (c) to authorize data access. Disclosure outside the Department of the Interior may be made: (1) To the U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department, or when represented by the Government, an employee of the Department is a party to litigation or anticipated litigation or has an interest in such litigation, and (b) the Department of the Interior determines that the disclosure is relevant or necessary to the litigation and is compatible with the purpose for which the records were compiled; (2) Of information indicating a violation or potential violation of a statute, regulation, rule, order, or license to appropriate Federal, State, local or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order, or license; (3) To a congressional office from the record of an individual in response to an inquiry the individual has made to the congressional office; (4) To a Federal agency which has requested information relevant or necessary to its hiring or retention of an employee, or issuance of a security clearance, license, contract, grant, or other benefit; and (5) To Federal, State, or local agencies where necessary to obtain information relevant to the hiring or retention of an employee, or the issuance of a security clearance, license, contract, grant, or other benefit.

POLICES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained on magnetic disk.

RETRIEVABILITY:

By user name, user number, E-mail address where applicable, telephone number, subsystem, account number.

SAFEGUARDS:

Maintained with safeguards meeting the requirements of 43 CFR 2.51.

RETENTION AND DISPOSAL:

Retained and disposed of according to Bureau Records Disposition Schedule, RCS/Item 102–01.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Enterprise Data Services Branch, Office of Program Support, U.S. Geological Survey, Mail Stop 815, National Center, Reston, Virginia 20192; Chief, Menlo Park Service Center, U.S. Geological Survey, 345 Middlefield Road, Menlo Park, California 94025; Chief, Flagstaff Service Center, U.S. Geological Survey, 2255 N. Gemini Drive, Flagstaff, Arizona 86001.

NOTIFICATION PROCEDURES:

A request for notification of the existence of records shall be addressed to the appropriate System Manager. The request shall be in writing, signed by the requester, and comply with the content requirements of 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

A request for access to records shall be addressed to the appropriate System Manager. The request shall be in writing, signed by the requester, and comply with the content requirements of 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A request for amendment of a record shall be addressed to the appropriate System Manager. The request shall be in writing, signed by the requester, and comply with the content requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Individual users of computer services.

[FR Doc. 98–29910 Filed 11–5–98; 8:45 am]

BILLING CODE 4310–84–M

DEPARTMENT OF THE INTERIOR

Geological Survey

Privacy Act of 1974; As Amended; Revisions to the Existing System of Records

AGENCY: Geological Survey, Department of the Interior.

ACTION: Proposed revisions to an existing system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (5 U.S.C. 552a), the U.S. Geological Survey (USGS) is issuing public notice of its intent to modify an existing Privacy Act system of records notice, EGS–20, "Photo File System." The revisions will update the addresses of the System Location and System Manager. In addition it will more clearly define Retention and Disposal.

EFFECTIVE DATE: 5 U.S.C. 552a(e)(11) requires that the public be provided a 30-day period in which to comment on the intended use of the information in the system of records. The Office of Management and Budget, in its Circular A–130, requires an additional 10-day period (for a total of 40 days) in which to make these comments. Any persons interested in commenting on this revised system of records may do so by submitting comments in writing to the U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, 12201 Sunrise Valley Drive, Reston, VA 20192. Comments received within 40 days of publication in the **Federal Register** (December 21, 1998), will be considered. The system will be effective as proposed at the end of the comment period, unless comments are received which would require a contrary determination.

ADDRESSES: Send written comments to U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, Reston, Virginia 20192. Hand deliver comments to the same address.

FOR FURTHER INFORMATION CONTACT: Chief, Eastern Publications Group, Geologic Division, Eastern Region Geology, U.S. Geological Survey, National Center, MS–903, Reston, Virginia 20192.

SUPPLEMENTARY INFORMATION: The USGS is proposing to amend the system notice for EGS–20, "Photo File System" to more accurately and clearly describe the addresses of the System Location, System Manager, and redefine the Retention and Diposal.

Dated: October 28, 1998.

Paul R. Celluzzi,

Chief, Corporate Information Technology Branch, Office of Information Services.

Accordingly, the USGS proposes to amend the "Photo File System," EGS–20, in its entirety to read as follows:

INTERIOR/EGS–20

SYSTEM NAME:

Photo File System—Interior, GS–20.

SYSTEM LOCATION:

U.S. Geological Survey, Geologic Division, Office of Scientific Publications, National Center, Mail Stop 790, Reston, VA 20192.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

U.S.G.S. employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Photographs.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 3101, 43 U.S.C. 1467.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary use of the records is to maintain photographs of USGS top level employees.

Disclosure outside the Department of the Interior may be made: (1) To the public in presentation and publications; (2) to the U.S. Department of justice when related to litigation or anticipated litigations; (3) of information indicating a violation or potential violation of a statute, regulation, rule, order or license, to appropriate Federal, State, local or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order or licensee; (4) from the record of an individual in response to an inquiry from a Congressional office made at the request of that individual.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

PIC cards 5 by 8.

RETRIEVABILITY:

Indexed by name.

SAFEGUARDS:

Maintained in accordance with 43 CFR 2.51.

RETENTION AND DISPOSAL:

Retained and disposed of according to Bureau Records Disposition Schedule, RCS/Items.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Eastern Publications Group, Geologic Division, Eastern Region Geology, National Center, MS–903, Reston, VA 20192

NOTIFICATION PROCEDURE:

Inquiries regarding the existence of records shall be addressed to the System Manager. A written, signed request stating that the requester seeks information concerning records pertaining to him is required. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

A request for access shall be addressed to the System Manager. The request must be in writing and be signed by the requester. The request must meet the content requirements of 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment should be addressed to the System Manager and must meet the content requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Photographs of individuals employed by the U.S.G.S.

[FR Doc. 98–29911 Filed 11–6–98; 8:45 am]

BILLING CODE 4310–94–M

DEPARTMENT OF THE INTERIOR

Geological Survey

Privacy Act of 1974; As Amended; Revisions to the Existing System of Records

AGENCY: Geological Survey, Department of the Interior.

ACTION: Proposed revisions to an existing system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (5 U.S.C. 552a), the U.S. Geological Survey (USGS) is issuing public notice of its intent to modify an existing Privacy Act system of records notice, USGS–23, "Personnel Investigations Records." The revisions will update addresses of the System Location and the System Manager. There are two additions and minor language changes under Categories of Individuals Covered by the System. There is an addition to Authority for Maintenance of the System. There are minor language changes under Storage and Safeguards.

EFFECTIVE DATES: 5 U.S.C. 552a(e)(11) requires that the public be provided a 30-day period in which to comment on the intended use of the information in the system of records. The Office of Management and Budget, in its Circular A–130, requires an additional 10-day period (for a total of 40 days) in which to make these comments. Any persons interested in commenting on this revised system of records may do so by submitting comments in writing to the U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, 12202 Sunrise Valley Drive, Reston, VA. 20192. Comments received within two days of publication in the **Federal Register** (December 21, 1998), will be considered. The system will be effective as proposed at the end of the comment period, unless comments are received which would require a contrary determination.

ADDRESSES: Send written comments to U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, Reston, Virginia, 20192. Hand deliver comments to the same address.

FOR FURTHER INFORMATION CONTACT: Security Officer, Office of Program Support, Office of Management Services, U.S. Geological Survey, National Center, Mail Stop 250, Reston, Virginia 20192.

SUPPLEMENTARY INFORMATION: The USGS is proposing to amend the system notice for USGS–23, "Personnel Investigation Records," to more accurately and clearly define the addresses of the System Location and the System Manager; to add some new groups of individuals in Categories, as well as update some of the language used in the descriptions; to more clearly define the Authorities; and to update the language in Storage and Safeguards.

Dated: October 28, 1998.

Paul R. Celluzzi,

Chief, Corporate Information Technology Branch, Office of Information Services.

Accordingly, the USGS proposes to amend the "Personnel Investigations Records," USGS–23 in its entirety to read as follows:

INTERIOR/USGS–23

SYSTEM NAME:

Personnel Investigations Records—Interior, USGS–23.

SYSTEM LOCATION:

Security Management Office, Office of Program Support, Office of Management Services, U.S. Geological Survey, National Center, Mail Stop 250, Reston, VA 20192.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

1. Current Geological Survey employees and contractors who (a) are granted access to classified information; (b) are filling public trust positions not requiring access to classified information; (c) are being considered either for access to classified information or for filling public trust positions not requiring access to classified information; and (d) are found unsuitable for access to classified information or filling public trust positions because unfavorable information was revealed during the conduct of their security investigations. 2. Former Geological Survey employees and contractors who (a) were granted access to classified information; (b) were filling public trust positions not requiring access to classified information; and (c) were found unsuitable for access to classified information or filling public trust positions because unfavorable information was revealed during the conduct of their security investigations.

CATEGORIES OF RECORDS IN THE SYSTEM:

These records contain investigative information regarding an individual's character, conduct, and behavior in the community where he or she lives or lived; arrests and convictions for any violations against the law; reports of interviews with present and former supervisors, co-workers, associates, educators, etc.; reports and the qualifications of an individual for a specific position; reports of inquiries with or from law enforcement agencies, employers, and educational institutions attended; foreign affiliations which may affect his or her loyalty to the United States; and other information developed from the above.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Executive Order 10450, as amended, and Departmental manual 441, Personnel Security and Suitability Requirements.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The contents of these records and files may be disclosed and used as follows: (1) To designated officials, officers, and employees of the USGS, DOI, OPM, DOE, CIA, FBI, and all other agencies and departments of the Federal Government who in the performance of their duties have an interest in the individual for employment purposes, including a security clearance or access determination, and a need to evaluate qualifications, suitability, and loyalty to the United States Government; (2) To the U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department, or, when represented by the government, an employee of the Department is a party to litigation or anticipated litigation or has an interest in such litigation, and (b) the Department of the Interior determines that the disclosure is relevant or necessary to the litigation and is compatible with the purpose for which the records were compiled; (3) To disclose pertinent information to an appropriate Federal, State, local, or foreign agency responsible for investigating, prosecuting, enforcing, or implementing a statute, regulation, rule, or order, where the disclosing agency becomes aware of an indication of a violation or potential violation of civil or criminal law or regulation; and, (4) To a congressional office from the record of an individual in response to an inquiry the individual has made to the congressional office.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

All investigative records are maintained in file folders stored in file cabinets. An automated index system of all records is on a personal computer.

RETRIEVABILITY:

All records are indexed by surname in alphabetical order. The automated index system is indexed by surname or social security number.

SAFEGURDS:

The filing cabinets and the personal computer are safeguarded in a secure, windowless office with one doorway which is secured by a key locking device using an off-master key system. Access to all keys is under stringent security controls. The automated index system of all records is further protected by a password and privacy act warning.

RETENTION AND DISPOSAL:

(a) OPM investigative files are routinely destroyed within 90 days after receipt or upon completion of the adjudication action, whichever occurs last. Disposition of files is made in accordance with the Bureau Records Disposition Schedule, RCS/Item 306–15b. (b) All information, supplementing the above OPM investigative files originated by the Geological Survey, is retained for five years following termination of awarded security clearance or employment, whichever occurs first, and is then destroyed. Disposition of files if made in accordance with the Bureau Records Disposition Schedule, RCS/Item 306–15a.

SYSTEM MANAGER(S) AND ADDRESS:

Security Officer/Alternate Security Officer, Office of Program Support, Office of Management Services, U.S. Geological Survey, National Center, Mail Stop 250, Reston, VA 20192.

NOTIFICATION PROCEDURE:

Written inquires to the System Manager are required and must include the following information in order to positively identify the individual whose records are requested: (1) Full name, (2) Date of birth, (3) Place of birth, (4) Any available information regarding the type of record requested. See 43 CFR 2.60.

RECORD ACCESS PROCEDURE:

An individual can obtain information on the procedures for gaining access to and contesting the records from the above System Manager. See 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

Same as above. See 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Information contained in this system is obtained from the following categories of sources: (1) Applications and order personnel and security forms furnished by the individual, (2) Results of investigations and other material furnished by Federal agencies.

[FR Doc. 98–29912 Filed 11–6–98; 8:45 am]

BILLING CODE 4310–94–M

DEPARTMENT OF THE INTERIOR

Geological Survey

Privacy Act of 1974; As Amended; Revisions to the Existing System of Records

AGENCY: Geological Survey, Department of the interior.

ACTION: Proposed revisions to an existing system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (5 U.S.C. 552a), the U.S. Geological Survey (USGS) is issuing public notice of its intent to modify an existing Privacy Act system of records notice, USGS–24, "Employee Work Report Edit and Individual Employee Production Rates." The revisions will update addresses of the System Location and the System Manager. In addition, it adds, deletes, and revises language under several sections of the notice.

EFFECTIVE DATE: 5 U.S.C. 552a(e)(11) requires that the public be provided a 30-day period in which to comment on the intended use of the information in the system of records. The Office of Management and Budget, in its Circular A–130, requires an additional 10-day period (for a total of 40 days) in which to make these comments. Any persons interested in commenting on this revised system of records may do so by submitting comments in writing to the U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, 12202 Sunrise Valley, Drive, Reston, VA 20192. Comments received within two days of publication in the **Federal Register** (December 21, 1998), will be considered. The system will be effective as proposed at the end of the comment period, unless comments are received which would require a contrary determination.

ADDRESSES: Send written comments to U.S. Department of the Interior, U.S. Geological Survey, USGS Privacy Act Officer, National Center, MS–807, Reston, Virginia, 20192. Hand deliver comments to the same address.

FOR FURTHER INFORMATION CONTACT: Chief, Programs and Partnership Branch, Mapping Applications Center, National Mapping Division, U.S. Geological Survey, National Center, MS–558, Reston, Virginia 20192.

SUPPLEMENTARY INFORMATION: The USGS is proposing to amend the system notice for USGS–24, "Employee Work Report Edit and Individual Employee Production Rates," to more accurately and clearly describe the addresses of the System Location and the System Manager; to change the word Production to All in Categories of Individual in the System; to delete several words in Categories of Records in the System; to redefine the Storage media; and to more clearly define the procedures under Notification, Record Access, and Contesting Record Procedures.

Dated: October 28, 1998.

Paul R. Celluzzi,

Chief, Corporate information Technology Branch, Office of Information Services.

Accordingly, the USGS proposes to amend the "Employee Work Report Edit and Individual Employee Production Rates," USGS–24 in its entirety to read as follows:

INTERIOR/USGS–24

SYSTEM NAME:

Employee Work Report Edit and Individual Employee Production Rates—Interior, USGS–24.

SYSTEM LOCATION:

1. Mapping Applications Center, National Mapping Division, U.S. Geological Survey, National Center, Mail Stop 558, Reston, Virginia 20192. 2. Mid-Continent Mapping Center, National Mapping Division, U.S. Geological Survey, 1400 Independence Road, Rolla, Missouri 65401. 3. Rocky Mountain Mapping Center, National Mapping Division, U.S. Geological Survey, Box 25046, Mail Stop 510, Denver, Colorado 80225. 4. Western Mapping Center, National Mapping Division, U.S. Geological Survey, 345 Middlefield Road, Mail Stop 531, Menlo Park, California 94025.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All employees in Mapping Centers.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains name, social security number, and hours, by individual employees in each of the offices listed above, as well as Geological Survey professionals (geographers, cartographers, etc.) who conducted research and investigations for which results are published in Geological Survey reports.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 310, 3010; 43 U.S.C. 31, 1467.

ROUTINE USES FOR RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary use of the records is for analysis of cost and production rates for individual employees and for units of National Mapping Division. Disclosure outside the Department of the Interior may be made: (1) To the U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department or, when represented by the Government, an employee of the Department is party to litigation or anticipated litigation or has an interest in such litigation, and (b) the Department of the Interior determines that the disclosure is relevant or necessary to the litigation and is compatible with the purpose for which the records were compiled; (2) Of information indicating a violation or potential violation of a statute, regulation, rule, order, or license to the appropriate Federal, State, local or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order, or license; (3) To a congressional office from the record of an individual in response to an inquiry the individual has made to the congressional office; (4) To a Federal agency which has requested information relevant or necessary to its hiring or retention of an employee, or issuance of a security clearance, license, contract, grant, or other benefit; (5) To Federal, State or local agencies where necessary to obtain information relevant to the hiring or retention of an employee, or issuance of a security clearance, license, contract, grant, or other benefit.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained on magnetic tape and disc.

RETRIEVABILITY:

By name, employee ID.

SAFEGUARDS:

Access restricted to authorized persons only from locked storage.

RETENTION AND DISPOSAL:

Retained and disposed of according to Bureau Records Disposition Schedule. RCS/Item 102–01.

SYSTEM MANAGER(S) AND ADDRESS:

1. Chief, Programs and Partnerships Branch, Mapping Applications Center, National Mapping Division, U.S. Geological Survey, National Center, Mail Stop 558, Reston, Virginia 20192. 2. Chief, Branch of Program Management, Mid-Continent Mapping Center, National Mapping Division, U.S. Geological Survey, 1440 Independence Road, Rolla, Missouri 65401. 3. Chief, Branch of Program Management, Rock Mountain Mapping Center, National Mapping Division, U.S. Geological Survey, Box 25046, Mail Stop 510, Denver, Colorado 80225. 4. Assistant Chief, Western Mapping Center, National Mapping Division, U.S. Geological Survey, 345 Middlefield Road, Mail Stop 531, Menlo Park, California 94025.

NOTIFICATION PROCEDURE:

A request for notification of the existence of records shall be addressed to the appropriate System Manager. The request shall be in writing, signed by the requester, and comply with the content requirements of 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

A request for access to records shall be addressed to the appropriate System Manager. The request shall be in writing, signed by the requester, and comply with the content requirements of 43 CFR 2.63.

CONTESTING RECORDS PROCEDURES:

A request for amendment of a record shall be addressed to the appropriate System Manager. The request shall be in writing, signed by the requester, and comply with the content requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Data from work prepared by individual.

BILLING CODE 4310–84–M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Notice of Revision of Form MMS–2005, Oil and Gas Lease of Submerged Lands Under the Outer Continental Shelf Lands Act

AGENCY: Minerals Management Service, Interior.

ACTION: Notice.

SUMMARY: MMS has determined that Form MMS–2005, the lease document, needs revision due to changes in regulations since it was last reviewed in 1986. MMS has revised the form to reflect plain language and has rewritten it for clarity and organization. To reduce the need for future revisions to the document due to changes in regulations, MMS refers the Lessee to applicable laws, and rules and regulations of the Department. Much of the wording of existing Form MMS 2005 that specifically cites, incorporates by reference, or restates statutory and regulatory requirements is therefore deleted from the proposed revision.

DATES: MMS will accept comments on this document on or before December 24, 1998, and will schedule a workshop during the comment period.

ADDRESSES: Comments may be sent to Terry Holman, Minerals Management Service, Mail Stop 4230, 1849 C Street, NW, Washington, D.C. 20240.

SUPPLEMENTARY INFORMATION: The Lease Sale Document form MMS–2005, is the written contract between the U.S. Government and those wishing to lease the submerged lands of the Outer Continental Shelf for exploration, development and production of oil and natural gas resources. Section 1 explicitly states that the lease is subject to the Notice of Lease Sale, the Outer Continental Shelf Lands Act, and all applicable rules and regulations of the Secretary of the Interior and Executive Orders issued by the President. Provisions that restate regulations have been deleted from the document. A section-by-section description of the proposed changes is presented below.

Old form	New form
Top of the form above the double line	The statement concerning information collection has been revised to indicate that the form contains information collection requirements that have been approved by the Office of Management and Budget. Headings in the upper right are revised for clarity. The Net Profit Share heading is replaced with Other to accommodate the recording of a broader range of special terms that might pertain to a lease.
Section 1: Statutes and Regulations	This section was rewritten to clarify that the lease is subject to the OCS Lands Act, the Lease Sale Notice, and all applicable laws, rules, regulations, and Executive Orders issued by the President as of the date of the lease and in the future. The revised section contains a specific reference to the Notice of Sale which was not included in the previous version of the document. Since many sections have been removed from the lease document because the requirements exist in various regulations, this statement affirms that the lessee remains responsible for elements not expressly stated in the lease.
Section 2: Rights of Lessee	Retitled Rights Granted to the Lessee. Rewritten in plain language.
Section 3: Term	Rewritten in plain language.
Section 4: Rental	Four sections combined in one renumbered and retitled Section 7 Payment of Rent and Royalty. Provisions deleted because they are redundant of 43 USC 1337; 30 CFR part 206, subpart C, 30 CFR 202.100; and 30 CFR part 218, subparts B and D. Rewritten in plain language.
Section 5: Minimun Royalty	See note on section 4 above.
Section 6: Royalty on Production	See note on section 4 above.
Section 7: Payments	See note on section 4 above. Clarifies when payments are due and how value of production is calculated. We added additional language to make express the existing implied covenant to market production for the mutual benefit of the Lessee and the Lessor. We also added that delivery of resources taken in kind shall be made to a point designated by the Lessor.
Section 8: Bonds	Provision deleted because it is redundant of 30 CFR part 256, subpart I.
Section 9: Plans	Provision deleted because it is redundant of 30 CFR part 250, subpart B.
Section 10: Performance	Renumbered and retitled Section 8 Diligent Operations. Rewritten in plain language.
Section 11: Directional Drilling	Provision deleted because it is redundant of 30 CFR 256.71.
Section 12: Safety Requirements	Provision deleted because it is redundant of 30 CFR 250.120–122 22 and 43 U.S.C. 1347 and 1348.
Sectioni 13: Suspension and Cancellation	Provision deleted because it is redundant of 30 CFR 250.110, 250.112 and 43 U.S.C. 1334.
Section 14: Indemnification	Renumbered section 4. Rewritten in plain language. Clarifies that only successful appeal of an MMS order, not mere pursuit of an appeal, could exempt the lessee from liability for loss or damage to property or injury to persons resulting from compliance with the order.
Section 15: Disposition of Production	Provision deleted because it is redundant of 43 U.S.C. 1353 and 43 U.S.C. 1337.
Section 16: Unitization, Pooling, and Drilling Agreements	Provision deleted because it is redundant of 30 CFR part 250, subpart M.
Section 17: Equal Opportunity Clause	Provision deleted because it is redundant of 41 CFR 6–1.4(a) and Executive Order 11246.
Section 18: Certification of Nonsegregated Facilities	Effective September 18, 1997, the Labor Department amended its regulations and 41 CFR 60–1.8(b) has been deleted. (See rulemaking at 62 FR 44174 (Aug. 19, 1997). The amended 60–1.8 requires the contractor maintain a non-segregated workplace, but no longer relies on certification of the contractor.
Section 19: Reservations to Lessor	Renumbered section 6. Rewritten in plain language.
Section 20: Transfer of Lease	Provision deleted because it is redundant of 30 CFR part 256, subpart J and 43 U.S.C. 1334.
Section 21: Surrender of Lease	Provision deleted because it is redundant of 30 CFR part 256.76 and 43 U.S.C. 1334.

Old form	New form
Section 22: Removal of Property on Termination of Lease	Renumbered section 9. Rewritten to specify time for submission of a plan for well abandonment and platform removal (within 3 months of lease termination). Also would authorize lessor to take title to property not removed within the prescribed time.
Section 23: Remedies in Case of Default	Renumbered section 10 and retitled Remedies for Lessee Non-Compliance. Rewritten in plain language.
Section 24: Unlawful Interest	Provision deleted because it is redundant of 41 U.S.C. 22 and 18 U.S.C. 431–433.
	Section 5 Access to Records is a new section. It implements and clarifies the requirements of 30 CFR 207.5, 212.51 and 250.121 and implements section 103 of the Federal Oil and Gas Royalty Management Act. In particular, it would require disclosure to authorize representatives of the lessor of documents in the possession of "affiliates," which have been found to be covered "other persons" under 30 CFR 212.51 in *Shell Oil Co.* v. *Babbitt*, 125 F.3d 172 (3rd Cir. 1997), affirming 945 F.Supp. 792, and *Santa Fe Mineral* v. *McCutcheon*, 90 F.3d 409 (10th Cir. 1996).

The revised form is included below:

Form MMS–2005 (1998)
(Supersedes MMS–2005 March 1986)

United States Department of the Interior
Minerals Management Service

Oil and Gas Lease of Submerged Lands Under the Outer Continental Shelf Lands Act

This form contains information collection requirements that have been approved by the Office of Management and Budget. These approvals are found at 30 CFR 210.10, and 30 CFR 250.100.

This lease contains approximately acres hectares (the "leased area"), described as follows:

It is effective as of (the "Effective Date") and will continue for an initial period of years (the "Initial Period") by and between the United States of America (the "Lessor"), by the Minerals Management Service ("MMS"), its authorized officer, and

(the "Lessee"). In consideration of any payment made by the Lessee to the Lessor and in consideration of the promises, terms, conditions, and covenants contained herein, including the attached Stipulation(s) numbered , the Lessee and Lessor agree as follows:

Sec. 1. *Statutes and Regulations.* This lease is issued under the Outer Continental Shelf Lands Act 43 U.S.C. 1331 et seq., as amended (the "Act"), and the Notice of Sale _____dated _____.

This lease is subject to the terms of that Notice, the Act, all applicable laws, and the rules and regulations of the Secretary of the Interior now or hereafter in effect, when not inconsistent with any express provision of this lease. This lease is also subject to all applicable Executive Orders issued by the President now or hereafter in effect.

Sec. 2. *Rights Granted to the Lessee.* The Lessor grants to the Lessee the exclusive right to explore for, develop, and produce oil and gas resources, except helium gas, in the submerged lands of the Outer Continental Shelf. This right is subject to the Lessor's approval of plans and permits required under the Act and regulations.

The Lessee also has the following rights:

(a) the nonexclusive right to conduct geological and geophysical explorations according to applicable regulations;

(b) the nonexclusive right to drill water wells, except wells in geopressured-geothermal and other geothermal reservoirs, and to use the water produced for operations under the Act free of cost. Drilling must be conducted according to procedures approved by the Lessor.

(c) the right to construct and maintain devices and structures necessary to the full exercise of rights under the lease, subject to compliance with applicable laws and regulations.

Sec. 3. *Term.* This lease will continue from the Effective Date of the lease for the Initial Period and as long as oil or gas is produced from the leased area in paying quantities, or drilling or well reworking operations (as approved by the Lessor) are conducted, or as otherwise extended under regulation.

Sec. 4. *Indemnification.* The Lessee must indemnify the Lessor for any claim, including claims for loss or damage to property or injury to persons resulting from any operation on the leased area conducted by or on behalf of the Lessee. However, the Lessee is not responsible to the Lessor under this section for any loss, damage, or injury caused by or resulting from:

(a) the Lessor's negligence, other than the commission or omission of a discretionary function or duty, or

(b) the Lessee's compliance with an order of the Lessor against which the Lessee filed an administrative appeal if the appeal is filed before the cause of action for the claim arose and if the Lessee prevails in the administrative appeal or subsequent action for judicial review.

Sec. 5. *Access to Records.* In accordance with regulations, if requested by the Lessor, the Lessee agrees to provide within a reasonable time to any authorized representative of the Department of the Interior all books, accounts, maps and any other records in the possession or under the control of the Lessee, its affiliates, or agents, that are relevant to operations, payments, disposition of the production, or any other activity occurring under this lease. The Lessee also agrees to keep these records open for inspection by any authorized representative at all reasonable times. This clause applies regardless of whether the records were prepared by or are under the control of the Lessee, or its affiliates, or agents. Information regarding disposition of the production includes, but is not limited to, all records regarding the sale or other disposition of oil or gas produced from the leased area by the Lessee or any of its affiliated or related entities.

Sec. 6. *Reservations to Lessor.* All rights in the leased area not expressly granted to the Lessee by the Act, the regulations, or this lease are reserved to the Lessor. Reserved rights include, but are not limited to:

(a) authorizing geological and geophysical exploration in the leased area which does not unreasonably interfere with or endanger actual operations under this lease;

(b) granting easements or rights-of-way;

(c) granting leases for any minerals other than oil and gas, provided that operations under such leases do not unreasonably interfere with or endanger operations under this lease; and

(d) suspending operations under this lease during war or national emergency as provided in section 12(c) or 12(d) of the Act. If the Lessor suspends operations or restricts activities under those sections of the Act, rent and royalty payments will be suspended and the term of this lease will be extended by adding the suspension period. The Lessor will pay the Lessee just compensation for such suspension as provided by the Act.

Section. 7. *Payment of Rent and Royalty.* The Lessee must pay the rent, minimum royalty, or royalty on the value of production saved, removed or sold at the rate specified on the face of this lease. The Lessor may require payment of the royalty in kind.

Payment must comply with applicable regulations and the following provisions:

(a) The Lessee must pay rent for each lease year which begins before determination of oil or gas in paying quantities in the leased area. Rent for the first year is due by the eleventh business day after receipt of this lease, and for subsequent years on or before the anniversary date of this lease.

(b) The Lessee must pay minimum royalty for each year which begins after a determination of oil or gas in paying quantities on the lease area is made by the Lessor. Minimum royalty is due by the day before the next anniversary of the lease. If production occurs, the Lessee must pay the greater of minimum royalty or royalty.

(c) The Lessor reserves authority to establish reasonable value of all production for royalty purposes. To establish the value of production, the Lessor may use dispositions by the Lessee, its affiliates, and others related to the Lessee, or the Lessor may use other considerations specified under applicable regulations.

(d) The Lessee must place production in marketable condition and market the production at no cost to the Lessor.

(e) The Lessee shall deliver royalty oil and gas resources taken in kind to a delivery point designated by the Lessor.

Sec. 8. *Diligent Operations.* The Lessee must properly and timely develop and produce this lease. Under normal conditions, the Lessee will explore and commence development within the primary term of this lease. After due notice in writing from the Lessor, the Lessee must drill such wells and produce at such rates consistent with sound operating principles as the Lessor may require.

Sec. 9. *Removal of Property on Termination of Leose.* In accordance with regulations, the Lessee must submit for approval a plan for well abandonment and platform decommissioning within three months after termination in whole or in part unless the Lessor approves a longer period. The Lessee must provide for the removal of all devices, works, and structures from the premises no longer subject to the lease, according to applicable regulations and orders of the Lessor. All abandonment and removal operations must be completed within one year after termination of this lease unless otherwise approved by the Lessor. Failure to comply will result in penalties under the regulations. The Lessor may take title to any property not removed within such time. With the written approval of the Lessor under a right of use and easement, the Lessee may continue to maintain devices, works, and structures on the leased area for drilling or producing on other leases or for other purposes.

Sec. 10. *Remedies for Less Non-Compliance.*

(a) Whenever the Lessee fails to comply with any provisions of the Act, the regulations issued under the Act, or the terms of this lease, the Lessor's remedies include, but are not limited to:

(1) Penalties under section 24 of the Act;

(2) Suspension or cancellation under Section 5 of the Act;

(3) Demands for payment or forfeiture of bond; or

(4) Other remedies for nonperformance of a contract available under common law or statutes.

(b) The Lessor's nonenforcement of a remedy for any violation does not prevent the Lessor from exercising any other remedies for any other violation or from exercising any other remedies for the same violation occurring at any other time.

BILLING CODE 4310–MR–M

DEPARTMENT OF INTERIOR

National Park Service

Notice of Boundary Revision: Piscataway Park

SUMMARY: Notice is hereby given that the National Park Service is revising the boundary of Piscataway Park to include one additional tract of land.

FOR FURTHER INFORMATION CONTACT: Joseph A. Cook, Chief, Land Resources Program Center, National Capital Region, National Park Service, 1100 Ohio Drive, SW., Washington, D.C. 20242, (202) 619–7034; and John Hale, Superintendent, National Capital Parks—East, Piscataway Park, 1900 Anacostia Drive, SW., Washington, D.C. 20020, (202) 690–5185.

SUPPLEMENTARY INFORMATION: Public Law 87–362 enacted October 4, 1961, authorizes the Secretary of the Interior to acquire lands and interests therein for Piscataway Park. Section 7(c)(ii) of the Land and Water Conservation Fund Act, as amended by Section 814(b) of Public Law 104–333, authorizes minor boundary revisions of areas within the National Park System. Such boundary revisions may be made, when necessary, after advising the appropriate congressional committees, and following publication of a revised boundary map, drawing or other boundary description in the **Federal Register.** In order to preserve lands which comprise the principal viewshed from Mount Vernon and Fort Washington in a manner that will ensure, insofar as practicable, the natural beauty of such lands as it existed at the construction and active use of the Mount Vernon Mansion and Fort Washington, it is necessary to revise the existing boundary of Piscataway Park to include one additional tract of land comprising approximately 45 acres. The property is being acquired by donation.

Notice is hereby given that the exterior boundary of Piscataway Park is revised to include all that tract, piece, parcel or subdivision of land and premises, situated, lying and being in the Seventh Election District of Charles County, Maryland, and more particularly described as follows:

Beginning at a stake now fixed at a point on the south side of an extension of a 30 foot roadway lying between Lots 9 and 10 of Block "B" a subdivision of a part of the said William C. Gibons land "Part of Marshall Hall," the said stake being more particularly fixed 990 feet north 64 degrees 13 minutes east of the intersection of the south side of the said 30 foot roadway with the east side of the State Road leading from Bryans Road Post Office to Marshall Hall, and running thence in direct extension of the said 30 foot roadway north 64 degrees 13 minutes east 1482 feet to the intersection with the boundary line or outline of the said William C. Gibons land where a stake is fixed; thence to the said outline south 19 degrees 03 minutes east 350 feet to a cedar stake a corner of said entire tract; thence still with the outline south 86 degrees 03 minutes east 1385 feet to a stake fixed in said outline; thence leaving said outline and running a division line between the land now surveyed and the land still owned by William C. Gibons south 64 degrees 13 minutes west 2640 feet to a stake there fixed; thence running parallel with the State Road and 990 feet distant (north 64 degrees 13 minutes east thereof) north 25 degrees 47 minutes west 1050 feet to the point of beginning, containing 45 acres, more or less.

Being all and the same land and premises acquired by Howard E. Jones and June E. Jones, his wife by Deed from Sandra H. Spessard, dated July 15, 1997,

and recorded July 17, 1997, among the Land Records of Charles County, Maryland, in Liber Number 2406, folio 253.

This parcel of land is depicted as Tract Number 02–218 on Land Status Map numbered 838–80036, Segment 2, dated July 1998 and is available for inspection in the Offices of the Land Resources Program Center, National Capital Region, National Park Service, Department of Interior, 1100 Ohio Drive, SW., Washington, D.C. 20242.

Dated: October 21, 1998.

Terry R. Carlstrom,

Regional Director, National Park Service, National Capital Region.

BILLING CODE 4310–70–M

DEPARTMENT OF THE INTERIOR

National Park Service

Lake Roosevelt National Recreation Area Draft General Management Plan/ Environmental Impact Statement, Washington

AGENCY: National Park Service, DOT.

ACTION: Notice of availability of Draft Environmental Impact Statement.

SUMMARY: The National Park Service announces the availability of a Draft General Management Plan/ Environmental Impact Statement (GMP/EIS) for Lake Roosevelt National Recreation Area (NRA), Washington. This notice also announces public meetings for the purpose of receiving comments on the draft document.

DATES: Comments on the draft GMP/EIS should be received no later than January 31, 1999. Public meetings will be held in Coulee Dam, WA, on November 30, 1998; Spokane, WA, on December 1; Kettle Falls, WA, on December 2; and Davenport, WA, on December 3. The specific locations and times of the meetings will be announced in the local media.

SUPPLEMENTARY INFORMATION: Guidance for managing a national park system unit such as Lake Roosevelt NRA is usually done through the development of a general management plan. The current General Management Plan for Lake Roosevelt NRA was approved in 1980. However, much has changed in the past 18 years, and a new management plan is needed to guide managers and decision-makers regarding the future management and use of the national recreation area.

The draft GMP/EIS presents and analyzes two alternatives for managing Lake Roosevelt NRA for the next 15 to 20 years. Alternative 1 proposes a new plan for managing the area that would emphasize maintenance of the existing visitor experience by increasing the capacity of existing facilities where feasible and redirecting other increases in visitation to less used areas. Alternative 1 would provide a framework for decision making regarding natural and cultural resources management, visitor use and development, NRA operations, and land use. Alternative 2, a "no action" alternative, proposes a continuation of management according to the 1980 General Management Plan. The draft alternatives were developed with input from federal, tribal, state, and local governments; concerned groups and individuals; and the general public. The Environmental Impact Statement presents a full discussion of the environmental impacts associated with implementing each alternative.

ADDRESSES: Comments on the draft GMP/EIS should be submitted to: Superintendent, National Park Service, Lake Roosevelt NRA, 1008 Crest Drive, Coulee Dam, WA 99116–1259. Copies of the draft GMP/EIS are available by request from the aforementioned address. The document will also be available for review at the Office of Public Affairs, National Park Service, Department of the Interior, 1849 C St., NW, Washington, DC 20240, and on the Internet at www.nps.gov.

FOR FURTHER INFORMATION CONTACT: Harold Gibbs, Planning Coordinator, Lake Roosevelt National Recreation Area, phone (509) 633–9441, ext. 131, fax (509) 633–9332, or E-mail: harold_gibbs@nps.gov.

Dated: October 26, 1998.

Rory D. Westberg,

Superintendent, Columbia Cascades Support Office, Pacific West Region.

National Park Service

Maine Acadian Culture Preservation Commission; Notice of Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act (Pub. L. 92–463) that the Maine Acadian Culture Preservation Commission will meet on Friday, December 18, 1998. The meeting will convene at 6:00 p.m. at the Wisdom High School, Saint Agatha, Aroostook County, Maine.

The Maine Acadian Culture Preservation Commission was appointed by the Secretary of the Interior pursuant to the Maine Acadian Culture Preservation Act (Pub. L. 101–543). The purpose of the Commission is to advise the National Park Service with respect to:

The implementation of an interpretive program of Acadian culture in the state of Maine.

The proceedings of a joint meeting with the Maine Acadian Heritage Council.

The Agenda for this meeting is as follows:

Review of April 10 and June 12, August 21 and October 23, 1998, summary reports.

2. Speaker: Pierre Chartrand on "The Dance of Acadia and Quebec."
3. Report of the National Park Service project staff.
4. Opportunity for public comment.
5. Proposed agenda, place, and date of the next Commission meeting.

The meeting is open to the public. Further information concerning Commission meetings may be obtained from the Superintendent, Acadia National Park. Interested persons may make oral/written presentations to the Commission or file written statements. Such requests should be made at least seven days prior to the meeting to: Superintendent, Acadia National Park, P.O. Box 177, Bar Harbor, ME 04609–0177; telephone (207) 288–5459.

Dated: October 28, 1998.

Paul F. Haertel,

Superintendent, Acadia National Park.

BILLING CODE 4310–70–P

DEPARTMENT OF THE INTERIOR

National Park Service

Notice of Availability of Final Director's Order #77–1: Wetland Protection and Final Procedural Manual #77–1: Wetland Protection

AGENCY: National Park Service, Interior.

ACTION: Notice of availability.

SUMMARY: The National Park Service (NPS) is converting and updating its current system of internal instructions in conformance with a new system of NPS internal guidance documents. As part of this process, the NPS recently made available for public review and comment (63 FR 45254) a draft Director's Order #77–1: Wetland Protection and a draft Procedural Manual #77–1: Wetland Protection. The Director's Order will revise NPS policies, standards, and requirements for implementing Executive Order 11990: Protection of Wetlands, and the Procedural Manual will establish NPS procedures for implementing the Director's Order within units of the National Park System.

The public review period for the Director's Order and Procedural Manual ended on September 24, 1998. Comments received during this period have been carefully considered and have been incorporated into the documents, as appropriate (see **SUPPLEMENTARY INFORMATION**). The comments were mostly related to clarifying certain points in the Director's Order and Procedural Manual, and did not result in any substantive changes to the policies, requirements, standards, or procedures proposed in the draft documents.

The NPS now announces the availability of the final Director's Order #77–1 and final Procedural Manual #77–1. The previous NPS wetland protection guidance, found in the 1980 NPS Floodplain Management and Wetland Protection Guidelines (45 FR 35916, minor revisions in 47 FR 36718), is now rescinded.

SUPPLEMENTARY INFORMATION: The NPS received four sets of written comments during the public review. One commenter was concerned that Director's Order #77–1 and Procedural Manual #77–1 might apply to activities conducted by a private party on lands that are outside of NPS units. The NPS believes that Section 2.0 of the Director's Order and Section 4.1.B of the Procedural Manual clearly indicate that these policies, requirements, and procedures apply only to activities conducted by the NPS that are either on or otherwise affect lands managed by the agency. A minor wording change was incorporated into Section 4.1.B of the Procedural Manual to help clarify this point.

A state agency recognized the rationale for the 0.1 acre wetland impact threshold for required compensation (Section 5.2.C of the Procedural Manual), but expressed concern that this threshold could potentially lead to unacceptable cumulative impacts in arid areas where small wetlands are especially important. The NPS believes that these concerns are adequately addressed in several ways. First, these procedures and NPS National Environmental Policy Act (NEPA) procedures do not allow an action to be "categorically excluded" from the NEPA process if there is the potential for adverse impacts on wetlands. Therefore, such cumulative impacts would have to be addressed in an Environmental Assessment or an Environmental Impact Statement, and justified in the required wetland "Statement of Findings" (Section 5.3.D and 5.3.E of the Procedural Manual). Second, we believe that the required wetland avoidance and impact minimization steps outlined in Section 5.2 of the Procedural Manual, along with other NPS natural resources policies and procedures, make the choice of important desert aquatic habitats for development sites highly unlikely. Third, such actions would also be subject to the permitting provisions of Section 404 of the Clean Water Act. For these reasons, the NPS is convinced that such areas are adequately protected from such cumulative impacts, and no changes were made on this subject in the final documents.

A federal agency found the Director's Order and Procedural Manual to be clear and useful to NPS staff and the public, and provided a number of comments intended to further clarify information in the areas of wetland definitions, assessment methodologies, delineation manuals, compensation, inventories, and treatment of incidental wetlands. We found these suggestions to be useful, and incorporated a number of them via minor modifications of Sections 2.3 and 2.4 of the Director's Order and Sections 2.2.C, 2.2.D, 3.2, 4.1.A, 4.2.B, and 4.2.C of the Procedural Manual.

DATES: Director's Order #77–1: Wetland Protection and Procedural Manual #77–1: Wetland Protection became effective on October 22, 1998.

ADDRESSES: Director's Order #77.1: Wetland Protection and Procedural Manual #77.1: Wetland Protection are available on the Internet at the following address: http://www.nps.gov/refdesk/DOrders/index.htm Requests for copies should be sent to: Joel Wagner, National Park Service, Water Resources Division, P.O. Box 25287, Denver, CO 80225.

FOR FURTHER INFORMATION CONTACT: Joel Wagner at (303) 969–2955.

Dated: October 30, 1998.

BILLING CODE 4310–70–P

DEPARTMENT OF JUSTICE

Justice Management Division/ Information Resources Management/ Telecommunications Services Staff; Notice of Establishment of the Global Criminal Justice Information Network Advisory Committee

SUMMARY: In accordance with the provisions of the Federal Advisory Committee Act, 5 U.S.C. app. 2 (1972), and 41 CFR101–6.1001–6,1035 (1992), the Deputy Assistant Attorney General for Information Resources Management, with the concurrence of the U.S. Attorney General, is establishing the Global Criminal Justice Information Network Advisory Committee to define the core requirements of the Global Criminal Justice Information Network, be the advocate to the Attorney General and to Congress, and set guiding principles to implement the Global Criminal Justice Information Network capabilities.

The Government Advisory Group is authorized by Initiative A07, "Address the Information Technology Needs of Our Nation's Criminal Justice Community," from Vice President Gore's National Performance Report entitled "Across America." The specific actions of A07 state that the Government Advisory Group will "define the core requirements of a Global Criminal Justice Information Network. Core requirements should include security and privacy protections * * * this group should also identify the challenges, such as funding, standards, and leadership, that might delay the network's implementation."

Membership

In accordance with the provisions of National Performance Review Initiative A07, this Advisory Committee will be composed of representatives from federal, state, and local government criminal justice community organizations experienced in identifying the criminal justice community's requirements for sharing information.

The Global Criminal Justice Information Network Advisory Committee will consist of approximately 25 members appointed by the U.S. Attorney General. The Advisory Committee will be advisory only and will report to the U.S. Attorney General through the Deputy Assistant Attorney General for Information Resources Management.

CONTACT PERSON: R.D. Robertson, Department of Justice, JMD/IRM/TSS, 600 E Street NW, 3rd Floor, Washington, DC 20530.

TELEPHONE: (202) 514–1600, Fax: (202) 514–1043.

Richard B. Chapman,

Director, Telecommunications Services Staff, Information Resources Management, Department of Justice.

DEPARTMENT OF JUSTICE

Justice Management Division/ Information Resources Management/ Telecommunications Services Staff; Notification of Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92–463), as amended, notice is hereby given that a meeting of the Global Criminal Justice Information Network Advisory Committee will be held on December 10–11, 1998. The Group will meet from 9:00 am—5:00 pm on December 10, 1998 and from 9:00 am—2:00 pm on December 11, 1998 at the Hyatt Dulles Hotel, 2300 Dulles Corner Boulevard, Herndon, VA, 20171. The Advisory Committee will meet to carry out its activities identified under National Performance Review "Access America" Initiative A07.

This meeting will be open to the public. Any interested person must register two (2) weeks in advance of the meeting. Registrations will then be accepted on a space available basis. For information on how to register, contact R.D. Robertson, the Designated Federal Employee (DFE), 600 E Street NW, 3rd Floor, Washington, DC 20530, or call (202) 514–1600. Interested persons whose registrations have been accepted may be permitted to participate in the discussions at the discretion of the meeting chairman and with the approval of the DFE.

If you need special accommodations due to a disability, please contact Tom Michalisko at (703) 713–1234 at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from R.D. Robertson, the DFE, 600 E Street NW, 3rd Floor, Washington, DC 20530, or call (202) 514–1600.

Richard B. Chapman,

Director, Telecommunications Services Staff, Information Resources Management, Department of Justice.

DEPARTMENT OF JUSTICE

Office of Justice Programs

Violence Against Women Office; Meeting

AGENCY: United States Department of Justice and United States Department of Health and Human Services.

ACTION: Notice of meeting.

SUMMARY: The National Advisory Council on Violence Against Women, co-chaired by the Attorney General and Secretary of Health and Human Services, will meet November 17 and 18, 1998 in the third floor conference room of the U.S. Department of Justice's Office of Justice Programs at 810 7th Street, NW, Washington, DC 20531. Scheduled to begin at 9:30 a.m. on November 17th and adjourn at 3:30 p.m. on November 18th, the meeting will include opening remarks by the Attorney General and Secretary Shalala, committee meetings, and an afternoon plenary session.

Committee meetings and the plenary session will be open to the public on a space-available basis. Reservations are required and a photo ID will be requested for admittance. To reserve a space and advise of any special needs, interested persons should call the U.S. Department of Justice Violence Against Women Office at (202) 616–8894. Sign language interpreters will be provided. Anyone wishing to submit written questions to the Council should notify the Violence Against Women Office by Thursday, November 12, 1998. The notification may be delivered by mail, telegram, or facsimile or in person. It should contain the requestor's name and his or her corporate or government designation or consumer affiliation along with a short statement describing the topic to be addressed. Interested parties may attend by calling Ms. Karen Noel at (202) 616–8894.

FOR FURTHER INFORMATION CONTACT: Questions regarding this meeting may be sent to the Violence Against Women Office, United States Department of Justice, Room 5302, 950 Pennsylvania Avenue, NW, Washington, DC 20530, by telephone to (202) 616–8894, or by facsimile to (202) 307–3911.

Bonnie J. Campbell,

Director, Violence Against Women Office, United States Department of Justice.

BILLING CODE 4410–BB–M

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

[Application No. D–10535, et al.]

Proposed Exemptions; Moody-Day, Inc.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or request for a hearing on the pending exemptions, unless otherwise stated in the Notice of Proposed Exemption, within 45 days from the date of publication of this **Federal Register** Notice. Comments and requests for a hearing should state: (1) The name, address, and telephone number of the person making the comment or request, and (2) the nature of the person's interest in the exemption and the manner in which the person would be adversely affected by the exemption. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing.

ADDRESSES: All written comments and request for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Exemption Determinations, Room N–5649, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210. Attention: Application No. _____, stated in each Notice of Proposed Exemption. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefits Administration, U.S. Department of Labor, Room N–5507, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of proposed exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of proposed exemption are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Moody-Day, Inc. Profit Sharing Plan, (the Plan), Located in Carrollton, Texas

(Application No. D–10535)

Proposed Exemption

The Department of Labor (the Department) is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990).[1] If the exemption is granted, the restrictions of sections 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975(a) and (b) of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the past sale (the Sale) by the Plan of an unimproved three-acre tract of real property located in Austin, Texas (the Property) to Metroport Realty Corporation (Metroport), an affiliate of Moody-Day, Inc., the Plan sponsor and a party in interest with respect to the Plan, provided the following conditions were satisfied:

(a) the Sale was a one-time transaction for cash;

(b) the Plan received the fair market value of the Property on the date of the Sale;

(c) the Property was appraised by qualified, independent real estate appraisers;

(d) a qualified, independent fiduciary determined that the Sale was in the best interests of the Plan; and

(e) the Plan paid no commissions or other expenses relating to the Sale.

Effective Date of Exemption: If granted, the effective date of this exemption will be May 24, 1995.

Summary of Facts and Representations

1. The Applicants are Donald J. Carter, William J. Hendrix, and M. Douglas Adkins in their capacity as trustees (Trustees) of the Moody-Day, Inc. Profit Sharing Plan, and Ronald L. Carter and Jeffery Fink who were directors of Moody-Day, Inc. (Moody-Day) on the date of the Sale.

2. The Applicants state that the Plan is a defined contribution plan which had 50 participants as of the end of the 1994 Plan year. The Applicants state further that at the time of consummation of the Sale, the fair market value of the total assets of the Plan was $217,545. The fair market value of the Property was determined to be $165,000 (see paragraph 8 below) at that time. Thus, approximately 76% of the Plan's assets was involved in the subject transaction.[2]

3. The Property was owned by the Plan at the time of the Sale free and clear of any encumbrances. The Property consists of approximately 3 acres of unimproved land at the Northeast corner of Middle Fiskville Road and Northcape Drive in the City of Austin, Travis County, Texas. The Property was not adjacent to any property owned by the Plan sponsor or a party in interest with respect to the Plan.

The Property was acquired by the Plan in 1977 from an unrelated party, for $47,154. The Applicants represent that the Property has been held by the Plan since it was acquired in 1977 and it has not been leased to or used by any party in interest or other related party during such time.[3]

4. The Applicants represent that the motivation for the Sale of the Property by the Plan to Metroport was solely to benefit the Plan's participants and beneficiaries. The Plan had been frozen since 1991 and the participants and beneficiaries were requesting that distributions of their assets be made. The Plan had tried, without success, to sell the Property on the open market since 1989. The Applicants represent that the Sale of the Property was in the best interests of the Plan and its participants and beneficiaries. At the time of the Sale, the Property was the last remaining asset of the Plan. Thus, the Sale provided the necessary liquidity to allow for a termination of the Plan and a final distribution of its assets.

Prior to the Sale, the Applicants were advised by their legal counsel (Counsel) that the Property could be sold to Metroport pursuant to Prohibited Transaction Exemption (PTE) 84–14 (49 FR 9494, March 13, 1984), a class exemption for certain prohibited transactions by a plan whose assets are managed by a "qualified professional asset manager" or "QPAM" (the QPAM Exemption).[4] The Applicants represent that they now believe that the conditions of PTE 84–14 may not have been satisfied with respect to the Sale. As a result, they request that the Department consider granting an individual exemption under section 408(a) of the Act, which would be effective as of May 24, 1995, the date of the Sale.

5. In order to fulfill what the Applicants, Moody-Day, Inc., Metroport and Counsel believed to be the requirements of PTE 84–14 with respect to the Sale, on or about December 19, 1994, the Applicants, on behalf of the Plan, hired Lucian L. Morrison (Mr. Morrison) as an independent fiduciary for the purpose of appointing a QPAM to sell the Property owned by the Plan. Prior to this time, Counsel had contacted Mr. Morrison, the past President of Heritage Trust Company in Houston, Texas, with regard to his willingness to act as an independent fiduciary for the Plan. Counsel, on behalf of the Applicants, had contacted Mr. Morrison because he had acted in a fiduciary capacity in a number of

[1] Section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978, 5 U.S.C. App. 1 (1995)) generally transferred the authority of the Secretary of the Treasury to issue exemptions under section 4975(c)(2) of the Code to the Secretary of Labor. In the discussion of the exemption, references to sections 406 and 408 of the Act should be read to refer as well to the corresponding provisions of section 4975 of the Code.

[2] It is represented that a high percentage of the Plan's assets was involved in the Sale because the Property was one of the only remaining assets of the Plan at the time of the transaction. In this regard, the Sale was carried out in connection with completing the affairs of the Plan for termination.

[3] The Department expresses no opinion herein regarding whether the acquisition and holding of the Property by the Plan violated any of the provisions of Part 4 of Title I of the Act. The Department is providing no retroactive exemptive relief herein with respect to the acquisition and holding of the Property by the Plan.

[4] PTE 84–14 provides relief from the restrictions of section 406(a) of the Act for transactions between parties in interest and plans where a QPAM (as defined in Part V(a) of that class exemption) is the decision-maker for the assets of the plan involved, and certain other conditions are met.

situations for various entities. On July 11, 1994, Counsel informed the Applicants that Mr. Morrison was willing to act on behalf of the Plan in appointing a QPAM to have investment discretion with respect to the Sale. Counsel advised Moody-Day and the Applicants that in order to comply with PTE 84–14, the Sale would proceed as follows:

(1) Mr. Morrison would appoint a QPAM to represent the Plan with respect to the potential sale of the Property;

(2) the QPAM would hire its own appraiser or appraisers and attorney to represent it in the transaction and, if appropriate, to negotiate the terms of the sale between the Plan and Metroport; and

(3) after the final terms of any transaction were negotiated and approved, the sale would close with all appropriate documents properly executed.

Therefore, on December 19, 1994, Mr. Morrison was engaged as an independent fiduciary of the Plan to select and hire a QPAM to evaluate the proposed transaction and to negotiate the terms thereof. Mr. Morrison had full authority to select the QPAM and to allocate a portion of his fiduciary authority to the QPAM. No recommendations for the selection of the QPAM were made by either Moody-Day, the Applicants, or any other party in interest with respect to the Plan.

6. On December 19, 1994, a "Limited Purpose Independent Fiduciary Agreement" (the Limited Agreement) was formally entered into between Moody-Day, the Trustees, and Mr. Morrison. The purpose of the Limited Agreement was to facilitate the Sale of the Property. The Limited Agreement stated that the Sale would be a prohibited transaction unless an exemption from the prohibited transaction rules of the Act was utilized. The Limited Agreement further specified that the QPAM Exemption was available for this purchase if the conditions of that exemption were met.[5]

Mr. Morrison accepted his appointment as a limited purpose independent fiduciary and agreed to act as provided for under the Limited Agreement, the Plan Document, and the Act. Mr. Morrison selected Sarofim Realty Advisors (SRA) as a "QPAM" to transact the Sale of the Property by the Plan. SRA, as a fiduciary of the Plan, served as investment manager with exclusive investment discretion over the Property. The Applicants represent that SRA, as fiduciary of the Plan, was not related to or otherwise affiliated with Moody-Day, Inc., Metroport, Counsel or the Applicants.

7. On December 22, 1994, Mr. Morrison, SRA and Moody-Day entered into an "Investment Management Agreement" (the IMA). As independent fiduciary, Mr. Morrison appointed SRA as an Investment Manager (IM) of the Plan for purposes of the proposed transaction. In Section 2 of the IMA, SRA acknowledged that in acting as an IM under the IMA, it would be acting as a fiduciary of the Plan as defined under section 3(21) of the Act. Section 4 of the IMA provides, in pertinent part, that the IM shall: (1) Evaluate the proposed transaction and, if appropriate; (2) negotiate the terms of the Sale. Section 4 also provides that the IM shall sell the Property to Metroport if, in the IM's judgement, the sale price negotiated by the IM represented the fair market value of the Property as determined by the IM after considering one or more appraisals obtained from qualified, independent appraisers. Finally, section 6 of the IMA provides that the agreement shall terminate on the closing date of the proposed sale in the event that the IM directs the Plan to enter into the sale of the Property to Metroport.

8. In order to determine the fair market value of the Property, SRA, in its capacity as IM, retained the independent appraisal firm of Bach Thoreen McDermott, Inc., of Houston, Texas, to appraise the Property. Mr. Steven N. Bach (Mr. Bach), MAI, prepared the appraisal that was used to establish the value of the Property for the Sale.[6] Using the Sales Comparison Approach (i.e. which relied on recent sales of similar properties in the open market) to value the Property, Mr. Bach determined that the fair market value of the Property, as of January 30, 1995, was $165,000. Mr. Bach reported his finding to SRA on the same date.

9. On February 1, 1995, SRA in its capacity as IM, opined that $165,000 represented the fair market value of the Property and determined that the Sale to Metroport at that price would be in the best interests of the Plan and its participants and beneficiaries.

10. Pursuant to SRA's findings and instructions for the Sale, the Plan sold the Property to Metroport for $165,000 in cash on May 24, 1995. In this regard, a Special Warranty Deed conveying title to the Property from the Plan to Metroport was signed on May 24, 1995 by a Trustee of the Plan. With respect to the Sale, the Plan paid no commissions or other expenses.

Moody-Day represents that all parties involved in the Sale recognized that Metroport was paying the Plan an amount which represented no less than the current fair market value of the Property.

11. In summary, the Applicants represent that the requested exemption will satisfy the criteria of section 408(a) of the Act for the following reasons: (a) The Sale was a one-time transaction for cash; (b) the Plan received the fair market value of the Property on the date of the Sale; (c) the fair market value of the Property was determined by an independent, qualified real estate appraiser at the time of the Sale; (d) a qualified, independent fiduciary acting on behalf of the Plan appointed an independent investment manager who negotiated the terms of the transaction, determined that the Sale was in the best interests of the Plan, and assured that the Plan received an amount in cash equal to the fair market value of the Property; and (e) the Plan paid no commissions or other expenses relating to the Sale.

FOR FURTHER INFORMATION CONTACT: Janet L. Schmidt of the Department, telephone (202) 219–8883. (This is not a toll-free number.)

Mohammad J. Iqbal Employee Profit Sharing Plan and Trust (the Plan), Located in Elizabethtown, KY

(Application Number D–10614)

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, August 10, 1990). If the exemption is granted the restrictions of 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the proposed cash sale (the Sale) of 12 Krugerrand gold coins (the Coins) by the individually directed account (the Account) in the Plan of Dr. Mohammad J. Iqbal (Dr. Iqbal), to Dr. Iqbal, a party in interest and disqualified person with respect to the Plan, provided that the following conditions are met:

(a) The Sale is a one-time transaction for cash;

(b) The terms and conditions of the Sale are as least as favorable to the Account as those obtainable in an arm's length transaction with an unrelated party;

(c) The Account receives the fair market value of the Coins as of the date of Sale; and

(d) The Account is not required to pay any commissions, costs, or other expenses in connection with the Sale.

Summary of Facts and Representations

1. The Plan is a defined contribution profit-sharing plan that provides its 3 participants with the opportunity to direct the investment of their individual accounts. The Plan is sponsored by Dr. Iqbal, who also serves as Plan Trustee and Plan Administrator. As of December 31, 1997, the Plan held assets valued at approximately $2,199,000. As of the same date, Dr. Iqbal's Account held assets valued at approximately $2,110,000.

2. Among the assets in the Account are 12 Krugerrand gold coins. The Coins, issued by the South African government, were purchased by the Account on March 6, 1992, for $4,848 from the Gumer & Company brokerage firm located in Louisville, Kentucky.[7] As of Friday, October 23, 1998, the asking price in the Wall Street Journal was $300 per coin.

3. The applicant requests an exemption for the proposed Sale of the Coins by the Account to Dr. Iqbal. Dr. Iqbal represents that he will pay fair market value for the Coins on the date of the Sale, as determined by the asking price listed in the "Cash Prices" table in the Wall Street Journal on such date. The applicant wishes to engage in the proposed transaction because the Coins have steadily declined in value.[8] Dr. Iqbal wishes to have the Account reinvest the proceeds from the proposed Sale in assets which may generate a higher rate of return.

4. The applicant represents that the proposed transaction would be administratively feasible in that it would be a one-time transaction for cash. Furthermore, the applicant states that the transaction would be in the best interests of the Account because the Sale of the Coins would enable the Account to invest the proceeds from the Sale in other assets and potentially achieve a higher rate of return. Finally, the applicant asserts that the transaction will be protective of the rights of the participant and beneficiary as indicated by the fact that the Account will receive the fair market value of the Coins as of the date of Sale, and will incur no commissions, costs or other expenses as a result of the Sale.

5. In summary, the applicant represents that the proposed transaction satisfies the statutory criteria of section 408(a) of the Act and section 4975(c)(2) of the Code because: (a) The Sale will be a one-time transaction for cash; (b) the terms and conditions of the Sale will be at least as favorable to the Account as those obtainable in an arm's length transaction with an unrelated party; (c) the Account will receive the fair market value of the Coins as of the date of Sale; and (d) the Account will not be required to pay any commissions, costs, or other expenses in connection with the Sale.

Notice to Interested Persons: Because Dr. Iqbal is the only participant to be affected by the proposed transaction, it has been determined that there is no need to distribute the notice of proposed exemption to (the Notice) to interested persons. Comments and requests for a hearing are due thirty (30) days after publication of the Notice in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Mr. James Scott Frazier, telephone (202) 219–8881. (This is not a toll-free number.)

Individual Retirement Accounts (Collectively, the IRAs) for William N. Albright, Victor Hamre, and Richard Pearson, (Collectively, the Participants) Located in Westerville, Ohio; Chicago, Illinois; and New York, New York, Respectively

(Application No. D—10656, 10657, 10658)

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, August 10, 1990). If the exemption is granted, the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed cash sales (the Sales) of certain shares of stock (the Stock) in the First Community Bancshares Corp. (First Community) by each IRA to its respective Participant, a disqualified person with respect to the IRA,[9] provided that the following conditions are met:

(a) The terms and conditions of the Sales will be at least as favorable to each

---

either the QPAM or (so long as the QPAM retains full fiduciary responsibility with respect to the transaction) a property manager acting in accordance with written guidelines established and administered by the QPAM, makes the decision on behalf of the investment fund to enter into the transaction, provided that the transaction is not part of an agreement, arrangement or understanding designed to benefit a party in interest; * * *

Part V(c)(3) of PTE 84–14 provides, in relevant part, that a named fiduciary (within the meaning of section 402(a)(2) of the Act) of a plan and an employer any of whose employees are covered by the plan will also be considered affiliates with respect to each other for purposes of Part I(a) if such an employer * * * has the authority * * * to appoint or terminate the named fiduciary or otherwise negotiate the terms of the named fiduciary's employment agreement.

Section 402(a) of ERISA provides that every employee benefit plan shall be established and maintained pursuant to a written instrument. This instrument must provide for one or more named fiduciaries who have the authority to control and manage the operation and administration of the plan. Under sections 402(c)(3) and 403(a) of ERISA, only a named fiduciary has the authority to appoint an investment manager, and such an appointment may be made only as specifically provided in the plan instrument.

The preamble to the proposed class exemption, 47 FR 56945 at 56947 (December 21, 1982), explains that the Department is prepared to grant broad exemptive relief only where an independent asset manager has, and in fact exercises, discretionary authority to cause an investment fund to enter into a transaction which is otherwise prohibited. Party in interest transactions that are negotiated by, e.g., an employer which sponsors a plan, and are then presented to a QPAM for approval would not qualify for the class exemption as proposed.

It is the view of the Department that the retention of a QPAM solely to approve a specific transaction presented for its consideration by a plan sponsor at the time of its engagement is inconsistent with the underlying intent of the exemption, i.e., the transfer of plan assets to an independent, discretionary manager free from the undue influence of the sponsor. Such a transaction also raises issues under section I(c) of the exemption which requires that the transaction not be a part of an agreement, arrangement or understanding designed to benefit a party in interest.

[5] In this regard, Part I(a) of PTE 84–14 provides that:

(a) At the time of the transaction (as defined in section V(i)) the party in interest, or its affiliate (as defined in section V(c)), does not have, and during the immediately preceding one year has not exercised, the authority to—

(1) Appoint or terminate the QPAM as a manager of any of the plan's assets, or (2) negotiate the terms of the management agreement with the QPAM (including renewals or modifications thereof) on behalf of the plan; * * *

Part I(c) of PTE 84–14 provides that:

(c) The terms of the transaction are negotiated on behalf of the investment fund by, or under the authority and general directions of, the QPAM, and

[6] SRA also secured an appraisal from Crosson Dennis, Inc., an independent real estate appraisal firm, who determined that the Property had a fair market value of $95,000 as of December 22, 1994. However, after consulting with Counsel and the Trustees, SRA selected Mr. Bach for the purpose of securing a second appraisal of the Property.

[7] The applicant represents that, at the time of the original acquisition, the Plan was not an "individually directed account plan." The Department notes that section 408(m) of the Code provides, in pertinent part, that "[t]he acquisition * * * by an individually-directed account under a plan described in section 401(a) of any collectible shall be treated (for purposes of this section and section 402) as a distribution from such account in an amount equal to the cost to such account of such collectible." Section 408(m)(2)(A) includes coins in the definition of the term collectible. In this regard, the Department is not providing any exemptive relief to the extent section 408(m) is applicable to the facts in this case.

[8] The Department expresses no opinion in this proposed exemption as to whether the acquisition and the subsequent holding of the Coins by the Account violated any of the fiduciary responsibility provisions of Part 4 of Title I of the Act.

[9] There is no jurisdiction under 29 CFR § 2510.3(b) since the IRAs have only one participant. However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

IRA as those obtainable in arm's length transactions with an unrelated party;

(b) The Sales will be one-time transactions for cash;

(c) The IRAs will receive the fair market value of the Stock as established by a qualified, independent appraiser; and

(d) The IRAs will pay no commissions, costs or other expenses with respect to the Sales.

Summary of Facts and Representations

1. The IRAs are individual retirement accounts, as described in Section 408(a) of the Code. Each IRA owns shares of Stock in First Community. First Community is a bank holding company located in Milton, Wisconsin with 230,789 shares of Stock issued and outstanding. First Community's primary assets are First Community's 100% ownership of two banks: Citizens Savings Bank located in Anamosa, Iowa with approximately $37.6 million in total assets and First Community Bank located in Milton, Wisconsin with approximately $62.7 million in total assets.

2. The Participants of the IRAs are: William N. Albright, the president of First Community Bank; Victor Hamre, the president of Citizens Savings Bank; and Richard Pearson, a director at both First Community Bank and Citizens Savings Bank. The Participants describe the IRAs as follows:

(a) The IRA of William N. Albright (the Albright IRA) currently holds total assets valued at approximately $289,538. The Albright IRA's ownership of 9,200 shares of the Stock comprises 99.74% of the Albright IRA's total assets and represents a 3.99% interest in First Community.[10] The Albright IRA acquired the Stock in 1995 for investment purposes from an existing First Community shareholder for $23.00 per share.

(b) The IRA of Victor Hamre (the Hamre IRA) currently holds total assets valued at approximately $82,907. The Hamre IRA's ownership of 1,087 shares of the Stock comprises 41.16% of the Hamre IRA's total assets and represents a 0.47% interest in First Community. The Hamre IRA acquired the Stock in 1995 for investment purposes from an existing First Community shareholder for $23.00 per share.

(c) The IRA of Richard Pearson (the Pearson IRA) currently holds total assets valued at approximately $413,084. The Pearson IRA's ownership of 5,941 shares of the Stock comprises 41.73% of the Pearson IRA's total assets and represents a 2.57% interest in First Community. The Pearson IRA acquired the Stock for investment purposes from First Community when First Community issued new shares in 1991 and 1992 for $17.15 and $19.14 per share, respectively.[11]

3. The Participants represent that business considerations have recently caused First Community to elect to be taxed as a Subchapter S corporation. This election is tentatively scheduled to become effective as of the close of business on December 31, 1998. The Participants propose to purchase the Stock from their respective IRAs to avoid the violation of section 1361 of the Code which prohibits IRAs from holding stock in a Subchapter S corporation.

4. Mr. Kent Fisher and Mr. Neal Richardson (collectively, the Appraisers) appraised the Stock on June 30, 1998. The Appraisers are both experienced business appraisers for Lindgren, Callihan, Van Osdol & Co., Ltd., an appraisal company independent of the IRAs and the Participants. The Appraisers represent that they have no present or contemplated financial interest in First Community and their fees were not contingent upon the results of their findings. In their evaluation of the Stock, the Appraisers relied solely on the Private Market Method.[12] The Appraisers concluded that the fair market value of the Participants' interest in the non-marketable, non-controlling Stock was $31.39 per share.[13]

5. The Participants propose to purchase the Stock from their respective IRAs in one-time transactions for cash. The Participants represent that the Sales will be in the best interest of the IRAs because the Sales will allow for greater diversification of the IRAs' assets and the Stock will be purchased at a price per share greater than the price per share initially paid by the IRAs. Additionally, the Participants represent that the Sales will be protective of the rights of each IRA's participant because each IRA will receive cash equal to the fair market value of the Stock, as determined by a qualified, independent appraiser, and each IRA will incur no commissions, costs, or other expenses as a result of the Sales.

6. In summary, the Participants represent that the Sales satisfy the statutory criteria of section 4975(c)(2) of the Code because:

(a) The terms and conditions of the Sales will be at least as favorable to each IRA as those obtainable in arm's length transactions with an unrelated party;

(b) The Sales will be one-time transactions for cash;

(c) The IRAs will receive the fair market value of the Stock as established by a qualified, independent appraiser; and

(d) The IRAs will pay no commissions, costs or other expenses with respect to the Sales.

Notice to Interested Persons: It has been determined that there is no need to distribute the notice of proposed exemption (the Notice) to interested persons since the Participants are the only participants in the IRAs. Comments and requests for a hearing are due thirty (30) days after publication of the Notice in the **Federal Register**.

[10] The Department notes that the Internal Revenue Service has taken the position that a lack of diversification of investments may raise questions with respect to the exclusive benefit rule under section 401(a) of the Code. See, e.g. Rev. Rul. 73–632, 1973–2 C.B. 128. The Department further notes that section 408(a) of the Code, which describes the tax qualification provisions for IRAs, mandates that a trust be created for the exclusive benefit of an individual or his beneficiaries. However, the Department is expressing no opinion in this proposed exemption regarding whether violations of the Code have taken place with respect to the purchase and subsequent retention of the Stock by the Participants.

[11] To the extent that First Community or other sellers of the Stock were not disqualified persons with respect to the IRAs under section 4975(e)(2), the purchase of the Stock by the IRAs does not constitute a prohibited transaction under section 4975(c)(1)(A) of the Code. However, the purchase and holding of the Stock raises questions under section 4975(c)(1)(D) and (E) depending on the degree (if any) of the IRA participant's interest in the transaction. Section 4975(c)(1)(D) and (E) of the Code prohibits the use by or for the benefit of a disqualified person of the assets of a plan and prohibits a fiduciary from dealing with the assets of a plan in his own interest or for his own account. The IRA sponsors, as presidents or director of the First Community Bank or Citizens Savings Bank, may have interests in the proposed transactions which may have affected their best judgment as fiduciaries of their IRAs. In such circumstances, the transactions may have violated 4975(c)(1)(D) and (E) of the Code. See Advisory Opinion 90–20A (June 15, 1990). Accordingly, to the extent there were violations of section 4975(c)(1)(D) and (E) of the Code with respect to the purchases and holdings of the Stock by the IRAs, the Department is extending no relief for these transactions herein.

[12] Although the Appraisers considered the Public Market Method in their evaluation, they determined that this method was too difficult to implement due to First Community's geographic location and financial structure. The Appraisers additionally considered the prices paid for the Stock in previous Stock purchases but determined that there were no recent purchases which would provide an accurate valuation of the Stock.

[13] The Appraisers calculated the price of the Stock by first adjusting the equity levels of a comparable group of recently sold banks to reflect 8% or "normal" capitalization levels. The Appraisers then determined the average price to "normal" equity ratio for this group of banks and multiplied this ratio against First Community's adjusted book value. After subtracting First Community's debt from this amount to calculate First Community's value, this value was then divided by the number of outstanding shares to determine the Stock's price per share. Finally, the Appraisers discounted the resulting price per share to reflect the Stock's non-marketable and non-controlling nature.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest of disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(b) of the act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan;

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 4th day of November, 1998.

Ivan Strasfeld,

Director of Exemption Determinotions, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 98–29962 Filed 11–5–98; 8:45 am]

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

[Application No. D–10574]

Notice of Proposed Individual Exemption to Amend Prohibited Transaction Exemption (PTE) 94–50 Involving Salomon Smith, Barney Inc. (Salomon Smith Barney) Located in New York, NY

AGENCY: Pension and Welfare Benefits Administration, U.S. Department of Labor.

ACTION: Notice of proposed individual exemption to modify PTE 94–50.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed individual exemption which, if granted, would amend PTE 94–50 (59 FR 32024, June 21, 1994), an exemption granted to Smith Barney, Inc. (Smith Barney), the predecessor of Salomon Smith Barney. PTE 94–50 relates to the operation of the TRAK Personalized Investment Advisory Service product (the TRAK Program) and the Trust for TRAK Investments (subsequently renamed the Trust for Consulting Group Capital Markets Funds) (the Trust). If granted, the proposed exemption would affect participants and beneficiaries of and fiduciaries with respect to employee benefit plans (the Plans) participating in the TRAK Program.

EFFECTIVE DATE: If granted, the proposed amendments will be effective as of November 9, 1998.

DATES: Written comments and requests for a public hearing should be received by the Department on or before December 24, 1998.

ADDRESSES: All written comments and requests for a public hearing (preferably, three copies) should be sent to the Office of Exemption Determinations, Pension and Welfare Benefits Administration, Room N–5649, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210, Attention: Application No. D–10574. The application pertaining to the proposed exemption and the comments received will be available for public inspection in the Public Documents Room of the Pension and Welfare Benefits Administration, U.S. Department of Labor, Room N–5507, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: Ms. Jan D. Broady, Office of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor, telephone (202) 219–8881. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of a proposed exemption that would amend PTE 94–50. PTE 94–50 provides an exemption from certain prohibited transaction restrictions of section 406 of the Employee Retirement Income Security Act of 1974 (the Act) and from the sanctions resulting from the application of section 4975 of the Internal Revenue Code of 1986 (the Code), as amended, by reason of section 4975(c)(1) of the Code. Specifically, PTE 94–50 provides exemptive relief from the restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code, for the purchase or redemption of shares in the Trust by an employee benefit plan, an individual retirement account (the IRA), or a retirement plan for a self-employed individual (the Keogh Plan). PTE 94–50 also provides exemptive relief from the restrictions of section 406(b) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(E) and (F) of the Code, with respect to the provision, by the Consulting Group of Smith Barney (the Consulting Group), of investment advisory services to independent fiduciaries of participating Plans (the Independent Plan Fiduciaries) that might result in such fiduciary's selection of an investment portfolio (the Portfolio) under the TRAK Program for the investment of Plan assets.[1]

[1] On October 5, 1992, the Department granted PTE 92–77 at 55 FR 45833. PTE 92–77 permitted Shearson Lehman Brothers, Inc. (Shearson Lehman) to make the TRAK Program available to Plans that acquired shares in the Trust. In this regard, PTE 92–77 permitted Plans to purchase or redeem shares in the Trust and allowed the Consulting Group to provide investment advisory services to an independent Fiduciary of a Plan which might result in such fiduciary's selection of a Portfolio in the TRAK Program for the investment of Plan assets.

Subsequent to the granting of PTE 92–77, on July 31, 1993, Smith Barney acquired certain assets of Shearson Lehman associated with its retail business, including the TRAK Program, and applied for and received a new exemption (PTE 94–50) for

Continued

Besides the transactions described above, PTE 94–50 permitted Smith Barney to add a daily-traded collective investment fund (the GIC Fund) to the existing Fund Portfolios and to describe the various entities operating the GIC Fund. Further, PTE 94–50 replaced references to Shearson Lehman with references to Smith Barney. PTE 94–50 is effective as of July 31, 1993 for the transactions described in PTE 92–77 and effective as of March 29, 1994 with respect to transactions involving the GIC Fund.

As of December 31, 1997, the TRAK Program held assets that were in excess of $8.4 billion. Of those assets, approximately $1.7 billion were held in 540, 401(k) Plan accounts and approximately 57,100 employee benefit plan and IRA/Keogh-type accounts. At present, the Trust consists of 13 Portfolios that are managed by the Consulting Group and advised by one or more unaffiliated sub-advisers selected by Salomon Smith Barney.

Salomon Smith Barney has informed the Department of certain changes, which are discussed below, to the facts underlying PTE 94–50. These modifications include (1) corporate mergers that have changed the names of the parties described in PTE 94–50 and would permit broader distribution of TRAK-related products, (2) the implementation of a recordkeeping reimbursement offset system (the Recordkeeping Reimbursement Offset Procedure) under the TRAK Program, and (3) the institution of an automated reallocation option (the Automatic Reallocation Option) under the TRAK Program for which Salomon Smith Barney has requested administrative exemptive relief from the Department.

The proposed exemption has been requested in an application filed on behalf of Salomon Smith Barney pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, August 10, 1990). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Accordingly, the proposed exemption is being issued solely by the Department.

the ongoing operation of the TRAK Program. Essentially, PTE 94–50 amended and replaced PTE 92–77. However, because of certain material factual changes to the representations supporting PTE 92–77, the Department determined that the exemption was no longer effective for use by Smith Barney and its subsidiaries as of the date of the asset sale.

1. *The Corporate Mergers.* Salomon Smith Barney states that in November 1997, a subsidiary of the Travelers Group Inc. (the Travelers Group), the parent of Smith Barney, acquired all of the shares of Salomon Brothers, Inc. (Salomon). Subsequent to the acquisition, Salomon and Smith Barney were operated as separately-registered broker-dealers and as sister corporations with a common parent. On September 1, 1998, Salomon was merged with and into Smith Barney, with Smith Barney remaining as the surviving corporation. As a result of the merger, the corporate name of Smith Barney has been changed to "Salomon Smith Barney Inc."

Salomon Smith Barney also states that in April 1998, the Travelers Group and Citicorp Inc. (Citicorp) announced a stock merger whereby Citicorp would be merged with and into a subsidiary of the Travelers Group. As a result of the merger, the Travelers Group would become a bank holding company and change its name to "Citigroup Inc." (Citigroup).

Salomon Smith Barney represents that the purpose of the merger is to create more distribution channels for TRAK products. In this regard, registered broker-dealers associated with Citigroup will be permitted to market the TRAK Program under a different product name. However, Salomon Smith Barney explains that the terms and conditions of PTE 94–50 and this amendment will be complied with by the parties involved.

The merger, which occurred on October 8, 1998, required that the affected parties obtain approval from the Federal Reserve Board under the Bank Holding Company Act (the BHC Act). Under the BHC Act, the Federal Reserve Board does not authorize bank holding companies, such as Citigroup, to be affiliated with companies that organize, sponsor, control or distribute United States open-end mutual funds. As a bank holding company, Citigroup is required to engage an independent party to provide certain distribution services in connection with the marketing of mutual fund shares) for all United States, publicly-traded mutual funds for which any subsidiary of the Travelers Group/Citigroup acts as a distributor. Salomon Smith Barney notes that although the Funds participating in the TRAK Program will be affected by this change, no Plan will be required to pay distribution fees to the independent distributors.

On October 15, 1998, Salomon Smith Barney was merged with and into Pendex Real Estate Corp. (Pendex), a shell corporation domiciled in New York. Pendex, the survivor of the merger, was then renamed "Salomon Smith Barney Inc." Upon completion of this merger, Salomon Smith Barney became a New York corporation.

2. *Recordkeeping Reimbursement Offset Procedure.* Salomon Smith Barney states that the Board of Trustees (the Board) of the Funds approved, but has not yet implemented, a recordkeeping reimbursement offset procedure under which a Plan participating in the TRAK Program would be permitted to reduce its investment fees and expenses. The reimbursement amount would be paid solely by the Funds as a means of being competitive with other mutual funds offering similar reimbursements to investors.

In May 1998, the Board approved a recordkeeping reimbursement amount of $12.50 for each investment position held by a participant. (In other words, a participant holding positions in three different Funds would be eligible to receive a total annual reimbursement of $37.50). In addition, the Board resolved that after applying such reimbursement to recordkeeping expenses charged by recordkeepers of the Plans, any excess reimbursement amount would be applied to reduce other fees and expenses [2] payable by participating Plans, including, but not limited to, the Plan-level investment advisory fee payable to the Consulting Group for asset allocation recommendations (the Outside Fee), after the appropriate offset has been applied (the Net Outside Fee).[3] If implemented, Salomon Smith Barney explains that the Funds would pay the appropriate reimbursement amount directly to the recordkeeper of the Plan. The affected Plan would then be required to pay only the balance of the fee, which is generally charged on a quarterly basis, after the excess reimbursement amount has been deducted.

The Recordkeeping Reimbursement Offset Procedure would work as follows:

Assume that Plan A has $1 million in assets invested in the TRAK Program and 100 participants. Assume further that Plan A pays its recordkeeper $20 per participant per year in Annual Fees totaling $2,000 per year or $500 per quarter and $12 per participant per year in Other Fees, totaling $1,200 per year or $300 per quarter. In addition, Plan A pays the Consulting Group a total annual net investment advisory fee (i.e., the Net Outside Fee) of $8,500.

[2] In addition to annual recordkeeping fees (the Annual Fees) payable by a Plan participating in the TRAK Program, it is represented that a Plan might be required to pay recordkeeping fees associated with certain particular services (the Other Fees) such as initial plan set-up and conversion, preparation of annual filings, enrollment, special statement preparation and audit.

[3] Salomon Smith Barney is offsetting, quarterly, against the Outside Fee, such amount as is necessary to assure that the Consulting Group retains not more than 20 basis points (as an Inside Fee) from any Portfolio on investment assets attributable to any Plan.

At the end of each calendar quarter, Plan A's recordkeeper will determine the actual number of Fund positions held by the Plan A participants and calculate the resulting reimbursement amount. If Plan A had 300 participant positions at the end of the quarter, the Plan's total recordkeeping reimbursement amount would be 300 x $3.125 (the annual amount of $12.50 divided by 4) or $937.50. That amount would be credited as follows:

APPLICATION OF REIMBURSEMENT TO RECORDKEEPING FEES

Quarterly Portion of Annual Fees	$500.00
Quarterly Portion of Other Fees	300.00
Total Quarterly Recordkeeping Fees	800.00
Credit for Reimbursement	(937.50)
Excess Reimbursement	(137.50)

Because the reimbursement amount exceeds the recordkeeping fees due for the quarter, the Plan does not owe any recordkeeping fee for that period. Therefore, the recordkeeper will not bill the Plan.

APPLICATION OF EXCESS REIMBURSEMENT TO THE NET OUTSIDE FEE

Quarterly Net Outside Fee	$2,125.00
Excess Reimbursement	(137.50)
Total	1,987.50

The recordkeeper will advise the Consulting Group that it is entitled to bill the Plan for the $1,987.50 balance of its investment advisory fee (i.e., the Net Outside Fee).

Upon participation in the TRAK Program, an Independent Plan Fiduciary selects a recordkeeper for the Plan, from a list of recordkeepers which maintain computer links to the Funds under the TRAK Program. Salomon Smith Barney states that of the 23 recordkeepers currently providing services to TRAK Program investors, only one, Smith Barney Plan Services, is an affiliate. Because the reimbursement rate and the timing of the offset of the excess reimbursement amount against fees will be the same regardless of the identity of the recordkeeper and the Independent Plan Fiduciary is responsible for the selection of this particular recordkeeper, Salomon Smith Barney believes its affiliation with Smith Barney Plan Services does not appear to present additional potential abuses under section 406(b)(1) or 406(b)(3) of the Act in its capacity as an investment adviser in recommending investment in the Funds to Independent Plan Fiduciaries.

Salomon Smith Barney notes that the reasoning in the Frost National Bank Advisory Opinion (ERISA Advisory Opinion 97–15A, May 22, 1997) (the Frost Opinion), is relevant to this situation. Therefore, it has not requested administrative exemptive relief from the Department. Salomon Smith Barney explains that in the Frost Opinion, the bank offered a comprehensive program of administrative and investment services to Plan investors. Under this program, the Department opined that section 406(b)(1) and 406(b)(3) of the Act would not be violated if the bank received payments for services from mutual funds while recommending mutual fund investments to plans provided such payments were fully disclosed and then offset to reduce other plan expenses, with any excess payments made to the plans. Salomon Smith Barney further explains that in the Frost Opinion any benefit from payments made by the mutual funds benefitted the plans and not the bank.

With respect to the TRAK Program, Salomon Smith Barney represents that the reimbursement rates adopted by the Funds will be fully disclosed to Independent Plan Fiduciaries and the offset of the excess reimbursement amount against a Plan's expenses will be accomplished in a manner to ensure that the Plans obtain the full benefit of the reimbursement to reduce their recordkeeping and other Plan expenses. Salomon Smith Barney submits that the reasoning in the Frost Opinion would apply equally to the proposed reimbursement of expenses under the TRAK Program. Therefore, Salomon Smith Barney does not believe any change in the scope of the exemption is necessary.[4]

3. *The Automatic Reallocation Option.* Salomon Smith Barney wishes to modify the TRAK Program to institute an automated reallocation feature whereby an Independent Plan Fiduciary could elect to have his or her current asset allocation adjusted automatically whenever the Consulting Group changes the recommended asset allocation model (the Allocation Model) followed by such Plan or participant.[5] Therefore, Salomon Smith Barney proposes to amend General Condition II(f) of PTE 94–50 which requires that any recommendation or evaluation offered by the Consulting Group be implemented only upon the express direction of the Independent Plan Fiduciary. With the exception of the requested changes to General Condition II(f) of PTE 94–50, all of the existing conditions of PTE 94–50 will continue to apply to the TRAK Program.

As noted above, General Condition II(f) of PTE 94–50 provides that any recommendation or evaluation by the Consulting Group to an Independent Plan Fiduciary will be implemented only at the express direction of such fiduciary. Accordingly, under the current exemption, whenever asset allocation advice is modified by the Consulting Group, Salomon Smith Barney states that its Financial Consultants are required to contact the Independent Plan Fiduciary of each Plan who has chosen the Allocation Model, and obtain such fiduciary's consent to modification of the asset allocation applied to the Plan's account.

Salomon Smith Barney notes that many TRAK Program investors have expressly indicated that they expect reallocations to take place in the ordinary course of the provision of investment advisory services offered by the Consulting Group. However, these investors do not understand why they need to be contacted in each instance

[4] In this proposed exemption, the Department expresses no opinion on whether the Frost Opinion is applicable to the recordkeeping reimbursement procedure described above. In this regard, the Department notes that, under the facts presented in the Frost Opinion, Frost would offset the fees received from the mutual funds on a dollar-for-dollar basis against the trustee fees that the plan was otherwise obligated to pay Frost.

[5] Salomon Smith Barney notes that the Automatic Reallocation Option is to be distinguished from "rebalancing" which occurs after the passage of time from the original allocation decision and changes a participant's investment mix to bring the actual allocation among investment alternatives back in line with the participant's original allocation choices. For example, Salomon Smith Barney states that a Plan participant receives a written quarterly review that sets forth information concerning the participant's investments and includes a chart comparing the original asset allocation recommendation and the actual percentage distribution of investments held in the portfolio. Salomon Smith Barney explains that under the chart is the following legend:

TRAK is a non-discretionary investment advisory service. All investment decisions rest with you, the participant. Therefore, you are strongly urged to adhere to the Consulting Group's asset allocation recommendations. Please call your Financial Consultant should a change in allocation be warranted due to a significant difference between the portfolio originally recommended by the Consulting Group and your allocation or due to a change in your objectives.

Salomon Smith Barney further explains that the Financial Consultant is expected to contact participants at least annually to encourage a comparison of the holdings in the portfolio against the Consulting Group's original recommendation. Barney proposes to amend General Condition II(f) of PTE 94–50 which requires that any recommendation or evaluation offered by the Consulting Group be implemented only upon the express direction of the Independent Plan Fiduciary. With the exception of the requested changes to General Condition II(f) of PTE 94–50, all of the existing conditions of PTE 94–50 will continue to apply to the TRAK Program.

for this purpose. In addition, Salomon Smith Barney explains that the case-by-case contact and reallocation involves delay in implementing the change at the client's express direction, putting similarly-situated investors into the new Allocation Models at different times.

To resolve these problems, Salomon Smith Barney proposes to offer TRAK Program investors an Automatic Reallocation Option. Because Salomon Smith Barney recognizes that the Automatic Reallocation Option is outside the scope of PTE 94–50, it requests a modification of the existing terms of PTE 94–50 to the extent necessary to allow it to offer this alternative to investors. If the exemptive relief is granted, Salomon Smith Barney represents that it will fully disclose the nature of the Automatic Reallocation Option to the Independent Plan Fiduciary of each existing client Plan in a written notice (the Announcement) and permit the fiduciary to elect the Automatic Reallocation Option by responding in writing. The Announcement will describe the intended operation of the Automatic Reallocation Option and how future changes to the Allocation Model selected on behalf of the Plan will be implemented. In order to implement the Automatic Reallocation Option for new TRAK Program investors, the Independent Plan Fiduciary will be required to check a box on the form of Investment Advisory contract with Salomon Smith Barney (or on a separate document designed for this purpose for those investors who have already executed such an agreement with Salomon Smith Barney). By checking the box, the Independent Plan Fiduciary will indicate its consent to and authorization of actions to be taken by Salomon Smith Barney to reallocate automatically the asset allocation in the Plan account whenever the Consulting Group modifies the particular asset allocation recommendation which the Plan or participant has chosen. Such election will continue in effect until revoked or terminated by the Plan, in writing.

In operation, Salomon Smith Barney represents that the Automatic Reallocation Option will work as follows:

(a) The Consulting Group will release a modified version of the Allocation Model for the Plan account based upon its amended recommendation.

(b) On the day such modification is released, the Consulting Group will adjust the Plan account to fit the new Allocation Model and to reflect current market conditions.[6] Such adjustments will be effected through a series of purchases and redemptions of Portfolio shares to increase or decrease the relative investment in the various Portfolios by the Plan account.

(c) The reallocation of the Plan account will be effected on the same business day as the release of the new Allocation Model by the Consulting Group, except to the extent market conditions and orderly purchase and redemption procedures may delay such processing. For purposes of calculating the percentage changes in its asset allocation recommendation underlying the Automatic Reallocation Option for a Plan investor's account, the Consulting Group will use the net asset values at the close of business on the preceding trading day. However, the execution of trades to give effect to the changed percentages will occur on the next trading day at the then-current net asset values.

(d) Participants in the TRAK Program will receive trade confirmations of the reallocation transactions. In this regard, for all Plan investors other than Section 404(c) Plan accounts (i.e., 401(k) Plan accounts), Salomon Smith Barney will mail trade confirmations the next business day after the reallocation trades are executed. In the case of Section 404(c) Plan participants, notification will depend upon the notification provisions agreed to by the Plan recordkeeper.[7] For example, if the recordkeeper notifies Section 404(c) Plan participants (i.e., Independent Plan Fiduciaries) in writing after each trade, such participants will be notified of reallocation transactions in this manner. If, however, the recordkeeper notifies Section 404(c) Plan participants of trading activity in a quarterly statement, the reallocation activity would be included there.

In addition to the trade confirmations which Salomon Smith Barney will provide to all Plan investors except Section 404(c) Plans, disclosure of the reallocation transactions will appear in the next regular client statement. Such transactions will be reflected as a series of purchase and redemption transactions that will shift assets among the Portfolios in accordance with the Allocation Model as modified by the Consulting Group.

(e) If, however, the reallocation to be made in response to the Consulting Group's recommendation exceeds an increase or decrease of more than 10 percent in the absolute percentage allocated to any one investment medium (e.g., a suggested increase in a 15 percent allocation to greater than 25 percent or a decrease of such 15 percent allocation to less than 5 percent), Salomon Smith Barney will not automatically adjust a Plan account. Under such circumstances, Salomon Smith Barney will send out a written notice (the Notice) to the Independent Plan Fiduciary for each affected Plan, describing the proposed reallocation and the date on which such allocation is to be instituted (the Effective Date).

(f) The Notice will be mailed with the presumption of delivery within three business days to permit timely notification and adequate response time for the Independent Plan Fiduciary. The Notice will instruct the fiduciary that he or she will need to do nothing if such fiduciary decides to have his or her Plan account automatically reallocated on the Effective Date. If, on the other hand, the Independent Plan Fiduciary does not wish to follow the Consulting Group's revised asset allocation recommendation, the Notice will instruct the Independent Plan Fiduciary to inform a Financial Consultant, in writing, at least 30 calendar days prior to the proposed Effective Date that the fiduciary wishes to "opt out" of the new Allocation Model.[8]

(g) If the Independent Plan Fiduciary "opts out," his or her Plan account will not be changed on the Effective Date.

[6] Salomon Smith Barney notes that there are 12 standard Allocation Models and that two similarly-situated Plan participants who receive the same recommendation from the Consulting Group will receive the same reallocation.

[7] Under these circumstances, Salomon Smith Barney will advise the recordkeeper of the proposed reallocation of the account of a Section 404(c) Plan participant as soon as the Consulting Group has determined that a change to an asset allocation recommendation is going to be made. The communication may initially be made orally because the recordkeeper must then promptly modify its system to effect the necessary changes to a participant's account on the effective date of the new recommendation. The oral communication is customarily followed by a full written description of the changes within two business days of the verbal update.

As noted above, a Section 404(c) Plan participant who has elected the Automatic Reallocation Option would receive a trade confirmation from the recordkeeper of the resulting changes to the positions in his or her account, if that is the notification procedure agreed to for the Plan. Also as noted above, transactions occurring upon automatic reallocation and the underlying recommendation changes will be disclosed in the "Participant Quarterly Review."

[8] The Notice will be mailed with the presumption of delivery within three business days so that the 30 day calendar period will not commence until the third business day following the mailing. In addition, the Effective Date of the Automatic Reallocation Option will occur no sooner than the business day following the thirtieth calendar day. To avoid any misunderstandings or miscalculations by the Independent Plan Fiduciary, Salomon Smith Barney represents that it will conspicuously state, in the Notice, the last date for its receipt of the Independent Plan Fiduciary's written response.

Under such circumstances, the Allocation Model will remain at its current level or at such other level as the Independent Plan Fiduciary designates. However, the Automatic Reallocation Option, will remain in effect for future changes in such participant's Allocation Model.

(h) The Independent Plan Fiduciary will always have the ability to elect, terminate or reinstitute the Automatic Reallocation Option or to otherwise adjust an Allocation Model, in any way, by providing reasonably prompt notice to a Financial Consultant. Upon request by the Independent Plan Fiduciary, the Financial Consultant will send the appropriate form.

Salomon Smith Barney states that it is not possible to predict the frequency of reallocations because these changes are dictated by the Consulting Group's analysis of market conditions. However, since November 1991, Salomon Smith Barney represents that asset allocation changes of the type that would trigger automatic reallocations have been instituted by the Consulting Group on ten occasions. Eight of these changes were of a magnitude of 10 percentage points or less. The other two changes were 15 percent changes and impacted only approximately one percent and 3 percent, respectively, of the total number of clients participating in the TRAK Program at the time.[9]

Salomon Smith Barney also states that the reallocation called for under the Automatic Reallocation Option will be effected by a dollar-for-dollar liquidation and purchase of the required amounts in the respective Plan accounts. Because of the billing of Plan accounts participating in the TRAK Program is leveled with respect to the compensation received by Salomon Smith Barney and by the Financial Consultant involved in an account, Salomon Smith Barney states that the implementation of the Automatic Reallocation Option will be revenue-neutral. In addition, Salomon Smith Barney represents that neither the Plan nor the participants will pay any additional fees for electing to use the Automatic Reallocation Option.[10]

Thus, on the basis of the foregoing, General Condition II(f) has been revised to read as follows:

(f) Any recommendation or evaluation made by the Consulting Group to an Independent Plan Fiduciary will be implemented only at the express direction of such Independent Plan Fiduciary, provided, however, that—

(1) If such Independent Plan Fiduciary shall have elected in writing (the Election), on a form designated by Salomon Smith Barney from time to time for such purpose, to participate in the Automatic Reallocation Option under the TRAK Program, the affected Plan or participant account will be automatically reallocated whenever the Consulting Group modifies the particular asset allocation recommendation which the Independent Plan Fiduciary has chosen. Such Election shall continue in effect until revoked or terminated by the Independent Plan Fiduciary, in writing.

(2) Except as set forth below in paragraph II(f)(3), at the time of a change in the Consulting Group's asset allocation recommendation, each account based upon the asset allocation model (the Allocation Model) affected by such change would be adjusted on the business day of the release of the new Allocation Model by the Consulting Group, except to the extent that market conditions, and order purchase and redemption procedures may delay such processing through a series of purchase and redemption transactions to shift assets among the affected Portfolios.

(3) If the change in the Consulting Group's asset allocation recommendation exceeds an increase or decrease of more than 10 percent in the absolute percentage allocated to any one investment medium (e.g., a suggested increase in a 15 percent allocation to greater than 25 percent, or a decrease of such 15 percent allocation to less than 5 percent), Salomon Smith Barney will send out a written notice (the Notice) to all Independent Plan Fiduciaries whose current investment allocation would be affected, describing the proposed reallocation and the date on which such allocation is to be instituted (the Effective Date). If the Independent Plan Fiduciary notifies Salomon Smith Barney, in writing, at least 30 calendar days prior to the proposed Effective Date that such fiduciary does not wish to follow such revised asset allocation recommendation, the Allocation Model will remain at the current level, or at such other level as the Independent Plan Fiduciary then expressly designates, in writing. If the Independent Plan Fiduciary does not affirmatively "opt out" of the new Consulting Group recommendation, in writing, prior to the proposed Effective Date, such new recommendation will be automatically effected by a dollar-for-dollar liquidation and purchase of the required amounts in the respective account.

(4) An Independent Plan Fiduciary will receive a trade confirmation of each reallocation transaction. In this regard, for all Plan investors other than Section 404(c) Plan accounts (i.e., 401(k) Plan accounts), Salomon Smith Barney will mail trade confirmations on the next business day after the reallocation trades are executed. In the case of Section 404(c) Plan participants, notification will depend upon the notification provisions agreed to by the Plan recordkeeper.

[9] While there is no minimum percentage threshold that will trigger the Automatic Reallocation Option, other than the historical ranges specified above, Salomon Smith Barney notes that there may be future market circumstances that may justify an asset allocation adjustment of a lesser amount. Because the Consulting Group will only adjust asset allocation recommendations to reflect current market conditions, Salomon Smith Barney anticipates that triggers for the Automatic Reallocation Option will continue to be only market-related. As is currently the situation, Salomon Smith Barney represents that a Plan investor may, at any time and for any reason, contact a Financial Consultant to request a modification of an existing Allocation Model.

[10] General Condition II(c) of PTE 94–50 as well as this proposal states that no Plan will pay a fee or commission by reason of the acquisition or redemption of shares in the Trust. Since the fees paid to Salomon Smith Barney are based upon net asset values of investments and not transactions, a change of investment allocations and the net purchases and redemptions used to effect such changes do not change the payable fees.

Notice to Interested Persons

Notice of the proposed exemption will be mailed by first class mail to the Independent Plan Fiduciary Plan of each Plan currently participating in the TRAK Program, or, in the case of a Section 404(c) Plan, to the recordholder of Trust shares. Such notice will be given within 15 days of the publication of the notice of pendency in the **Federal Register**. The notice will contain a copy of the notice of proposed exemption as published in the **Federal Register** and a supplemental statement, as required pursuant to 29 CFR 2570.43(b)(2). The supplemental statement will inform interested persons of their right to comment on and/or to request a hearing with respect to the pending exemption. Written comments and hearing requests are due within 45 days of the publication of the proposed exemption in the **Federal Register**.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which require, among other things, a fiduciary to discharge his or her duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirements of section 401(a) of the Code that the plan operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the

Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption can be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interest of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan;

(4) This proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(5) This proposed exemption, if granted, is subject to the express condition that the Summary of Facts and Representations set forth in the notice of proposed exemption relating to PTE 92–77, as amended by PTE 94–50 and this notice, accurately describe, where relevant, the material terms of the transactions to be consummated pursuant to this exemption.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time frame set forth above, after the publication of this proposed exemption in the **Federal Register**. All comments will be made a part of the record. Comments received will be available for public inspection with the referenced applications at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, August 10, 1990).

Section I. Covered Transactions

A. If the exemption is granted, the restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply, to the purchase or redemption of shares by an employee benefit plan, an individual retirement account (the IRA), or a retirement plan for self-employed individuals (the Keogh Plan) [11] in the Trust for Consulting Group Capital Market Funds (the Trust), established by Salomon Smith Barney, in connection with such Plans' participation in the TRAK Personalized Investment Advisory Service product (the TRAK Program).

B. If the exemption is granted, the restrictions of section 406(b) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(E) and (F) of the Code, shall not apply, to the provision, by the Consulting Group, of (1) investment advisory services or (2) an automatic reallocation option (the Automatic Reallocation Option) to an independent fiduciary of a participating Plan (the Independent Plan Fiduciary), which may result in such fiduciary's selection of a portfolio (the Portfolio) in the TRAK Program for the investment of Plan assets.

This proposed exemption is subject to the following conditions that are set forth below in Section II.

Section II. General Conditions

(a) The participation of Plans in the TRAK Program will be approved by an Independent Plan Fiduciary. For purposes of this requirement, an employee, officer or director of Salomon Smith Barney and/or its affiliates covered by an IRA not subject to Title I of the Act will be considered an Independent Plan Fiduciary with respect to such IRA.

(b) The total fees paid to the Consulting Group and its affiliates will constitute no more than reasonable compensation.

(c) No Plan will pay a fee or commission by reason of the acquisition or redemption of shares in the Trust.

(d) The terms of each purchase or redemption of Trust shares shall remain at least as favorable to an investing Plan as those obtainable in an arm's length transaction with an unrelated party.

(e) The Consulting Group will provide written documentation to an Independent Plan Fiduciary of its recommendations or evaluations based upon objective criteria.

(f) Any recommendation or evaluation made by the Consulting Group to an Independent Plan Fiduciary will be implemented only at the express direction of such Independent Plan Fiduciary, provided, however, that—

(1) If such Independent Plan Fiduciary shall have elected in writing (the Election), on a form designated by Salomon Smith Barney from time to time for such purpose, to participate in the Automatic Reallocation Option under the TRAK Program, the affected Plan or participant account will be automatically reallocated whenever the Consulting Group modifies the particular asset allocation recommendation which the Independent Plan Fiduciary has chosen. Such Election shall continue in effect until revoked or terminated by the Independent Plan Fiduciary in writing.

(2) Except as set forth below in paragraph II(f)(3), at the time of a change in the Consulting Group's asset allocation recommendation, each account based upon the asset allocation model (the Allocation Model) affected by such change would be adjusted on the business day of the release of the new Allocation Model by the Consulting Group, except to the extent that market conditions, and order purchase and redemption procedures may delay such processing through a series of purchase and redemption transactions to shift assets among the affected Portfolios.

(3) If the change in the Consulting Group's asset allocation recommendation exceeds an increase or decrease of more than 10 percent in the absolute percentage allocated to any one investment medium (e.g., a suggested increase in a 15 percent allocation to greater than 25 percent, or a decrease of such 15 percent allocation to less than 5 percent), Salomon Smith Barney will send out a written notice (the Notice) to all Independent Plan Fiduciaries whose current investment allocation would be affected, describing the proposed reallocation and the date on which such allocation is to be instituted (the Effective Date). If the Independent Plan Fiduciary notifies Salomon Smith Barney, in writing, at least 30 calendar days prior to the proposed Effective Date that such fiduciary does not wish to follow such revised asset allocation recommendation, the Allocation Model will remain at the current level, or at such other level as the Independent Plan Fiduciary then expressly designates, in writing. If the Independent Plan Fiduciary does not affirmatively "opt out" of the new Consulting Group recommendation, in writing, prior to the proposed Effective Date, such new recommendation will be automatically effected by a dollar-for-dollar liquidation and purchase of the required amounts in the respective account.

(4) An Independent Plan Fiduciary will receive a trade confirmation of each reallocation transaction. In this regard, for all Plan investors other than Section 404(c) Plan accounts (i.e., 401(k) Plan accounts), Salomon Smith Barney will mail trade confirmations on the next business day after the reallocation trades are executed. In the case of Section 404(c) Plan participants, notification will depend upon the notification provisions agreed to by the Plan recordkeeper.

(g) The Consulting Group will generally give investment advice in writing to an Independent Plan Fiduciary with respect to all available Portfolios. However, in the case of a Plan providing for participant-directed investments (the Section 404(c) Plan), the Consulting Group will provide investment advice that is limited to the Portfolios made available under the Plan.

(h) Any sub-adviser (the Sub-Adviser) that acts for the Trust to exercise investment discretion over a Portfolio will be independent of Salomon Smith Barney and its affiliates.

(i) Immediately following the acquisition by a Portfolio of any securities that are issued by Salomon Smith Barney and/or its affiliates, the percentage of that Portfolio's net assets invested in such securities will not exceed one percent.

(j) The quarterly investment advisory fee that is paid by a Plan to the Consulting Group for investment advisory services rendered to such Plan will be offset by such amount as is necessary to assure that the Consulting Group retains no more than 20 basis points from any Portfolio (with the exception of the Government Money Investments Portfolio and the GIC Fund Portfolio for which the Consulting Group and the Trust will retain no investment management fee) which contains investments attributable to the Plan investor.

(k) With respect to its participation in the TRAK Program prior to purchasing Trust shares, (1) Each Plan will receive the following written or oral disclosures from the Consulting Group:

(A) A copy of the Prospectus for the Trust discussing the investment objectives of the Portfolios comprising the Trust, the policies employed to achieve these objectives, the corporate affiliation existing between the Consulting Group, Salomon Smith Barney and its subsidiaries and the compensation paid to such entities.[12]

(B) Upon written or oral request to Salomon Smith Barney, a Statement of Additional Information supplementing the Prospectus which describes the types of securities and other instruments in which the Portfolios may invest, the investment policies and strategies that the Portfolios may utilize and certain risks attendant to those investments, policies and strategies.

(C) A copy of the investment advisory agreement between the Consulting Group and such Plan relating to participation in the TRAK Program and, if applicable, informing Plan investors of the Automatic Reallocation Option.

(D) Upon written request of Salomon Smith Barney, a copy of the respective investment advisory agreement between the Consulting Group and the Sub-Advisers.

(E) In the case of a Section 404(c) Plan, if required by the arrangement negotiated between the Consulting Group and the Plan, an explanation by a Salomon Smith Barney Financial Consultant (the Financial Consultant) to eligible participants in such Plan, of the services offered under the TRAK Program and the operation and objectives of the Portfolios.

(F) A copy of PTE 94–50 as well as the proposed exemption and the final exemption pertaining to the exemptive relief described herein.

(2) If accepted as an investor in the TRAK Program, an Independent Plan Fiduciary of an IRA or Keogh Plan, is required to acknowledge, in writing, prior to purchasing Trust shares that such fiduciary has received copies of the documents described above in subparagraph (k)(1) of this Section.

(3) With respect to a Section 404(c) Plan, written acknowledgement of the receipt of such documents will be provided by the Independent Plan Fiduciary (i.e., the Plan administrator, trustee or named fiduciary, as the recordholder of Trust shares). Such Independent Plan Fiduciary will be required to represent in writing to Salomon Smith Barney that such fiduciary is (a) independent of Salomon Smith Barney and its affiliates and (b) knowledgeable with respect to the Plan in administrative matters and funding matters related thereto, and able to make an informed decision concerning participation in the TRAK Program.

(4) With respect to a Plan that is covered under Title I of the Act, where investment decisions are made by a trustee, investment manager or a named fiduciary, such Independent Plan Fiduciary is required to acknowledge, in writing, receipt of such documents and represent to Salomon Smith Barney that such fiduciary is (a) independent of Salomon Smith Barney and its affiliates, (b) capable of making an independent decision regarding the investment of Plan assets and (c) knowledgeable with respect to the Plan in administrative matters and funding matters related thereto, and able to make an informed decision concerning participation in the TRAK Program.

(l) Subsequent to its participation in the TRAK Program, each Plan receives the following written or oral disclosures with respect to its ongoing participation in the TRAK Program:

(1) The Trust's semi-annual and annual report which will include financial statement for the Trust and investment management fees paid by each Portfolio.

(2) A written quarterly monitoring statement containing an analysis and an evaluation of a Plan investor's account to ascertain whether the Plan's investment objectives have been met and recommending, if required, changes in Portfolio allocations.

(3) If required by the arrangement negotiated between the Consulting Group and a Section 404(c) Plan, a quarterly, detailed investment performance monitoring report, in writing, provided to an Independent Plan Fiduciary of such Plan showing, Plan level asset allocations, Plan cash flow analysis and annualized risk adjusted rates of return for Plan investments. In addition, if required by such arrangement, Financial Consultants will meet periodically with Independent Plan Fiduciaries of Section 404(c) Plans to discuss the report as well as with eligible participants to review their accounts' performance.

(4) If required by the arrangement negotiated between the Consulting Group and a Section 404(c) Plan, a quarterly participant performance monitoring report provided to a Plan participant which accompanies the participant's benefit statement and describes the investment performance of the Portfolios, the investment performance of the participant's individual investment in the TRAK Program, and gives market commentary and toll-free numbers that will enable the participant to obtain more information about the TRAK Program or to amend his or her investment allocations.

(5) On a quarterly and annual basis, written disclosures to all Plans of the (a) percentage of each Portfolio's brokerage commissions that are paid to Salomon Smith Barney and its affiliates and (b)

[11] The employee benefit plan, the IRA and the Keogh Plan are are collectively referred to herein as the Plans.

[12] The fact that certain transactions and fee arrangements are the subject of an edministrative exemption does not relieve the Independent Plan Fiduciary from the general fiduciary responsibility provisions of section 404 of the Act. In this regard, the Department expects the Independent Plan Fiduciary to consider carefully the totality of fees and expenses to be paid by the Plan, including the fees paid directly to Salomon Smith Barney or to other third parties and/or indirectly through the Trust to Smith Barney.

the average brokerage commission per share paid by each Portfolio to Salomon Smith Barney and its affiliates, as compared to the average brokerage commission per share paid by the Trust to brokers other than Salomon Smith Barney and its affiliates, both expressed as cents per share.

(m) Salomon Smith Barney shall maintain, for a period of six years, the records necessary to enable the persons described in paragraph (n) of this Section to determine whether the conditions of this exemption have been met, except that (1) a prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of Salomon Smith Barney and/or its affiliates, the records are lost or destroyed prior to the end of the six year period, and (2) no party in interest other than Salomon Smith Barney shall be subject to the civil penalty that may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975(a) and (b) of the Code, if the records are not maintained, or are not available for examination as required by paragraph (n) below.

(n)(1) Except as provided in section (2) of this paragraph and notwithstanding any provisions of subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (m) of this Section II shall be unconditionally available at their customary location during normal business hours by:

(A) Any duly authorized employee or representative of the Department or the Service;

(B) Any fiduciary of a participating Plan or any duly authorized representative of such fiduciary;

(C) Any contributing employer to any participating Plan or any duly authorized employee representative of such employer; and

(D) Any participant or beneficiary of any participating Plan, or any duly authorized representative of such participant or beneficiary.

(2) None of the persons described above in subparagraphs (B)–(D) of this paragraph (n) shall be authorized to examine the trade secrets of Salomon Smith Barney or commercial or financial information which is privileged or confidential.

Section III. Definitions

For purposes of this proposed exemption:

(a) The term "Salomon Smith Barney" means Salomon Smith Barney Inc. and any affiliate of Salomon Smith Barney, as defined in paragraph (b) of this Section III.

(b) An "affiliate" of Salomon Smith Barney includes—

(1) Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with Salomon Smith Barney. (For purposes of this subsection, the term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.)

(2) Any officer, director or partner in such person, and

(3) Any corporation or partnership of which such person is an officer, director or a 5 percent partner or owner.

(c) An "Independent Plan Fiduciary" is a Plan fiduciary which is independent of Salomon Smith Barney and its affiliates and is either—

(1) A Plan administrator, sponsor, trustee or named fiduciary, as the recordholder of Trust shares under a Section 404(c) Plan;

(2) A participant in a Keogh Plan;

(3) An individual covered under a self-directed IRA which invests in Trust shares;

(4) A trustee, investment manager or named fiduciary responsible for investment decisions in the case of a Title I Plan that does not permit individual direction as contemplated by Section 404(c) of the Act; or

(5) A participant in a Plan, such as a Section 404(c) Plan, who is permitted under the terms of such Plan to direct, and who elects to direct the investment of assets of his or her account in such Plan.

Section IV. Effective Dates

If granted, this proposed exemption will be effective as of June 21, 1994 with respect to the transactions described in Section I.A. and B.(1). With respect to Section I.B.(2) and Section II(f)(1)–(4) of the General Conditions, this proposed exemption will be effective November 9, 1998.

The availability of this proposed exemption is subject to the express condition that the material facts and representations contained in the application for exemption are true and complete and accurately describe all material terms of the transactions. In the case of continuing transactions, if any of the material facts or representations described in the applications change, the exemption will cease to apply as of the date of such change. In the event of any such change, an application for a new exemption must be made to the Department.

For a more complete statement of the facts and representations supporting the Department's decision to grant PTEs 92–77 and PTE 94–50, refer to the proposed exemptions and the grant notices which are cited above.

Signed at Washington, D.C., this 4th day of November, 1998.

Ivan L. Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 98–29964 Filed 11–6–98; 8:45 am]

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

[Prohibited Transaction Exemption 98–51; Exemption Application No. L–9583, et al.]

Grant of Individual Exemptions; U.S. West, Inc.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of Individual Exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, D.C. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of proposed exemption were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990) and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

U S WEST, Inc.; Located in Englewood, Colorado

[Prohibited Transaction Exemption 98–51; Application No. L–9583]

Exemption

Section I—Transactions Involving Contributions In-kind

Effective March 31, 1994, the restrictions of sections 406(a)(1)(E), 407(a)(2), 406(b)(1), and 406(b)(2) of the Act shall not apply to voluntary contributions in-kind by U S WEST, Inc., any successor to U S WEST, Inc., and/or any affiliates of U S WEST, Inc. (collectively, U S WEST) of certain shares of publicly traded common stock of U S WEST (the Stock) and/or any replacement publicly traded shares of such Stock to certain trusts (the Trusts or Trust) for the purpose of pre-funding welfare benefits under one or more employee welfare benefit plans (the Plan or Plans) maintained by U S WEST, provided that:

(a) The Plan provisions explicitly authorize U S WEST to pre-fund benefits through in-kind contributions of Stock, and all contributions of Stock have been and will be made in conformity with such Plan provisions;

(b) Neither the Plans nor the Trusts have paid nor will pay, whether in cash or in other property or in a diminution of any funding obligation of U S WEST, any consideration for Stock contributed in-kind by U S WEST;

(c) U S WEST has no obligation to pre-fund welfare benefits provided to participants under any of the Plans, either pursuant to the plan documents, the terms of any collective bargaining agreement, or the provisions of the Act;

(d) None of the Plans have ceded, nor will cede, any right to receive cash contributions from U S WEST;

(e) None of the Plans or Trusts have paid, nor will pay, any commissions in connection with the contribution in-kind of Stock by U S WEST; and

(f) Each of the conditions, as set forth below in Section II, have been satisfied and at all times will be satisfied.

Section II—Conditions

The exemption is conditioned upon the adherence by U S WEST to the material facts and representations described in the Notice of Proposed Exemption (the Notice) as modified by this exemption and upon satisfaction of the following requirements:

(a) All Stock contributed in-kind by U S WEST to any of the Trusts or acquired by such Trusts, as a result of the recapitalization of U S WEST, constituted qualifying employer securities (QES), as defined in section 407(d)(5) of the Act; and all Stock contributed in-kind in the future and any replacement publicly traded shares of such Stock will constitute QES;

(b) Stock contributed in-kind by U S WEST or acquired as a result of the recapitalization of U S WEST has been held in Trusts, which are qualified under section 501(c)(9) of the Code, and which are established for the purpose of funding life, sickness, accident, and other welfare benefits for the participants and beneficiaries of the Plans, and all Stock contributed in-kind in the future and any replacement publicly traded shares of such Stock will be held in such Trusts;

(c) All Stock contributed in-kind by U S WEST to any Trust or acquired by any Trust as a result of the recapitalization of U S WEST has been held in a separate account (the Account or Accounts) under such Trust, and all Stock contributed in-kind in the future and any replacement publicly traded shares of such Stock will be held in an Account under such Trust. Such Accounts under a Trust have been and will be managed by an independent fiduciary (the I/F), who is an independent, qualified investment manager, or any successor independent, qualified investment manager, and who has represented and will represent the interests of the Plans which are funded by such Trust for all purposes with respect to the Stock for the duration of the Trust's holding of any of such Stock;

(d) The I/F of the Accounts in the Trusts which fund any welfare plan benefits, has accepted Stock from U S WEST, through in-kind contributions and recapitalization of U S WEST, and will accept Stock, through future in-kind contributions and through any replacement publicly traded shares of such Stock, only after such I/F determines at the time of the transactions that such transactions are feasible, in the interest of, and protective of participants and beneficiaries of the Plans funded by such Trusts;

(e) The I/F has had sole responsibility and, at all times, will have sole responsibility for the ongoing management of the Accounts under the Trusts which hold the Stock and has taken and will take whatever action is necessary to protect the rights of the Plans funded by such Trusts, including but not limited to all decisions regarding the acceptance of contributions in-kind by U S WEST, the sale or retention of such Stock, the exercise of voting rights of such Stock, and any other acquisition or dispositions of such Stock;

(f) Any contributions in-kind of Stock made by U S WEST to any Plan through any Trust and any acquisitions of Stock in connection with the recapitalization of U S WEST did not cause immediately after each such transaction, and in the future any contributions in-kind of Stock and any replacement publicly traded shares of such Stock will not cause immediately after each such transaction the aggregate fair market value of such Stock, plus the fair market value of all qualifying employer real property (QERP), as defined by section 407(d)(4) of the Act, and the fair market value of all other QES held by such Plan to exceed 25 percent (25%) of the fair market value of the assets of such Plan as determined on the date of each such transaction;

(g) The percentage limitations, as set forth above in paragraph (f) of this Section II, have been and will be applied without regard to amounts of securities issued by U S WEST that may be held by an unrelated common or collective trust fund maintained by an independent manager in which any of the Plans through the Trusts may have invested or may invest, provided that the fair market value of the securities issued by U S WEST and held in such unrelated common or collective trust fund does not exceed 5 percent (5%) of the fair market value of each such common or collective trust fund; and provided further that the conditions of Prohibited Transaction Class Exemption 91–38 (PTCE 91–38) [1] are satisfied, including the requirement that the interests of the Plans in such unrelated common or collective trust fund does not exceed 10 percent (10%) of the total

[1] The Notice of Proposed Exemption for exemption application number D–8414 was published at 56 FR 4856 on February 6, 1991. PTCE 91–38 was granted at 56 FR 31966 on July 12, 1991.

of all assets in such common or collective trust fund;

(h) Nothing in the conditions, as set forth above in paragraph (f) of this Section II, shall preclude, the holding by any Plan of Stock, any other QES and QERP, in amounts in excess of 25 percent (25%) of the assets of such Plan, if the aggregate fair market value of such Stock, other QES and QERP exceeds 25 percent (25%) of the value of the assets of such Plan solely by reason of:

(1) A greater rate of appreciation to the value of such Stock, other QES and QERP relative to the rate of appreciation to the value of the assets in such Plan, other than the Stock, other QES and QERP; or

(2) A greater decline in the value of the other assets of the Plan relative to that of such Stock, other QES and QERP;

(i) None of the assets of any of the Trusts have reverted, nor at any time will any of the assets of such Trusts revert to the use or benefit of U S WEST.

EFFECTIVE DATE: The exemption is effective as of March 31, 1994.

Written Comments

In the Notice, the Department invited all interested persons to submit written comments and requests for a hearing on the proposed exemption within ninety (90) days of the date of the publication of the Notice in the **Federal Register** on March 31, 1998. All comments and requests for hearing were due by June 29, 1998.

During the comment period, the Department received two (2) requests for a hearing. The Department has taken into consideration the concerns expressed by the individuals who requested a hearing. After a review of these concerns, the Department does not believe that any issues have been raised which would require the convening of a hearing.

The Department received letters from thirty-five (35) interested persons commenting on the subject transaction. At the close of the comment period, the Department forwarded copies of these letters to the applicant and requested that the applicant address in writing the various concerns raised by the commentators. Most of the comments fell into broad categories that the applicant responded to generally. Where a single commentator raised a specific issue, such issue was responded to individually. A description of the comments and the applicant's responses thereto are summarized below.

The applicant noted that several commentators objected to the granting of the requested exemption based on the belief that the assets of the Plans, the assets of U S WEST Pension Plan, or the assets of retirees would be used to purchase QES. In this regard, the applicant reiterated that the exemption would permit the voluntary contribution of QES by the applicant or its affiliates. Thus, it is represented that the cost of the QES contributed to the Trusts has been and will be borne solely by U S WEST. No assets of the Plans, of the U S WEST Pension Plan, or of the retirees has been or will be used to pay for the QES, nor have the Trusts ceded nor will the Trusts cede any right to receive cash contributions in exchange for the contribution by U S WEST of the QES.

Three (3) commentators expressed identical beliefs that the applicant should be required to contribute to the Trusts the cash which the applicant's affiliate, U S WEST Communications (USWC) receives from its telephone service customers (the Rate Payers), and which is attributable to the expense borne by the Rate Payers as a result of the cost of the Plans being passed along to the Rate Payers in the state rate making procedures. The three commentators that raised the rate making issue were from Arizona, which the applicant maintains does not permit accrued expenses for post-retirement welfare benefits to be taken into account for purposes of setting the rates charged by USWC in that state.

Notwithstanding the circumstances in Arizona, and in the interest of ensuring a complete response to the issues raised, the applicant considered the comments in light of each of the fourteen (14) states served by USWC. In this regard, it is represented that until recently accrued expenses for future post-retirement welfare benefits could not be included in the calculation of cost of service for rate making purposes. Instead, such expenses could be included in cost of service calculations only to the extent they were paid out in the form of benefits. Following the adoption by the Financial Accounting Standards Board of Financial Accounting Standard 106 (FAS 106) in 1990, most state regulatory jurisdictions in which USWC does business have begun permitting utilities to use some type of accrual method similar to that provided in FAS 106 for recognizing post-retirement welfare benefit expenses in the cost of service. These accrued expenses are not automatically included in rates but may be included at the request of USWC.

As part of the procedure for determining the extent to which accrued post-retirement welfare benefit expenses should be included in rates, many jurisdictions consider how these expenses are funded through trusts or other means, and certain states require U S WEST to maintain a specified minimum level of funding for benefits in one or more external accounts (*i.e.* trust accounts). More specifically, some of the states served by USWC may require a certain level of funding of benefits be designated as funded by that state's utility customers. In this regard, the applicant represents that no part of U S WEST's two prior contributions of QES was attributable to funding these designations. In the future, even if the applicant chooses to make an additional contribution attributable to a particular state's Rate Payers, rather than choose other alternatives, New U S WEST is able to ensure that no part of such contribution will consist of QES, and accordingly will do so.

The three commentators who raised the rate structuring issues, discussed in the paragraphs above, also suggested that the Stock should be discounted to protect the Plans against the potential loss of value over time. In the opinion of the applicant the intent of the commentators in making this suggestion is unclear, inasmuch as Plans are not paying for the Stock contributed by U S WEST, and the financial reporting standards of the Act require plan assets to be reported at fair market value.

Several commentators objected to permitting the Plans to invest more than the statutory limit (10%) in QES. Some of these commentators expressed their concern that the holding by the Plans of QES in excess of the statutory limit would reduce the security of Plan benefits (*e.g.* by exposing the Plans to volatility in Stock prices). In response, the applicant points out that welfare benefits under the Plans are not intended to be fully pre-funded, and that the voluntary contributions of Stock do not replace any required cash contributions of U S WEST. The applicant notes that no business purpose would be served if U S WEST were to contribute Stock that is expected to decline in value, because the cost of any benefits that are not pre-funded remain a liability of U S WEST. Accordingly, in the opinion of the applicant the exemption is in the interest of the participants and beneficiaries of the Plans in that U S WEST will be encouraged to make voluntary contributions to the Plans that would not otherwise be made.

Finally, several commentators expressed concern that the proposed exemption would affect their benefits under the Plans or their benefits under the U S WEST Pension Plan. In response, the applicant represents that the exemption will have no impact on these benefits. Further, one commentator noted that the applicant has made certain promises relating to the continuation of benefits to persons who retired prior to 1991. With respect to such promises, the applicant represents that it intends neither to enlarge nor to reduce the scope of its obligations by any representations made in connection with the requested exemption.

In addition to the comments described above, in letters dated June 29, August 10, 1998, September 17, and September 23, 1998, the Department also received comments and additional information from the applicant. In these submissions, the applicant requested certain modifications to the exemption as proposed, provided documentation for such modifications, and informed the Department of certain clarifications and changes in the Summary of Facts and Representations (SFR) in the Notice. The applicant's comments fall into four (4) categories: (1) clarification of the purpose of the contribution; (2) the application of limits on the acquisition and holding of QES; (3) information on the separation of U S WEST; and (4) the impact of such separation on the requested exemption.

With respect to category 1, above, regarding the purpose of the contribution, the applicant has requested confirmation of its interpretation of the language in Section I of the Notice. In this regard, Section I states that the contribution by U S WEST of Stock to the Trusts was "for the purpose of pre-funding post-retirement welfare benefits" under the Plans. In its comment, the applicant expressed its understanding that the exemption would not require Stock or any other specific asset contributed to a Trust to be used *solely* for the provision of post-retirement welfare benefits. In this regard, the applicant notes that where a Plan provides benefits to retirees, as well as to active employees, and such Plan holds an interest in a Trust, the terms of such Trust would permit the use of plan assets held in the Trust to pay benefits on behalf of either group, to the extent that such assets are not segregated for tax and accounting purposes for one or the other group. The Department concurs in the understanding, as expressed by the applicant, and has deleted the words, "post-retirement," from the language in Section I of the exemption.

With respect to category 2, above, regarding issues associated with the application of limits on the acquisition and holding of QES, the applicant has requested a modification of the language of Section III (f) of the Notice. In this regard, Section III (f) states that:

any contributions in-kind of Stock made by U S WEST to any Trust, any acquisitions of Stock in connection with the recapitalization of U S WEST, did not cause immediately after each such transaction, and in the future any contributions in-kind of Stock, any replacement publicly traded shares of such Stock or any Stock purchases in connection with rebalancing of a Trust's holding of Stock will not cause immediately after each such transaction the aggregate fair market value of such Stock, plus the fair market value of all qualifying employer real property (QERP), as defined by section 407(d)(4) of the Act, and the fair market value of all other QES held by such Trust to exceed 25 percent (25%) of the fair market value of the assets of such Trust as determined on the date of each such transaction.

In the opinion of the applicant the 25 percent limitation (the 25% Limitation) should be calculated at the Plan level, rather than at the Trust level. In this regard, the applicant believes that applying the 25% Limitation at the Plan level would ensure consistency with the method of accounting required under the reporting rules of the Act, and that the primary impact of applying the 25% Limitation at the Trust level would be that fewer voluntary contributions would be made to the trusts, specifically, to the U S WEST Occupational Welfare Benefit Trust (formerly the U S WEST Benefit Assurance Trust) (the Assurance Trust). Further, the applicant points out that if the final exemption were revised to provide for calculation of the 25% Limitation at the Plan level, rather than at the Trust level, the assets of the Assurance Trust that could be invested in QES would not significantly exceed 25 percent (25%) of the asset of such trust.

In support of its position, the applicant represents that the value of each Plan's interest in each Trust can be measured. In addition, the applicant represents that each Plan holds a proportionate interest in each Trust asset (that is, a Plan's interest in each Trust asset, is the same as such Plan's interest in the Trust as a whole). Because each Plan can account for its interest in the Trust and holds an undivided interest in each of the underlying assets of the Trust in the same proportion as its interest in the Trust as a whole, it is represented that each Plan's interest in a particular asset, including the Stock, can be readily determined. Because a single Plan's benefits may be funded under more than one Trust, the applicant believes that applying the 25% Limitation at the Plan level would provide a more useful and accurate measurement of each Plan's interest in the Stock.

Further, it is represented that where a single Trust funds the benefits of more than one Plan, the assets attributable to each Plan are identifiable. The applicant represents that this is achieved either by commingling plan assets for investment purposes and attributing a *pro rata* share of each asset in the commingled Account to each Plan participating in the Trust, or by establishing one or more separate investment management Accounts solely on behalf of a plan participating in the Trust, or by combining both approaches. In this regard, it is represented that a Trust that funds benefits under more than one Plan functions as a "master trust." Moreover, when assets of a Plan are utilized to pay benefits, the liquidation of the assets attributable to the benefit paying Plan funded under a Trust will not affect the assets of any other Plan funded under such Trust. Once U S WEST has determined that benefits are to be paid for a Plan from the assets in an Account that holds QES, then the Independent Fiduciary of such Account continues to be responsible for the allocation as between QES or cash equivalents in funding the benefit payment.

The Department has decided that it is in the interests of the participants and beneficiaries whose Plan benefits are funded in whole or in part by the assets in the Accounts under the Trusts, if the 25% Limitation is imposed on the Plan level. This decision is based on the representations of the applicant, as discussed in the paragraph above, and on the fact that all Stock contributed in-kind by U S WEST in the past or in the future to any Accounts under such Trusts have been and will be managed by an I/F who has had and, at all times, will have sole responsibility for the ongoing management of the Accounts under the Trusts which hold the Stock and has taken and will take whatever action is necessary to protect the rights of the Plans funded by such Trusts, including but not limited to all decisions regarding the acquisition, retention, or disposition of such Stock. Accordingly, the Department concurs with the applicant's request to modify the language, as set forth in Section III(f) of the Notice. However, the Department notes that Section III(f), has been renumbered in the final exemption, as Section II(f) which reads as follows:

any contributions in-kind of Stock made by U S WEST to any Plan through any Trust and any acquisitions of Stock in connection with the recapitalization of U S WEST did not cause immediately after each such transaction, and in the future any contributions in-kind of Stock and any replacement publicly traded shares of such

Stock will not cause immediately after each such transaction the aggregate fair market value of such Stock, plus the fair market value of all qualifying employer real property (QERP), as defined by section 407(d)(4) of the Act, and the fair market value of all other QES held by such Plan to exceed 25 percent (25%) of the fair market value of the assets of such Plan as determined on the date of each such transaction.

In addition, the Department notes that reference was made in the language of Section III(h), as set forth in the Notice, to the application, under certain conditions, of the 25% Limitation to the Trust level. In order to maintain consistency throughout the exemption the Department has renumbered Section III(h), as Section II(h) and has substituted the word, "Plan," wherever the word, "Trust," appears in the language of Section II(h). Accordingly, the language of Section II(h) reads as follows:

nothing in the conditions, as set forth above in paragraph (f) of this Section II, shall preclude, the holding by any Plan of Stock, any other QES and QERP, in amounts in excess of 25 percent (25%) of the assets of such Plan, if the aggregate fair market value of such Stock, other QES and QERP exceeds 25 percent (25%) of the value of the assets of such Plan solely by reason of:

(1) a greater rate of appreciation to the value of such Stock, other QES and QERP relative to the rate of appreciation to the value of the assets in such Plan, other than the Stock, other QES and QERP; or

(2) a greater decline in the value of the other assets of the Plan relative to that of such Stock, other QES and QERP.

With respect to category 3, above, regarding information relating to the separation of U S WEST, the applicant informed the Department that the Board of Directors of U S WEST, on April 20, 1998, submitted for shareholder approval a proposal under which U S WEST would be separated into two (2) independent companies. In this regard, pursuant to the terms of the separation, those parts of the business representing U S WEST Communications Group (the Communications Group) and U S WEST's directory services (DEX) would be known as U S WEST, Inc. (New U S WEST), and those parts of the business representing U S WEST Media Group (the Media Group) would be known as MediaOne Group, Inc. (MediaOne). It is represented that the terms of the separation were approved for fairness by two (2) independent investment banking firms, and that the opinions of these firms were provided to all shareholders of U S WEST. On June 4, 1998, shareholders of U S WEST approved the proposal to separate U S WEST, effective June 12, 1998. It is represented that after the separation of U S WEST, there is no ownership or management relationship between New U S WEST and MediaOne (other than the fact that shareholders may choose to hold shares issued by both companies).

Prior to the separation of U S WEST, the different lines of business engaged in by U S WEST through its subsidiaries were reflected in two (2) classes of stock, "C" shares and "M" shares (the "C" Shares and the "M" Shares). The "C" Shares represented the Communications Group's business involving integrated communications, entertainment, information and transactions services. The "M" Shares reflected the Media Group's business involving cable, wireless, directory, interactive and international services.

To effect the separation of U S WEST, it is represented that the businesses of the Communications Group and DEX were contributed to New U S WEST, and stock of New U S WEST was distributed to the holders of "C" Shares. It is represented that the "M" Shares continue to reflect the business of the Media Group which after the separation of U S WEST is engaged in by MediaOne. No additional shares were distributed to the holders of "M" shares, other than $850 million shares of New U S WEST stock that such holders received as compensation for the transfer of DEX from the Media Group to New U S WEST.

The Department acknowledges the separation of U S WEST into New U S WEST and MediaOne, as described by the applicant, and notes that this information has been included in the record of the exemption. For a more detailed description of the circumstances preceding the separation of U S WEST and/or a description of the steps taken to effect such separation, interested persons are encouraged to obtain a copy of the exemption application file (L–9583) which is available in the Public Documents Room of the Pension and Welfare Benefits Administration, U.S. Department of Labor, Room N–5638, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

With respect to category 4, above, it is represented that the separation of U S WEST into two distinct companies did not have an impact on the holding of the Stock contributed in-kind by U S WEST to the Assurance Trust, on March 1994, and again on March 1995. In this regard, the applicant represents that such Stock was not affected by the separation of U S WEST on June 12, 1998, because such Stock had already been sold out of the Assurance Trust by December 31, 1997. Further, it is represented that the cash proceeds from sales of "C" Shares or the "M" Shares were not used to purchase shares of Stock in connection with "rebalancing" the portfolio of "C" Shares and "M" Shares by the Assurance Trust. Accordingly, the applicant represents that the transactions, as described in Section II of the Notice and in the SFR, have not occurred and will not occur, such that relief will no longer be necessary, either on a retroactive or prospective basis. Accordingly, the applicant does not object to the removal in its entirety of Section II of the Notice from the final exemption.

The Department concurs with the applicant, has deleted Section II from the exemption, and has renumbered the former Section III, as Section II in the final exemption. In addition, the Department has deleted any reference to transactions involving "rebalancing" of a Trust's holding of Stock from the terms and conditions of the final exemption.

The separation of U S WEST into two distinct companies did cause changes in the employee welfare benefit plans sponsored by each company. In this regard, because MediaOne and New U S WEST are not affiliated, it is no longer possible to cover employees of each company under the same welfare benefit plan. Accordingly, it is represented that the respective boards of directors of each company have determined that New U S WEST will adopt the Plans previously maintained by U S WEST (the New U S WEST Plans), and that MediaOne will establish "mirror" welfare benefit plans (the MediaOne Plans) on behalf of the former employees of U S WEST who transferred to MediaOne. It is anticipated the welfare benefit plans maintained by New U S WEST and MediaOne, respectively, will provide the same benefits provided by the Plans maintained by U S WEST. In this regard, it is represented that the operation and administration of the welfare benefit plans and trusts maintained by New U S WEST and MediaOne will be the same in all material respects to the operation and administration of Plans and the Trusts established by U S WEST. It is further represented that the welfare benefits provided to employees of New U S WEST and MediaOne will have the same level of funding protection that such employees had prior to the separation of U S WEST. Each company will reserve the same right to amend or terminate, respectively, the New U S WEST Plans and the MediaOne Plans, as was reserved by U S WEST with respect to the Plans it sponsored. As described in the Notice, in order to pre-fund a portion of the welfare benefits provided under the Plans, U S WEST 60403established under section 501(c)(9) of the Code, three Trusts: (1) the Assurance Trust, (2) the U S WEST Management Benefit Assurance Trust (the Management Trust), and (3) the U S WEST Life Insurance and Welfare Trust (the Life Insurance Trust). In its comment, the applicant informed the Department of the effect of the separation of U S WEST on these three Trust and on a fourth trust, the U S WEST VEBA Trust (the VEBA Trust), maintained by U S WEST, pursuant to section 501(c)(9) of the Code, to provide short-term funding of health care benefits for any of the Plans.

In this regard, it is represented that, effective with the separation of U S WEST, New U S WEST adopted the Assurance Trust, the Management Trust, and the Life Insurance Trust to provide funding for the New U S WEST Plans, while MediaOne has adopted the VEBA Trust. Further, New U S WEST has transferred a proportionate share of the assets and liabilities of the Management Trust and the Life Insurance Trust to the VEBA Trust for the purpose of funding the MediaOne Plans. In addition, the applicant has represented that no assets of the Assurance Trust were transferred to the VEBA Trust, because the assets of the Assurance Trust are held solely on behalf employees covered under collective bargaining agreements, and none of these employees are employed by MediaOne.

Notwithstanding the changes caused by the separation of U S WEST, as described in the paragraphs above, New U S WEST and MediaOne have requested that the final exemption continue to be available prospectively to both companies; provided certain conditions are satisfied. It is represented that the conditions of the exemption will ensure that the rights of participants and beneficiaries of the New U S WEST Plan and the MediaOne Plan will be protected. In this regard, New U S WEST and MediaOne each confirm that the Department may rely on representations made in the exemption application and incorporated in the Notice, subject to those modifications necessarily resulting from the separation of U S WEST, as described herein. Specifically, New U S WEST and MediaOne have omitted representations (b) and (c) in paragraph 12 of the SFR in the Notice, because such conditions relate solely to the "rebalancing" transactions for which exemptive relief is no longer requested or required.

New U S WEST and MediaOne believe that it would be in the interest of participants of the welfare benefit plans sponsored respectively by each company to continue to receive contributions of QES. In support of this request, it is represented that the reasons that additional voluntary contribution of QES are in the best interest of participants are completely unchanged. In this regard, it is represented that the operation and administration of the welfare benefit plans and trusts that will be maintained respectively by New U S WEST and MediaOne "mirror" the terms of the Plans in existence prior to the separation of U S WEST. Further, it is represented that the level of protection afforded to participants and beneficiaries in the New U S WEST Plans and the MediaOne Plans will be unaffected, in that voluntary contributions of QES will permit a higher level of contributions and will provide greater security that assets will be available to fund future benefits.

Finally, the applicant argues that the separation of U S WEST into two (2) lines of business should not necessitate the filing of another application for exemption, as such a filing would only duplicate the information that has already been provided to the Department. Similarly, it is represented that a separate exemption application would not serve to provide notice to additional interested persons, because all persons who would be interested in such application have already been notified by the publication of Notice in the **Federal Register**.

The Department concurs that the exemption will cover future contributions in-kind of QES by New U S WEST, and accordingly, has altered Section I of the exemption by adding the italicized words to the language of Section I, as follows,

Effective March 31, 1994, the restrictions of sections 406(a)(1)(E), 407(a)(2), 406(b)(1), and 406(b)(2) of the Act shall not apply to voluntary contributions in-kind by U S WEST, Inc., *any successor to U S WEST, Inc.*, and/or any affiliates *of U S WEST, Inc.* (*collectively*, U S WEST) of certain shares of publicly traded common stock of U S WEST (the Stock) and/or any replacement publicly traded shares of such Stock to certain trusts (the Trusts or Trust) for the purpose of pre-funding post-retirement welfare benefits under one or more employee welfare benefit plans (the Plan or Plans) maintained by U S WEST.

However, with regard to the request that the exemption continue to be available prospectively to MediaOne, the Department does not believe that the Notice, as published in the **Federal Register**, contemplated future contributions in-kind of QES by MediaOne to the MediaOne Plans. In this regard, the Department notes that the MediaOne Plans are new "mirror" plans which were not in existence at the time of the publication of the Notice in the **Federal Register**. Further, the Department is not convinced that the notice to interested persons that was provided with regard to the exemption requested by U S WEST afforded sufficient opportunity for comment from persons who would be interested persons with regard to future transactions by MediaOne. As a result, the Department does not believe that the exemption can be interpreted to be available prospectively to MediaOne. MediaOne may submit another application for exemption relief should MediaOne wish to make voluntary in-kind contributions of QES in the future to MediaOne Plans.

Accordingly, after full consideration and review of the entire record, including the written comments, the Department has determined to grant the exemption, as modified and amended herein. The comments submitted by the commentators to the Department and the applicant's response thereto has been included as part of the public record of the exemption application. The complete application file, including all supplemental submissions received by the Department, is available for public inspection in the Public Documents Room of the Pension Welfare Benefits Administration, Room N–5638, U.S. Department of Labor, 200 Constitution Avenue N.W., Washington, D.C. 20210.

For a complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the Notice published on March 31, 1998, 61 FR 15443.

RREEF America L.L.C. (RREEF); Located in San Francisco, California

[Prohibited Transaction Exemption 98–52; Exemption Application No. D–9952]

Exemption

The Department is granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 C.F.R. Part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990.)

Section I—Covered Transactions

The restrictions of sections 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason

of section 4975(c)(1)(A) through (E) of the Code, shall not apply to:

(1) The provision of certain leasing services (the Leasing Services) by RREEF's leasing affiliates (the Leasing Affiliates, as defined in Section IV) to certain accounts established by RREEF (the Accounts, as defined in Section IV); and

(2) The payment of leasing commissions in connection with the provision of Leasing Services by the Leasing Affiliates to the Accounts;

provided that the conditions set forth in Section II are met.

Section II—Conditions

(1) The arrangement under which the Leasing Services are performed with respect to any Account is subject to the prior authorization of either (i) an independent plan fiduciary for each employee benefit plan or other plan for which RREEF serves as trustee or investment manager (a Client Plan) that invests in a Single Client Account, or (ii) independent plan fiduciaries with respect to Client Plans or other institutional investors holding at least 60 percent of the units of beneficial interest in a Multiple Client Account, following disclosure of information in the manner described in paragraph (2) below. In the case of a Client Plan whose assets are proposed to be invested in an Account subsequent to the provision of Leasing Services to the Account, the Client Plan's investment in the Account is subject to the prior written authorization of an authorizing plan fiduciary following disclosure of the information described in paragraph (2).

(2) Not less than 45 days prior to the first date it proposes to provide Leasing Services for any Account, RREEF, as investment manager, shall furnish the authorizing plan fiduciary with any reasonably available information which RREEF believes to be necessary to determine whether such approval should be given, as well as such information which is reasonably requested by the authorizing plan fiduciary. Such information will include: (a) a description of the Leasing Services to be performed by the Leasing Affiliate; (b) an explanation of the potential conflicts of interest involved in selecting the Leasing Affiliate; (c) an explanation of the selection process (including the role of the Independent Fiduciaries (as defined in Section IV)); (d) identification of properties for which Leasing Services will be required; (e) an estimate of the leasing fees to be paid to the Leasing Affiliate if it is selected to provide such services; and (f) a description of the terms upon which a Client Plan may withdraw from an Account.

(3) In the event an authorizing plan fiduciary of any Client Plan whose assets are invested in an Account submits a notice in writing to RREEF, as investment manager, at least 15 days prior to the provision of Leasing Services, objecting to the provision of the Leasing Services, and RREEF proposes to proceed with the provision of Leasing Services, the Client Plan on whose behalf the objection was tendered will be given the opportunity to terminate its investment in the Account, without penalty. With the exception of a Client Plan which has invested in a closed-end Account under which the rights of withdrawal from the Account may be limited, as provided in the Client Plan's written agreement to invest in the Account, if a written objection to the Leasing Services is submitted to RREEF any time after 15 days prior to implementation of the Leasing Services (or after implementation), the Client Plan must be able to withdraw without penalty, within such time as may be necessary to effect such withdrawal in an orderly manner that is equitable to all withdrawing and the non-withdrawing Client Plans. However, the Leasing Affiliate need not discontinue providing the Leasing Services, once implemented, by reason of a Client Plan electing to withdraw after 15 days prior to the scheduled implementation date of the Leasing Services. Any Client Plan which invests in a Single Client Account may terminate the Leasing Services arrangement and withdraw from the Account at any time (upon reasonable written notice).

(4)(a) RREEF shall furnish the Independent Fiduciary (as defined in section IV) acting on behalf of the Client Plans participating in the Account with an annual report (the RREEF Annual Report) containing the information described in this paragraph, not less frequently than once a year and not later than 45 days following the end of the period to which the report relates. The RREEF Annual Report shall disclose the total of all fees incurred by the Account during the preceding year under contracts with RREEF and its affiliates and shall include a description of all leasing activities with respect to each property under the responsibility of the Independent Fiduciary for which a Leasing Affiliate provides services, including marketing/advertising activities, leases under negotiation, lease offers rejected (and why), and such other information as shall be reasonably requested by the Independent Fiduciary. The RREEF Annual Report shall also delineate the leasing commissions that are anticipated to be paid to RREEF and its affiliates in the coming year for services provided by these entities in connection with the properties held by the Account. The RREEF Annual Report will contain a description of a method for the termination of the leasing arrangement (see Section II(5)) by the Independent Fiduciary and/or by investing Client Plans in each Account.

(b) The Independent Fiduciary shall furnish RREEF and the authorizing plan fiduciaries with an annual report (the I/F Annual Report), within 90 days following the end of the period to which the report relates, summarizing its activities for the year, indicating its opinion as to the continued validity of the leasing guidelines with respect to any property for the next year, and recommending any amendments to, or termination of, the leasing agreement with the Leasing Affiliate. The I/F Annual Report will contain a description of a method for the termination of the leasing arrangement with the Leasing Affiliate and for the confirmation and/or removal of the Independent Fiduciary by the Client Plans investing in the Accounts.

(c) RREEF implements procedures to ensure each authorizing plan fiduciary of a Client Plan investing either in a Multiple Client Account, or a Single Client Account, has an opportunity to vote on the reconfirmation of the Independent Fiduciary on an annual basis. These procedures require that the Independent Fiduciary: (i) provide each authorizing independent client plan fiduciary with a ballot [2] by certified mail (or another method of delivery pursuant to which confirmation of receipt is provided), with the ballot instructions that direct the authorizing independent client plan fiduciary to return the ballot to RREEF; (ii) ensure that the ballot clearly indicates that the authorizing plan fiduciary may vote for or against continuation of the Independent Fiduciary; (iii) ensure that the ballot must be accompanied by a statement that failure to return the ballot within 45 days following the independent plan fiduciaries' receipt of the ballots will be counted as a "for" vote (unless holders of a majority of the units of beneficial interests in the Accounts have voted against reconfirmation); and (iv) 30 days after the Independent Fiduciary mails the ballot to the authorizing plan fiduciary, RREEF must make at least one follow-up contact with the authorizing plan fiduciary that has not previously returned the ballot prior to treating the unreturned ballot as a "for" vote. If RREEF does not receive a response from the authorizing plan fiduciary within 15 days after initiating contact with the authorizing plan fiduciary, RREEF may treat the unreturned ballot as a vote for reconfirmation. The reconfirmation will become effective on the earlier of the date affirmative ballots are obtained from the holders of a majority of the units of beneficial interests in the Accounts, or 45 days following the authorizing plan fiduciaries' receipt of the ballots (unless holders of a majority of the units of beneficial interests in the Accounts have voted against reconfirmation.)

(d) The Independent Fiduciary receives confirmation, and certifies to RREEF that the notice and the ballots sent to the authorizing plan fiduciary pursuant to subparagraphs (b) and (c) regarding the continued retention of the Independent Fiduciary and RREEF have been received by the authorizing plan fiduciary. The method used to confirm notice to the authorizing plan fiduciaries must be sufficient to ensure that the authorizing Client Plan fiduciaries actually receive notice. In all cases, return receipt for certified mail, printed confirmation of facsimile transmissions and manifest or computer data entries of independent courier services will be considered acceptable methods of confirming receipt.

(5)(a) The leasing agreement for any property may also be terminated or modified at any time at the written direction of the Independent Fiduciary, and may be terminated by a vote in favor of such termination by the holders of a majority of the units of beneficial interests in the Account (or such greater percentage, not to exceed 60 percent, as shall be set out in the agreements establishing the Account). Further, any Client Plan which invests in a Single Client Account may terminate the Leasing Services arrangement and withdraw from the Account at any time (upon reasonable notice).

(b) In the event of a vote to terminate the Leasing Services arrangement pursuant to paragraph (4)(c) or (5)(a), RREEF shall cease submitting to the Independent Fiduciary any new proposals to engage in covered transactions and RREEF will not renew or extend any covered transactions. Moreover, within 180 days after the vote of the Account holders, RREEF shall cease engaging in any existing covered transactions.

(6)(a) Each Leasing Services agreement shall be in writing and shall be reviewed at least annually and approved by an Independent Fiduciary. However, prior to proposing a transaction to the Independent Fiduciary, RREEF will first determine that such transaction is in the best interest of the Account.

(b) The Independent Fiduciary shall negotiate each Leasing Services agreement. The Independent Fiduciary shall also consider the cost to the Account of such fiduciary's involvement in connection with its consideration of whether to approve a particular Leasing Services agreement.

(c) Each leasing agreement and the performance of the Leasing Affiliate under such agreement shall be reviewed at least annually by the Independent Fiduciary, who shall instruct RREEF of any action which should be taken by RREEF on behalf of the Account with respect to the continuation, termination or other exercise of rights available to the Account under the terms of the leasing agreement. RREEF will carry out such instruction from the Independent Fiduciary to the extent it is legal and permitted by the terms of the leasing agreement.

(d) In the case of any emergency circumstances, RREEF or the Leasing Affiliates may provide Leasing Services to an Account for a period not exceeding 90 days without entering into a Leasing Services agreement, but no compensation may be paid by an Account for such services without prior approval of the Independent Fiduciary.

(7) If RREEF holds Account properties, and any RREEF affiliate or principal holds for its own account any properties in the same real estate market during a period when there is leasing competition between those properties, RREEF will hire, during such period, a third party leasing agent for Account properties.

(8)(a) RREEF shall furnish the Independent Fiduciary with any reasonably available information which RREEF reasonably believes to be necessary or which the Independent Fiduciary shall reasonably request to determine whether such approval of the transactions described above should be given, or to accomplish the Independent Fiduciary's periodic reviews of RREEF's performance under such agreements.

(b) With respect to RREEF, such information will include: a description of the Leasing Services for the Account and the Client Plans investing therein; the qualifications of RREEF to do the job; a statement, supported by appropriate factual representations, of the reasons for RREEF's belief that RREEF is qualified to provide the services; a copy of the proposed Leasing Services agreement and the terms on which RREEF would provide the services; the reasons why RREEF believes the retention of RREEF would be in the best interest of the Account; information demonstrating why the fees and other terms of the arrangement are reasonable and comparable to the fees customarily charged by similar firms for similar services in comparable locales; the identities of non-affiliated service providers and the terms under which these service providers might perform the services; and whether any RREEF affiliate is a property manager to any properties that are in competition for tenants with the property for which RREEF is under consideration.

(9) Any Independent Fiduciary may be removed at any time by a vote of holders of a majority of the units of beneficial interests in an Account. In the event of the removal of an Independent Fiduciary, existing leasing agreements overseen by that Independent Fiduciary will not be affected; however, RREEF will designate a replacement Independent Fiduciary within sixty (60) days.

(10) Seventy-five percent (75%) or more of the units of beneficial interests in a Multiple Client Account must be held by Client Plans or other investors having total assets of at least $100 million. In addition, 50 percent (50%) or more of the Client Plans investing in a Multiple Client Account must have assets of at least $100 million. A group of Client Plans maintained by a single employer or controlled group of employers, any of which individually has assets of less than $100 million, will be counted as a single Client Plan if the decision to invest in the Account (or the decision to make investments in the Account available as an option for an individually directed account) is made by a fiduciary other than RREEF, who exercises such discretion with respect to Client Plan assets in excess of $100 million.

(11) No Client Plan covering employees of RREEF will be invested in an Account.

(12) Not more than 20 percent of the assets of any Client Plan on whose behalf RREEF proposes to provide Leasing Services can be invested in RREEF Accounts.

(13) At the time any leasing agreement is entered into, the terms of the agreement must be at least as favorable to the Account as the terms of an arm's-length transaction between unrelated parties. In addition, the compensation paid to the Leasing Affiliate for Leasing Services by any Account must not exceed the amount paid in an arm's-length transaction between unrelated parties for comparable properties in similar locales. In any event, such

[2] RREEF will direct the Independent Fiduciary as to the specific form of a ballot. The applicant represents that for a Single Client Account, this will not be a "ballot", but a "direction" form.

compensation will not exceed reasonable compensation within the meaning of section 408(b)(2) of the Act and regulation 29 CFR 2550.408b–2. (The Independent Fiduciary must certify that an economic advantage to the Accounts exists before consummation of any leasing agreement).

(14)(a) Within one-year of the grant of this exemption, and after the beginning of each subsequent five-year period, each Independent Fiduciary will prepare with the assistance of RREEF a survey of leasing fees for the properties that have similar geographic location and property types to those held by the Accounts for which the Independent Fiduciary is responsible. The survey will include data regarding the fees that have been charged to the Accounts by several firms that are unaffiliated with RREEF for Leasing Services during the one-year period prior to the beginning of the new five-year period. Also, the survey will include data as to the fees paid by RREEF for such services performed for the properties not held by the Accounts during the same period and other market data regarding the cost of Leasing Services by geographic location and property types.

(b) Based upon its survey and its professional resources and expertise, the Independent Fiduciary will determine a typical range of annual fees for Leasing Services for the Accounts. The average of the range, as determined from such survey, will serve as the basis of comparison for determining for the next five-year period whether continuation of the Leasing Services policy has provided cost savings or other benefits to the Accounts.

(c) RREEF will demonstrate to the Independent Fiduciary at the end of the applicable five-year period that leasing fees charged to each Account by RREEF or its affiliates, plus the cost of the services of the Independent Fiduciary under the exemption that are allocated to the Accounts, are less than the fees that would have been charged using the benchmark rate established at the beginning of the five-year period. In making its determinations, the Independent Fiduciary shall take into account, to the extent it deems necessary, property management fees paid by the Accounts to RREEF and its affiliates.[3]

(d) The Independent Fiduciary will review the data supplied by RREEF and, to the extent considered necessary by the Independent Fiduciary, data collected from the Independent Fiduciary's own surveys, and will document its findings and analysis of such cost savings in a report to be delivered to each of the Client Plans participating in the Accounts within 90 days after the end of the five-year period and each subsequent five-year period and prior to the implementation of the annual confirmation procedure described in paragraph (6) of Section II with respect to such period. In the event the Independent Fiduciary finds that cost savings have not been achieved for the Accounts, it will not approve any additional services arrangements until RREEF and its affiliates have demonstrated to the satisfaction of the Independent Fiduciary that policies intended to assure cost savings to the Accounts have been implemented by RREEF and its affiliates. The survey, the Independent Fiduciary's report reviewing the survey, and the final report of the Independent Fiduciary analyzing whether cost savings had been achieved during the five-year period to which the survey relates, will be maintained by RREEF in accordance with the recordkeeping requirements of Section III.

(15) The fees paid to RREEF and/or its affiliates for Leasing Services provided in connection with a property held for an Account shall not exceed: (a) 7 percent of the lease amount for new leases; (b) 2 percent of the lease amount for renewal leases; and (c) for leases in which outside brokers are involved, 2.75 percent of the lease amount.

(16) Before entering into any leasing arrangement pursuant to the terms of this exemption, copies of the proposed exemption and the final exemption will be delivered to each Client Plan for which RREEF or its affiliate propose to perform Leasing Services as described herein.

Section III—Recordkeeping

(1) RREEF and any Leasing Affiliate will maintain, for a period of six years, the relevant records necessary to enable the persons described in paragraph (2) of this Section III to determine whether the conditions of this exemption have been met. Included in these records will be the written records of the Independent Fiduciary which had been periodically furnished by the Independent Fiduciary to RREEF, and the records described in paragraph (14) of Section II. However, a prohibited transaction will not be considered to have occurred if, due to circumstances beyond RREEF's, the Leasing Affiliate's, or the Independent Fiduciary's control, the records are lost or destroyed prior to the end of the six-year period.[4]

(2)(a) Except as provided in subsection (b) of this paragraph and notwithstanding any provisions of section 504(a)(2) and (b) of the Act, the records referred to in paragraph (1) of this section shall be unconditionally available at their customary location for examination during normal business hours by:

(1) Any duly authorized employee or representative of the Department or the Internal Revenue Service;

(2) Any fiduciary of a Client Plan who has authority to acquire or dispose of the interests of the Client Plan in the Accounts or any duly authorized employee or representative of such fiduciary;

(3) Any contributing employer to any Client Plan that has an interest in the Accounts or any duly authorized employee or representative of such employer;

(4) Any participant or beneficiary of any Client Plan participating in the Accounts, or any duly authorized employee or representative of such participant or beneficiary; and (5) The Independent Fiduciaries.

(b) None of the persons described above in subparagraphs (2)–(5) of this paragraph shall be authorized to examine the trade secrets of RREEF or any Leasing Affiliate or commercial or financial information which is privileged or confidential.

Section IV—Definitions

(1) The Accounts—The Accounts are any future pooled accounts (i.e., Multiple Client Accounts) or any existing or future single-customer accounts (i.e., Single Client Accounts), including joint ventures, general or limited partnerships or other real estate investment vehicles established by RREEF for the investment of employee benefit Client Plan assets in real-estate related investments to the extent that (i) such Accounts hold "plan assets" within the meaning of the regulations at 29 CFR section 2510.3–101 and (ii) management of their assets is subject to the discretionary authority of RREEF.

[3] With respect to Multiple Client Accounts, property management services by RREEF are currently provided in accordance with PTE 82–51 (47 FR 14238/14241, April 2, 1982). PTE 82–51 permits collective investment funds (the Funds) managed by RREEF or any of its affiliates, in which Client Plans participate, to engage in certain transactions with parties in interest with respect to the Client Plans that are investors in the Funds, provided that certain conditions are met. Therefore, the requested exemption is necessary only for the provision of Leasing Services by RREEF's affiliates to the Multiple Client Accounts in connection with the properties held by the Accounts.

[4] RREEF represents that its contract with each Independent Fiduciary will require that the Independent Fiduciary's written records be maintained in accordance with this section.

(2) RREEF—For purposes of this exemption, the term RREEF means RREEF America L.L.C., and certain of their officers who may serve as trustees of group trusts managed by RREEF America L.L.C., or who may serve in similar fiduciary capacities with respect to other commingled investment vehicles managed by them, and/or any other affiliates of RREEF as defined in paragraph (4) of this section IV which act as investment fiduciaries with respect to any Account.

(3) Leasing Affiliate—RREEF Management Company or other affiliates of RREEF (as defined in paragraph (4) of this Section IV) retained to provide Leasing Services with respect to an Account.

(4) An "affiliate" of a person means any person directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with the person.

(5) The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(6) Independent Fiduciary—A person who:

(a) Is not an affiliate of RREEF as defined in Section IV(4);

(b) Is not an officer, director, employee of, or partner in, RREEF (or affiliates thereof as defined in Section IV(4));

(c) Is not a corporation or partnership in which RREEF has an ownership interest or is a partner;

(d) Does not have an ownership interest in RREEF or any of its affiliates;

(e) Is not a fiduciary with respect to any Client Plan's investment in the Account;

(f) Has represented in writing that it is qualified to perform the services contemplated by the exemption, which qualifications shall include, among other things: (i) Demonstrated experience, generally over a period of not less than five years, in the business of commercial real estate, brokerage, management, or appraisal generally and in reviewing or negotiating leasing agreements and commissions specifically; (ii) familiarity with the relevant real estate, specifically as it relates to comparable property types with respect to the specific properties for which the Leasing Affiliate proposes to perform Leasing Services (for example, in the case of office properties, the Independent Fiduciary's experience shall relate specifically to office properties in the same market); (iii) experience in complying with the fiduciary standards of the Act in connection with the representation of the Client Plans; and

(g) Has acknowledged in writing acceptance of fiduciary obligations and has agreed not to participate in any decision with respect to any transaction in which the Independent Fiduciary has an interest that might affect its best judgement as a fiduciary. For purposes of the foregoing, each Independent Fiduciary shall represent in writing that it has no relationship with RREEF or its affiliates, or with any Account, that would affect its best judgement as a fiduciary.

For purposes of this definition of Independent Fiduciary, no organization or individual may serve as an Independent Fiduciary for any fiscal year if the gross income received by such organization or individual (or partnership or corporation of which such organization or individual is an officer, director, or 10 percent or more partner or shareholder) from RREEF or any affiliates of RREEF (including amounts received for services as Independent Fiduciary under any prohibited transaction exemption granted by the Department) for that fiscal year exceeds 5 percent of its or his annual gross income from all sources for such fiscal year.

In addition, no organization or individual who is an Independent Fiduciary, and no partnership or corporation of which such organization or individual is an officer, director or 10 percent or more partner or shareholder, may acquire any property from, sell any property to, or borrow any funds from RREEF or any affiliates of RREEF, or any Account maintained by RREEF or any affiliates of RREEF, during the period that such organization or individual serves as an Independent Fiduciary and continuing for a period of 6 months after such organization or individual ceases to be an Independent Fiduciary or negotiates any such transaction during the period that such organization or individual serves as Independent Fiduciary.

This exemption is subject to the express condition that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transactions to be consummated pursuant to the exemption.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on August 31, 1998 at 63 FR 46245 (the Notice).

Written Comments

The Department received two written comments (the Comments) with respect to the Notice and no requests for a public hearing. The Comments were filed by RREEF and generally request clarifications and modifications to the Notice. Set forth below in section I is a discussion of those aspects of the Comments which relate to the language of the final exemption (the Exemption). In addition, section II below discusses those aspects of the Comments which relate to the Summary of Facts and Representations (the Summary) contained in Notice.

I. Discussion of the Comments Regarding the Exemption

1. Section II(10) of the Notice relates to the appropriate percentage of beneficial interests in an Account which must be held by Client Plans with a certain minimum asset size. Specifically, Section II(10) of the Notice states, in relevant part, that 75% or more of the units of beneficial ownership in "an Account" must be held by Client Plans or other investors having total assets of at least $100 million. In addition, Section II(10) of the Notice states that 50% or more of the Client Plans investing in "an Account" must have assets of at least $100 million.

The Comments state that the foregoing 75% and 50% tests are relevant only in the case of, and are meant to apply to, Multiple Client Accounts (see paragraph 22 of the Summary contained in the Notice). For purposes of this Exemption, RREEF has represented that Single Client Accounts will be established only for Client Plans with at least $100 million in assets. Accordingly, RREEF requests that the foregoing references to "an Account" in the first and second sentences of Section II(10) of the Exemption be changed to "Multiple Client Account."

The Department acknowledges RREEF's request, as stated in the Comments, and has modified the language of Section II(10) of the Exemption accordingly.

2. The Comments also state that the third sentence in Section II(10) of the Notice provides that "for purposes of the 50% test", a group of Client Plans maintained by a single employer or controlled group of employers, any of which individually has assets of less than $100 million, will be counted as a single Client Plan if the decision to invest in the Account is made at the direction of an unaffiliated fiduciary who exercises discretion with respect to

total Client Plan assets in excess of $100 million..

The Comments state that the phrase ". . . . For purposes of the 50% test", as it appears in the third sentence of Section II(10) of the Notice, should be deleted. The Comments note that this reference to only the "50% test" is not completely accurate in the context of RREEF's Multiple Client Accounts, as contemplated under this Exemption. In this regard, the Comments state that if a fiduciary unaffiliated with RREEF directs the investment of multiple affiliated plans (usually through a single "master trust") into a Multiple Client Account, it is appropriate to treat the affiliated plans as a Single Client Plan for both the "75% test" and the "50% test" referred to in Section II(10). In addition, the Comments state that it is RREEF's understanding that multiple plans of a single employer, invested as a unit at the direction of a fiduciary independent of RREEF, would be treated as a single Client Plan for purposes of establishing a Single Client Account under the Exemption.

The Department acknowledges RREEF's request and has modified the Exemption by deleting the phrase ". . . . For purposes of the 50% test" in the third sentence of Section II(10) of the Exemption.

II. Discussion of the Comments Regarding the Summary

1. The Comments state that the Exemption will not be relevant to RREEF USA Fund-I because this Multiple Client Account is in liquidation. Moreover, as stated in the Notice, the Comments reaffirm that RREEF has no intention of using the Exemption for any other current Multiple Client Accounts. Therefore, the Comments note that the references to USA Fund-I in the Notice, which are located in Paragraphs 3 and 20 of the Summary, should be disregarded.

The Department acknowledges the applicant's clarification regarding the applicability of the Exemption to existing Multiple Client Accounts, including USA Fund-I. Thus, in response to this Comment, the Department has modified the definition of the term "Accounts," as it appears in Section IV(1) of the Notice, to clarify that this term does not apply to any existing Multiple Client Accounts. Section IV(1) of the Exemption states, in pertinent part, that the Accounts are any future pooled accounts (i.e., Multiple Client Accounts) or any existing or future single-customer accounts (i.e., Single Client Accounts).

2. With respect to Paragraph 9 of the Summary, the Comments state that the discussion regarding the potential for leasing competition among properties held by an Account and another property held by a RREEF affiliate for its own account in the same real estate market, is not meant to refer in any way to the potential for competition between two properties held by two different Accounts. In the latter case, RREEF and the Independent Fiduciary, subject to the veto rights of the Client Plan(s), will determine whether it would be appropriate for a Leasing Affiliate to provide Leasing Services to one or both of the properties held by such Accounts.

3. With regard to Paragraph 10 of the Summary, the Comments state that the reference to the use of the same Independent Fiduciary for all Accounts that have properties in the same real estate market is not entirely accurate. In this regard, the Comments note that RREEF proposes to use the same Independent Fiduciary for all Accounts that have properties of the same type in the same real estate market. Thus, for example, different Independent Fiduciaries may be retained in the same real estate market for retail and commercial properties.

The Department concurs with all of the Comments relating to the Summary.

Accordingly, after giving full consideration to the entire record, including the Comments, the Department has decided to grant the exemption subject to the modifications and clarifications described above. The Comments have been included as part of the public record of the exemption application.

Interested persons should note that the complete exemption file is available for public inspection in the Public Disclosure Room of the Pension and Benefits Administration, Room N–5638, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington DC 20210.

[Prohibited Transaction Exemption 98–53; Exemption Application No. D–10324]

Exemption

Section I—Exemption Involving Plans Where PIA Is Both a Fiduciary or Other Party in Interest With Respect to the Plan and Investment Adviser of Certain Trusts in Which the Plans Invest

The restrictions of sections 406(a) and 406(b) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (F) of the Code shall not apply to: (1) the acquisition, sale or redemption of trust units (the Units) in the Pacific Income Advisers Fixed-Income Group Investment Trust (Fixed Income Trust), the Pacific Income Advisers Short-Term Group Investment Trust (Short-Term Trust), the Pacific Income Advisers Equity Group Investment Trust (Equity Trust), and the Pacific Income Advisers Global Group Investment Trust (Global Trust; each a Trust and collectively, the Trusts), by employee benefit plans, and Individual Retirement Accounts (IRA's; collectively, the Plan(s)); and (2) the payment of fees by a Trust to Pacific Income Advisers (PIA) where PIA is a fiduciary or other party in interest with respect to a Plan investing in a Trust and the investment adviser to each of the Trusts, provided the conditions of Section II are met.

Section II—Conditions

(1) (a) The investment of a Plan's assets in the each of the Trusts and the fees to be paid by a Trust to PIA are authorized in writing by a Plan fiduciary who is independent of PIA (Independent Fiduciary).[5] Such authorization shall be consistent with the responsibilities, obligations and duties imposed on fiduciaries by Part 4 of Title I of the Act. In addition, such authorization shall be either: (1) Set forth in the investment management agreement between the Plan and PIA; (2) indicated in writing prior to each purchase or sale; or (3) indicated in writing prior to the commencement of a specified purchase or sale program in the Units of the Trusts.

(b) PIA does not provide investment advice to a Plan's Independent Fiduciary within the meaning of 29 CFR 2510.3–21(c)(1)(ii) with respect to a Plan's acquisition of Units of a Trust.

(2) Prior to making an initial investment in the Units, each Plan's Independent Fiduciary shall receive the following written disclosures from PIA:

(a) The proposed exemption and grant notice describing the exemptive relief provided herein;

(b) The applicable Trust's Offering Memorandum, outlining the investment objective(s) of the Trust and the policies employed to achieve these objectives and a description of all fees associated with investment in the Trust; and

(c) The applicable Trust's Agreement and Declaration of Trust, disclosing the structure and manner of operation of the Trust.

(d) A statement describing the relationship between PIA and the Trusts.

(3) The Independent Fiduciary shall acknowledge in writing that the Plan is an "accredited investor" as defined in Rule 501 of Regulation D of the Securities Act of 1933 (1933 Act). In addition, the Independent Fiduciary shall acknowledge in writing that it has not relied upon the advice of PIA with respect to the acquisition, sale or redemption of the Units.

(4) No Plan shall pay a sales commission or redemption fee, in connection with the acquisition, sale or redemption of the Units of the Trusts.

(5) (a) No participating Plan may invest more than 25% of its total assets in the Global Trust.

(b) No Plan, other than a multiple employer welfare arrangement (MEWA), a multiple employer trust (MET), or voluntary employee benefit association (VEBA), may acquire or hold Units representing more than 20% of the assets of a Trust.[6] A MEWA, MET, or VEBA may acquire and hold Units representing up to 35% of the assets of either the Short-Term Trust or Fixed Income Trust only. As to investment in any other Trust, a MEWA, MET, or VEBA may not acquire or hold Units representing more than 20% of the assets of such Trust.

(c) For purposes of determining the percentage of the assets of a Trust being held by a single Plan, PIA shall first make the calculation 90 days after the first Unit of a Trust is sold to such Plan.

(6)(a) At the time the transactions are entered into, the terms of the transactions shall be at least as favorable to the Plans as those obtainable in arm's length transactions between unrelated parties.

(b) PIA, including any officer or director of PIA, does not purchase or sell shares of the Trusts from or to any Plan Client.

(c) The price paid or received by a Plan Client for Units of a Trust is the net asset value per Unit at the time of the transaction and it is the same price which would have been paid or received for the Units of a Trust by any other investor at that time. For purposes of this paragraph, the term "net asset value" means the amount for purposes of pricing all purchases and sales calculated by dividing the value of all securities, determined by an objective method as set forth in each Trust's relevant Trust documents and Trust Offering Memorandum, and other assets belonging to the Trust, less the liabilities charged to such Trust, by the total number of Units of the Trust.

(7) The combined total of all fees paid by a participating Plan shall constitute no more than reasonable compensation within the meaning of section 408(b)(2)of the Act.

(8) The Plan does not pay any Plan-level investment management fees, investment advisory fees or similar fees to PIA with respect to any of the assets of such Plan which are invested in Units of a Trust. This condition does not preclude the payment of investment advisory or similar fees by the Trusts to PIA under the terms of investment management agreements between PIA and each of the Trusts.

(9) All authorizations and approvals made by the Independent Fiduciary regarding investment in a Trust and the fees paid to PIA are subject to an annual reauthorization wherein any such prior authorization shall be terminable at will by the Plan, without penalty to the Plan, upon written notice of termination. A form expressly providing an election to terminate the authorization (the Termination Form) with instructions on the use of the form must be supplied to the Independent Fiduciary no less than annually; provided that the Termination Form need not be supplied sooner pursuant to paragraph (10) below. The Termination Form must include the following information:

(a) The authorization is terminable at will by the Plan, without penalty to the Plan, upon receipt by PIA of written notice from the Independent Fiduciary; and

(b) Failure of the Independent Fiduciary to return the Termination Form will result in continued authorization of PIA to continue to engage in the transactions described in Sections I.

(10) PIA will provide, at least 30 days in advance of the implementation of an additional service to a Trust by PIA or a fee increase for investment management, investment advisory or similar services, a written notice to the Independent Fiduciary of the Plan Client explaining the nature and amount of the additional service for which a fee is charged or the increase in fees.

(11) Each Plan shall receive the following:

(a) A monthly report disclosing the performance and the value of the Plan's investment in each of the Trusts. Such monthly report shall disclose the extent to which assets of a Plan have been shifted between the Trusts by PIA and any fee differential resulting from such shifting between the Trusts;

(b) An audited financial statement of each of the Trusts in which a Plan is invested, prepared annually by a independent, certified public accountant, including a list of investments of each Trust and their valuations, provided to the Plan not later than 45 days after the end of the period to which the report relates; and

(c) An annual statement of a Plan's percentage interest in each Trust and the value of the Plan's Units, provided to the Plan not later than 45 days after the end of the period to which the report relates. Such report shall also include the total fees paid to PIA by each Trust. Further, such report shall also include the brokerage fees paid by each Trust to unrelated broker-dealers, as well as the total of all fees and expenses paid by PIA to third parties.

(12) Brokerage transactions for the Trusts are performed by entities unrelated to PIA for no more than reasonable compensation within the meaning of section 408(b)(2) of the Act.

(13) PIA shall maintain, for a period of six years, the records necessary to enable the persons described in paragraph (14) of this section to determine whether the conditions of this exemption have been satisfied, except that (a) prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of PIA, the records are lost or destroyed prior to the end of the six year period, and (b) no party in interest other than PIA shall be subject to the civil penalty that may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975(a) and (b) of the Code, if the records are not maintained, or are not available for examination as required by paragraph (14) below.

(14) (a) Except as provided in section (b) of this paragraph and notwithstanding any provisions of subsection (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (13) of this section shall be unconditionally available at their

[5] A fiduciary will not be deemed independent of PIA if: (1) such fiduciary is directly or indirectly controlled by PIA or an affiliate thereof; (2) such fiduciary or any officer, director, partner, highly compensated employee, or the relative of such fiduciary is an officer, director, partner, or highly compensated employee, of PIA or an affiliate of PIA; and (3) such fiduciary directly or indirectly receives any compensation or other consideration for that fiduciary's own personal account in connection with any transaction described in this exemption.

[6] A MEWA is defined in section 3 (40)(A) of the Act and provides benefits described in section 3(1) of the Act for employees of two or more employers. Although the term "MET" is not used or defined in Title I of the Act, a MET may be covered by Title I of the Act, to the extent that it provides benefits described in section 3(1) of the Act and it is established or maintained by an employer, an employee organization, or both. A VEBA is defined in section 501(c)(9) of the Code and is subject to Title I to the extent that it provides benefits described in section 3(1) of the Act and it is established or maintained by an employer, an employee organization, or both.

customary location during normal business hours for examination by:

(1) Any duly authorized employee or representative of the Department or the Internal Revenue Service (the Service);

(2) Any Independent Fiduciary of a Plan investing in a Trust, or any duly authorized representative of such fiduciary;

(3) Any contributing employer to any Plan investing in a Trust, or any duly authorized employee representative of such employer;

(4) Any participant or beneficiary of any participating Plan investing in a Trust, or any duly authorized representative of such participant or beneficiary; and

(5) Any other person or entity investing in a Trust.

(b) None of the persons described above in subparagraphs (2)–(5) of this paragraph (14) shall be authorized to examine the trade secrets of PIA or commercial or financial information which is privileged.

EFFECTIVE DATE: This exemption is effective August 29, 1997.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on July 20, 1998 at 63 FR 38855.

Written Comments

The applicant submitted a letter and certain other information commenting on the notice of proposed exemption (the Notice) and the Summary of Facts and Representations contained therein (the Summary). The major points raised by such comments are summarized below.

First, the applicant states that references made in the Notice to the "Pacific Income Advisers International Group Investment Trust" should be changed to refer to the "Pacific Income Advisers Global Group Investment Trust". Thus, the applicant requests that the first reference to this Trust in the operative language of the exemption should be changed to reflect the proper name, and that references made thereafter in the exemption to the "International Trust" should be changed to refer to the "Global Trust".

The Department acknowledges the applicant's request and has so modified the language of the exemption.

Second, with respect to Paragraphs 4, 5 and 7 of the Summary, the applicant's comments seek to clarify the relationships between PIA and its clients, including the Plans. In this regard, the applicant states that it is unlikely that a Plan would discontinue a separate account investment advisory relationship with PIA and subsequently invest all of its assets under PIA's management in Units of one or more of the Trusts. The applicant states that it would be more likely that a Plan would instruct PIA to sell some of the assets separately managed by PIA and invest the proceeds in such Units.

Third, with respect to the discussion in Paragraph 10 of the Summary regarding the fees charged to Plans for investments in each of the Trusts, the applicant's comments state that the investment advisory fees payable to PIA by each Trust are subject to change. Such change must be approved in accordance with the terms and conditions set forth in the Notice and this exemption. Thus, for example, Section II(10) of this exemption requires that PIA provide, at least 30 days in advance of the implementation of any fee increase for investment management, investment advisory or similar services, a written notice to the Independent Fiduciary of the Plan explaining the increase in fees. Section II(9)(a) and (b) also requires that the Independent Fiduciary be provided with a Termination Form which allows the Plan to authorize such a fee increase under the procedures described therein.

The Department acknowledges these and other clarifications to the information contained in the Summary, as stated in the applicant's comment letter and accompanying materials.

Accordingly, the Department has determined to grant the exemption as modified.

FOR FURTHER INFORMATION CONTACT: Ms. Janet Schmidt of the Department, telephone (202) 219–8883. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions to which the exemptions does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transactional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 4th day of November, 1998.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, Department of Labor.

BILLING CODE 4510–29–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration, Office of Records Services—Washington, DC.

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. They authorize the preservation of records of continuing value in the National Archives of the United States and the destruction, after a specified period, of records lacking administrative, legal, research, or other value. Notice is published for records schedules in which agencies propose to destroy records not previously authorized for disposal or reduce the retention period of records already authorized for disposal. NARA invites public comments on such records schedules, as required by 44 U.S.C. 3303a(a).

DATES: Requests for copies must be received in writing on or before December 24, 1998. Once the appraisal of the records is completed, NARA will send a copy of the schedule. NARA staff usually prepare appraisal memorandums that contain additional information concerning the records covered by a proposed schedule. These, too, may be requested and will be provided once the appraisal is completed. Requesters will be given 30 days to submit comments.

ADDRESSES: To request a copy of any records schedule identified in this notice, write to the Life Cycle Management Division (NWML), National Archives and Records Administration (NARA), 8601 Adelphi Road, College Park, MD 20740–6001. Requests also may be transmitted by FAX to 301–713–6852 or by e-mail to records.mgt@arch2.nara.gov.

Requesters must cite the control number, which appears in parentheses after the name of the agency which submitted the schedule, and must provide a mailing address. Those who desire appraisal reports should so indicate in their request.

FOR FURTHER INFORMATION CONTACT: Michael L. Miller, Director, Modern Records Programs (NWM), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740–6001. Telephone: (301) 713–7110. E-mail: records.mgt@arch2.nara.gov.

SUPPLEMENTARY INFORMATION: Each year Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA approval, using the Standard Form (SF) 115, Request for Records Disposition Authority. These schedules provide for the timely transfer into the National Archives of historically valuable records and authorize the disposal of all other records after the agency no longer needs the records to conduct its business. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

No Federal records are authorized for destruction without the approval of the Archivist of the United States. This approval is granted only after a thorough consideration of their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and whether or not they have historical or other value.

Besides identifying the Federal agencies and any subdivisions requesting disposition authority, this public notice lists the organizational unit(s) accumulating the records or indicates agency-wide applicability in the case of schedules that cover records that may be accumulated throughout an agency. This notice provides the control number assigned to each schedule, the total number of schedule items, and the number of temporary items (the records proposed for destruction). It also includes a brief description of the temporary records. The records schedule itself contains a full description of the records at the file unit level as well as their disposition. If NARA staff has prepared an appraisal memorandum for the schedule, it too includes information about the records. Further information about the disposition process is available on request.

Schedules Pending

1. Department of Commerce, Bureau of the Census (N1–29–98–1, 3 items, 2 temporary items). Edited and unedited master files of the American Community Survey, a monthly household survey designed to provide accurate and up-to-date profiles of America's communities and replace certain data collected on the long form in the Decennial Census. Public-use microdata files are proposed for permanent retention.

2. Department of Justice, Immigration and Naturalization Service, Agency-wide (N1–85–98–2, 1 item, 1 temporary item). Bond Management Information System, a database used to track the status of immigration bonds posted by aliens. The data does not materially enhance permanent electronic data relating to aliens.

3. Environmental Protection Agency, Agency-wide (N1–412–96–1, 33 items, 31 temporary items). Electronic systems and related paper records pertaining to such matters as Superfund finances, EPA web sites, water quality monitoring in the New York City area and the U.S. Virgin Islands, the status of litigation filed against EPA, electronic bulletin boards, system backups, payrolling, and the determination of the ecological risks posed by synthetic organic chemicals. Master files and documentation associated with an electronic system relating to environmental monitoring and assessment are proposed for permanent retention.

4. Environmental Protection Agency, Environmental Appeals Board (N1–412–97–6, 3 items, 3 temporary items). Records that document review of appeals for environmental permits, enforcement appeals stemming from permit violations, and Comprehensive Environmental Response Compensation and Liability Act reimbursement petitions requesting compensation for an unjust penalty.

5. Federal Communications Commission, Common Carrier Bureau, (N1–173–98–5, 1 item, 1 temporary item). Cost allocation manuals, filed yearly, that specify how local carriers will allocate costs between regulated and nonregulated operations.

6. Federal Energy Regulatory Commission, Office of Pipeline Regulation (N1–138–98–8, 1 item, 1 temporary item). Electronic copies of records in gas pipeline rates and tariffs case files created using electronic mail or word processing applications. Recordkeeping copies were previously approved for disposal.

7. Federal Energy Regulatory Commission, Office of Pipeline Regulation (N1–138–98–10, 1 item, 1 temporary item). Electronic copies of correspondence from oil producers and oil pipeline companies created using electronic mail or word processing applications. Recordkeeping copies were previously approved for disposal.

8. Federal Energy Regulatory Commission, Office of Pipeline Regulation (N1–138–98–11, 2 items, 2 temporary items). Electronic copies of gas pipeline service agreements setting forth pipeline tariffs and rates created using electronic mail or word processing applications. Recordkeeping copies were previously approved for disposal. This schedule also covers paper copies other than the long-term recordkeeping copy.

9. United States Information Agency (N1–59–99–1, 11 items, 5 temporary items). Records from Department of State predecessor elements dealing with international broadcasting matters transferred to the custody of the United States Information Agency upon creation of USIA in 1953. The records consist of requests for copies of Voice of America recordings, status ledgers, extra copies of processed documents, budget and personnel files, and graphs relating to signal strength. Files dealing with overall programs, policies, and operations are proposed for permanent retention.

Dated: October 30, 1998.

Michael J. Kurtz,

Assistant Archivist for Record Services—Washington, DC.

BILLING CODE 7515–01–P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Council on the Humanities; Meeting

November 4, 1998.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended) notice is hereby given the National Council on the Humanities will meet in Washington, D.C. on November 19–20, 1998.

The purpose of the meeting is to advise the Chairman of the National Endowment for the Humanities with respect to policies, programs, and procedures for carrying out his functions, and to review applications for financial support and gifts offered to the Endowment and to make recommendations thereon to the Chairman.

The meeting will be held in the Old Post Office Building, 1100 Pennsylvania Avenue, N.W., Washington, D.C. A portion of the morning and afternoon sessions on November 19–20, 1998, will not be open to the public pursuant to subsections (c) (4), (6) and (9)(B) of section 552b of Title 5, United States Code, because the Council will consider information that may disclose: trade secrets and commercial or financial information obtained from a person and privileged or confidential; information of a personal nature and disclosure of which will constitute a clearly unwarranted invasion of personal privacy; and information the disclosure of which would significantly frustrate implementation of proposed agency action. I have made this determination under the authority granted me by the Chairman's Delegation of Authority dated July 19, 1993.

The agenda for the session on November 19, 1998 will be as follows:

Committee Meetings

9:00–10:30 a.m.—(Open to the Public) Policy Discussion
Public Programs—Room 420
Preservation and Access/Challenge Grants combined meeting with Federal/State Partnership—Room 527
9:00 a.m.–10:30 a.m.—(Closed to the Public) Discussion of specific grant applications and programs before the Council
Research/Education programs—Room M07
10:30 a.m. until Adjourned—(Open to the Public) Policy Discussion
Research/Education Programs—Room M07
Federal/State Partnership—Room 507
10:30 a.m. until Adjourned—(Closed to the Public) Discussion of specific grant applications and programs before the Council
Public Programs—Room 420
Preservation and Access/Challenge Grants—Room 415
12:30–1:30 p.m.
Jefferson Lecture Committee Meeting—Room 430

The morning session on November 20, 1998 will convene at 8:00 a.m., in the 1st Floor Council Room, M–09, and will be open to the public, as set out below. The agenda for the morning session will be as follows:

Minutes of the Previous Meeting

Reports

A. Introductory Remarks
B. New Directives in Television through Digital Technology
C. Staff Report
D. Reports on Policy & General Matters
1. Overview
2. Research and Education Programs
3. Public Programs
4. Preservation and Access and Challenge Grants
5. Federal/State Partnership
6. Jefferson Lecture

The remainder of the proposed meeting will be given to the consideration of specific applications and closed to the public for the reasons stated above.

Further information about this meeting can be obtained from Ms. Nancy E. Weiss, Advisory Committee Management Officer, Washington, D.C. 20506, or call area code (202) 606–8322, TDD (202) 606–8282. Advance notice of any special needs or accommodations is appreciated.

Nancy E. Weiss,

Advisory Committee Management Officer.

[FR Doc. 98–29934 Filed 11–6–98; 8:45 am]

BILLING CODE 7536–01–M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–361 and 50–362]

Southern California Edison Company; Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. NPF–10 and NPF–15 issued to Southern California Edison Company (the licensee) for operation of the San Onofre Nuclear Generating Station, Unit Nos. 2 and 3 located in San Diego County, California.

The proposed amendments would revise the turbine missile protection calculation methodology in the San Onofre Nuclear Generating Station, Unit Nos. 2 and 3 (SONGS) licensing basis.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

This change is in support of a planned replacement of the existing shrunk-on disc turbines with welded-rotor turbines for Units 2 and 3. The new design is believed to be superior to the existing design in terms of the probability of generation of missiles. However, because a new missile strike-and-damage analysis has not been performed, and due to differences in the method of calculation of missile generation probability—for instance, inclusion of stress corrosion cracking as a potential failure mechanism—it is difficult to quantify the change in probability of damage to safety-related equipment due to turbine missile strikes.

However, in order to characterize the effect of the proposed change, a comparison can be made using the current turbine missile methodology for the current design and the proposed methodology for the proposed design. Using the methodology currently approved for San Onofre Units 2 and 3 for the current shrunk-on disc rotor design, the overall probability of damage to safety-related systems, structures, and components is 0.9×10^{-7}.

Using the methodology proposed by this change for the new welded rotor design, the overall probability of damage to safety-related systems, structures, and components is calculated to be 1.7×10^{-8} per year.

Ultimately, the proposed change is acceptable because the overall probability of damage to safety-related systems, structures, and components will be less than or equal to the acceptance criteria of 1×10^{-7} per year stated in Regulatory Guide (RG) 1.115. The difference between the calculated value of 1.7×10^{-8} and the acceptance criteria of 1×10^{-7} is considered margin that is available to account for any future changes to the turbine missile generation analysis.

Therefore, this change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

Damage to safety-related systems, structures, and components from turbine missiles is currently evaluated in Section 3.5.1.3 of the Updated Final Safety Analysis Report (UFSAR). This proposed change merely provides an alternative method to demonstrate that the overall probability of damage to safety-related systems, structures, and components from turbine missiles will remain less than or equal to the acceptance criterion of 1×10^{-7} per year, which is the current acceptance criterion.

Therefore, this proposed change will not create a new or different kind of accident from any accident that has been previously evaluated.

3. The proposed change does not involve a significant reduction in a margin of safety.

There is no change to the method of operation of the turbine for Units 2 and 3 as a result of this change. Turbine overspeed protection is unaffected, and provides assurance that the turbine will operate within design limits.

Therefore, there will be no significant reduction in a margin of safety as a result of this change.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 6D59, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC.

The filing of requests for hearing and petitions for leave to intervene is discussed below.

By December 9, 1998, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Main Library, University of California, Irvine, California 92713. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any

hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and to Douglas K. Porter, Esquire, Southern California Edison Company, P.O. Box 800, Rosemead, California 91770, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated June 12, 1998, as supplemented by letter dated October 29, 1998, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Main Library, University of California, Irvine, California 92713.

Dated at Rockville, Maryland, this 3rd day of November 1998.

For the Nuclear Regulatory Commission.

James W. Clifford,

Senior Project Manager, Project Directorate IV–2, Division of Reactor Projects III/IV, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–498 and 50–499]

STP Nuclear Operating Company (South Texas Project Electric Generating Stations Units 1 and 2); Exemption

I

STP Nuclear Operating Company (the licensee) is the holder of Facility Operating License Nos. NPF–76 and NPF–80, for the South Texas Project, Units 1 and 2 (STP). The licenses provide, among other things, that the licensee is subject to all rules, regulations, and orders of the Commission now or hereafter in effect.

The facility consists of two pressurized water reactors located in Matagorda County, Texas.

II

Title 10 of the *Code of Federal Regulations* (10 CFR), Section 50.71 "Maintenance of records, making of reports," paragraph (e)(4) states, in part, that "Subsequent revisions [to the Updated Final Safety Analysis Report (UFSAR)] must be filed annually or 6 months after each refueling outage provided the interval between successive updates to the FSAR does not exceed 24 months." The STP two-unit site shares a common UFSAR; therefore, this rule requires the licensee to update the same document annually or within 6 months after a refueling outage for either unit.

III

Section 50.12(a) of 10 CFR, "Specific exemptions," states that

> The Commission may, upon application by any interested person or upon its own initiative, grant exemptions from the requirements of the regulations of this part, which are:
>
> (1) Authorized by law, will not present an undue risk to the public health and safety, and are consistent with the common defense and security.
>
> (2) The Commission will not consider granting an exemption unless special circumstances are present.

Section 50.12(a)(2)(ii) of 10 CFR states that special circumstances are present when "Application of the regulation in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule. . . ." The underlying purpose of the rule was to relieve licensees of the burden of filing annual FSAR revisions while assuring that such revisions are made at least every 24 months. The Commission reduced the burden, in part, by permitting a licensee to submit its FSAR revisions 6 months after refueling outages for its facility, but did not provide for multiple unit facilities sharing a common FSAR in the rule. Rather, the Commission stated that "With respect to . . . multiple facilities sharing a common FSAR, licensees will have maximum flexibility for scheduling updates on a case-by-case basis" (57 FR 39355 (1992)).

As noted in the staff's Safety Evaluation, the licensee's proposed schedule for UFSAR updates will ensure that the STP UFSAR and Operations Quality Assurance Plan will be maintained current within 24 months of the last revision and the interval for submission of the 10 CFR 50.59 design change report will not exceed 24 months. The proposed schedule fits within the 24-month duration specified by 10 CFR 50.71(e)(4). Revising the FSAR annually or 6 months after refueling outages for each unit, therefore, is not necessary to achieve the underlying purpose of the rule. Accordingly, the Commission has determined that special circumstances are present as defined in 10 CFR 50.12(a)(2)(ii). The Commission has further determined that, pursuant to 10 CFR 50.12, the exemption is authorized by law, will not present an undue risk to the public health and safety and is consistent with the common defense and security, and is otherwise in the public interest. The Commission hereby grants the licensee an exemption from the requirement of 10 CFR 50.71(e)(4) to submit updates to the STP UFSARs within 6 months of each unit's refueling outage. The licensee will be required to submit updates to the STP UFSAR, the Operations Quality Assurance Plan, and the 10 CFR 50.59 safety evaluation summary reports to the NRC no later than 24 calendar months from the previous revision.

Pursuant to 10 CFR 51.32, the Commission has determined that granting of this exemption will have no significant effect on the quality of the human environment (63 FR 57144).

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 2nd day of November 1998.

For the Nuclear Regulatory Commission.

Samuel J. Collins,

Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

OFFICE OF MANAGEMENT AND BUDGET

Agency Information Collection Under Review by the Office of Management and Budget

AGENCY: Office of Management and Budget, Executive Office of the President.

ACTION: Notice of submission for OMB review; comment request.

SUMMARY: The Office of Management and Budget (OMB) has submitted the information collections listed at the end of this notice to the Office of Information and Regulatory Affairs (OIRA), OMB for review under provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104–13). These forms are required by OMB Circulars A-102, "Grants and Cooperative Agreements with State and Local Government," and A-110, "Uniform Administrative Requirements for Grants and Agreements with Institution of Higher Education, Hospitals, and Other Non-Profit Organizations." In response to OMBs earlier **Federal Register** notice on July 30, 1998 (63 FR 40745), four responses were received. At this time, OMB proposes no changes to the existing forms.

DATES: Submit comments on or before December 9, 1998.

ADDRESSES: Address comments to Ed Springer, Desk Officer, Office of Information and Regulatory Affairs (OIRA), OMB, 725 17th Street NW, Room 10236, New Executive Office Building, Washington, DC 20503. E-mail comments may be submitted to springer__e@a1.eop.gov. Please include the full body of the comments in the text of the message and not as an attachment. Please include the name, title, organization, postal address, and E-mail address in the text of the message. (Comments should also be addressed to the Office of Federal Financial Management at the address listed below.)

FOR FURTHER INFORMATION CONTACT: F. James Charney, Office of Federal Financial Management, Office of Management and Budget, (202) 395–3993 (e-mail charney__f@a1.eop.gov). The standard forms can be obtained via fax by calling OMB's FAX Information Line (202–395–9068). The forms can also be downloaded from the OMB Grants Management home page (http://www.whitehouse.gov/WH/EOP/OMB/Grants).

SUPPLEMENTARY INFORMATION:

OMB Control No.: 0348–0039.
Title: Financial Status Report (Long Form).
Form No: SF–269.
Type of Review: Extension of a currently approved collection.
Respondents: States, Local Governments, Non-Profit organizations.
Number of Responses: 200,000.
Estimated Time Per Response: 90 minutes.
Needs and Uses: The SF–269 is used to monitor grantee expenditures in circumstances where grantees earn program income or contribute matching funds. The Federal awarding agencies and OMB use information reported on this form for general management of Federal assistance awards programs.

OMB Control No.: 0348–0038.
Title: Financial Status Report (Short Form).
Form No: SF–269A.
Type of Review: Extension of a currently approved collection.
Respondents: States, Local Governments, Non-Profit organizations.
Number of Responses: 200,000
Estimated Time Per Response: 30 minutes.
Needs and Uses: The SF–269A is used to monitor grantee expenditures in circumstances where grantees earn program income or contribute matching funds. The Federal awarding agencies and OMB use information reported on this form for general management of Federal assistance awards programs.

OMB Control No.: 0348–0004.
Title: Request for Advance or Reimbursement.
Form No: SF–270.
Type of Review: Extension of a currently approved collection.
Respondents: States, Local Governments, Non-Profit organizations.
Number of Responses: 100,000.
Estimated Time Per Response: 60 minutes.
Needs and Uses: The SF–270 is used to request funds for all nonconstruction grant programs when letters of credit or predetermined advance methods are not used. The Federal awarding agencies and OMB use information reported on this form for general management of Federal assistance awards programs.

OMB Control No.: 0348–0002.
Title: Outlay Report and Request for Reimbursement for Construction Programs.
Form No: SF–271.
Type of Review: Extension of a currently approved collection.
Respondents: States, Local Governments, Non-Profit organizations.
Number of Responses: 40,000.
Estimated Time Per Response: 60 minutes.
Needs and Uses: The SF–271 is used to request reimbursement for all construction programs. The Federal awarding agencies and OMB use information reported on this form for general management of Federal assistance awards programs.

OMB Control No.: 0348–0003.
Title: Federal Cash Transactions Report.
Form No: SF–272 and SF–272A.
Type of Review: Extension of a currently approved collection.
Respondents: States, Local Governments, Non-Profit organizations.
Number of Responses: 100,000.
Estimated Time Per Response: 120 minutes.
Needs and Uses: The SF–272 & 272A are used to report disbursement information for each financial assistance agreement when funds are advanced to them through letters of credit or with direct Treasury check. The Federal awarding agencies and OMB use information reported on this form for general management of Federal assistance awards programs.

OMB Control No.: 0348–0043.
Title: Application for Federal Assistance.
Form No: SF–424.
Type of Review: Extension of a currently approved collection.
Respondents: States, Local Governments, Non-Profit organizations.
Number of Responses: 400,000.
Estimated Time Per Response: 45 minutes.
Needs and Uses: The SF–424 is used to apply for Federal grants. The Federal awarding agencies and OMB use information reported on this form for general management of Federal assistance awards programs.

OMB Control No.: 0348–0044.
Title: Budget Information—Nonconstruction Programs.
Form No: SF–424A.
Type of Review: Extension of a currently approved collection.
Respondents: States, Local Governments, Non-Profit organizations.
Number of Responses: 360,000.
Estimated Time Per Response: 180 minutes.
Needs and Uses: The SF–424A is used to budget and request grant funds for nonconstruction programs. The Federal awarding agencies and OMB use information reported on this form for general management of Federal assistance awards programs.

OMB Control No.: 0348–0040.
Title: Assurances—Nonconstruction Programs.
Form No: SF–424B.
Type of Review: Extension of a currently approved collection.
Respondents: States, Local Governments, Non-Profit organizations.
Number of Responses: 360,000.
Estimated Time Per Response: 15 minutes.
Needs and Uses: The SF–424B is used to assure compliance with statutory requirements for nonconstruction grant programs. The Federal awarding agencies and OMB use information reported on this form for general management of Federal assistance awards programs.

OMB Control No.: 0348–0041.
Title: Budget Information—Construction Programs.
Form No: SF–424C.
Type of Review: Extension of a currently approved collection.

Respondents: States, Local Governments, Non-Profit organizations.
Number of Responses: 40,000.
Estimated Time Per Response: 180 minutes.
Needs and Uses: The SF–424C is used to budget and request grant funds for construction grant programs. The Federal awarding agencies and OMB use information reported on this form for general management of Federal assistance awards programs.
OMB Control No.: 0348–0042.
Title: Assurances—Construction Programs.
Form No: SF–424D.
Type of Review: Extension of a currently approved collection.
Respondents: States, Local Governments, Non-Profit organizations.
Number of Responses: 40,000.
Estimated Time Per Response: 15 minutes.
Needs and Uses: The SF–424D is used to assure compliance with statutory requirements for construction grant programs. The Federal awarding agencies and OMB use information reported on this form for general management of Federal assistance awards programs.

Issued in Washington, DC, October 19, 1998.

G. Edward DeSeve,
Controller.

POSTAL SERVICE

Changes in Domestic Rates, Fees, and Mail Classifications

AGENCY: Postal Service.

ACTION: Notice of implementation of changes to the Domestic Mail Classification Schedule, domestic rates, and fees and of corrections to the notice published at 63 FR 39124.

SUMMARY: This notice sets forth the rate and fee changes and the accompanying Domestic Mail Classification Schedule (DMCS) changes to be implemented as a result of the Decision of the Governors of the United States Postal Service on the Further Recommended Decision of the Postal Rate Commission on Postal Rate and Fee Changes, Docket No. R97–1 (October 5, 1998). This notice also contains minor corrections to the notice published at 63 FR 39124.

EFFECTIVE DATE: January 10, 1999.

FOR FURTHER INFORMATION CONTACT: Daniel J. Foucheaux, Jr., (202) 268–2989.

SUPPLEMENTARY INFORMATION: On July 10, 1997, pursuant to its authority under 39 U.S.C. 3621, et seq., the Postal Service filed with the Postal Rate Commission (PRC) a Request for a Recommended Decision on Proposed Changes in Rates of Postage and Fees for Postal Services (Request). The PRC designated the filing as Docket No. R97–1. The PRC published a notice of the filing, with a description of the Postal Service's proposals, on July 23, 1997, in the **Federal Register** (62 FR 39660).

On May 11, 1998, pursuant to its authority under 39 U.S.C. 3624, the PRC issued its Recommended Decision on the Postal Service's Request to the Governors of the Postal Service.

Pursuant to 39 U.S.C. 3625, the Governors of the United States Postal Service acted on the PRC's recommendations on June 29, 1998. In one decision, the Governors rejected the PRC's recommendations regarding Prepaid Reply Mail and Courtesy Envelope Mail. Decision of the Governors of the United States Postal Service on the Recommended Decisions of the Postal Rate Commission on Prepaid Reply Mail and Courtesy Envelope Mail, Docket No. R97–1 (June 29, 1998). In the second decision, the Governors acted on the remainder of the PRC's recommendations. Decision of the Governors of the United States Postal Service on the Recommended Decision of the Postal Rate Commission on Postal Rate and Fee Changes, Docket No. R97–1 (June 29, 1998). The Governors approved all of the remaining classification, fee, and rate changes (see 63 FR 39124), except that the Governors allowed under protest and returned for reconsideration recommendations related to three categories of mail. In particular, the Governors requested further action or clarification on the PRC's recommendations concerning Within County, Library Mail, and destination delivery unit Parcel Post.

In response, the PRC solicited comments on those matters from all interested parties, and thereafter issued a Further Recommended Decision upon reconsideration on September 24, 1998. On October 5, 1998, the Governors approved the relatively minor recommended changes in the rate and fee schedules for those three subclasses, along with associated classification changes, recommended by the PRC in its further Recommended Decision. Also on October 5, 1998, the Board of Governors of the Postal Service, pursuant to its authority under 39 U.S.C. 3625(f), determined to implement the rate, fee and classification changes approved by the Governors effective at 12:01 a.m. on January 10, 1999 (Resolution No. 98–12).

In accordance with the Decision of the Governors and Resolution No. 98–12, the Postal Service hereby gives notice that the classification, fee, and rate changes set forth below will become effective at 12:01 a.m. on January 10, 1999. For the affected subclasses and rate categories, the rate and fee schedules published below supersede those rate and fee schedules accepted or allowed under protest by the Governors in their Decision on the Recommended Decision of the Postal Rate Commission on Postal Rate and Fee Changes, Docket No. R97–1 (June 29, 1998) and published at 63 FR 39124.

Changes in implementation regulations published in the Domestic Mail Manual also become effective on January 10, 1999, as noted in a separate notice in the **Federal Register**.

A copy of the attachments to the Governors' Decision, setting forth the classification, fee, and rate changes ordered into effect by the Governors on the PRC's Further Recommended Decision, is set forth below.

A correction to Fee Schedule 943, which was published in the **Federal Register** on July 21, 1998 (63 FR 39143), is also published below. No substantive change is made to Fee Schedule 943; rather, the second heading entitled "Express Mail Insurance" is moved from the center to the left to clarify its applicability to the first two fee groupings for Express Mail Insurance. In addition, the Postal Service hereby gives notice that, due to complications apparently arising from word processing software conversions, the term "correction" surrounded by quotation marks in Domestic Mail Classification Schedule sections 221.24(b), 222.34(b), 321.231(c), 321.33, 321.431(c), 423.81, and 423.82 appears as "Acorrection@" in the version of Attachment B to the Decision of the Governors of the United States Postal Service on the Recommended Decision of the Postal Rate Commission in Docket No. R97–1 (June 29, 1998) published at 63 FR 39124.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC–23514; 812–10734]

CD Radio Inc.; Notice of Application

November 2, 1998.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for an order under section 6(c) of the Investment Company Act of 1940 (the "Act").

SUMMARY OF APPLICATION: Applicant requests an order exempting it from all provisions of the Act until the earlier of one year from the date the requested order is issued or the date applicant ceases to be an investment company.

FILING DATE: The application was filed on July 22, 1997, and amended on August 6, 1998. Applicant has agreed to file an amendment during the notice period, the substance of which is included in this notice.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on November 27, 1998, and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street NW, Washington, DC 20549. Applicant, 14th Floor, 1180 Avenue of the Americas, New York, NY 10019–6064.

FOR FURTHER INFORMATION CONTACT: Lisa McCrea, Attorney Adviser, at (202) 942–0562, or Nadya B. Roytblat, Assistant Director, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch, 450 5th Street, NW, Washington, DC 20549 (tel. 202–942–8090).

Applicant's Representations

1. Applicant is a Delaware corporation formed in 1990 and engaged in the business of developing a national satellite broadcast system to provide digital audio radio service ("Service"). In October 1997, applicant was granted a license by the Federal Communications Commission ("FCC") to build, launch and operate the Service.

2. To obtain the funds needed to pay for the FCC License, in 1997 applicant completed a public stock offering, a public debt offering, and a private placement of its common stock. Pending utilization in building the Service, the proceeds of the offerings were used to pay for the FCC License and invested in a money market fund, U.S. government securities, commercial paper, and a bank certificate of deposit.

3. For applicant to continue to hold the FCC License, applicant must satisfy certain progress requirements, including meeting certain deadlines for the construction and launch of satellites, and a deadline for the Service to be in full operation. Satisfying these requirements will require significant expenditures. Applicant currently expects to commence operations of the Service by the first quarter of the year 2000.

Applicant's Legal Analysis

1. Under section 3(a)(1)(C) of the Act, an issuer is an investment company if it "is engaged or proposes to engage in the business of investing, reinvesting, owning, holding, or trading in securities, and owns or proposes to acquire investment securities having a value exceeding 40 percent of the value of such issuer's total assets (exclusive of Government securities and cash items) on an unconsolidated basis." Section 3(a)(2) of the Act defines "investment securities" to include all securities except government securities, and securities which are issued by majority-owned subsidiaries of the owner which are not investment companies, and are not relying on the exception from the definition of investment company in section 3(c)(1) or 3(c)(7) of the Act.

2. Applicant states that, pending utilization in building and operating the System, the proceeds of applicant's offerings of its stock may be held in "investment securities" within the meaning of section 3(a)(2) of the Act. As of June 30, 1998, approximately 44% of applicant's total assets consisted of "investment securities." Applicant states, therefore, that it may come within the definition of investment company in section 3(a)(1)(C) of the Act. Applicant also states that it anticipates raising additional funds to complete the development of the System, and will place the proceeds in U.S. government securities and shares of money market funds to be drawn down as needed to complete the construction and operate the System.

3. Section 6(c) of the Act permits the SEC to exempt any person, security, or transaction from any provision of the Act, if and to the extent that the exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

4. Applicant requests an exemption under section 6(c) from all provisions of the Act until the earlier of one year from the date the requested order is issued or the date applicant ceases to be an investment company. Applicant believes that within this period it will have sufficient expenditures of funds on the establishment of the Service and the acquisition of non-investment assets to cure its temporary status under section 3(a)(1)(C) of the Act.

5. Applicant asserts that, as a company that was created to build and operate the Service, applicant is not the type of entity that was intended to be governed by the Act. Applicant states that, since its inception, its principal activities have been in technology development, pursuing regulatory approval for the Service, discussions with radio manufacturers and automakers, market research, design and development, development of a mobile demonstration program, contract negotiations with satellite and launch vehicle contractors, technical efforts with respect to standards and specifications, and securing adequate working capital. Applicant thus asserts that the requested relief is consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant's Conditions

Applicant agrees that the requested exemption will be subject to the following conditions:

1. Applicant will not purchase or otherwise acquire any securities other than shares of a money market fund and U.S. Government securities.

2. Applicant will not hold itself out as being engaged in the business of investing, reinvesting, owning, holding, or trading in securities.

3. Applicant will allocate and utilize its accumulated cash and securities for the purpose of funding its satellite radio system business.

For the SEC, by the Division of Investment Management, under delegated authority.
Jonathan G. Katz,
Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC–23517; File No. 812–11208]

John Hancock Bond Trust, et al.; Notice of Application

November 2, 1998.

AGENCY: Securities and Exchange Commission.

ACTION: Notice of application for an order pursuant to Section 11(a) of the Investment Company Act of 1940 (the "1940 Act").

SUMMARY OF APPLICATION: Applicants seek an order approving the terms of offers of exchange by the Funds, as defined below, and John Hancock Funds, Inc. ("JHFI") to certain holders of variable annuity contracts ("Contracts") issued by Variable Annuity Accounts U and V of John Hancock and Variable Annuity Account I of JHVLICO (collectively, the "Accounts").

APPLICANTS: John Hancock Bond Trust, John Hancock Capital Series, John Hancock Current Interest, John Hancock Investment Trust, John Hancock Investment Trust II, John Hancock Investment Trust III, John Hancock Series Trust, John Hancock Bond Fund, John Hancock Special Equities Fund, John Hancock Strategic Series, John Hancock World Fund (the "Funds"), JHFI, John Hancock Variable Life Insurance Company ("JHVLICO") and John Hancock Mutual Life Insurance Company ("John Hancock," together with JHVLICO, JHFI and the Funds, "Applicants")

FILING DATES: The application was filed on June 29, 1998, and amended on October 30, 1998.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Secretary of the Commission and serving Applicants with a copy of the request, personally or

by mail. Hearing requests must be received by the Commission by 5:30 p.m. on November 27, 1998, and must be accompanied by proof of service on the Applicants in the form of an affidavit, or, for lawyers, a certificate of service. Hearing requests should state the nature of the requester's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Secretary of the Commission.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicants, Ronald J. Bocage, Esq., John Hancock Mutual Life Insurance Company, John Hancock Place, Boston, Massachusetts 02117.

FOR FURTHER INFORMATION CONTACT: Keith E. Carpenter, Senior Counsel, or Kevin M. Kirchoff, Branch Chief, Office of Insurance Products, Division of Investment Management, at (202) 942–0670.

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application is available for a fee from the Public Reference Branch of the Commission (tel. (202) 942–8090).

Applicants' Representations

1. Each Fund is a business trust organized under the laws of Massachusetts, is registered under the Act as an open-end management investment company and was organized by John Hancock or an affiliated company of John Hancock. Each Fund offers up to three classes of shares: "A Shares" (which are sold with a front-end sales load of up to 5% or alternatively, for certain purchases, a reduced deferred sales charge); "B Shares" (which are sold with a deferred sales load of up to 5% that declines to 0% after the sixth year); and "C shares" (which are sold with a reduced deferred sales charge of 1% which declines to 0% after the first year) Only A Shares will be offered in the proposed exchanges.

2. JHFI is an indirect, wholly-owned subsidiary of John Hancock. JHFI is registered with the Commission as a broker-dealer and is a member of the National Association of Securities Dealers, Inc. ("NASD"). JHFI is the principal underwriter for each of the Funds.

3. Each Fund, except for John Hancock Bond Fund and John Hancock Special Equities Fund, offers its shares by series (collectively, "Series," and together with the non-series Funds, the "Exchange Funds"). The investment manager of each of the Exchange Funds is John Hancock Advisers, Inc. ("Advisers"), an indirectly wholly-owned subsidiary of John Hancock.

4. The expense ratios of the Exchange Funds on an annual basis for their last fiscal year, including management fees, 12b–1 fees and other expenses, ranged from a low of 0.35% for John Hancock U.S. Government Cash Reserve to a high of 2.06% for John Hancock Pacific Basin Equities Fund. These expense ratios reflect the impact of Advisers' and/or JHFI's temporary agreement to limit expenses, including management fees and 12b–1 fees. Without these limitations, the expense ratios would have ranged from 1.00% for the John Hancock Strategic Income Fund to 3.03% for the John Hancock International Fund.

5. The Contracts are variable annuity contracts issued by Variable Annuity Accounts U and V of John Hancock and Variable Annuity Account I of JHVLICO. The Contracts have been purchased on behalf of pension plans ("Plans") qualified under Section 401(k) of the Internal Revenue Code of 1986 ("Code") and certain target-benefit pension plans ("Target Benefit Plans"), both of which are qualified under Section 401(a) of the Code to fund pension benefits payable to eligible persons ("Participants") participating in the Plans. Under the terms of the various Plans holding the Contracts, the employer sponsoring the Plan ("Plan Sponsor") is the Contract owner, and only the Plan Sponsor is permitted to make premium payments to fund Plan benefits (either directly or through salary deductions). Further, only the Plan Sponsor is authorized to select the investment vehicle(s), such as the Contracts, in which Plan assets are to be invested. Depending on the type of Plan involved, Plan assets held under the Contracts may or may not be allocated specifically as being for the account of individual Participants. With respect to certain 401(k) Plans, the Plan Sponsor purchases individual Contracts on behalf of Plan Participants, in which case Plan assets would be allocated specifically to the Contracts owned by the Plan on behalf of such Participants, and the Participants may be entitled to provide instructions with respect to how Plan assets held in such Contracts are to be invested among the available investment options. With respect to the remaining 401(k) Plans and all Target Benefit Plans, the Plans provide that Plan assets are not allocated specifically as being for the account of individual Participants, in which case the Contract essentially serves as an "unallocated" group contract holding Plan assets for the benefit of the all Plan Participants, with the Plan Sponsor investing Plan assets among the available investment options. The Contracts, however, are no longer being offered for use on such an "unallocated" basis. Plan sponsors holding contracts issued by the Accounts in connection with target-benefit plans where plan assets are allocated specifically as being for the account of individual participants are not eligible to participate in the exchange offer that is the subject of the application.

6. The investment options underlying the Contracts consist of a fixed account investment option that is part of John Hancock's general account, and the 23 portfolios of John Hancock Variable Series Trust I ("Trust"), a series-type mutual fund advised by John Hancock. These 23 portfolios (collectively, "Portfolios") have a wide range of investment objectives.

7. All but one form of the Contracts have a contingent deferred sales charge ("CDSC"). The maximum CDSC for any Contract is 8.5%, and in all cases the CDSC declines to 0% seven years after the date of the contribution to which the CDSC applies. Moreover, for Contracts that impose a CDSC, there is also a "free corridor" provision, which, if applicable, allows certain amounts to be withdrawn annually without a CDSC. One form of Contract imposes a maximum front-end sales charge of 8% of purchase payments made. None of the Contracts provides for any sales charges that is deducted from assets.

8. Applicants state that the Contracts have an annual maintenance charge that ranges from $10 per year to $30 per year, plus a daily asset-based administrative charge. For certain Contracts, the annual maintenance charge is waived if the account value exceeds $10,000, and John Hancock or JHVLICO may reserve the right to increase the annual maintenance charge to $50, with state approval. The asset-based administrative charge ranges from 0.25% to 0.50% (on an annual basis) of the current Contract value.

9. A mortality and expense risk charge that ranges from 0.75% to 1.15% of the assets of the issuing Account may be deducted under the Contracts.

10. There is no charge for transfers under the Contracts, but such transfers are limited to twelve per Contract year, although one form of Contract limits such transfers to four per Contract year. State premium taxes are deducted at annuitization or from payments, in accordance with applicable state laws.

11. The expense rations of the Portfolios which serve as the investment vehicle for the Accounts ranged from 0.28% to 1.55% (after expense reimbursements) on an annual basis in their last fiscal year. Applicants state that when the Portfolio expenses are added to the maximum mortality and expense risks charge and applicable asset-based administration charges of the Contracts, the ongoing expense of the Contracts ranges from 1.81% to 3.05% (3.32% without expense reimbursement), excluding the up of $30 per year maintenance charge.

12. Applicants state that certain Plan Sponsors of Plans holding Contracts have determined to change the nature of their Plans and to replace the Contracts with Exchange Fund shares. To facilitate this change, Plans holding Contracts may wish to surrender them and reinvest the proceeds in Class A shares of the Exchange Funds. Any such surrender and reinvestment of proceeds will be at relative net asset values; i.e., immediately after the transaction, the aggregate value of the shares of the Exchange Funds acquired will be identical to the cash value of the Contract immediately prior to the transaction. No administrative fee or any other charge will be imposed for effecting this transaction. No CDSC on the Contracts to be surrendered will be imposed.

13. Applicants further state that, prior to surrendering a Contract, the Plan Sponsor will be responsible for determining, consistent with the terms of its Plan, the appropriate allocation of Plan assets among Plan Participants. The Plan Sponsor also will be responsible for obtaining instructions from each Plan Participant concerning the manner in which Plan assets attributable to that Plan Participant, as well as future contributions, are to be allocated among the available Exchange Funds. Once a Plan Sponsor decides to surrender a Contract and provides the necessary allocation instructions, such surrender and reinvestment of proceeds will take place immediately at relative net asset values. For 90 days following the surrender of the Contract by the Plan, Participants will be allowed unlimited, free transfer among the Exchange Funds available under the Plan, subject to the Exchange Funds' current exchange policies and any limitation imposed by a Plan. No Exchange Fund front-end load will be deducted, and no Exchange Fund deferred sales charges will become applicable at the time of any transfer from Exchange Fund shares that were acquired as a result of the surrender of the Contract, regardless of when any such transfers are effected. At present, this offer of exchange is expected to be made available to Plan Sponsors during the six-month period following the issuance of the order sought by the application.

14. Applicants state that one or more aspects of the above transactions may be deemed to involve one or more offers of exchange by a Fund or JHFI that requires Commission approval under Section 11 of the 1940 Act. All recipients of such offers will be provided current prospectuses for the Exchange Funds available to them. Accompanying such prospectuses may be sales literature, including a cover letter, that has been approved by the NASD. Such sales literature will highlight the differences between Contracts and shares of the Funds and the terms of the offer of exchange. Administrative details of effecting exchanges will be handled by JHFI.

15. The exchanges will be effected as direct transfers and will not have adverse tax consequences for offerees who accept the exchange offer.

Applicants' Legal Analysis

1. Section 11(a) of the 1940 Act makes it unlawful for a registered open-end investment company or principal underwriter for such a company to make or cause to be made an offer to the holder of a security of such company or of any other open-end investment company to exchange his security for a security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged, unless the terms of the offer have first been submitted to and approved by the Commission or are in accordance with such rules and regulations as the Commission may have prescribed in respect of such offers which are in effect at the time such offer is made.

2. Section 11(c) of the 1940 Act provides that, irrespective of the basis of exchange, subsection (a) shall be applicable to any type of offer of exchange of the securities of registered unit investment trusts for the securities of any other investment company.

3. Applicants maintain, for the reasons summarized below, that the terms of the proposed offers of exchange do not involve any of the "switching" (*i.e.*, offer of exchange made solely for the purpose of assessing additional selling charges) abuses that led to the adoption of Section 11 of the 1940 Act.

4. Applicants state that the exchanges will be made on the basis of relative net asset value (*i.e.*, immediately after an exchange, the cash value of the Exchange Fund shares acquired will be identical to the cash value under the Contract immediately prior to the exchange). Further, no CDSC will be applicable to Exchange Fund shares acquired as part of the exchange, and no administrative fee or sales load will be deducted at the time of the exchange. Applicants state that the exchanges will not have adverse tax consequences for offerees who accept the exchange offer because the exchanges proposed would be made as direct transfers.

5. Applicants state that, as a general matter, Exchange Funds with investment objectives comparable to most of the 23 Portfolios will be available through the exchange offer, although each Plan may not offer all Exchange Funds available pursuant to the exchange offer. Certain of the Portfolios, however, are designed to fill a specific "niche," such as the Real Estate Equity Portfolio and International Balanced Portfolio, and there are no Exchange Funds comparable to these "niche" funds that are currently available under the Contracts. Accordingly, depending on the Exchange Funds made available by a Plan, the exchange offer will offer an opportunity to permit Plan Sponsors and Participants to duplicate generally the current investment objective selection under the Contracts by allocating plan assets held in their accounts among Exchange Funds with comparable investment objectives, or to expand those investment objectives by selecting Exchange Funds with investment objectives not available under the Contracts. Further, Applicants state that the expenses of the Exchange Funds are generally lower than the combined expenses and fees of the Contracts and the Portfolios in which the Accounts invest. Accordingly, those persons who accept the exchange offer should incur lower expenses than those incurred under the Contracts.

6. Applicants have consented to the following conditions:

(a) No redemption or administrative fee will be imposed in connection with the proposed exchanges.

(b) At the commencement of the exchange offer, and at all times thereafter, the prospectus or the statement of additional information, as appropriate, of the offering Exchange Fund will disclose that the exchange offer is subject to termination and its terms are subject to change.

(c) Whenever the exchange offer is to be terminated or its terms are to be amended materially, any holder of a security subject to that offer shall be given prominent notice of the impending termination or amendment at least 60 days prior to the date of termination or the effective date of the amendment, provided that no notice need be given if, under extraordinary circumstances, either—

(i) There is a suspension of the redemption of the exchanged security

under Section 22(e) of the Act and the rules and regulations thereunder, or

(ii) The offering Exchange Funds temporarily delays or ceases the sale of the security to be acquired because it is unable to invest amounts effectively in accordance with applicable investment objectives, policies and restrictions.

Other than in the circumstance set forth in (c)(i) and (c)(ii) above, Applicants would dispense with the 60-days notice requirement only upon obtaining further relief from the Commission authorizing them to do so.

Conclusion

For the reasons summarized above, Applicants submit that the proposed offer of exchange is consistent with the intent and purpose of Section 11 of the 1940 Act, and that none of the abuses which Section 11 was enacted to prevent will be present.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 35–26935]

Filings Under the Public Utility Holding Company Act of 1935, as Amended ("Act")

November 2, 1998.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated under the Act. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) and any amendment is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by November 27, 1998, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the relevant applicant(s) and/or declarants(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing should identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After November 27, 1998, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Interstate Energy Corporation, et al. (70–9317)

Interestate Energy Corporation ("IEC"), a registered holding company, Wisconsin Power & Light Company, a public utility subsidiary company of IEC ("WPL"), Alliant Services Company ("Services"), a subsidiary service company of IEC, Alliant Industries, Inc., ("Alliant") a wholly owned subsidiary of IEC, Heartland Environmental Holding Company, RMT, Inc., Heartland Energy Group, Inc., Heartland Properties, Inc., Capital Square Financing Corporation, Cargill-Alliant LLC, all nonutility subsidiary companies of Alliant, and Wisconsin Power & Light Company, a public utility subsidiary company of IEC, located at 222 West Washington Avenue, Madison, Wisconsin 53703, Interstate Power Company ("Interstate Power"), a public utility subsidiary company of IEC, 1000 Main Street, PO Box 769, Dubuque, Iowa 53004–0789, IES Utilities Inc. ("IES Utilities"), a public utility subsidiary company of IEC, IES Transportation Inc., IEC Transfer Services Inc., IES Investments Inc., IES Investco Inc., Village Lakeshares Inc., Prairie Ridge Business Park, Iowa Land and Building Company, IES International Inc., all indirect nonutility subsidiary companies of Alliant, located at 200 First Street, SE, Cedar Rapids, Iowa 52401, Whiting Petroleum Company, an indirect nonutility subsidiary company of Alliant, Mile High Center, 1700 Broadway, Denver, Colorado 80290, and IEI Barge Services Inc. and Cedar Rapids and Iowa City Railroad Company, both indirect nonutility subsidiary companies of Alliant, located at 2330 12th Street, SW, Cedar Rapids, Iowa 52404, have filed an application-declaration under sections 6(a), 7, 9(a), 10, 12(b), 12(f), and 13(b) of the Act and rules 32, 33, 40, 43, 44, 45, 53, 54, 87(b)(1), 90, 91 and 93 under the Act.

IEC and Alliant propose through December 31, 2000, to form and fund a Utility Money Pool ("Utility Pool") and a Nonutility Money Pool ("Nonutility Pool") in aggregate amounts not to exceed $450 million and $600 million respectively, through the issuance and sale of commercial paper and bank borrowings.[1] IEC also proposes to finance the acquisition of foreign utility companies ("FUCOs") and exempt wholesale generators ("EWGs") through the issuance of commercial paper and bank borrowings in an amount not to exceed $300 million. IEC represents that borrowings allocated to finance FUCO and EWG acquisitions will not at any time exceed 50% of IEC's retained earnings. Lastly, IEC proposes through December 31, 2000 to enter into guarantee agreements ("Guarantee") in an amount not to exceed $600 million.

The Utility Pool participants are WPL, IES Utilities, Interstate Power and Services. The aggregate principal amount of borrowings outstanding at any one time from the Utility Pool will be limited as follows: WPL, $128 million; IES Utilities, $150 million; Interstate Power, $72 million; and Services, $100 million.[2] IEC states that participants in the Utility Pool intend to use the funds for general corporate purposes including interim funding of construction programs until permanent financing can be arranged.

IEC proposes to issue commercial paper that will have a commercial rating of at least A–1 by Standard & Poor's ("S&P") or at least P–1 by Moody's Investor Services ("Moody's"), and Alliant proposes to issue commercial paper that will have a commercial rating of at least A–2 by S&P or P–2 by Moody's. IEC proposes to issue and sell commercial paper to fund the Utility Pool and invest in and acquire EWGs and FUCOs. Alliant proposes to issue and sell commercial paper to fund the Nonutility Pool.[3]

The proceeds from the sale of the commercial paper that will be used to fund the Nonutility Pool will be added to Alliant's treasury funds in a separate nonutility account. The proceeds from the sale of commercial paper intended to fund the Utility Pool and the investment in and acquisition of FUCO's will be added to IEC's treasury funds in separate utility and FUCO investment/acquisition accounts.

IEC and Alliant propose to issue commercial paper to dealers in the form of book-entry unsecured promissory notes of varying denominations not less than $100,000. Each note will mature not more than two-hundred and seventy days from the date of issue. The notes will be issued and sold by IEC and Alliant directly to dealers at rates not to exceed the rate per annum prevailing at the time of issuance for commercial paper of comparable qualities and maturities sold by issuers thereof to commercial paper dealers. No commission or fee will be payable in connection with the issuance and sale of the commercial paper. Applicants also request authorization for IEC and Alliant to sell commercial paper directly to certain financial institutions. Sales of commercial paper directly to these institutions will occur only if the resulting cost of money would be equal to or less than that available from dealer-placed commercial or bank borrowings. The terms of directly placed notes would be similar to those of dealer-placed notes.

IEC and Alliant have also entered into credit agreements with banks to support the issuance of commercial paper and in lieu of issuing commercial paper may borrow directly from the banks if it is more cost effective.[4]

Borrowings from banks will be evidenced by promissory notes. Each note, whether issued under a term loan or an open credit line, will be for the principal amount available to be borrowed at the time from the lending bank and be payable to the order of the bank; shall be dated the date of the closing of the loan; shall bear interest at a rate no higher than the effective cost of money for unsecured prime commercial bank loans prevailing at the date of borrowing; and, shall be subject to repayment by the borrower in whole at any time or in part from time to time without premium or penalty.

The cost of compensating balances and fees paid to banks to maintain credit lines will be initially allocated to the subsidiaries of IEC on the basis of relative maximum outstanding short-term borrowings for the prior calendar year from the particular money pool in which the subsidiary participates, and the costs will be retroactively reallocated at the end of each calendar year on the basis of that year's actual relative maximum outstanding short-term borrowing of each subsidiary in the particular pool. However, during the first calendar year of operation of the money pools, the cost will initially be allocated to the subsidiaries based on the relative maximum borrowing authority of each subsidiary, and, similar to the calculations to be made in subsequent years of operations, the costs will be retroactively reallocated at the end of the first calendar year on the basis of that year's actual relative maximum outstanding short term borrowing of each subsidiary.

The funds available to the Utility Pool will be loaned by IEC on a short-term basis to applicants that are public utility subsidiaries and, to a lesser extent, will also come from the utility participants themselves, to the extent permitted by state law, through the investment of surplus funds into the Utility Pool.

Under the proposed terms of the respective money pools, from time to time, short-term funds will be made available to participants of the money pools if Services, as administrator of both money pools, determines that it will result in a lower cost of borrowing consistent with the individual borrowing needs and financial standing of the participating subsidiaries.

Services will provide each money pool participant with periodic activity and cash accounting reports that include, among other things, reports of each activity, the daily balance of loans outstanding, and the daily interest charged. No party will be required to effect a borrowing through a money pool if it is determined that it could (and had authority to) effect a borrowing at a lower cost directly from banks.

The operation of the money pools is designed to match, on a daily basis, the available cash and short-term borrowing requirements of the participants. To the extent necessary, IEC and Alliant will use the proceeds of external borrowings, up to Commission approved limits, to accommodate the short-term requirements of participants. Requirements satisfied by the money pools will be in the form of open account advances and will not exceed the approved limits contained in the financing program of IEC, Alliant and the other subsidiaries that may be subsequently authorized by the Commission.

IEC and Alliant will participate in the money pools only insofar as they have funds available for lending, either through internally generated or from external sources. Under no circumstances will IEC or Alliant be permitted to borrow funds available through the money pools. If at any time there are funds remaining in the money pools after satisfaction of the borrowing needs of the participating subsidiaries, Services, as the manager of the money pools, will invest these funds appropriately and consistent with applicable state and federal regulations and allocate the earnings of the investments between or among those applicants within each money pool according to the amount of excess funds provided by each respective applicant. The return on the funds loaned by a subsidiary into either of the money pools will essentially be equal to the cost of borrowing from the money pools. The applicable interest rate will be the average for the month of the CD yield equivalent of the 30 day Federal Reserve "AA" Industrial Commercial Paper Composite Rate ("Composite") or, if no Composite were established for that particular day, then the applicable rate would be the Composite for the next preceding day for which the Composite was established.

All borrowings from and contributions to the money pools will be adequately documented and will be evidenced on the books of each applicant that is borrowing or contributing funds through the money pools. All loans will be payable on demand, may be prepaid by any borrowing applicant at any time without premium or penalty and will be subject to interest that shall be calculated and added to the outstanding loan balance. These rates will be adjusted periodically and any participating subsidiary that contributes funds to a money pool may withdraw them at any time to satisfy its daily need for funds.

Services proposes to administer the Utility Pool on an "at cost" basis and to administer the Nonutility Pool on a basis other than cost. Services will also provide cash management and banking services to the subsidiaries of IEC that participate in the money pools.

IEC proposes to enter into guarantees, obtain letters of credit, enter into guarantee-type expense agreements or otherwise provide credit support to the obligations of its nonutility subsidiaries as may be appropriate to enable those companies to carry on in the ordinary course of their respective business in an aggregate principal amount not to exceed $600 million outstanding at any one time.

Columbia Energy Group, et al. (70–9365)

Columbia Energy Group ("Columbia"), a registered holding company, and its wholly owned subsidiary Columbia Electric Corporation ("Columbia Electric"), both located at 13880 Dulles Corner Lane, Herndon, Virginia 20171–4600, have filed an application-declaration under sections 6(a), 7, 9(a), 10, 12(b) and 13(b) of the Act and rules 45, 54, 87(b)(1), 90, and 91 under the Act.

Columbia proposes to acquire indirectly, through Columbia Electric, a 50% interest in a congeneration facility

[1] Rule 52 exempts Alliant's financial transactions from Commission jurisdiction, however, this information is provided for background purposes.

[2] The figure for WPL includes the maximum outstanding borrowing for South Beloit Water, Gas & Electric Company, a wholly owned subsidiary of WPL.

[3] The Nonutility Pool participants are all nonutility subsidiary companies, except Services, included in this Application-Declaration.

[4] Alliant has two unsecured credit facilities totaling $600 million and IEC has a $150 million credit facility. All credit facilities are available for direct borrowing or commercial paper back-up.

(Project Gregory) to be constructed in Gregory, Texas and to issue guarantees in an aggregate amount not to exceed $200 million. Project Gregory is a 550 megawatt electric and steam production facility that, once operational, will be a "qualifying facility" under the Public Utility Regulatory Policies Act of 1978 and rules thereunder.

In June, 1998, Columbia Electric and LG&E Power Inc. ("LG&E") entered into an agreement to participate in the development, construction, start-up, operation, maintenance, financing, and ownership of Project Gregory. The assets of Project Gregory will be held by Gregory Power Partners, L.P., a special purpose limited partnership that will be jointly owned by subsidiaries of Columbia Electric and LG&E. Columbia Electric Gregory General Corporation will hold a 1% interest as a general partner of Gregory Power Partners, L.P. and Columbia Electric Gregory Limited Corporation will hold a 49% interest as a limited partner on behalf of Columbia Electric. LG&E Power Gregory IV, Inc. will hold a 1% interest as a general partner and LG&E Power Gregory I, Inc. will hold a 49% interest as a limited partner on behalf of LG&E.

A second special purpose entity, Gregory Partners, LLC will provide administrative and advisory services to Project Gregory. Columbia Electric Gregory Remmington Corporation will hold a 1% interest as member-manager, and Columbia Electric Gregory Member Corporation will hold a 49% interest as a member of Gregory Partners, LLC on behalf of Columbia Electric. LG&E Power Gregory II, Inc. will hold a 1% interest as a member-manager, and LG&E Power Gregory III, Inc. will hold a 49% interest as a member of Gregory Partners, LLC on behalf of LG&E.

For the Commission, by the Division of Investment Management, under delegated authority.

Jonathan G. Katz,

Secretary

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–23516; File No. 812–11128]

The Wright Managed Blue Chip Series Trust, et al.; Notice of Application

November 2, 1998.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of application for an order under Section 6(c) of the Investment Company Act of 1940 (the "1940 Act") granting exemptive relief from Sections 9(a), 13(a), 15(a) and 15(b) of the 1940 Act and Rules 6e–2(b)(15) and 6e–3(T)(b)(15) thereunder.

Summary of Application: Applicants seek an order to permit shares of The Wright Managed Blue Chip Series Trust and any similar investment companies for which Wright Investors' Service, Inc., or any of its affiliates may in the future serve as investment adviser, administrator, principal underwriter or sponsor to be sold to and held by: (1) Separate accounts funding variable annuity and variable life insurance contracts issued by both affiliated and unaffiliated participating life insurance companies; and (2) qualified pension and retirement plans outside of the separate account context ("Qualified Plans" or "Plans").

Applicants: The Wright Managed Blue Chip Series Trust (the "Trust") and Wright Investors' Service, Inc. ("Wright" or "the Adviser").

Filing Dates: The application was filed on April 27, 1998, and amended on August 6, 1998, and October 9, 1998.

Hearing or Notification of Hearing: An order granting the application will be issued unless the Commission orders a hearing. Interested Persons may request a hearing on this application by writing to the Secretary of the Commission and serving Applicants with a copy of the request, in person or by mail. Hearing requests must be received by the Commission by 5:30 p.m. on November 27, 1998, and must be accompanied by proof of service on the Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the interest, the reason for the request and this issues contested. Persons may request notification of the date of a hearing by writing to the Secretary of the Commission.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW, Washington, DC 20549. Applicants, c/o Mr. A. M. Moody III, Wright Investors' Service, Inc., 1000 Lafayette Boulevard, Bridgeport, Connecticut 06604.

FOR FURTHER INFORMATION CONTACT: Keith E. Carpenter, Senior Counsel, or Kevin M. Kirchoff, Branch Chief, Office of Insurance Products, Division of Investment Management, at (202) 942–0670.

SUPPLEMENTARY INFORMATION: the following is a summary of the application. the complete application is available for a fee from the Public Reference Branch of the SEC, 450 Fifth Street, NW, Washington, DC (tel. (202) 942–8090).

Applicants' Representations

1. the Trust is organized as a Massachusetts business trust and is registered under the 1940 Act as an open-end management investment company. It currently consists of three separate investment portfolios ("Portfolios"), each with its own investment objectives and policies.

2. Wright, a registered investment adviser under the Investment Adviser Act of 1940, is the investment adviser for each Portfolio.

3. the Trust will offer shares of its Portfolios to separate accounts of insurance companies to serve as the investment medium for variable annuity contracts and variable life insurance policies, as well as to qualified pension and retirement accounts and other appropriate investors.

4. The Trust and any other similar investment companies that the Adviser or any of its affiliates may manage or serve as investment adviser, administrator, principal underwriter or sponsor for in the future (the Trust and such similar investment companies are collectively referred to herein as the "Funds") would offer shares to separate accounts that are registered under the 1940 Act as unit investment trusts ("Separate Accounts") and that serve as investment vehicles for variable insurance contracts issued by affiliated and unaffiliated participating life insurance companies. Variable insurance contracts may include variable annuity contracts, variable life insurance contracts and variable group life insurance contracts. Separate accounts to which the shares of the Funds would in the future be offered also include separate accounts that are not registered as investment companies under the 1940 Act pursuant to the exceptions from registration in Sections 3(c)(1) and 3(c)(11) of the 1940 Act. In addition, the Funds may offer shares to separate accounts serving as investment vehicles for other types of insurance products, which may include variable annuity contracts, scheduled premium variable life insurance contracts, single premium variable life insurance contracts, modified single premium variable life insurance contracts, and flexible premium variable life insurance contracts. (All insurance contracts reference in this paragraph are collectively referred to as "Variable Contracts." insurance companies whose separate account or accounts would own share of the Funds are referred to as "participating insurance companies.")

5. The Funds also intend to offer shares directly to Qualified Plans described in Treasury Regulation § 1.817–5(f)(3)(iii).

Applicants' Legal Analysis

1. Applicants request that the Commission issue an order under Section 6(c) of the 1940 Act granting exemptive relief from Sections 9(a), 13(a), 15(a) and 15(b) thereof, and Rules 6e–2(b)(15) and 6e–3(T)(b)(15) thereunder, to the extent necessary to: (a) permit "mixed" and "shared" funding as defined below; and (b) allow shares of the Funds to be sold to and held by Qualified Plans.

2. Section 6(c) authorizes the Commission, by order upon application, to conditionally or unconditionally exempt any person, security, or transaction, or class or classes of persons, securities, or transactions, from any provision of the 1940 Act, or the rules or regulations thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

3. In connection with the funding of scheduled premium variable life insurance contracts issued through Separate Accounts, Rule 6e–2(b)(15) under the 1940 Act provides partial exemptions from Sections 9(a), 13(a), 15(a) and 15(b) of the 1940 Act. The exemptions granted by Rule 6e–2(b)(15) are available only where the management investment company underlying the Separate Account ("underlying fund") offers its shares "*exclusively* to variable life insurance separate accounts of the life insurer, or of any affiliated life insurance company" (emphasis supplied). Therefore, the relief granted by Rule 6e–2(b)(15) is not available with respect to a scheduled premium variable life insurance separate account that owns shares of an underlying fund that also offers its shares to a variable annuity or a flexible premium variable life insurance separate account of the same company or of any affiliated life insurance company. The use of a common management investment company as the underlying investment medium for both variable annuity and variable life insurance separate accounts of the same life insurance company or of any affiliated life insurance company is referred to as "mixed funding." In addition, the relief granted by Rule 6e–2(b)(15) is not available with respect to a scheduled premium variable life insurance separate account that owns shares of an underlying fund that also offers its shares to separate accounts funding Variable Contracts of one or more unaffiliated life insurance companies. The use of a common management investment company as the underlying investment medium for variable life insurance separate accounts of one insurance company and separate accounts funding Variable Contracts of one or more unaffiliated life insurance companies is referred to as "shared funding."

4. The relief granted by Rule 6e–2(b)(15) is in no way affected by the purchase of shares of the Funds by Qualified Plans. However, because the relief under Rule 6e–2(b)(15) is available only where shares are offered *exclusively* to separate accounts, additional exemptive relief is necessary if the shares of the Funds are also to be sold to Plans.

5. In connection with the funding of flexible premium variable life insurance contracts issued through a Separate Account, Rule 6e–3(T)(b)(15) under the 1940 Act provides partial exemptions from Sections 9(a), 13(a), 15(a), and 15(b) of the 1940 Act. The exemptions granted by Rule 6e–3(T) are available only where the Separate Account's underlying fund offers its shares "*exclusively* to separate accounts of the life insurer, or of any affiliated life insurance company, offering either scheduled [premium variable life insurance] contracts or flexible [premium variable life insurance] contracts, or both; or which also offer their shares to variable annuity separate accounts of the life insurer or of an affiliated life insurance company" (emphasis supplied). Therefore, Rule 6e–3(T)(b)(15) permits mixed funding but does not permit shared funding.

6. The relief granted by Rule 6e–3(T) also is in no way affected by the purchase of shares of the Funds by Qualified Plans. However, because the relief under Rule 6e–3(T) is available only where shares are offered exclusively to separate accounts, additional exemptive relief is necessary if the shares of the Funds are also to be sold to Plans.

7. Section 9(a) of the 1940 Act provides that it is unlawful for any person to serve as an investment adviser to or principal underwriter for any registered open-end investment company if an affiliated person of that person is subject to a disqualification enumerated in Section 9(a)(1) or (2). Rules 6e–2(b)(15) and 6e–3(T)(b)(15) provides exemptions from Section 9(a) under certain circumstances, subject to the limitations on mixed and shared funding. These exemptions limit the application of the eligibility restrictions to affiliated individuals or companies that directly participate in the management of the underlying fund.

8. Applicants state that the partial relief from Section 9(a) provided by Rules 6e–2(b)(15) and 6e–3(T)(b)(15), in effect, limits the amount of monitoring necessary to ensure compliance with Section 9 to that which is appropriate in light of the policy and purposes of Section 9. Applicants state that those Rules recognize that it is not necessary for the protection of investors or the purposes fairly intended by the policy and provisions of the 1940 Act to apply the provisions of Section 9(a) to the many individuals in an insurance company complex, most of whom typically will have no involvement in matters pertaining to investment companies in that organization. Applicants assert, therefore, that there is no regulatory purpose in extending the monitoring requirements to embrace a full application of the eligibility restrictions of Section 9(a) because of mixed funding or shared funding.

9. Applicants state that the relief requested herein will not be affected by the proposed sale of shares of the Funds to Qualified Plans because the Qualified Plans are not investment companies and will not be deemed to be affiliates by virtue of their shareholdings in the Funds.

10. Sections 13(a), 15(a) and 15(b) of the 1940 Act require "pass-through" voting with respect to management investment company shares held by a separate account. Rules 6e–2(b)(15)(iii) and 6e–3(T)(b)(15)(iii) provide partial exemptions from the pass-through voting requirement. More specifically, the Rules provide that the insurance company may disregard the voting instructions of its contract owners with respect to the investments of an underlying fund, or any contract between a fund and its investment adviser, when required to do so by an insurance regulatory authority and subject to certain requirements. In addition, Rules 6e–2(b)(15)(iii)(B) and 6e–3(T)(b)(15)(iii)(A)(*2*) provide that the insurance company may disregard contract owners' voting instructions if the contract owners initiate any change in such company's investment policies, principal underwriter, or any investment adviser (provided that disregarding such voting instructions is reasonable and subject to other provisions of Rules 6e–2 and 6e–3(T)).

11. Rules 6e–2 recognizes that a variable life insurance contract has important elements unique to insurance contracts, and is subject to extensive state regulation. In adopting Rule 6e–2(b)(15)(iii), the Commission expressly recognized that state insurance

regulators have authority, pursuant to state insurance laws or regulations, to disapprove or require changes in investment policies, investment advisers, or principal underwriters. The Commission also expressly recognized that state insurance regulators have authority to require an insurer to draw from its general account to cover costs imposed upon the insurer by a change approved by contract owners over the insurer's objection. Applicants assert that the Commission therefore deemed such exemptions necessary to assure the solvency of the life insurer and performance of its contractual obligations by enabling an insurance regulatory authority or the life insurer to act when certain proposals reasonably could be expected to increase the risks undertaken by the life insurer. In this respect, flexible premium variable life insurance contracts are identical to scheduled premium variable life insurance contracts; therefore, corresponding provisions of Rule 6e–3(T) were adopted in recognition of the same factors.

12. Applicants further represent that the Funds' sale of shares to Qualified Plans will not have any impact on the relief requested in this regard. Shares of the Funds sold to such Plans would be held by the trustees of such Plans as mandated by Section 403(a) of the Employee Retirement Income Security Act ("ERISA"). Section 403(a) also provides that the trustee(s) must have exclusive authority and discretion to manage and control the assets of the plan, with two exceptions: (a) when the plan expressly provides that the trustee(s) is subject to the direction of a named fiduciary who is not a trustee, in which case the trustee(s) is subject to proper directions made in accordance with the terms of the plan and not contrary to ERISA; and (b) when the authority to manage, acquire or dispose of assets of the plan is delegated to one or more investment managers pursuant to Section 402(c)(3) of ERISA. Unless one of the two exceptions stated in Section 403(a) applies, Plan trustees have the exclusive authority and responsibility for voting proxies. Where a named fiduciary appoints an investment manager, the investment manager has the responsibility to vote the shares held unless the right to vote such shares is reserved to the trustees or the named fiduciary. In any event, there is no pass-through voting to the participants in such plans. Accordingly, unlike the case with insurance company separate accounts, the issue of the resolution of material irreconcilable conflicts with respect to voting is not present with Qualified Plans.

13. Applicants submit that shared funding does not present any issues that do not already exist where a single insurance company is licensed to do business in several or all states. In this regard, Applicants state that a particular state insurance regulatory body could require action that is inconsistent with the requirements of other states in which the insurance company offers its policies. Accordingly, Applicants submit that the fact that different insurers may be domiciled in different states does not create a significantly different or enlarged problem.

14. Applicants submit that the conditions discussed below are designed to safeguard against and provide procedures for resolving any adverse effects that differences among state regulatory requirements may produce. If a particular state insurance regulator's decision conflicts with the majority of other state regulators, then the affected insurer will be required to withdraw its separate account's investment in the affected Fund. This requirement will be provided for in agreements that will be entered into by participating insurance companies with respect to their participation in the Funds.

15. Rules 6e–2(b)(15) and 6e[3(T)(b)(15) permit an insurance company to disregard contract owners' voting instructions. Applicants submit that this does not raise any issues different from those raised by the authority of state insurance administrators over separate accounts. Applicants note that Rules 6e–2 and 6e–3(T) both require that disregard of voting instructions by an insurance company be reasonable and based on specific good faith determinations. If the insurer's judgment represents a minority position or would preclude a majority vote, the insurer may be required, at a Fund's election, to withdraw its separate account's investment in such Fund. No charge or penalty would be imposed as a result of such withdrawal.

16. Applicants submit that there is no reason why the investment policies of the Funds providing mixed funding would or should be materially different from what those policies would or should be if the Funds funded only variable annuity contracts or variable life insurance policies, whether flexible premium or scheduled premium policies. In this regard, Applicants note that each type of variable insurance product is designed as a long-term investment program. In addition, each Fund will be managed to attempt to achieve the Fund's investment objective or objectives, and not to favor or disfavor any particular participating insurer or type of variable insurance product.

17. Furthermore, Applicants submit that no one investment strategy can be identified as appropriate to a particular insurance product. Each pool of variable annuity and variable life insurance contract owners is composed of individuals of diverse financial status, age, insurance and investment goals. An underlying fund supporting even one type of insurance produce must accommodate these diverse factors in order to attract and retain purchasers.

18. Applicants note that Section 817(h) of the Internal Revenue Code of 1986, as amended (the "Code"), imposes certain diversification standards on the underlying assets of variable annuity contracts and variable life contracts held in the portfolios of management investment companies. Treasury Regulation 1.817–5(f)(3)(iii), which established diversification requirements for such portfolios, specifically permits "qualified pension or retirement plans" and separate accounts to share the same underlying management investment company. Therefore, Applicants have concluded that neither the Code, the Treasury Regulations, nor Revenue Rulings thereunder present any inherent conflicts of interest if Qualified Plans, variable annuity separate accounts and variable life separate accounts all invest in the same management investment company.

19. Applicants note that while there are differences in the manner in which distributions are taxed for variable annuity contracts, variable life insurance contracts and Qualified Plans, the tax consequences do not raise any conflicts of interest. When distributions are to be made, and the Separate Account or the Qualified Plan is unable to net purchase payments to make the distributions, the Separate Account or the Plan will redeem shares of the Funds at their respective net asset value. The Qualified Plan will then make distributions in accordance with the terms of the Plan, and the life insurance company will make distributions in accordance with the terms of the Variable Contract.

20. With respect to voting rights, Applicants submit that it is possible to provide an equitable means of giving such voting rights to Separate Account contract owners and to the trustees of Qualified Plans. Applicants represent that the transfer agent for the Funds will inform each participating insurance company of its share ownership in each Separate Account, as well as inform the trustees of Qualified Plans of their holdings. Each participating insurance company will then solicit voting instructions in accordance with the "pass-through" voting requirements of Rules 6e–2 and 6e–3(T).

21. Applicants argue that the ability of the Funds to sell their respective shares directly to Qualified Plans does not create a "senior security," as such term if defined under Section 18(g) of the 1940 Act, with respect to any contract owner as opposed to a participant under a Qualified Plan. Regardless of the rights and benefits of participants under the Qualified Plans, or contract owners under Variable Contracts, the Qualified Plans and the Separate Accounts have rights only with respect to their respective sharesof the Funds. Such shares may be redeemed only at their net asset value. No shareholder of any of the Funds will have any preference over any other shareholder with respect to distribution of assets or payment of dividends.

22. Applicants submit that there are no conflicts between the contract owners of the Separate Accounts and the participants under the Qualified Plans with respect to the state insurance commissioners' veto powers over investment objectives. The state insurance commissioners have been given the veto power in recognition of the fact that insurance companies cannot simply redeem shares of one underlying fund held by their separate accounts and invest in another underlying fund. Complex and time-consuming transactions must be undertaken to accomplish such redemptions and transfers. On the other hand, trustees of qualified Plans can make the decision quickly and implement the redemption of their shares from the Funds and reinvest in another funding vehicle without the same regulatory impediments or, as is the case with most Plans, even hold cash pending a suitable investment. Based on the foregoing, Applicants represent that even if there should arise issues where the interests of contract owners and the interests of Qualified Plans are in conflict, the issues can be resolved almost immediately because the trustees of the Qualified Plans can, on their own, redeem the shares out of the Funds.

23. Applicants submit that various factors have limited the number of insurance companies that offer variable annuities and variable life insurance policies. These factors include the costs of organizing and operating a funding medium, the lack of expertise with respect to investment management (principally with respect to stock and money market investments) and the lack of name recognition by the public of certain insurers as investment experts. Applicants submit that use of the Funds as a common investment medium for Variable Contracts would help alleviate these concerns. Applicants submit that mixed and shared funding also should benefit variable contract owners by: eliminating a significant portion of the costs of establishing and administering separate funds; creating a greater amount of assets available for investment by the Funds, thereby promoting economies of scale which permit increased safety of investments through greater diversification and make the addition of new portfolios more feasible; and encouraging more insurance companies to offer Variable Contracts, which should result in increased competition with respect to both the design and pricing of Variable Contracts, which, in turn, can be expected to result in more product variation and lower charges.

Applicants' Conditions

Applicants have consented to the following conditions:

1. A majority of the board of trustees ("Board") of each of the Funds will consist of persons who are not "interested persons" of the Funds, as defined by Section 2(a)(19) of the 1940 Act and the rules thereunder and as modified by any applicable orders of the Commission. However, if this condition is not met by reason of the death, disqualification, or bona fide resignation of any trustee(s), then the operation of this condition will be suspended: (a) for a period of 45 days if the vacancy or vacancies may be filled by the Board; (b) for a period of 60 days if a note of shareholders is required to fill the vacancy or vacancies; or (c) for such longer period as the Commission may prescribe by order upon application.

2. The Boards will monitor their respective Funds for the existence of any material irreconcilable conflict among the interests of the contract owners of all Separate Accounts investing in the Funds and all other persons investing in the Funds, including Qualified Plans. A material irreconcilable conflict may arise for a variety of reasons, including: (a) an action by any state insurance regulatory authority; (b) a change in applicable federal or state insurance, tax or securities laws or regulations, or a public ruling, private letter ruling, no action or interpretative letter, or any similar action by insurance, tax or securities regulatory authorities; (c) an administrative or judicial decision in any relevant proceeding; (d) the manner in which the investments of any series of the Funds are being managed; (e) a difference in voting instructions given by variable annuity contract owners and variable life insurance contract owners; or (f) a decision by an insurer to disregard the voting instructions of contract owners.

3. Participating insurance companies and any Qualified Plan that executes a participation agreement with a Fund (collectively, "Participating Parties") and the Adviser will report any potential or existing conflicts of which it becomes aware to the Board of the relevant Fund. Participating Parties and the Adviser will be responsible for assisting the Board in carrying out its responsibilities under these conditions, by providing the Board with all information reasonably necessary for the Board to consider any issues raised. This includes, but is not limited to, an obligation by each participating insurance company to inform the Board whenever contract owner voting instructions are disregarded. The responsibility to report such information and conflicts and to assist the Board will be a contractual obligation of all Participating Parties under their participation agreements and these agreements will provide that these responsibilities will be carried out with a view only to the interests of the contract owners and Qualified Plan participants.

4. If it is determined by a majority of the Board of a Fund, or a majority of its disinterested trustees, that a material irreconcilable conflict exists, the relevant Participating Parties will, at their expense and to the extent reasonably practicable (as determined by a majority of the disinterested trustees), take whatever steps are necessary to remedy or eliminate the material irreconcilable conflict. These steps may include: (a) withdrawing the assets allocable to some or all of the Separate Accounts of the participating insurance companies from the affected Fund or any series thereof and reinvesting these assets in a different investment medium (including another series, if any, of such Fund) or submitting the question of whether such segregation should be implemented to a vote of all affected contract owners and, as appropriate, segregating the assets of any appropriate group (*i.e.*, annuity contract owners, life insurance contract owners, or variable contract owners of one or more participating insurance companies) that votes in favor of such segregation, or offering to the affected contract owners the option of making such a change; (b) withdrawing the assets allocable to some or all of the participating Qualified Plans from the

relevant Fund and reinvesting those assets in a different investment medium; and (c) establishing a new registered management investment company or managed separate account. If a material irreconcilable conflict arises because of an insurer's decision to disregard contract owner voting instructions and that decision represents a minority position or would preclude a majority vote, the insurer may be required, at the Fund's election, to withdraw its Separate Account's investment in the Fund, and no change or penalty will be imposed as a result of the withdrawal. The responsibility to take remedial action in the event of a Board determination of a material irreconcilable conflict and to bear the cost of such remedial action will be a contractual obligation of all Participating Parties under their participation agreements and these responsibilities will be carried out with a view only to the interests of the contract owners and participating in Qualified Plans, as applicable.

5. For the purposes of condition (4), a majority of the disinterested members of the Board of the affected Fund will determine whether or not any proposed action adequately remedies any material irreconcilable conflict, but in no event will the Fund or the Adviser be required to establish a new funding medium for any Variable Contract or Qualified Plan. No participating insurance company will be required by condition (4) to establish a new funding medium for any Variable Contract if an offer to do so has been declined by vote of a majority of contract owners materially and adversely affected by the material irreconcilable conflict.

6. A Board's determination of the existence of a material irreconcilable conflict and its implications will be make known promptly in writing to the Adviser and all Participating Parties.

7. As to Variable Contracts issued by Separate Accounts, participating insurance companies will provide pass-through voting privileges to all participants so long as and to the extent that the Commission continues to interpret the 1940 Act to require pass-through voting privileges for Variable Contract owners. As to Variable Contracts issued by unregistered separate accounts, pass-through voting privileges will be extended to participants to the extent granted by the issuing insurance company. Participating insurance companies will be responsible for assuring that each of their registered Separate Accounts participating in a Fund calculate voting privileges as instructed by a Fund with the objective that each such participating insurance company calculate voting privileges in a manner consistent with other participating insurance companies. The obligation to calculate voting privileges in a manner consistent with all other Separate Accounts investing in a Fund will be a contractual obligation of all participating insurance companies under their participation agreements. Each participating insurance company will vote Fund shares held by Separate Accounts for which it has not received voting instructions, as well as shares attributable to it, in the same proportion as it votes shares for which it has received voting instructions.

8. Each Fund will comply with all provisions of the 1940 Act requiring voting by shareholders (which, for these purposes, will be the persons having a voting interest in the Fund's shares). In particular the Funds will either provide for annual meetings (except insofar as the Commission may interpret Section 16 not to require such meetings) or, if annual meetings are not held, comply with Section 16(c) of the 1940 Act (although the Trust is not, and the Funds may not be, one of the trusts described in Section 16(c) of the 1940 Act) as well as with Sections 16(a) and, if and when applicable, 16(b). Further, the Funds will act in accordance with the Commission's interpretation of the requirements of Section 16(a) with respect to periodic election of Trustees and with whatever rules the Commission may promulgate with respect thereto.

9. The Funds will notify all participating insurance companies that prospectus disclosure regarding potential risks of mixed and shared funding may be appropriate. Each Fund will disclose in its registration statement that: (a) shares of the Fund are offered to insurance company separate accounts offered by various participating insurance companies which fund both variable annuity and variable life insurance contracts, and to Qualified Plans; (b) due to differences in tax treatment or other considerations, the interests of various contract owners participating in the Fund and the interests of Qualified Plans investing in the Fund might at some time conflict; and (c) the Board will monitor for any material conflicts and determine what action, if any, should be taken in response to a conflict.

10. No less often than annually, the Participating Parties and/or the Adviser will submit to the Boards such reports, materials or data as each Board may reasonably request so that the Boards may carry out fully the obligations imposed upon them by the conditions contained in the application. These reports, materials, and data will be submitted more frequently if deemed appropriate by the relevant Board. The obligations of the Participating Parties to provide these reports, materials and data to the Boards will be contractual obligations of all Participating Parties under the participation agreements.

11. All reports received by a Board of potential or existing conflicts, and all Board action with regard to determining the existence of a conflict, notifying the Adviser or Participating Parties of a conflict, and determining whether any proposed action adequately remedies a conflict, will be properly recorded in the minutes of the Board or other appropriate records, and these minutes or other records will be made available to the Commission upon request.

12. If and to the extent Rule 6e–2 and Rule 6e–3(T) are amended, or Rule 6e–3 is adopted, to provide exemptive relief from any provision of the 1940 Act or the rules thereunder with respect to mixed or shared funding on terms and conditions materially different from those of any exemptions granted in the order requested in this application, then the Funds and/or the Participating Parties, as appropriate, will take such steps as may be necessary to comply with Rule 6e–2 and Rule 6e–3(T), as amended, and Rule 6e–3, as adopted, to the extent these rules are applicable.

13. In the event that a Qualified Plan should ever become an owner of 10% or more of the assets of a Fund, such Qualified Plan will execute a participation agreement with the Fund. A Qualified Plan will execute an application containing an acknowledgement of this condition at the time of its initial purchase of shares of each Fund.

Conclusion

For the reasons summarized above, Applicants represent that the exemptions requested are necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–40626; File No. SR–Amex–98–37]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the American Stock Exchange, Inc., Relating to the Listing and Trading of Index-Linked Term Notes

November 2, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 under the Act,[2] notice is hereby given that on October 13, 1998, the American Stock Exchange, Inc. ("Exchange" or "Amex") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange seeks to list and trade separate Index-linked Term Notes ("Notes"). The value of each Note will be linked to an index comprised of a single specified domestic mutual fund portfolio ("Index" or collectively "Indexes").

The text of the proposed rule change is available at the Office of the Secretary, the Exchange, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Under Section 107A of the Exchange's *Company Guide*, the Exchange may approve for listing and trading securities that cannot be readily categorized under the Exchange's listing criteria for common and preferred stock, bonds, debentures, or warrants.[3] The Exchange seeks to list Index-linked Term Notes, each of which shall be separately linked to a specified domestic mutual fund portfolio Index.[4] The mutual fund portfolios underlying the Indexes will be registered under the Investment Company Act of 1940.

The Index-linked Term Notes will be senior, unsecured debt securities that will conform to the listing guidelines under Section 107A of the *Company Guide*.[5] Although a specific maturity date will not be established until the time of the offering, the Notes will provide for a maturity of between two and seven years from the date of issuance. Each note may provide for payments at maturity based in whole or in part on changes in the value of the corresponding Index. Each Index will measure the total return of the corresponding mutual fund portfolio. The total return value shall reflect the changes in the Net Asset Value ("NAV") of the corresponding mutual fund portfolio, plus any cash dividends and/or distributions paid on those shares.[6]

The Exchange will calculate the value of each Index once each business day. Holders of the Notes will not receive any interest payments. However, holders of the Notes will receive at maturity the full principal amount of their Notes, plus a "Supplemental Redemption Amount," if any, based on a formula to be set forth in the prospectus. The Exchange notes that the formula may produce a total return at maturity that is lower than what a holder of the corresponding mutual fund portfolio might receive during the same period. At maturity, holders of the Notes will not receive less than 100% of the initial issue price.

a. *Description of the Index-linked Term Notes and the Underlying Mutual Fund Portfolios.* Similar to other notes linked to an index that trade on the Exchange, both the issue (Index-linked Term Notes) and the issuer will meet the general criteria set forth in Section 107A of the Exchange's *Company Guide*. Furthermore, the Exchange has represented that the issuer will have a minimum tangible net worth in excess of $100,000,000 and otherwise substantially exceeds the earnings requirements set forth in Section 101 of the Exchange's *Company Guide*.[7] Each mutual fund portfolio underlying an Index will include hundreds of stocks from among a wide variety of industry groups. The underlying mutual fund portfolios will range in value from $900 million to over $2 billion in total net assets. The NAV of each mutual fund portfolio will be reported each business day through the facilities of the National Association of Securities Dealers Automated Quotation System ("Nasdaq") and also will be reported in the Mutual Fund Tables of the Wall Street Journal and other newspapers. The Notes will be subject to the suspension and delisting policies of the Exchange set forth in Part 10 (Sections 1001–1011) of the Exchange's *Company Guide*.[8]

b. *Calculation and Dissemination of Net Asset Values and Index Values.* Each Index will measure the total return of its underlying mutual fund portfolio. Such amount shall be equal to the change in the mutual fund's NAV, plus

[3] *See* Exchange Act Release No. 27753 (March 1, 1990), 55 FR 8626 (March 8, 1990).

[4] The Exchange notes that the Commission recently approved a similarly structured product for listing and trading on the Exchange—Market Index Target Term Securities linked to the Merrill Lynch EuroFund Index. *See* Exchange Act Release No. 40367 (Aug. 26, 1998), 63 FR 47052 (Sept. 3, 1998).

[5] Section 107A of the Exchange's *Company Guide* states that the Exchange will consider listing any security not otherwise covered by the Exchange's listing requirements, provided the security is suited for auction market trading and satisfies the following criteria:

(a) Assets/Equity: The issuer shall have assets in excess of $100 million and stockholders' equity of at least $10 million. In the case of an issuer which is unable to satisfy the earnings criteria set forth in Section 101 (*i.e.*, pre-tax income of at least $750,000 in its last fiscal year, or in two of its last three fiscal years), the Exchange generally will require the issuer to have the following: (i) assets in excess of $200 million and stockholders' equity of at least $10 million; or (ii) assets in excess of $100 million and stockholders' equity of at least $20 million.

(b) Distribution: Minimum public distribution of 1,000,000 trading units with a minimum of 400 public shareholders, except, if traded in thousand dollar denominations, then no minimum number of holders.

(c) Principal Amount/Aggregate Market Value: Not less than $4 million.

[6] As discussed *infra* in Section II(A)(1)(c), "Settlement of Index-linked Term Notes," the total return value may be reduced by an adjustment factor.

[7] Section 101 of the Exchange's *Company Guide* requires that an issuer have pre-tax income of at least $750,000 in its last fiscal year, or in two of its last three fiscal years.

[8] Under Section 1003(b)(iii) of the Exchange's *Company Guide*, the Exchange may consider delisting debt securities if the aggregate market value or the principal amount of debt securities publicly held is less than $400,000 or, the issuer is not able to meet its obligations on the listed debt securities.

any cash dividends and/or distributions paid on the mutual fund portfolio shares. The value for each Index will be disseminated once a day over the Consolidated Tape Association's Network B. If any mutual fund portfolio does not comply with Rule 22c–1 of the Investment Company Act of 1940,[9] which requires daily computation of a fund's current NAV, the Exchange will use the last available NAV in its calculation of the Index.

c. *Settlement of Index-linked Term Notes.* The Notes will be settled at maturity by either a cash payment or by delivering shares in the corresponding mutual fund portfolio, at the determination of the issuer. The value of the Notes at maturity will be equal to the principal amount of such Notes plus a Supplemental Redemption Amount. The Supplemental Redemption Amount, which may not be less than zero, will equal the principal amount of such Note multiplied by the percentage difference between the Adjusted Ending Index Value and the Starting Index Value. The Adjusted Ending Index Value means the ending value of the Index[10] reduced by an adjustment factor, if any, to be set forth in the prospectus.

d. *Other Exchange Rules Applicable to Index-linked Term Notes.* Because the Notes are linked to a portfolio of equity securities, the Exchange's existing equity floor trading rules and standard equity trading hours (9:30 A.M. to 4:00 P.M., Eastern Standard Time) will apply to the trading of the Notes. Further, the Notes will be subject to the equity margin rules of the Exchange.[11]

Pursuant to Exchange Rule 411, "Duty to Know and Approve Customers," the Exchange will impose a duty of due diligence on its members and member firms to learn the essential facts relating to every customer prior to trading the Notes. In addition, consistent with Exchange practices regarding other structured products, the Exchange will distribute an informational circular to its membership prior to the commencement of trading in the Notes to provide guidance regarding member firm compliance responsibilities, including appropriate suitability criteria and/or guidelines. The circular will state that before a member, member organization, or employee of such member organization undertakes to recommend a transaction in a Note, such member or member organization should make a determination that the Note is suitable for such customer. As part of that determination, the person making the recommendation should have a reasonable basis for believing at the time of making the recommendation, that the customer has such knowledge and experience in financial matters that they may be capable of evaluating the risks and the special characteristics of the recommended transaction, including those highlighted, and that the customer is financially able to bear the risk of the recommended transaction. Lastly, as with other structured products, the Exchange will closely monitor trading activity in the Notes to identify and deter any potential improper trading activity in the Notes.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with Section 6 of the Act,[12] in general, and furthers the objectives of Section 6(b)(5),[13] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, foster cooperation and coordination with persons engaged in facilitating transactions in securities, and remove impediments to and perfect the mechanism of a free and open market and a national market system.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes the proposed rule change will not impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange did not solicit or receive written comments with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the Exchange consents, the Commission will:

(A) By order approve the proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–Amex–98–37 and should be submitted by November 30, 1998.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[14]

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–40628; File No. SR–BSE–98–8]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Boston Stock Exchange Relating to its Fee Schedule

November 2, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 29, 1998,[3] the Boston Stock Exchange ("Exchange" or "BSE") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to waive Specialist Transaction fees for all BSE executed, automated order flow for the month of September, 1998.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to waive Specialist Transaction fees for the month of September 1998 to provide the Exchange's specialist community, which has borne additional costs associated with attracting order flow to the Exchange, with a reduction in transaction fees as a result of the Exchange's increased revenue stream for the fiscal year.

2. Basis

The basis for the proposed rule change is Section 6(b)(5) of the Act,[4] in that the proposed rule change is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change establishes or changes a due, fee, or other charges imposed by the Exchange and, therefore, has become effective upon filing pursuant to Section 19(b)(3)(A)(ii) of the Act[5] and Rule 19b–4(e)(2)[6] thereunder. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.[7] Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–BSE–98–8 and should be submitted by November 30, 1998.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–40627; File No. SR–NASD–97–89, Amendment No. 1]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the National Association of Securities Dealers, Inc. Relating to Bond Mutual Fund Volatility Ratings

November 2, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on December 12, 1997, the National Association of Securities Dealers, Inc. ("NASD" or "Association") through its wholly-owned subsidiary, the NASD Regulation, Inc. ("NASD Regulation" or "NASDR") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by NASD Regulation. On October 5, 1998, NASDR filed Amendment No. 1 which replaces and supersedes the initial proposal.[3] The Commission is publishing this notice to solicit comments on the proposed rule change, as contained in Amendment No. 1, from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] On December 12, 1997, the NASDR submitted its initial proposal which could have limited the effectiveness of the disclosure statement and prevented sales literature from containing relevant explanatory information concerning bond mutual fund volatility ratings. After discussions between NASDR and the Commission, the NASDR filed Amendment No. 1 on October 5, 1998. The revised proposal will: (1) permit ratings to be provided by non-NRSROs; (2) permit funds to provide additional information in the disclosure statement if the information would help investors understand the rating; (3) permit funds to combine information about different ratings when the information is the same for each rating; (4) clarify the prohibition against using ratings that are based on subjective factors; and (5) require the use of the most recently issued rating.

I. Self-Regulatory Organizations Statement of the Terms of Substance of the Proposed Rule Change

NASD Regulation is proposing rules that add a new interpretation to Rule 2210 of the Conduct Rules of the NASD to permit the use by members and associated persons of bond mutual fund volatility ratings in supplemental sales literature on an interim 18 month pilot basis. Proposed new language is in italics.

IM– . Requirements for the Use of Bond Mutual Fund Volatility Ratings

(This rule will expire on [18 months from approval], unless extended or permanently approved by the Association at or before such date)

(a) Definition of Bond Mutual Fund Volatility Ratings

For purposes of this Rule and any interpretation thereof, the term "bond mutual fund volatility rating" is a description issued by an independent third party relating to the sensitivity of the net asset value of a bond mutual fund portfolio to changes in market conditions and the general economy, and is based on an evaluation of objective factors, including the credit quality of the fund's individual portfolio holdings, the market price volatility of the portfolio, the fund's performance, and specific risks, such as interest rate risk, prepayment risk, and currency risk.

(b) Prohibitions on Use

Members and persons associated with a member may use a bond mutual fund volatility rating only in supplemental sales literature and only when the following requirements are satisfied:

(1) The rating does not identify or describe volatility by use of a single symbol, number or letter, and the rating is not described as a "risk" rating.

(2) The supplemental sales literature incorporates the most recently available rating and reflects information that, at a minimum, is current to the most recently completed calendar quarter ended prior to use.

(3) The criteria and methodology used to determine the rating must be based exclusively on objective, quantifiable factors. Any other factors, such as an analysis of investment philosophy or quality of the fund's management, may be considered solely for purposes of determining whether to issue the rating. The rating and the Disclosure Statement that accompanies the rating must be clear, concise, and understandable.

(4) The supplemental sales literature conforms to the disclosure requirements described in paragraph (c).

(5) The entity that issued the rating provides detailed disclosure on its rating methodology to investors through a toll-free telephone number, a web site, or both.

(c) Disclosure Requirements

(1) Supplemental sales literature containing a bond mutual fund volatility rating shall include a Disclosure Statement containing all the information required by this Rule. The Disclosure Statement may also contain any additional information that is relevant to an investor's understanding of the rating.

(2) Supplemental sales literature containing a bond mutual fund volatility rating shall contain all current bond mutual fund volatility ratings that have been issued with respect to the fund. Information concerning multiple ratings may be combined in the Disclosure Statement, provided that the applicability of the information to each rating is clear.

(3) All bond mutual fund volatility ratings shall be contained within the text of the Disclosure Statement. The following disclosures shall be provided with respect to each such rating:

(A) the name of the entity that issued the rating;

(B) the most current rating and date of the current rating, with an explanation of the reason for any change in the current rating from the most recent prior rating;

(C) a description of the rating in narrative form, containing the following disclosures:

(i) a statement that there is no standard method for assigning ratings;

(ii) a description of the criteria and methodologies used to determine the rating;

(iii) a statement that not all bond funds have volatility ratings;

(iv) whether consideration was paid in connection with obtaining the issuance of the rating;

(v) a description of the types of risks the rating measures (e.g., short-term volatility);

(vi) a statement that the portfolio may have changed since the date of the rating; and

(vii) a statement that there is no guarantee that the fund will continue to have the same rating or perform in the future as rated.

* * * * *

2200. Communications With Customers and the Public

2210. Communications With the Public

* * * * *

(c) Filing Requirements and Review Procedures

* * * * *

(3) Sales literature concerning bond mutual funds that include or incorporate bond mutual fund volatility ratings, as defined in Rule IM–__, shall be filed with the Department for review at least 10 days prior to use (or such shorter period as the Department may allow in particular circumstances) for approval and, if changed by the Association, shall be withheld from publication or circulation until any changes specified by the Association have been made or, if expressly disapproved, until the sales literature has been refiled for, and has received, Association approval. Members are not required to file advertising and sales literature which have previously been filed and which are used without change. The member must provide with each filing the actual or anticipated date of first use. Any member filing sales literature pursuant to this paragraph shall provide any supplemental information requested by the Department pertaining to the rating that is possessed by the member.[4]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NASDR included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NASDR has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Background

Bond mutual fund volatility ratings are descriptions of the sensitivity of bond mutual fund portfolios to changing market conditions. The rating agencies and information vendors that issue such ratings are not NASD member firms, and mutual fund groups that purchase the ratings use them for promotional and marketing purposes. NASD rules do not apply to the use and dissemination of bond mutual fund volatility ratings by non-members.

Currently, NASD Regulation interprets its rules to prohibit the use by members and associated persons of bond mutual volatility ratings in supplemental sales literature. The prohibition is based on the analysis that judgments of how a bond mutual fund may react to changes in various market conditions may be predictive of fund performance or misleading and, therefore, prohibited for use by members and associated persons in sales literature.[5]

In Notice to Members 96–84 (December 1996) ("NTM 96–84"), NASD Regulation requested comment on the appropriations of its current prohibition. A majority of the commenters supported making the ratings available, and all of the commenters representing investor groups supported the goal of making accurate information regarding risk and volatility characteristics of bond funds available to investors.

On April 30, 1997, the Legal Advisory Board of the NASD ("LAB") reviewed and discussed bond fund volatility ratings. NASD Regulation staff proposed to the LAB that an alternative to the current prohibition would be permitting the use of bond fund volatility ratings subject to appropriate guidelines. After extended discussion, the LAB favored allowing volatility ratings to be used subject to guidelines containing sufficient prohibitions and disclosure requirements.

At its September 1997 Board meeting, NASD Regulation considered issues regarding bond mutual fund volatility ratings and adopted resolutions: (i) Affirming that investors can benefit from the availability of such information, (ii) directing the staff to draft bond fund volatility rating regulatory proposals to best serve the public interest and address the differences among interested parties, for presentation at the November Board meeting, and (iii) appointing Directors Theodore A. Levine and A.A. Sommer, Jr. ("Subcommittee") to assist the staff in this effort. After the September Board meeting, NASD Regulation staff and the Subcommittee met and worked to reach a solution that was sensitive to and reflective of the concerns and differences of all interested parties.

At its November 1997 Board meeting, NASD Regulation approved: (i) A modification to NASD Regulation's current prohibition on the use of bond mutual fund volatility ratings in supplemental sales literature to permit such use by members and associated persons according to proposed rules designed to prevent such ratings from being misleading, predictive, or otherwise inappropriate, and (ii) the submission of the proposed rules to the SEC for approval.

At its December 1997 Board meeting, the NASD ratified the NASD Regulation Board's approval of the proposed rules, without change, and their submission to the SEC for approval.

At its August 1998 Board Meeting, NASD Regulation approved amendments to the proposed rule change as originally filed with the SEC, and the submission of the amendments to the SEC for approval. The amendments, incorporated in this submission: (i) Delete the requirement that ratings be issued exclusively by nationally recognized statistical rating organizations; (ii) add the requirement that the rating and the Disclosure Statement be clear, concise, and understandable; (iii) permit the Disclosure Statement to contain any additional information that is relevant to an investor's understanding of the rating; (iv) permit repetitive information in multiple ratings for the same fund to be combined in the Disclosure Statement, provided the applicability of the information to each rating is clear; and (v) delete the requirement to use a "Required Disclosure Statement."

Description

Trial Period. The proposed rule change would permit, on an 18-month pilot basis, the use of the ratings in conformance to rules that prohibit the use of ratings unless certain requirements and disclosures are met. After the 18-month trial term, the rules would be evaluated to determine their efficacy in ensuring that comprehensible and useful information is provided to investors, and in preventing the dissemination of inappropriate or misleading information by members and associated persons. After the evaluation, the staff will consider all options, including prohibiting the use of ratings, permitting their use or permitting their use with modifications to the rule.

Definition of Bond Mutual Fund Volatility Rating. Paragraph (a) of the proposed rule change defines the term "bond mutual fund volatility rating" to mean, in part, a description issued by an independent third party relating to the sensitivity of a bond mutual fund's net asset value to changes in market conditions and the general economy, based on an evaluation of objective factors regarding the fund's current characteristics and its past performance. The definition recognizes that the rating is an opinion of a fund's potential share price movement in response to various economic conditions or market situations, and not a prediction of the actual movement of a fund's share price. The definition applies only to bond mutual fund volatility ratings provided by an independent third party. However, NASD Regulation understands that many mutual fund complexes currently provide various descriptions of risk and volatility for their own funds. These descriptions may involve some of the same processes and considerations that are used by independent rating agencies. NASD Regulation specifically solicits comment on whether such descriptions are similar in derivation and purpose to ratings that are issued by independent agencies, and whether their use in supplemental sales literature by members and their associated persons should also be subject to the provisions of the proposed rule change.

Prohibitions. Subparagraph (b) of the proposed rule change permits members and associated persons to use a bond mutual fund volatility rating only in supplemental sale literature and only when certain requirements are satisfied.

Subparagraph (b)(1) of the proposed rule change prohibits the use of a bond mutual fund volatility rating that identifies or describes volatility by use of a single symbol, number or letter. At the same time, the proposed rules refrain from imposing a specific standard on descriptions or calculations in recognition of the fact that there is no specified or uniform range of information used by all rating entities, and that rating entities should be free to develop completing methods and models of assessing volatility. Subparagraph (b)(1) also prohibits the use of a bond mutual fund volatility rating that uses the word "risk" to describe the rating. Because the word "risk" is capable of multiple meanings and interpretations, NASD Regulation believes that it is more accurate to refer to such ratings as "volatility" rather than "risk" ratings.

Subparagraph (b)(2) of the proposed rule change prohibits the use of a bond mutual fund volatility rating that does not incorporate the most recently available rating and is not current to the most recent calendar quarter ended prior to use. This prohibition is intended to ensure that stale or dated

[4] NASDR proposes to add this language to the existing text of Rule 2210(c). The existing sections of this rule will remain unchanged and will be renumbered, beginning with Rule 2210(c)(3)(A). Telephone conversation between Robert J. Smith, Office of General Counsel, NASD Regulation, Inc., and Mignon McLemore, Division of Market Regulation, Commission, on October 30, 1998.

[5] NASD Conduct Rule 2210 prohibits the use by members and associated persons of information that is misleading, that contains exaggerated, unwarranted or misleading statements or claims, or that predicts or projects investment results.

ratings are not provided to investors and reflects a common denominator time frame that can be used by rating entities currently to update their ratings.

Subparagraph (b)(3) of the proposed rule change prohibits the use of a bond mutual fund volatility rating that is not based exclusively on objective, quantifiable factors. Non-quantifiable, subjective factors, such as an analysis of investment philosophy and quality of the fund's management[6] could be considered solely for purposes of determining whether to issue the rating. Eliminating subjectivity from the volatility calculation reduces the potential variability of ratings, and thus helps eliminate the ability of funds to "shop around" for the most favorable rating.

Subparagraph (b)(3) of the proposed rule change also requires that the rating and the Disclosure Statement that accompanies it be clear, concise, and understandable. This addresses the need to deliver the rating information in a way that is accessible and informative.

Subparagraph (b)(4) of the proposed rule change prohibits the use of bond mutual fund volatility rating unless the supplemental sales literature containing the rating conforms to the disclosure requirements.

Subparagraph (b)(5) of the proposed rule change prohibits the use of a bond mutual fund volatility rating unless the entity that issued the ratings provides detailed disclosure on its rating methodology to investors through a toll-free telephone number, a web site, or both. NASD Regulation believes that access to such supplemental information will enable investors to obtain answers to question regarding the meaning of the rating or how it is calculated or derived.

Disclosure Requirements. Paragraph (c) of the proposed rule change requires that certain disclosures accompany any bond mutual fund volatility rating used in supplemental sales literature by members or associated persons of members.

Subparagraph (c)(1) requires that supplemental sales literature containing a bond mutual fund volatility rating include a Disclosure Statement containing all the information required by the rule, but also permits the Disclosure Statement to contain any additional information that is relevant to an investor's understanding of the rating. Permitting the Disclosure Statement to contain additional relevant information could help explain the meaning of the rating. In particular, supplemental sales literature that contains multiple ratings could benefit from additional information that could distinguish and clarify different methodologies and measurements of volatility.

Subparagraph (c)(2) requires that supplemental sales literature containing a bond fund volatility rating contain all other current volatility ratings that have been issued with respect to the same fund. Subparagraph (c)(2), however, permits information concerning multiple ratings to be combined in the Disclosure Statement, provided that the applicability of the information to each rating is clear. This serves the purpose of avoiding redundant and potentially confusing information, and reduces the possibility that the rating could be buried or hidden in excess information.

Subparagraph (c)(3) requires that all bond mutual fund volatility ratings be contained within the text of the Disclosure Statement. NASD Regulation believes it is important that the rating not be located separately from the Disclosure Statement to avoid the danger that either could be read separately, or not at all, which would increase the possibility that the rating would not be understood in the context of the required disclosures.

Subparagraphs (c)(3)(A)–(B) of the proposed rule change require that supplemental sales literature containing a bond mutual fund volatility rating disclose the name of the rating entity, the most current rating accompanied by the date of the rating and, if there is any change in the current rating from the most recent prior rating, an explanation of the change. NASD Regulation believes it is important for investors to see how a fund's rating may have changed and understand the reasons for the change.

Subparagraph (c)(3)(C) of the proposed rule change requires that supplemental sales literature containing a bond mutual fund volatility rating describe the rating in narrative form. Under subparagraphs (c)(3)(C)(i)–(vii), the narrative description must also include: (i) a statement that there is no standard method for assigning ratings; (ii) a description of the criteria and methodologies used to determine the rating; (iii) a statement that not all bond funds have volatility ratings; (iv) whether consideration was paid in connection with obtaining the issuance of the rating; (v) a description of the types of risks the rating measures, such as short-term volatility, for example; (vi) a statement that there is no guarantee that the fund will continue to have the same rating or perform in the future as rated.

The disclosures required by subparagraphs (c)(3)(C)(i)–(vii) help inform investors of certain potential limitations of a rating (*i.e.*, that a rating may have been paid for, may measure only a certain type of risk or volatility, may not reflect a comparison with all funds of a given class or peer group, and may not be current).

NASDR intends to include in the NTM that will accompany publication of the final rule the following Disclosure Statement as a sample to assist members in drafting Disclosure Statements that comply with the requirements of the rule:

> The volatility rating for this fund issued by [XYZ rating entity] ("XYZ") is [insert narrative rating]. The rating seeks to measure [description of what risks the rating measures, e.g., "how the value of the fund's current portfolio might respond to changing market conditions"]. XYZ arrived at his rating in the following way: [insert description of methodology]. There is no standard method for determining volatility ratings. The rating is current as of [date]. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same rating or perform in the future as rated. Not all bond mutual funds have volatility ratings and those that do may have paid for them. The fund [paid for][did not pay for] the volatility rating issued by XYZ. The fact that a fund has a rating is not an indication that it is more or less risky or volatile than a fund that does not. If you would like more specific information on the rating or the methodology used to determine the rating, call XYZ at 1–800–000–000 or visit XYZ's web site address at www.[address].

Filing Requirement. The proposed rule change amends NASD Rule 2210 regarding communications with the public by adding new subparagraph (c)(3) to require sales literature containing bond mutual fund volatility ratings to be filed with the Advertising Regulation Department for review and approval at least 10 days prior to use. Members would not be required to file advertising and sales literature which had previously been filed and approved, and used without change. Members filing sales literature containing bond mutual fund sales literature also must provide any supplemental information requested by the Department pertaining to the rating that is possessed by the member.

NASD Regulation believes that the proposed rule change is consistent with

[6] Volatility or risk rating analysis has been described as being comprised of three elements: (i) an analysis of the effective duration of the fund's current portfolio—*i.e.*, the sensitivity of the current portfolio to interest rate changes, (ii) a comparison of the historical risk profile of the bond fund with the risk of its current portfolio, and (iii) an assessment of the fund manager's policies and management style, including whether management has established policies and systems that comport with stated objectives for the fund, including levels of risk.

the provisions of Section 15A(b)(6)[7] of the Act, which require that the Association adopt and amend its rules to promote just and equitable principles of trade, and generally provide for the protection of investors and the public interest. The proposed rule change, by imposing certain prohibitions, disclosure and filing requirements, is designed to permit members and associated persons of a member to disseminate bond mutual fund volatility ratings in supplemental sales literature according to standards designed to prevent such ratings from being misleading, predictive, or otherwise inappropriate.

B. Self-Regulatory Organization's Statement on Burden on Competition

NASD Regulation does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received. However, NTM 96–84 requested comment on the appropriateness of the NASDR's current prohibition on the use by members and persons associated with a member of bond mutual fund volatility ratings in supplemental sales literature. A copy of NTM 96–84 and a summary of the comments received in response to NTM 96–84 are available for inspection and copying in the Commission's Public Reference Room.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposal is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by November 30, 1998.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–40625; File No. SR–PHLX–98–41]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Philadelphia Stock Exchange, Inc. Relating to the Extension of a Pilot Program for a System Enhancement to the X-Station Electronic Book on the Options Floor

November 2, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on October 6, 1998, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

On a pilot basis, the Phlx previously implemented an enhancement to its X-Station electronic book. The Exchange seeks to extend that pilot through April 23, 1999.[3] Under the pilot, a system enhancement was made to the X-Station electronic book on the options floor, which matches incoming orders eligible for the Automatic Execution System ("AUTO–X") feature of the Phlx Automated Options Market ("AUTOM") system with orders residing on the specialist's book.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

On April 24, 1998, the Exchange filed with the Commission a proposed rule change to implement, on a pilot basis, an enhancement to the X-Station electronic book on the Exchange's options floor, which became effective immediately upon filing.[4] As described in Phlx Rule 1080, Commentary .02, the electronic order book is an automated mechanism for specialists to hold and display orders based on price/time priority. The Exchange is currently preparing floor-wide deployment of the new X-Station electronic book on the options floor. The new X-Station provides certain improvements such as expedited non-AUTO–X order execution, as well as expedited cancel replacement processing.

AUTO–X is the automatic execution feature of the AUTOM System, the electronic order delivery and routing system for options orders. Previously,

[3] Letter from Richard S. Rudolph, Legal Counsel, Phlx, to Anitra T. Cassas, Attorney, Division of Market Regulation, Commission, dated October 21, 1998.

[4] Exchange Act Release No. 39972 (May 7, 1998) 63 FR 26666 (May 13, 1998).

AUTO–X orders were executed against a "shadow account" for which the specialist was ultimately responsible. The execution was immediately reported back to the sending firm and the specialist was then required to manually input the contra-side interest representing the booked order that became due as a result of the AUTO–X trade.

At this time, the Phlx proposes to extend the pilot program, a system enhancement to the electronic book that matches incoming AUTO–X orders with booked orders, for an additional six months. The matching ability allows the specialist to match two participants directly, without the specialist participating in the trade, by dropping the order to manual status. The match is not automatic, as the specialist must ensure that crowd participation under current parity/priority rules is not due before executing the trade; thus, the specialist must "select" the orders to execute the trade. Since the AUTO–X order drops to manual status (meaning it is not automatically executed), the sending firm will only receive an execution report after the specialist selects and executes the trade.

The enhancement implemented through the current pilot program affords specialists relief from the manual burden of inserting trade participant and clearing information by writing an order ticket for the booked order. Without the X-Station itself, the booked order appeared on an actual order ticket, which the specialist submitted for key punch entry. Thus, implementing the X-Station without the matching feature is more burdensome than the process required without the existence of the X-Station because the X-Station requires more ticket-writing. The enhancement has reduced the amount of paper processed on the options floor, which in turn has reduced handling and processing time, including the likelihood of errors, thereby facilitating more prompt and accurate trade reporting.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with Section 6(b)[5] of the Act, in general, and furthers the objectives of Section 6(b)(5),[6] in particular, in that it is designed to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, as well as to protect investors and the public interest by enhancing efficiency through automation in the market.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[7] and subparagraph (e)(5) of Rule 19b–4 thereunder.[8] The proposal effects a change in an existing order-entry or trading system of a self-regulatory organization that (i) does not significantly affect the protection of investors or the public interest; (ii) does not impose any significant burden on competition; and (iii) does not have the effect of limiting the access to or availability of the system.[9]

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the Phlx. All submissions should refer to File No. SR–PHLX–98–41 and should be submitted by November 30, 1998.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[10]

Jonathan G. Katz,

Secretary.

DEPARTMENT OF STATE

Bureau of Consular Affairs

[Public Notice 2920]

Extension of Passport Validity

In accordance with the Immigration and Nationality Act, an alien who makes an application, either for a visa or for admission into the United States, is required to possess a passport that: (1) Is valid for a minimum of six months beyond the date of the expiration of the initial period of the alien's admission into the United States or contemplated initial period of stay and, (2) authorizes the alien to return to the place from which he or she came, or to proceed to and enter some other country during such period. Because of the foregoing requirement, certain competent authorities have agreed that their passports will be recognized as valid for the return of the bearer for a period of six months beyond the expiration date specified in the passport, thereby effectively extending the validity period of the foreign passport an additional six months beyond its expiration date.

This public notice adds Slovenia to the list of countries that have concluded passport-extension agreements with the Government of the United States. In addition, the American Institute in Taiwan and the Taipei Economic and Cultural Representative Office in the United States have reached such an agreement with respect to passports issued by their respective authorities. The updated list of competent authorities is set forth below:

Fine Arts Committee; Notice of Meeting

The Fine Arts Committee of the Department of State will meet on Friday, November 13, 1998 at 2:00 p.m. in the John Quincy Adams State Drawing Room. The meeting will last until approximately 3:00 p.m. and is open to the public.

The agenda for the committee meeting will include a summary of the work of the Fine Arts Office since its last meeting on April 4, 1998 and the announcement of gifts and loans of furnishings as well as financial contributions from January 1, 1998 through September 30, 1998. Public access to the Department of State is strictly controlled. Members of the public wishing to take part in the meeting should telephone the Fine Arts Office by Monday, November 9, 1998, telephone (202) 647–1990 to make arrangements to enter the building. The public may take part in the discussion as long as time permits and at the discretion of the chairman.

Dated: October 28, 1998.

Gail F. Serfaty,

Vice Chairman, Fine Arts Committee.

DEPARTMENT OF STATE

[Public Notice #2928]

Advisory Committee on International Economic Policy; Public Meeting Notice

Members of the Advisory Committee on International Economic Policy (ACIEP) will meet from 9:00–11:30 am on Monday, November 23, 1998, in Room 1105, U.S. Department of State, 2201 C Street, N.W., Washington, DC 20520 to discuss on-going work in the OECD on multilateral rules on investment. The Department regrets shorter notice necessitated by last minute conflicts in schedule of senior officials.

Admittance of public members will be limited to the seating available. As access to the Department of State is controlled, persons wishing to attend the meeting should notify the ACIEP Executive Secretary by Thursday, November 21, 1998.

Each person must provide his or her name, company or organization affiliation, date of birth, and social security number and a valid photo ID (U.S. driver's license with picture, U.S. passport, or U.S. government identification) for entrance into the building at the C Street diplomatic entrance, to the ACIEP Secretariat at (202) 647–5968 or fax (202) 647–5713 (Attn: Sharon Rogers). A list will be made and the Reception personnel will direct attendees to Room 1105.

For further notification or information, contact Sharon Rogers, ACIEP Secretariat, U.S. Department of State, Bureau of Economic and Business Affairs, Room 6828, Main State, Washington, DC 20520. She may be reached at telephone (202) 647–5968 or fax number (202) 647–5713.

Dated: November 4, 1998.

Alan P. Larson,

Assistant Secretary for Economic and Business Affairs.

BILLING CODE 4710–07–M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Sanitary and Phytosanitary Issues

AGENCY: Trade Policy Staff Committee, USTR.

ACTION: Request for written comments on "Information for Evaluation of the Consistency of Foreign Trade Measures with the Provisions of the WTO Agreement on the Application of Sanitary and Phytosanitary Measures."

SUMMARY: The Trade Policy Staff Committee (TPSC) is publishing a set of questions developed to elicit information on foreign trade measures that may be inconsistent with the provisions of the World Trade Organization (WTO) Agreement on the Application of Sanitary and Phytosanitary Measures (SPS Agreement). This set of questions, "Information for Evaluation of the Consistency of Foreign Trade Measures with the Provisions of the WTO Agreement on the Application of Sanitary and Phytosanitary Measures," was developed by a subcommittee of the TPSC which focuses on issues related to the WTO SPS Agreement. These questions are attached as an annex to this **Federal Register** notice. They will be used by the TPSC in collecting and organizing information for analysis and for prioritizing potential U.S. Government action on trade barriers raised by sanitary or phytosanitary measures that appear to be inconsistent with the SPS Agreement.

The purpose of this notice is to solicit written public comments on the set of questions developed by the inter-agency TPSC committee. Comments are specifically invited to address the appropriateness and comprehensiveness of the questions as they are set forth in the annex to this **Federal Register** notice. If there are areas of concern or issues which commentors feel have not been fully addressed they should provide their rationale for inclusion or exclusion of such concerns.

DATES: Written comments should be submitted by December 9, 1998.

FOR FURTHER INFORMATION CONTACT: John Payne, Director for SPS Affairs, USTR, telephone (202) 395–6127; or e-mail: jpayne@ustr.gov.

SUPPLEMENTARY INFORMATION: It was recommended in a United States General Accounting Office (GAO) report, entitled "Agricultural Exports: U.S. Needs a More Integrated Approach to Address Sanitary/Phytosanitary Issues" (NSIAD–98–32 December 11, 1997) that the U.S. Government should:

• • • establish a more systematic process by which USDA entities evaluate complaints they receive about SPS measures, determine which ones they should address, prioritize their efforts, develop unified approaches, and determine when to recommend consideration of dispute settlement procedures to USTR. This process should be developed and implemented in consultation with the U.S. Trade Representative, the Commissioner of Food and Drugs, the Administrator of EPA, and the Secretary of State, or their designees.

The USTR in its response to the GAO report stated that the SPS subcommittee of the TPSC would develop a methodology for evaluating SPS issues brought to its attention and that methodology would be used to determine policy options for addressing specific SPS issues which appear to violate the WTO SPS Agreement. USDA in its response to the GAO report stated that a **Federal Register** notice would be published that invited public comment on factors to be taken into account in evaluating and prioritizing trade-related SPS measures.

The SPS subcommittee of the TPSC (comprised of representatives from USTR, the United States Department of Agriculture, the Food and Drug Administration, the Environmental Protection Agency, the State Department, and representatives of other interested Departments and Agencies) developed a set of questions to guide the collection of information to evaluate the consistency of foreign trade measures with the provisions of the SPS Agreement. This set of questions will be amended based on comments provided from this notice and, over time, through experience as new issues are identified that would lead to improving the collection of information for analysis of SPS measures which appear to violate the WTO SPS Agreement.

In order to assist the TPSC in its analysis of specific SPS measures, government Agencies intend to use the set of questions as a tool to systematically collect and organize their information on issues. It is understood that the information responsive to these questions may be provided from a number of sources, including Agencies of the U.S. Government and information voluntarily provided by industry or consumer groups. Failure of the TPSC to obtain answers to some of the questions does not mean that the issue will not be addressed, but the more complete the information, the sooner the evaluation can be completed, and potentially, the sooner the issue could be resolved. This set of questions is intended to ensure that the TPSC is aware of all available information that is pertinent to an issue. It does not imply any particular judgment regarding the relative importance of any specific item of information provided.

Submission of Written Comments

Those persons wishing to submit written comments should provide twenty (20) copies (in English) to Gloria Blue, Executive Secretary, Trade Policy Staff Committee, Office of the United States Trade Representative, Room 501, 600 17th Street Northwest, Washington, DC 20508. Comments should state clearly the position taken and should describe the specific information supporting that position.

If the submission contains business confidential information, twenty copies of a confidential version must also be submitted. A justification as to why the information contained in the submission should be treated confidentially must be included in the submission. In addition, any submissions containing business confidential information must be clearly marked "Confidential" at the top and bottom of the cover page (or letter) and of each succeeding page of the submission. The version that does not contain confidential information should also be clearly marked, at the top and bottom of each page, "public version" or "non-confidential."

Written comments submitted in connection with this request, except for information granted "business confidential" status pursuant to 15 CFR 20003.6, will be available for public inspection in the USTR Reading Room, Room 101, Office of the United States Trade Representative, 600 17th Street Northwest, Washington, DC. An appointment to review the file may be made by calling Brenda Webb (202) 395–6186. The Reading Room is open to the public from 9:30 a.m. to 12 noon, and from 1 p.m. to 4 p.m., Monday through Friday.

Frederick L. Montgomery,

Chairman, Trade Policy Staff Committee.

Annex: The Consistency of Foreign Trade Measures With the Provisions of the WTO Agreement on the Application of Sanitary and Phytosanitary Measures

In order to assist the TPSC in its analysis of the SPS measure in question, please provide as much information as possible in response to the following questions. It is understood that the information requested may be provided from several other sources, including the U.S. Government. Failure to answer questions does not mean that the issue will not be addressed by the TPSC, but the more complete the information, the sooner the evaluation can be completed. If any of the information provided is business confidential, please ensure that specific business confidential information on all copies is so marked.

Please note that this set of questions is intended to ensure that the TPSC is aware of all available information that is pertinent to this issue. It does not imply any judgment regarding the relative importance of any specific questions or specific elements of the information provided.

I. Description of The SPS Barrier

A. What country has imposed a trade restriction or SPS barrier?

B. What product or commodity is affected?

C. What claim (e.g., health, safety, etc.) is the government making as the reason for its measure?

D. Has this issue been brought to the attention of the U.S. Government before? If so, what was the date of the previous communication and to what Agency?

E. Who may have information available to answer more fully questions in this questionnaire? U.S. Government Agencies? Others?

II. Market Impact

A. Which export markets (i.e., countries, territories, regions) are affected by this measure?

B. Which foreign government agencies are responsible for developing, implementing, and enforcing the measure?

C. When was the measure adopted, publicized and implemented? Please provide as complete a chronology as possible.

D. Which U.S. export products are affected? Please provide as detailed a description as possible, including harmonized tariff schedule numbers (If known).

E. What other countries' imports of products into the country taking the measure are (might be) impacted by this measure?

F. What is the approximate value of the actual lost export earnings resulting from the application of this measure? (or) The estimate of lost export earnings which would result if the proposed measure were implemented?

(1) What is the approximate value of U.S. exports of the affected products to the affected markets in recent years?

(2) What is the approximate value of all U.S. exports of the affected products to the world in recent years?

(3) If there is no trade because of the measure (import bans, etc.), what is your estimate of potential market value if the current restriction were removed?

III. Health Objective of the Measure

A. Has the government applying the measure identified that it is doing so to protect human, animal or plant life or health? If so, provide the specific health concern the measure is intended to address. Please provide any available documentation.

B. If the measure is intended to mitigate against a disease or pest, which specifically?

(1) Do the pests or diseases of concern exist in the U.S.?

(2) If the pest or disease exist in the U.S., are there relevant surveillance or monitoring data to demonstrate that the pest or disease does not affect the product for which the measure is taken?

(3) Is the pest or disease known to occur in the country that has applied the measure? If so, is the pest or disease limited or widespread in that countries territory? Is the pest or disease under an official control program or quarantine in that country?

IV. Scientific Basis for the Measure

A. Are there any international standards, guidelines or recommendations which address the same or similar health concerns? Please identify and describe. Would use of those international standards, guidelines or recommendations be more or less trade restrictive than application of the measure in question?

B. Has the government that has applied (or is proposing) the measure conducted a risk assessment which provides a scientific basis for the measure? Are you aware of any other risk assessment upon which the measure may be based?

C. Is there strong scientific evidence that the measure is or is not based on scientific principles or maintained on the basis of sufficient scientific evidence? Does the scientific evidence indicate that application of this measure is necessary to achieve the intended level of health protection (as determined by the government applying the measure)? Please attach a technical summary of the relevant scientific evidence.

D. Have U.S. government or private sector scientists evaluated the scientific basis for the measure in question? If so, what is their view?

E. Does the measure take into account the sanitary and phytosanitary characteristics of the areas from which the affected products originate and the areas to which they are destined (e.g., does in recognize post harvest risk mitigation techniques and pest-free or disease-free production areas)?

F. How much technical analysis and research are required to generate conclusions regarding the other county's SPS measure (low, medium, high)? What are the research costs, current activity, and funding sources?

V. Consistency of the Measure

A. Has the measure been enforced consistently and in a non-discriminatory manner?

(1) Is the measure applied in a non-discriminatory way to all international suppliers, where identical or similar conditions prevail?

(2) Does the government applying the measure apply the measure in a non-discriminatory way to both imported and domestic products, where identical or similar conditions prevail? If not, has the government given a reason why it does not?

(3) Is the measure applied seasonally? If so, is there a scientific justification for seasonal implementation? How does seasonal implementation relate to seasonal U.S. export patterns?

VI. Transparency and Other Procedural Issues

A. To your knowledge, has the measure been formally notified through WTO notification procedures to the SPS Committee? Other WTO Committees?

B. Did the government applying the measure provide an opportunity for U.S. firms to comment on the measure before its adoption and implementation? Were any comments provided in response? If so, were they taken into account in the development of the final measure?

C. Did the government applying the measure provide sufficient time for U.S. exporters to adjust to the measure prior to its implementation?

VII. Previous or Ongoing Consultations

A. Have there been any consultations between the government applying the measure and affected (private sector) U.S. exporters? If so, when did those consultations take place, which foreign government agencies were involved, and what were the results? Please attach as detailed a chronology as possible.

B. Have there been any official bilateral consultations between the government applying the measure and the U.S. government regarding the application of the measure? When did those consultations take place, and which U.S. and foreign government agencies were involved?

C. Have any third parties sought or conducted consultations with the government applying the measure on this issue? If so, what were the results?

D. Are issues relevant to the application of this measure currently on the agenda of any relevant international standards setting bodies or other regional or international organizations?

VIII. Comparable Measures

A. What SPS measures, if any, does the United States apply in order to address the same or similar health concerns in association with the same or comparable products? In other words, What are the comparable U.S. measures, including related domestic and interstate regulations, to protect against the same or comparable risks?

(1) Are those U.S. measures more or less trade restrictive than the foreign measure in question?

(2) Are there any known scientific or other legitimate reasons for any difference between the foreign measure in question and the comparable U.S. measures?

B. What SPS measures, if any, do other governments apply in order to address the same or similar health concerns? Are these measures more or less restrictive than the measure in question?

C. Is there any other reasonably available measure or risk mitigation strategy which, taking into account technical and economic feasibility, would achieve the intended level of health protection (as determined by the government applying the measure) in a less trade-restrictive manner? Please provide any available scientific evidence which would demonstrate the efficacy of such alternatives.

IX. Other Information

A. Is there any other relevant information not asked for in previous questions, or information you believe to be pertinent that has not been provided in response to the previous questions?

B. Information in the following categories is particularly useful:

(1) Chronology of actions leading to the adoption and implementation of the measure.

(2) Chronology of any consultations between U.S. traders or U.S government representatives and the government applying the measure in question.

(3) Any available documentation of the specific requirements imposed under the measure and of the health justification identified by the government applying the measure.

(4) A technical summary of any available scientific evidence which calls into question the scientific basis for the measure.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

The Federal Aviation Administration (FAA) Satellite Operational Implementation Team (SOIT) Hosted Forum on the Capabilities of the Global Positioning System (GPS)/Wide Area Augmentation System (WAAS) and Local Area Augmentation System (LAAS)

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA SOIT will be hosting a public forum to discuss the FAA's GPS approvals and WAAS/LAAS operational implementation plans. This meeting will be held in conjunction with a regularly scheduled meeting of the FAA SOIT and in response to aviation industry requests to the FAA Administrator. Formal presentations by the FAA will be followed by a question and answer session. Those planning to attend are invited to submit proposed discussion topics. Requests to make presentations to the assembled forum should be made to the point of contact listed.

DATES: November 16–17, 1998, 9 a.m.–5 p.m.

ADDRESSES: The meeting will be held at the Holiday Inn Fair Oaks Hotel, 11787 Lee Jackson Memorial Highway, Fairfax, VA 22033, adjacent to the Fair Oaks Mall.

POINT OF CONTACT: Registration, submission of suggested discussion topics and requests to make presentations may be made to Mr. Steven Albers, phone (202) 267–7301, fax (202) 267–5086, or e-mail at steven.albers@faa.gov.

SUPPLEMENTARY INFORMATION: Open to the aviation industry with attendance limited to space available. Participants are requested to register their intent to attend this meeting by October 30, 1998. Names, affiliations, telephone and facsimile numbers should be sent to the point of contact listed.

Dated: September 22, 1998.

Hank Cabler,

SOIT Co-Chairman.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System or Relief From the Requirements of Title 49 Code of Federal Regulations Part 236

Pursuant to Title 49 Code of Federal Regulations (CFR) Part 235 and 49 U.S.C. App. 26, the following railroads have petitioned the Federal Railroad Administration (FRA) seeking approval for the discontinuance or modification of the signal system or relief from the requirements of 49 CFR Part 236 as detailed below.

Docket No. FRA–1998–4694

Block Signal Application (BS–AP)–No. 3484

Applicant: CSX Transportation, Incorporated, Mr. R.M. Kadlick, Chief Engineer Train Control, 500 Water Street (S/C J–350), Jacksonville, Florida 32202

CSX Transportation Incorporated seeks approval of the proposed modification of the traffic control system, on the two main tracks, at South Yard, milepost S–1.7, Richmond, Virginia, on the Bellwood Subdivision, Florence Service Lane, consisting of the conversion of the power-operated crossover to hand operation equipped with an electric locked turnout, and the discontinuance and removal of absolute controlled signals L10, R10, L14, and R14.

The reason given for the proposed changes is that present day traffic does not warrant the retention of the remote controlled location.

Docket No. FRA–1998–4695

BS–AP–No. 3485

Applicant: Port of Pend Oreille, dba Pend Oreille Valley Railroad, Mr. Clifford G. Robbins, Port Operations Manager, 1981 Black Road, Usk, Washington 99180

Port of Pend Oreille, dba Pend Oreille Valley Railroad seeks approval of the proposed discontinuance and removal of all slide detectors and indicators, on the former Burlington Northern and Santa Fe Railway Company's Newport Branch, between Dover, Idaho, milepost 1406 and Newport, Washington, milepost 1431, at five separate locations. The proposed changes include the installation of permanent "restricted speed" signs at proper locations.

The reasons given for the proposed changes are: the lack and prohibitive installation costs of A.C. power, replacement and disposal costs of primary batteries every 18 months, high vandalism rates, and to facilitate the cleaning of debris from the ditches.

Docket No. FRA–1998–4696

BS–AP–No. 3486

Applicant: Burlington Northern and Santa Fe Railway Company, Mr. William G. Peterson, Director Signal Engineering, 4515 Kansas Avenue, Kansas City, Kansas 66106

Burlington Northern and Santa Fe Railway seeks approval of the proposed retirement of Tower 16 Interlocking, milepost 645.6, and the approximately 400-foot reduction of the traffic control system limits, on the single main track, near South Sherman, Texas, milepost 645.5, on the Texas Division, Madill Subdivision, associated with the removal of the TNER crossing diamond. The proposed changes consist of the discontinuance and removal of all associated controlled and interlocked signals, conversion of the Old Frisco Main, power-operated switch to a spring switch, conversion of existing TNER power-operated switch to hand operation, discontinuance and removal of the power-operated derail on the TNER connection, and designation of the existing "Restricted Limits" operations between South Sherman, milepost 645.5 and Hank, milepost 647.7, to Track Warrant Control.

The reason given for the proposed changes is that the switches involved are presently controlled by the Interlocking operator, which will be retired with removal of the diamond.

Docket No. FRA–1998–4697

BS–AP–No. 3487

Applicant: CSX Transportation, Incorporated, Mr. R.M. Kadlick, Chief Engineer Train Control, 500 Water Street (S/C J–350), Jacksonville, Florida 32202

CSX Transportation, Incorporated seeks approval of the proposed modification of the traffic control system, on the single main, between milepost Z–37.0 and milepost Z–38.0, near Dante, Virginia, on the KP Subdivision, Appalachian Division, consisting of the conversion discontinuance and removal of controlled signals 38L and 38R.

The reason given for the proposed changes is to increase operating efficiency.

Docket No. FRA–1998–4698

BS–AP–No. 3488

Applicant: CSX Transportation, Incorporated, Mr. R.M. Kadlick, Chief Engineer Train Control, 500 Water Street (S/C J–350), Jacksonville, Florida 32202

CSX Transportation, Incorporated seeks approval of the proposed discontinuance and removal of the automatic block signal system, on the single and two main tracks, between FD Cabin, milepost CLS–65.2 and Huff Junction, milepost CLS–78.9, West Virginia, on the Logan Subdivision, C&O Business Unit, a distance of approximately 13.7 miles. The proposed method of operation will be by a Direct Traffic Control Block System between milepost CLS–67.1 and milepost CLS–78.9, and Rule 105 between milepost CLS–65.2 and milepost CLS–67.1.

The reason given for the proposed changes is to eliminate facilities no longer needed for present day operation.

Docket No. FRA–1998–4699

BS–AP–No. 3489

Applicant: CSX Transportation, Incorporated, Mr. R.M. Kadlick, Chief Engineer Train Control, 500 Water Street (S/C J–350), Jacksonville, Florida 32202

CSX Transportation, Incorporated seeks approval of the proposed modification of the traffic control and automatic block signal systems, on the two main tracks, between a milepost BG–89 and milepost BG–107, near Newton Falls, Ohio, on the New Castle Subdivision, Cumberland Division, consisting of the following:

1. Discontinuance and removal of absolute controlled signals 3R, L3A, and L3B, at West Switch, milepost BG–105.31, and conversion of the power-operated switch to hand operation;
2. Discontinuance and removal of absolute controlled signals R5A, L5, R11, L11A, and L11B, at FS Tower, milepost BG–103.90, and conversion of the three power-operated switches to hand operation;
3. Discontinuance and removal of absolute controlled signals R13A, R13B, and LB, at East Switch, milepost BG–102.52, and conversion of the power-operated switch to hand operation;
4. Discontinuance and removal of absolute controlled signals 2R, 2L, and E, near milepost BG–98.5, and conversion of the existing spring switch to hand operation;
5. Discontinuance and removal of absolute controlled signals 6RA, 6RB, and 6L, near milepost BG–96.2, and conversion of the power-operated switch to hand operation;
6. Discontinuance and removal of absolute controlled signals 18LA, 18LB, and 14R, near milepost BG–95.65, and conversion of the power-operated switch to hand operation; and
7. Discontinuance and removal of absolute controlled signals 20RA, 20RB, W1, near milepost BG–94.5, and conversion of the existing spring switch to hand operation.

The reason given for the proposed changes is to increase efficiency and eliminate facilities no longer needed in present day operation.

Docket No. FRA–1998–4700

BS–AP–No. 3491

Applicant: Consolidated Rail Corporation, CSX Transportation, Incorporated, and Norfolk Southern Corporation, Mr. J.F. Noffsinger, Chief Engineer—C&S Assets, 2001 Market Street, P.O. Box 41410, Philadelphia, Pennsylvania 19101–1410.

The Consolidated Rail Corporation (Conrail), CSX Transportation, Incorporated, and Norfolk Southern Corporation, jointly seek approval of the proposed discontinuance and removal of "CP Short" Interlocking, milepost 17.9, near Cleveland, Ohio, on Conrail's Dearborn Division, where two main tracks of the Short Line, cross at grade, the single main track of the Clark Branch. The proposal consists of the discontinuance and removal of all controlled signals, and conversion of the all remaining switches to hand operation.

The reason given for the proposed changes is to retire facilities no longer needed for present operation.

Any interested party desiring to protest the granting of an application shall set forth specifically the grounds upon which the protest is made, and contain a concise statement of the interest of the Protestant in the proceeding. The original and two copies of the protest shall be filed with the Associate Administrator for Safety, FRA, 400 Seventh Street, S.W., Mail Stop 25, Washington, D.C. 20590 within 30 calendar days of the date of publication of this notice. Additionally, one copy of the protest shall be furnished to the applicant at the address listed above.

FRA expects to be able to determine these matters without an oral hearing. However, if a specific request for an oral hearing is accompanied by a showing that the party is unable to adequately present his or her position by written statements, an application may be set for public hearing.

Issued in Washington, D.C. on October 30, 1998.

Grady C. Cothen, Jr.

Deputy Associate Administrator for Safety Standards and Program Development.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[Finance Docket No. 33556]

Canadian National Railway Company, Grand Trunk Corporation, and Grand Trunk Western Railroad Incorporated—Control—Illinois Central Corporation, Illinois Central Railroad Company, Chicago, Central and Pacific Railroad Company, and Cedar River Railroad Company

AGENCY: Surface Transportation Board.

ACTION: Decision No. 19; Notice of Availability of Draft Environmental Assessment and 30-day public comment period.

SUMMARY: The Surface Transportation Board's (Board) Section of Environmental Analysis (SEA) issued a Draft Environmental Assessment (Draft EA) for the proposed acquisition of control of Illinois Central Corporation and its railroad affiliates (IC) by Canadian National Railway Company (CN). The Draft EA is available for public review and comment for 30 days. Public comments are due by December 11, 1998. Any interested party may request a copy of the Draft EA or submit comments on the Draft EA by following the procedures discussed below. The Draft EA addresses potential acquisition-related environmental impacts and includes SEA's preliminary environmental mitigation recommendations. In addition, the Draft EA includes a Safety Integration Plan prepared by CN and IC that explains how they propose to safely integrate their separate operations if the Board approves the proposed acquisition. After fully considering all public comments, SEA will consult with appropriate public agencies and conduct additional environmental analysis, as appropriate, in preparing a Final Environmental Assessment (Final EA). SEA plans to issue the Final EA prior to the Board's Oral Argument and Voting Conference, which are currently scheduled for March 1999. In making its final decision on the proposed acquisition, the Board will consider the entire environmental record, including all public comments; the Draft EA; and the Final EA, including SEA's environmental mitigation recommendations. The Board plans to serve the final written decision on May 25, 1999. Any party may file an administrative appeal within 20 days of the Board's final written decision.

DATES: The Draft EA is available for public review and comment for 30 days. Public comments are due by December 11, 1998.

ADDRESSES: All interested agencies, organizations, and individuals are encouraged to comment on the Draft EA by submitting written comments (include an original plus 10 copies) to the address listed below by December 11, 1998, the close of the comment period:

Office of the Secretary, Case Control Unit, Finance Docket No. 33556, Surface Transportation Board, 1925 K Street, N.W., Washington, DC 20423–001, Attn: Elaine K. Kaiser, Environmental Project Director, Environmental Filing

FOR FURTHER INFORMATION CONTACT: To request a copy of the Draft EA or further information on the proposed CN/IC acquisition, interested parties may call SEA's toll-free Environmental Hotline at 1–888–869–1997 (TDD for the hearing impaired: (202) 565–1695), or access SEA's website for the CN/IC acquisition at http://www.cnicacquisition.com. For additional information regarding environmental issues, or the environmental review process, contact SEA's Project Manager for the proposed CN/IC acquisition, Michael Dalton, at (202) 565–1530.

SUPPLEMENTARY INFORMATION: On July 15, 1998, CN and IC, collectively referred to as CN/IC or applicants, filed a joint application [1] with the Board seeking authority for CN to acquire control of IC. The proposed CN/IC system would extend to both the east and west coasts of North America and the Gulf of Mexico. The Chicago area would serve as the hub of the combined system. This new system would cover approximately 18,670 miles of rail lines and related facilities, of which approximately 4,520 miles would be in the United States. The applicants state that integrating CN and IC operations would allow both rail systems to provide more reliable, efficient, and competitive service. The applicants also state that they anticipate relatively minor changes in rail operations as a result of the proposed acquisition. The applicants have proposed no rail line abandonments and only five minor construction projects (one rail line connection and four rail yard bypass tracks) as part of the proposed acquisition.

By the Board, Elaine K. Kaiser, Chief of the Section of Environmental Analysis.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

[1] *Canadian National Railway Company, Grand Trunk Corporation, and Grand Trunk Western Railroad Incorporated—Control—Illinois Central Corporation, Illinois Central Railroad Company, Chicago, Central and Pacific Railroad Company, and Cedar River Railroad Company*, STB Finance Docket No. 33556.

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Docket No. AB–531 (Sub–No. 2X)]

Pioneer Valley Railroad Company, Inc.—Abandonment Exemption—in Hampshire County, MA

Pioneer Valley Railroad Company, Inc. (PVRR) has filed a notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments* to abandon an approximately 0.26-mile line of railroad from milepost 9.40 at the Easthampton/Southampton border to milepost 9.14 at the south side of Coleman Road in Southampton, Hampshire County, MA. The line traverses United States Postal Service Zip Code 01073.

PVRR has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) any overhead traffic formerly handled on the line can be rerouted over other lines; (3) no formal complaint filed by a user of rail service on the line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Surface Transportation Board (Board) or with any U.S. District Court or has been decided in favor of complainant within the 2-year period; and (4) the requirements at 49 CFR 1105.7 (environmental reports), 49 CFR 1105.8 (historic reports), 49 CFR 1105.11 (transmittal letter), 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the abandonment shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed. Provided no formal expression of intent to file an offer of financial assistance (OFA) has been received, this exemption will be effective on December 10, 1998, unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues,[1] formal expressions of intent to file an OFA under 49 CFR 1152.27(c)(2),[2] and trail use/rail banking requests under 49 CFR 1152.29 must be filed by November 20, 1998. Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by November 30, 1998, with: Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, N.W., Washington, DC 20423.

[1] The Board will grant a stay if an informed decision on environmental issues (whether raised by a party or by the Board's Section of Environmental Analysis in its independent investigation) cannot be made before the exemption's effective date. *See Exemption of Out-of-Service Rail Lines*, 5 I.C.C.2d 377 (1989). Any request for a stay should be filed as soon as possible so that the Board may take appropriate action before the exemption's effective date.

A copy of any petition filed with the Board should be sent to applicant's representative: Thomas J. Litwiler, Oppenheimer Wolff & Donnelly, Two Prudential Plaza, 45th Floor, 180 North Stetson Avenue, Chicago, IL 60601.

If the verified notice contains false or misleading information, the exemption is void *ab initio*.

PVRR has filed an environmental report which addresses the abandonment's effects, if any, on the environment and historic resources. The Section of Environmental Analysis (SEA) will issue an environmental assessment (EA) by November 13, 1998. Interested persons may obtain a copy of the EA by writing to SEA (Room 500, Surface Transportation Board, Washington, DC 20423) or by calling SEA, at (202) 565–1545. Comments on environmental and historic preservation matters must be filed within 15 days after the EA becomes available to the public.

Environmental, historic preservation, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Pursuant to the provisions of 49 CFR 1152.29(e)(2), PVRR shall file a notice of consummation with the Board to signify that it has exercised the authority granted and fully abandoned the line. If consummation has not been effected by PVRR's filing of a notice of consummation by November 10, 1999, and there are no legal or regulatory barriers to consummation, the authority to abandon will automatically expire.

Board decisions and notices are available on our website at "WWW.STB.DOT.GOV."

Decided: November 3, 1998.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

[FR Doc. 98–29982 Filed 11–6–98; 8:45 am]

BILLING CODE 4915–00–P

[2] Each offer of financial assistance must be accompanied by the filing fee, which currently is set at $1000. *See* 49 CFR 1002.2(f)(25).

Submission for OMB Review; Comment Request

November 2, 1998.

The Department of the Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Pub. L. 104–13. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

DATES: Written comments should be received on or before December 9, 1998 to be assured of consideration.

Departmental Offices/Office of Foreign Assets Control

OMB Number: 1505–0169.

Form Number: None.

Type of Review: Extension.

Title: Sudanese Sanctions Regulations.

Description: Submissions will provide the United States Government with information to be used in implementing Executive Order 13067 and enforcing sanctions against the Government of Sudan. These information collections will assist in controlling financial transactions involving the Government of Sudan.

Respondents: Business or other for-profit, Individuals or households, Not-for-profit institutions.

Estimated Number of Respondents/Recordkeepers: 50.

Estimated Burden Hours Per Respondent/Recordkeeper: 2 hours.

Frequency of Response: On occasion.

Estimated Total Reporting/Recordkeeping Burden: 100 hours.

Clearance Officer: Lois K. Holland (202) 622–1563, Departmental Offices, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220

OMB Reviewer: Alexander T. Hunt (202) 395–7860, Office of Management and Budget, Room 10202, New Executive Office Building, Washington, DC 20503.

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

October 27, 1998.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

DATES: Written comments should be received on or before December 9, 1998 to be assured of consideration.

Internal Revenue Service (IRS)

OMB Number: 1545–0016.

Form Number: IRS Form 706–A.

Type of Review: Revision.

Title: United States Additional Estate Tax Return.

Description: Form 706–A is used by individuals to compute and pay the additional estate taxes due under Code section 2032A(c). IRS uses the information to determine that the taxes have been properly computed. The form is also used for the basis election of section 1016(c)(1).

Respondents: Individuals or households.

Estimated Number of Respondents/ Recordkeepers: 130,000.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping—40 min.
Learning about the law or the form—1 hr., 6 min.
Preparing the form—1 hr., 52 min.
Copying, assembling, and sending the form to the IRS—1 hr., 3 min.

Frequency of Response: Annually.

Estimated Total Reporting/ Recordkeeping Burden: 608,400 hours.

OMB Number: 1545–0021.

Form Number: IRS Form 709–A.

Type of Review: Extension.

Title: United States Short Form Gift Tax Return.

Description: Form 709–A is used to report gifts that would be taxable that they are "split" between husband and wife. The form is a simplified version of Form 709, designed to relieve these gift/ taxpayers of the burden of filing Form 709. IRS uses the information to assure that "gift-splitting" was properly elected.

Respondents: Individuals or households.

Estimated Number of Respondents/ Recordkeepers: Annually.

Estimated Burden Hours Per Respondent/Recordkeeper: 45,100 hours.

Frequency of Response: Annually.

Estimated Total Reporting/ Recordkeeping Burden: 44,100 hours.

OMB Number: 1545–0023.

Form Number: IRS Form 720.

Type of Review: Extension.

Title: Quarterly Federal Excise Tax Return.

Description: The information supplied on Form 720 is used by the IRS to determine the correct tax liability. Additionally, the data is reported by the IRS to Treasury so that funds may be transferred from the general revenue fund to the appropriate trust funds.

Respondents: Business or other for-profit, Individuals or households, Not-for-profit institutions, Farms, Federal Government, State, Local or Tribal Government

Estimated Number of Respondents/ Recordkeepers: 50,000.

Estimated Burden Hours Per Respondent/Recordkeeper:

Form	Recordkeeping	Learning about the law or the form	Preparing and sending the form to the IRS
720	23 hr., 41 min.	2 hr., 23 min.	6 hr., 29 min.
Schedule A	2 hr., 52 min.	3 min..	
Schedule C:.			
Part I	1 hr., 55 min.	6 min.	8 min.
Part II	20 hr., 20 min.	6 min.	20 min.
Part III	14 min.	6 min.	7 min.

Frequency of Response: Quarterly.

Estimated Total Reporting/ Recordkeeping Burden: 3,691,999 hours.

OMB Number: 1545–0150.

Form Number: IRS Form 2848.

Type of Review: Extension.

Title: Power of Attorney and Declaration of Representative.

Description: Form 2848 is used to authorize someone to act for the respondent in tax matters. It grants all powers that the taxpayer has except signing a return and cashing refund checks. Data is used to identify representatives and to ensure that confidential information is not divulged to unauthorized persons. Also used to input representative on CAF (Central Authorization File).

Respondents: Individuals or households, Business or other for-profit, Not-for-profit institutions, Farms.

Estimated Number of Respondents/ Recordkeepers: 800,000.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping—20 min.
Learning about the law or the form—29 min.
Preparing the form—29 min.
Copying, assembling, and sending the form to the IRS—35 min.

Frequency of Response: Annually.

Estimated Total Reporting/ Recordkeeping Burden: 1,504,000 hours.

OMB Number: 1545–0531.

Form Number: IRS Form 706–NA.

Type of Review: Extension.

Title: United States Estate (and Generation-Skipping Transfer) Tax Return, Estate of Nonresident Not a Citizen of the United States.

Description: Under section 6018, executors must file estate tax returns for nonresident noncitizens who had property in the United States. Executors use Form 706–NA for this purpose. IRS uses the information to determine correct tax and credits.

Respondents: Individuals or households.

Estimated Number of Respondents/ Recordkeepers: 300.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping—1 hr., 38 min.
Learning about the law or the form—32 min.
Preparing the form—1 hr., 46 min.
Copying, assembling, and sending the form to the IRS—41 min.

Frequency of Response: Annually.

Estimated Total Reporting/ Recordkeeping Burden: 1,307 hours.

OMB Number: 1545–0790.

Form Number: IRS Form 8082.

Type of Review: Extension.

Title: Notice of Inconsistent Treatment or Administrative Adjustment Request (AAR).

Description: Internal Revenue Code (IRC) sections 6222 and 6227 require partners to notify ITS by filing Form 8082 when they (1) treat partnership items inconsistent with the partnership's treatment (6222), and (2) change previously reported partnership items (6227). Sections 6244 and 860F extend this requirement to shareholders of S corporations and residuals of REMICs. Also, sections 6241 and 6034A(c) extend this requirement to partners in electing large partnerships and beneficiaries of estates and trust.

Respondents: Business or other for-profit, Individuals or households, Farms.

Estimated Number of Respondents/ Recordkeepers: 10,600.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping—4 hr., 18 min.
Learning about the law or the form—42 min.
Preparing and sending the form to the IRS—48 min.

Frequency of Response: Annually.

Estimated Total Reporting/ Recordkeeping Burden: 61,480 hours.

OMB Number: 1545–1038.

Form Number: IRS Form 8703.

Type of Review: Extension.

Title: Annual Certification of a Residential Rental Project.

Description: Operators of qualified residential projects will use this form to certify annually that their projects meet the requirements of Internal Revenue Code (IRC) section 142(d). Operators are required to file this certification form under section 142(d)(7).

Respondents: Business or other for-profit.

Estimated Number of Respondents/ Recordkeepers: 6,000.

Estimated Burden Hours Per Respondent/Recordkeeper:

Recordkeeping—3 hr., 50 min.
Learning about the law and the form—1 hr. 17 min.
Preparing and sending the form to the IRS—1 hr., 25 min.

Frequency of Response: Annually.

Estimated Total Reporting/ Recordkeeping Burden: 39,180 hours.

OMB Number: 1545–1135.

Form Number: IRS Form 8817.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

November 2, 1998.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

DATES: Written comments should be received on or before December 9, 1998 to be assured of consideration.

Internal Revenue Service (IRS)

OMB Number: 1545–1349.

Form Number: None.

Type of Review: Extension.

Title: Cognitive and Psychological Research.

Description: The proposed research will improve the quality of data collection by examining the psychological and cognitive aspects of methods and procedures such as: Interviewing processes, forms redesign, survey and tax collection technology and operating procedures (internal and external in nature).

Respondents: Business and other for-profit, Individuals or households.

Estimated Number of Respondents: 22,000.

Estimated Burden Hours Per Respondent: 27 minutes.

Frequency of Response: Other (one-time only).

Estimated Total Reporting Burden: 10,000 hours.

Clearance Officer: Garrick Shear, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, NW, Washington, DC 20224.

OMB Reviewer: Alexander T. Hunt, (202) 395–7860, Office of Management and Budget, Room 10202, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Notice 98–52

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Notice 98–52, Notice on Nondiscriminatory Safe Harbors.

DATES: Written comments should be received on or before January 8, 1999 to be assured of consideration.

ADDRESSES: Direct all written comments to Garrick R. Shear, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the notice should be directed to Carol Savage, (202) 622–3945, Internal Revenue Service, room 5569, 1111 Constitution Avenue NW., Washington, DC 20224.

SUPPLEMENTARY INFORMATION:

Title: Notice on Nondiscriminatory Safe Harbors.

OMB Number: 1545–1624.

Notice Number: Notice 98–52.

Abstract: This notice provides guidance to plan administrators, plan sponsors, etc., regarding nondiscriminatory safe harbors with respect to Internal Revenue Code sections 401(k)(12) and 401(m)(11), as amended by the Small Business Job Protection Act of 1996. The safe harbor provisions pertain to the actual deferral percentage test and the actual contribution percentage test for cash or deferred arrangements and for defined contribution plans. To take advantage of the safe harbor provisions, plan sponsors must amend their plans to reflect the new law and must provide plan participants with an annual notice describing the benefits available under the plan.

Current Actions: There are no changes being made to the notice at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations, and not-for-profit institutions.

Estimated Number of Respondents: 60,000.

Estimated Time Per Respondent: 1 hour, 20 minutes.

Estimated Total Annual Burden Hours: 80,000.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: October 30, 1998.

Garrick R. Shear,

IRS Reports Clearance Officer.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Form 8866

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 8866, Interest Computation Under the Look-Back Method for Property Depreciated Under the Income Forecast Method.

DATES: Written comments should be received on or before January 8, 1999 to be assured of consideration.

ADDRESSES: Direct all written comments to Garrick R. Shear, Internal Revenue Service, room 5571, 1111 Constitution Avenue NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Carol Savage, (202) 622–3945, Internal Revenue Service, room 5569, 1111 Constitution Avenue NW., Washington, DC 20224.

SUPPLEMENTARY INFORMATION:

Title: Interest Computation Under the Look-Back Method for Property Depreciated Under the Income Forecast Method.

OMB Number: 1545–1622.

Form Number: Form 8866.

Abstract: Taxpayers depreciating property under the income forecast method and placed in service after September 13, 1995, must use Form 8866 to compute and report interest due or to be refunded under Internal Revenue Code 167(g)(2). The Internal Revenue Service uses the information on Form 8866 to determine if the interest has been figured correctly.

Current Actions: There are no changes being made to the form at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Individuals or households, and business or other for-profit organizations.

Estimated Number of Respondents: 5,000.

Estimated Time Per Respondent: 12 hours, 36 minutes.

Estimated Total Annual Burden Hours: 63,000.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. This list is also available online at http://www.nara.gov/fedreg.

The text of laws is not published in the **Federal Register** but may be ordered in "slip law" (individual pamphlet) form from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–1808). The text will also be made available on the Internet from GPO Access at http://www.access.gpo.gov/su_docs/. Some laws may not yet be available.

H.R. 678/P.L. 105–331
Thomas Alva Edison Commemorative Coin Act (Oct. 31, 1998; 112 Stat. 3073)

H.R. 1853/P.L. 105–332
Carl D. Perkins Vocational and Applied Technology Education Amendments of 1998 (Oct. 31, 1998; 112 Stat. 3076)

H.R. 2000/P.L. 105–333
ANCSA Land Bank Protection Act of 1998 (Oct. 31, 1998; 112 Stat. 3129)

H.R. 2327/P.L. 105–334
Drive for Teen Employment Act (Oct. 31, 1998; 112 Stat. 3137)

H.R. 3830/P.L. 105–335
Utah Schools and Lands Exchange Act of 1998 (Oct. 31, 1998; 112 Stat. 3139)

H.R. 3874/P.L. 105–336
William F. Goodling Child Nutrition Reauthorization Act of 1998 (Oct. 31, 1998; 112 Stat. 3143)

H.R. 4259/P.L. 105–337
Haskell Indian Nations University and Southwestern Indian Polytechnic Institute Administrative Systems Act of 1998 (Oct. 31, 1998; 112 Stat. 3171)

H.R. 4655/P.L. 105–338
Iraq Liberation Act of 1998 (Oct. 31, 1998; 112 Stat. 3178)

S. 1021/P.L. 105–339
Veterans Employment Opportunities Act of 1998 (Oct. 31, 1998; 112 Stat. 3182)

S. 1722/P.L. 105–340
Women's Health Research and Prevention Amendments of 1998 (Oct. 31, 1998; 112 Stat. 3191)

S. 2285/P.L. 105–341
Women's Progress Commemoration Act (Oct. 31, 1998; 112 Stat. 3196)

S. 2240/P.L. 105–342
Adams National Historical Park Act of 1998 (Nov. 2, 1998; 112 Stat. 3200)

S. 2246/P.L. 105–343
To amend the Act which established the Frederick Law Olmsted National Historic Site, in the Commonwealth of Massachusetts, by modifying the boundary, and for other purposes. (Nov. 2, 1998; 112 Stat. 3203)

S. 2413/P.L. 105–344
Prohibiting the conveyance of Woodland Lake Park tract in Apache-Sitgreaves National Forest in the State of Arizona unless the conveyance is made to the town of Pinetop-Lakeside or is authorized by Act of Congress. (Nov. 2, 1998; 112 Stat. 3204)

S. 2427/P.L. 105–345
To amend the Omnibus Parks and Public Lands Management Act of 1996 to extend the legislative authority for the Black Patriots Foundation to establish a commemorative work. (Nov. 2, 1998; 112 Stat. 3205)

S. 2505/P.L. 105–346
To direct the Secretary of the Interior to convey title to the Tunnison Lab Hagerman Field Station in Gooding County, Idaho, to the University of Idaho. (Nov. 2, 1998; 112 Stat. 3206)

S. 2561/P.L. 105–347
Consumer Reporting Employment Clarification Act of 1998 (Nov. 2, 1998; 112 Stat. 3208)

S.J. Res. 51/P.L. 105–348
Granting the consent of Congress to the Potomac Highlands Airport Authority Compact entered into between the States of Maryland and West Virginia. (Nov. 2, 1998; 112 Stat. 3212)

S.J. Res. 58/P.L. 105–349
Recognizing the accomplishments of Inspectors General since their creation in 1978 in preventing and detecting waste, fraud, abuse, and mismanagement, and in promoting economy, efficiency, and effectiveness in the Federal Government. (Nov. 2, 1998; 112 Stat. 3216)

H.J. Res. 138/P.L. 105–350
Appointing the day for the convening of the first session of the One Hundred Sixth Congress. (Nov. 3, 1998; 112 Stat. 3218)

S. 538/P.L. 105–351
To authorize the Secretary of the Interior to convey certain facilities of the Minidoka project to the Burley Irrigation District, and for other purposes. (Nov. 3, 1998; 112 Stat. 3219)

S. 744/P.L. 105–352
Fall River Water Users District Rural Water System Act of 1998 (Nov. 3, 1998; 112 Stat. 3222)

S. 1260/P.L. 105–353
Securities Litigation Uniform Standards Act of 1998 (Nov. 3, 1998; 112 Stat. 3227)

S. 2524/P.L. 105–354
To codify without substantive change laws related to Patriotic and National Observances, Ceremonies, and Organizations and to improve the United States Code. (Nov. 3, 1998; 112 Stat. 3238)

Last List November 5, 1998

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service of newly enacted public laws. To subscribe, send E-mail to **listproc@lucky.fed.gov** with the text message:

subscribe PUBLAWS-L Your Name.

Note: This service is strictly for E-mail notification of new public laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The CFR is available free on-line through the Government Printing Office's GPO Access Service at http://www.access.gpo.gov/nara/cfr/index.html. For information about GPO Access call the GPO User Support Team at 1-888-293-6498 (toll free) or 202-512-1530.

The annual rate for subscription to all revised paper volumes is $951.00 domestic, $237.75 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250–7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, Master Card, or Discover). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at **(202) 512–1800** from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to **(202) 512-2250**.

The Regulatory Plan

Statement by the Vice President

A key measure of success by which this Administration will be judged is our progress in improving the regulatory process. This, the Administration's fifth Regulatory Plan, describes the most significant upcoming regulatory actions. It documents the continuing efforts of agencies to develop regulations the right way—regulating only when necessary and tailoring regulations to achieve their purpose in the least costly manner.

Whether developing new regulations or modifying existing ones, agencies are committed to working with the regulated community to identify workable approaches. They are carefully analyzing the likely effects of various alternatives. Most importantly, regulations must be made as flexible and as clear as possible by writing them in plain language. This is vital to creating a government that works better and costs less, and to reinventing a regulatory system that benefits the American people.

Today, this Regulatory Plan is published along with a more comprehensive catalogue of other regulatory activities—the Unified Agenda of Federal Regulatory and Deregulatory Actions. Taken together, these documents provide a wealth of information about regulations being developed. They empower concerned citizens to be more fully involved in the process by informing them of upcoming regulatory proposals. It also encourages them to register their comments and thoughts.

This fifth Regulatory Plan reflects the hard work being done by all agencies. It highlights many examples of regulation being done the right way—evidence of a regulatory system that works for the American people by providing more benefits with fewer burdens. It also charts the progress that we have made in reinventing the regulatory process since 1993. Thank you for all of your efforts.

Al Gore

REGULATORY INFORMATION SERVICE CENTER

Introduction to The Regulatory Plan and the Unified Agenda of Federal Regulatory and Deregulatory Actions

AGENCY: Regulatory Information Service Center.

ACTION: Introduction to The Regulatory Plan and the Unified Agenda of Federal Regulatory and Deregulatory Actions.

SUMMARY: The Regulatory Flexibility Act requires that agencies publish semiannual regulatory agendas describing regulatory actions they are developing (5 U.S.C. 602). Executive Order 12866 "Regulatory Planning and Review" (58 FR 51735; October 4, 1993) and Office of Management and Budget memoranda implementing section 4 of that Order establish minimum standards for agencies' agendas, including specific types of information for each entry.

The Unified Agenda helps agencies fulfill all of these requirements. All Federal regulatory agencies have chosen to publish their regulatory agendas as part of this publication.

Section 4 of Executive Order 12866 also directs that, as part of their submissions to the October edition of the Unified Agenda, agencies prepare a regulatory plan of the most important significant regulatory actions that the agency reasonably expects to issue in proposed or final form during the upcoming fiscal year. The agency plans appear as the first section of this joint publication; the agency agendas follow.

The Regulatory Plan begins with Vice President Gore's statement, followed by an introduction, and then the regulatory plans of 29 Federal departments and agencies. Each of these agencies has also submitted a regulatory agenda describing its other regulatory actions. The regulatory agendas for these and 33 other Federal agencies appear in Parts III-LXIV of this issue of the **Federal Register**, followed by indexes to both Plan and Agenda entries.

We welcome your comments on this joint publication and your suggestions for improving future ones.

ADDRESSES: Regulatory Information Service Center (MI), General Services Administration, 1800 F Street NW., Suite 3033, Washington, DC 20405.

Electronic Availability

All editions of **The Regulatory Plan** and the **Unified Agenda of Federal Regulatory and Deregulatory Actions** since October 1995 are available in electronic form. You can search the Plan and the Agenda on the World Wide Web at:

http://reginfo.gov

You may also search the Plan and the Agenda on the Government Printing Office's GPO Access, which is accessible through:

http://www.access.gpo.gov

FOR FURTHER INFORMATION CONTACT: For further information about specific regulatory actions, please refer to the Agency Contact listed for each entry.

INTRODUCTION TO THE UNIFIED AGENDA AND THE REGULATORY PLAN

I. What Are the Unified Agenda and The Regulatory Plan?

The **Unified Agenda of Federal Regulatory and Deregulatory Actions** (Unified Agenda) provides information, in a uniform format, about regulations that the Government is considering or reviewing. The Unified Agenda has appeared in the **Federal Register** twice each year since 1983. This edition includes regulatory agendas from 62 Federal departments and agencies. Agencies of the United States Congress are not included.

The Regulatory Plan (Plan) serves as a defining statement of the Administration's regulatory and deregulatory policies and priorities. The Plan is part of the fall edition of the Unified Agenda. The regulatory plan of each participating agency contains two sections: (1) A narrative statement of its regulatory priorities and (2) a description of the most important significant regulatory and deregulatory actions that the agency reasonably expects to issue in proposed or final form during the upcoming fiscal year. This edition includes the regulatory plans of 30 departments and agencies.

The Regulatory Information Service Center (the Center) compiles Unified Agenda and the Plan for the Office of Information and Regulatory Affairs (OIRA), part of the Office of Management and Budget. OIRA is responsible for overseeing the Federal Government's regulatory, paperwork, and information resource management activities, including implementation of E.O. 12866. The Center also provides information about Federal regulatory activity to the President and his Executive Office, the Congress, agency managers, and the public.

The activities included in the Agenda are, in general, those that will have a regulatory action within the next 12 months. Agencies may include activities that will have a longer timeframe than 12 months. Agency agendas also show actions or reviews completed or withdrawn since the last agenda. The agendas do not contain regulations that were excluded under Executive Order 12866, such as those concerning military or foreign affairs functions or regulations related to agency organization, management, or personnel matters.

A. What Are the Limitations of the Information?

Agencies prepared entries for this publication to give the public notice of their plans to review, propose, and issue regulations. They have tried to predict their activities over the next 12 months as accurately as possible, but dates and schedules are subject to change. Agencies may withdraw some of the regulations now under development, and they may issue or propose other regulations not included in their agendas. Agency actions in the rulemaking process may occur before or after the dates they have listed.

The Regulatory Plan and the Unified Agenda do not create a legal obligation on agencies to adhere to schedules within them or to confine their regulatory activities to those regulations that appear in these publications. The information in this edition is accurate as of October 1, 1998, in the judgment of the submitting agencies, except as otherwise noted by the agencies. In addition, some agencies submitted updates after that date.

Where applicable, individual actions will be subject to review for compliance with applicable Executive orders, the Regulatory Flexibility Act, and the Paperwork Reduction Act at appropriate points in the regulatory process.

II. Why Are the Unified Agenda and The Regulatory Plan Published?

The Unified Agenda helps agencies comply with their obligations under the Regulatory Flexibility Act and various Executive orders and other statutes.

Regulatory Flexibility Act

The *Regulatory Flexibility Act* requires agencies to identify those rules that may have a significant economic impact on a substantial number of small entities (5 U.S.C. 602). Agencies meet that requirement by including the information in their submissions for the Unified Agenda. Agencies may also indicate those regulations that they are reviewing as part of their periodic review of existing rules under the Regulatory Flexibility Act (5 U.S.C. 610).

Executive Order 12866

Executive Order 12866 entitled "Regulatory Planning and Review" (September 30, 1993; 58 FR 51735) requires covered agencies to prepare an agenda of all regulations under development or review. The Order also requires that certain agencies prepare annually a regulatory plan of their "most important significant regulatory actions," which appears as part of the October Unified Agenda.

Executive Order 12875

Executive Order 12875 entitled "Enhancing the Intergovernmental Partnership" (October 26, 1993; 58 FR 58093) directs agencies to reduce the imposition of unfunded mandates upon State, local, and tribal governments. The Order directs agencies that are proposing to impose nonstatutory unfunded mandates to consult with affected governmental officials and document their concerns, report those concerns to the Director of the Office of Management and Budget, and explain the agency's position supporting the continuing need to issue the regulation in light of those concerns. As part of this effort, agencies include in their submissions for the Unified Agenda information on whether their regulatory actions may have an effect on the various levels of government.

Unfunded Mandates Reform Act of 1995

The *Unfunded Mandates Reform Act of 1995* (P.L. 104-4, title II) requires agencies to prepare written assessments of the costs and benefits of significant regulatory actions "that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more . . . in any 1 year . . . ." The requirement does not apply to independent regulatory agencies, nor does it apply to certain subject areas excluded by section 4 of the Act. Affected agencies identify in the Unified Agenda those regulatory actions they believe are subject to title II of the Act.

Small Business Regulatory Enforcement Fairness Act

The *Small Business Regulatory Enforcement Fairness Act* (P.L. 104-121, title II) established a procedure for congressional review of rules (5 U.S.C. 801 *et seq.*), which defers, unless exempted, the effective date of a "major" rule for at least 60 days from the publication of the final rule in the **Federal Register**. The Act specifies that a rule is "major" if it has resulted or is likely to result in an annual effect on the economy of $100 million or more or meets other criteria specified in that Act. If the issuing agency believes that a rule may be major, it indicates this under the "Priority" heading of the entry. The Act provides that the Administrator of OIRA will make the final determination as to whether a rule is major.

III. How Are The Regulatory Plan and the Unified Agenda Organized?

The Regulatory Plan appears in Part II of this edition of the **Federal Register**. Following the Plan, each agency's agenda appears as a separate part. The sections of the Plan and the parts of the Unified Agenda are organized alphabetically in four groups: Cabinet departments; other executive agencies; the Federal Acquisition Regulation, a joint authority (Agenda only); and independent regulatory agencies. Departments may in turn be divided into subagencies.

Each department's or agency's section of the Plan contains a narrative statement of regulatory priorities followed by a description of the department's or agency's most important significant regulatory and deregulatory actions. Each part of the Agenda begins with a preamble providing information specific to that part.

In the Agenda, each agency presents its entries under one of five headings according to the rulemaking stage of the entry. In the Plan, only the first three stages are applicable. The stages are:

1. *Prerule Stage*—actions agencies will undertake to determine whether or how to initiate rulemaking. Such actions occur prior to a Notice of Proposed Rulemaking (NPRM) and may include Advance Notices of Proposed Rulemaking (ANPRMs) and reviews of existing regulations.

2. *Proposed Rule Stage*—actions for which agencies plan to publish a Notice of Proposed Rulemaking as the next step in their rulemaking process or for which the closing date of the NPRM Comment Period is the next step.

3. *Final Rule Stage*—actions for which agencies plan to publish a final rule or an interim final rule or to take other final action as the next step in their rulemaking process.

4. *Long-Term Actions*—items under development but for which the agency does not expect to have a regulatory action within the 12 months after publication of this edition of the Unified Agenda. Some of the entries in this section may contain abbreviated information.

5. *Completed Actions*—actions or reviews the agency has completed or withdrawn since publishing its last agenda. This section also includes items the agency began and completed between issues of the Agenda.

In the Agenda, an agency may use subheadings to identify regulations that it has grouped according to particular topics. When these subheadings are used, they appear above the title of the first regulation in each group.

A bullet (•) preceding an entry indicates that the entry appears in this publication for the first time.

All entries are numbered sequentially from the beginning of the Plan to the end of the Unified Agenda. The sequence number preceding the title of each entry identifies the location of the entry in this edition. The same number is used in the indexes to enable readers to find entries on specific subjects.

For each agency that requests it, the Center provides a table of contents that appears in the Agenda after the agency preamble. In addition to listing all the agency's Agenda entries, the tables of contents identify each Plan entry by a cross-reference in bold type.

This publication contains five indexes. The first two indexes list the regulatory actions that agencies believe may have effects on small entities. The first lists the regulatory actions for which agencies believe that the Regulatory Flexibility Act may require a Regulatory Flexibility Analysis. The second lists additional regulatory actions for which agencies have chosen to indicate that some impact on small entities is likely though a Regulatory Flexibility Analysis may not be required. The third index lists entries that agencies believe may have effects on levels of government. The fourth index lists entries for which agencies have indicated that they are conducting a periodic review under section 610(c) of the Regulatory Flexibility Act. The fifth is a subject index based on the **Federal Register Thesaurus of Indexing Terms**.

Congress generally authorizes a single Federal agency to implement, through regulation, a specific policy objective. Sometimes, however, a statute may require that several agencies issue regulations to accomplish the objective. In such cases, the agencies, working with a central coordinator, jointly publish the rulemaking documents. These regulations are known as Governmentwide common rules. Agencies participating in developing common rules report them in their individual sections of the Unified Agenda.

This edition of the Unified Agenda contains four Governmentwide common rules:

- New Restrictions on Lobbying
- Administrative Requirements for Grantees To Reflect Single Audit Act Amendments
- Nondiscrimination on the Basis of Sex in Federally Assisted Programs and Activities
- Protection of Human Subjects

IV. What Information Appears for Each Entry?

All entries in the Unified Agenda contain uniform data elements including, at a minimum, the following information:

Title of the Regulation. The notation "Section 610 Review" following the title indicates that the agency has selected the rule for its periodic review of existing rules under the Regulatory Flexibility Act (5 U.S.C. 610(c)).

Priority. Agencies assign each entry to one of the following five categories of significance.

(1) Economically Significant

As defined in Executive Order 12866, a rulemaking action that will have an annual effect on the economy of $100 million or more or will adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities. The definition of an "economically significant" rule is similar but not identical to the definition of a "major" rule under 5 U.S.C. 801 (P.L. 104-121). (See below.)

(2) Other Significant

A rulemaking that is not economically significant but is considered significant by the agency. This category includes rules that the agency anticipates will be reviewed under E.O. 12866 or rules that are a priority of the agency head. These rules may or may not be included in the agency's regulatory plan.

(3) Substantive, Nonsignificant

A rulemaking that has substantive impacts but is neither Significant, nor Routine and Frequent, nor Informational/Administrative/Other.

(4) Routine and Frequent

A rulemaking that is a specific case of a multiple recurring application of a regulatory program in the Code of Federal Regulations and that does not alter the body of the regulation.

(5) Informational/Administrative/Other

A rulemaking that is primarily informational or pertains to agency matters not central to accomplishing the agency's regulatory mandate but that the agency places in the Unified Agenda to inform the public of the activity.

In addition, if an agency believes that a rule may be "major" under 5 U.S.C. 801 (P.L. 104-121) because it has resulted or is likely to result in an annual effect on the economy of $100 million or more or meets other criteria specified in that Act, the agency indicates this under the "Priority" heading. (The Act provides that the Administrator of the Office of Information and Regulatory Affairs will make the final determination as to whether a rule is major.)

Unfunded Mandates—whether the rule is covered by section 202 of the Unfunded Mandates Reform Act of 1995 (P.L. 104-4). The Act requires that, before issuing an NPRM likely to result in a mandate that may result in expenditures by State, local, and tribal governments, in the aggregate, or by the private sector of more than $100 million in 1 year, agencies, other than independent regulatory agencies, shall prepare a written statement containing an assessment of the anticipated costs and benefits of the Federal mandate. If the agency believes the entry is not subject to the Act, this data element will not be printed.

Reinvention—whether the action is part of the Administration's Reinventing Government effort and, if so, whether the result will be elimination of existing text in the Code of Federal Regulations (CFR) or revision of text in the CFR to reduce burden or duplication or to streamline requirements. If the action is not specifically part of this effort, the data element will not be printed.

Legal Authority—the section(s) of the United States Code (U.S.C.) or Public Law (P.L.) or the Executive order (E.O.) that authorize(s) the regulatory action. Agencies may provide popular name references to laws in addition to these citations.

CFR Citation—the section(s) of the Code of Federal Regulations that will be affected by the action.

Legal Deadline—whether the rule is subject to a statutory or judicial deadline, the date of that deadline, and whether the deadline pertains to an NPRM, a Final Action, or some other action.

Abstract—a brief description of the problem the regulation will address; the need for a Federal solution; to the extent available, alternatives that the agency is considering to address the problem; and potential costs and benefits of the action.

Timetable—the dates and citations (if available) for all past steps and a projected date for at least the next step for the regulatory action. If a date appears in this section as 00/00/00, the date of the action is currently undetermined. A date printed in the form 01/00/99 means the agency is predicting the month and year the action will take place but not the day it will occur. "Undetermined" indicates the agency does not know what action it will take next. Dates after 1999 are printed in the same form as other dates, using the last two digits of the year. (Note that 00/00/00 refers to an unspecified date some time in the future, with no specific relation to the year 2000.)

Regulatory Flexibility Analysis Required—whether an analysis is required by the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) because the rule is likely to have a significant economic impact on a substantial number of small entities as defined by the Act.

Small Entities Affected—the types of small entities (businesses, governmental jurisdictions, or organizations) on which the rule is likely to have an impact as defined by the Regulatory Flexibility Act. Some agencies have chosen to indicate likely effects on small entities even though they believe that a Regulatory Flexibility Analysis will not be required.

Government Levels Affected—whether the rule is expected to affect levels of government and, if so, whether the governments are State, local, tribal, or Federal.

Agency Contact—the name, title, address, and phone number of a person in the agency who is knowledgeable about the regulation. If available, the agency may also provide the fax number, e-mail address, and TDD for the agency contact.

Procurement—whether the action is related to procurement and, if so, whether it is required by statute and whether it involves a paperwork burden. The Procurement heading appears only if the entry is related to procurement.

Some agencies have provided the following optional information:

Compliance Cost to the Public—the estimated gross compliance cost of the action.

Affected Sectors—the industrial sectors that the action may most affect, either directly or indirectly. Affected Sectors are identified by North American Industry Classification System (NAICS) codes.

Entries appearing in **The Regulatory Plan** should also contain the following information:

Statement of Need—a description of the need for the regulatory action.

Summary of the Legal Basis—a description of the legal basis for the action, including whether any aspect of the action is required by statute or court order.

Alternatives—a description of the alternatives the agency has considered or will consider as required by section 4(c)(1)(B) of E.O. 12866.

Anticipated Costs and Benefits—a description of preliminary estimates of the anticipated costs and benefits of the action.

Risks—a description of the magnitude of the risk the action addresses, the amount by which the agency expects the action to reduce this risk, and the relation of the risk and this risk reduction effort to other risks and risk reduction efforts within the agency's jurisdiction.

V. Abbreviations

The following abbreviations appear throughout this publication:

ANPRM—An Advance Notice of Proposed Rulemaking is a preliminary notice, published in the **Federal Register**, announcing that an agency is considering a regulatory action. The agency issues an ANPRM before it develops a detailed proposed rule. The ANPRM describes the general area that may be subject to regulation and usually asks for public comment on the issues and options being discussed. An ANPRM is issued only when an agency believes it needs to gather more information before proceeding to a notice of proposed rulemaking.

CFR—The Code of Federal Regulations is an annual codification of the general and permanent regulations published in the **Federal Register** by the departments and agencies of the Federal Government. The Code is divided into 50 titles, and each title covers a broad area subject to Federal regulation. The CFR is keyed to and kept up to date by the daily issues of the **Federal Register**.

EO—An Executive order is a directive from the President to executive agencies, issued under constitutional or statutory authority. Executive orders are published in the **Federal Register** and in title 3 of the Code of Federal Regulations.

FR—The **Federal Register** is a daily Federal Government publication that provides a uniform system for publishing Presidential documents, all proposed and final regulations, notices of meetings, and other official documents issued by Federal departments and agencies.

FY—The Federal fiscal year runs from October 1 to September 30.

NPRM—A Notice of Proposed Rulemaking is the document an agency issues and publishes in the **Federal Register** that describes and solicits public comments on a proposed regulatory action. Under the Administrative Procedure Act (5 U.S.C. 553), an NPRM must include, at a minimum:

- a statement of the time, place, and nature of the public rulemaking proceeding;
- a reference to the legal authority under which the rule is proposed; and
- either the terms or substance of the proposed rule or a description of the subjects and issues involved.

PL—A Public Law is a law passed by Congress and signed by the President or enacted over his veto. It has general applicability, unlike a private law that applies only to those persons or entities specifically designated. Public laws are numbered in sequence throughout the 2-year life of each Congress; for example, PL 105-4 is the fourth public law of the 105th Congress.

RFA—A Regulatory Flexibility Analysis is a description and analysis of the impact of a rule on small entities, including small businesses, small governmental jurisdictions, and certain small not-for-profit organizations. The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires each agency to prepare an initial RFA for public comment when it is required to publish an NPRM and to make available a final RFA when the final rule is published, unless the agency head certifies that the rule would not have a significant economic impact on a substantial number of small entities.

RIN—The Regulation Identifier Number is assigned by the Regulatory Information Service Center to identify each regulatory action listed in the Unified Agenda and **The Regulatory Plan**, as directed by E.O. 12866 (section 4(b)). Additionally, OMB has asked agencies to include RINs in the headings of their Rule and Proposed Rule documents when publishing them in the **Federal Register**, to make it easier for the public and agency officials to track the publication history of regulatory actions throughout their development.

Seq. No.—The Sequence Number identifies the location of an entry in this publication. Note that a specific regulatory action will have the same RIN throughout its development but will generally have different sequence numbers in different editions of the Unified Agenda and **The Regulatory Plan**.

USC—The United States Code is a consolidation and codification of all general and permanent laws of the United States. The USC is divided into 50 titles, and each title covers a broad area of Federal law.

VI. How Can Users Get Copies of the Plan and the Agenda?

Printed copies of this edition of the **Federal Register** are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402-9325, (202) 512-1800.

Copies of individual agency materials may be available directly from the agency. Please contact the particular agency for further information.

All editions of **The Regulatory Plan** and the **Unified Agenda of Federal Regulatory and Deregulatory Actions** since October 1995 are also available in electronic form. You can search the Plan and the Agenda on the World Wide Web at:

http://reginfo.gov

or through the U.S. Business Advisor at:

http://www.business.gov

You may also search the Plan and the Agenda on the Goverment Printing Office's GPO Access, which is accessible through:

http://www.access.gpo.gov

Dated: October 27, 1998.

Ronald C. Kelly,

Acting Executive Director.

[FR Doc. 98-29180 Filed 11-06-98; 8:45 am]

BILLING CODE 6820-27-F

DEPARTMENT OF AGRICULTURE (USDA)

Statement of Regulatory Priorities

To comply with the National Performance Review (NPR) directive to achieve regulatory reform, the Department of Agriculture is continuing an important project to eliminate unnecessary regulations and improve those remaining by making them easier to understand and more user friendly. To date, the Department's review and revision effort has resulted in actions on over 60 percent of our NPR commitment to regulatory reform. When the results are fully implemented, the Department will have eliminated or reinvented 81 percent of its regulatory holdings in the CFR.

Positive changes resulting from regulatory actions proposed as well as completed by the Department will reach into every corner of the country and, both directly and indirectly, touch the lives of most Americans. Those programs that offer support to specific rural and urban segments of the economy are being simplified so that persons who qualify for assistance, or some other form of participation, will find less burdensome rules. Yet high standards will be set for efficient and effective program management that makes the best use of taxpayer dollars. Farmers, ranchers, and others involved in U.S. agriculture will find significant changes in all aspects of regulations that govern their interaction with the Department and its programs. Farm credit, a mainstay of the Nation's rural economy, will be significantly streamlined by the merger of cumbersome loan-making regulations with forms and certifications simplified to facilitate the application process. The Department is undertaking a number of actions in the regulation of commodities that will increase efficiency, improve customer service, reduce intervention in markets, and allow States to assume greater responsibility in controlling the spread of plant pests or disease. The Department is also improving the regulations that serve rural communities. Several changes are being made in the rural housing programs. Nutrition programs are also being strengthened, their efficiency improved, and their integrity enhanced through regulatory reform. In the area of food safety, the Department has undertaken a significant reinvention of all policies and relationships with industry and the public. There are several important reinvention plans in the natural resources and conservation area.

Reducing Paperwork Burden on Farmers

The Department has made substantial progress under the guidance of the Chief Information Officer in implementing the goal of the Paperwork Reduction Act of 1995 to reduce the burden of information collection on the public by 25 percent by 1999. Further reductions will result from program changes, improved efficiency in the collection and management of information, and adjustments in the burden.

The Department established a Paperwork Reduction Implementation Team (PRIT), under the guidance of the Food and Agriculture Council, based on direction from the Secretary of Agriculture, to create a plan to reduce the paperwork burden on farmers. The PRIT has developed a USDA Paperwork Reduction Framework—a set of standards and guidelines for the Service Center agencies. Agencies and other teams will use the framework in their execution of their paperwork reduction initiatives.

Simultaneously, the PRIT, working with the Service Center agencies, continue ongoing initiatives to reduce burden as quickly as possible. These agencies are working together through business process reengineering initiatives to address customer needs by integrating Agency processes to streamline information collected from the farmer. This will eliminate redundant data collection, provide direct access to benefit and eligibility information, and reduce and simplify the number of regulations and forms.

The Role of Regulations

The programs of the Department are diverse and far reaching, as are the regulations that attend their delivery. Regulations codify how the Department will conduct its business, including the specifics of access to, and eligibility for, USDA programs. Regulations also specify the behavior of State and local governments, private industry, businesses, and individuals that is necessary to comply with their provisions. The diversity in purpose and outreach of our programs contributes significantly to the USDA being at or near the top of the list of departments that produce the largest number of regulations annually. These regulations range from nutrition standards for the school lunch program, to natural resource and environmental measures governing national forest usage and soil conservation, to regulations protecting American agribusiness (the largest dollar value contributor to exports) from the ravages of domestic or foreign plant or animal pestilence and they extend from farm to supermarket to ensure the safety, quality, and availability of the Nation's food supply. Many regulations function in a dynamic environment which requires their periodic modification. The factors determining various entitlement, eligibility, and administrative criteria often change from year to year. Therefore, many significant regulations must be revised annually to reflect changes in economic and market benchmarks. Almost all legislation that affects departmental programs has accompanying regulatory needs, often with a significant impact. The Farm Bill of 1996, Public Law 104-127, has considerable regulatory consequences. This key legislation affects most agencies of USDA and will result in the addition of new programs, the deletion of others, and modification to still others.

Administration Guidance—USDA Response

In developing and implementing regulations, the Department has been guided by the regulatory principles and philosophy set forth by the President in Executive Order 12866 "Regulatory Planning and Review." As prescribed in the Order, the USDA is committed to "promulgate only those regulations that are required by law, are necessary to interpret the law, or are made necessary by compelling public need." When considering a rulemaking action, the Department will assess the costs and benefits of available regulatory alternatives, including the alternative of not regulating. Our analysis will consider the costs and benefits of both quantifiable and qualitative measures and opt for approaches that maximize net benefits.

Major Regulatory Priorities

Five agencies are represented in this regulatory plan. They include the Farm Service Agency, the Food and Nutrition Service, the Forest Service, the Food Safety and Inspection Service, and the Risk Management Agency.

This document represents summary information on prospective significant regulations as called for in Executive Order 12866. A brief comment on each of the five agencies appears below, which summarizes the Agency mission and its key regulatory priorities. The Agency summaries are followed by the regulatory plan entries.

Farm Service Agency

Mission: The Farm Service Agency (FSA) administers contract commodity, conservation, farm loan, commodity purchase, and emergency loan programs, as prescribed by various statutes, in order to support farming certainty and flexibility while ensuring compliance with farm conservation and wetland protection requirements and to assist owners and operators of farms and ranches to conserve and enhance soil, water, and related natural resources.

Priorities: FSA's priority for 1999 will be to continue to implement these programs with emphasis on enhanced service to our customers.

The most significant FSA regulations are those that operate the contract commodity programs and farm loans. The farm programs were significantly changed by the 1996 Farm Bill. The Farm Bill instituted the contract commodity programs, which utilize production flexibility contracts and marketing assistance loans in place of the deficiency payments and production adjustment of past programs. The contracts removed the link between income support payments and farm prices by providing for seven annual fixed but declining payments. FSA's farm loan programs make and guarantee loans to family farmers and ranchers to purchase farm land and finance agricultural production. While the contract commodity and farm loan programs have significant economic impact, they are driven by specific statutory requirements. Therefore, they are noted here to acknowledge their significance in the overall USDA regulatory plan, but are not further listed in the body of the plan which appears below.

In addition to its normal program operations, FSA has initiated a business process reengineering project to streamline its farm loanmaking and servicing regulations and reduce the information collection burden associated with the programs. FSA plans to reduce the number of CFR parts containing its farm loan program regulations by approximately 70 percent. In addition, FSA hopes to achieve a significant reduction in the total number of CFR pages by removing administrative provisions and internal policy and eliminating duplicative material. Furthermore, FSA intends to improve the clarity of the farm loan program regulations by following the guidelines established in the President's Plain Language in Government Writing Initiative. Current plans are to publish as a final rule the first revised CFR part, containing the guaranteed loanmaking and servicing requirements, in December 1998.

Food and Nutrition Service

Mission: The Food and Nutrition Service (FNS) provides children and needy families better access to food and a more healthful diet through food assistance programs and comprehensive nutrition education efforts.

Priorities: In addition to responding to provisions of legislation authorizing its programs and recent welfare reform provisions, FNS has established broad strategic policy goals aimed at improving the nutritional well being of its clients and improving program integrity. These goals are:

- Healthful diets for school-age children. The two major programs serving this goal are the National School Lunch Program (NSLP) and the School Breakfast Program (SBP). This goal reflects the Agency's recognition of its national health and nutrition education responsibilities for school-age children.
- Enhanced food and nutrition security for low-income Americans. This goal represents both the continuation of the Food Stamp Program's traditional role in providing food assistance, as well as improving program administration to meet future challenges. Welfare reform legislation modified the eligibility criteria for food stamp benefits, increased State design options, and maintained the overall mission to provide food and nutrition security for low-income Americans participating in the program.
- Improved nutritional status and health of low-income women, infants, and children. This goal reflects the mission of the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC). It emphasizes nutrition education, healthy infant feeding practices, and positive health outcomes while seeking to enhance program efficiency and integrity.
- Improved nutritional status of childen in day-care settings. FNS seeks to improve the nutritional quality of meals served under its Child and Adult Care Food Program (CACFP), program access for children from low-income families, and program integrity.
- Low-income children consume nutritious lunches when school meals are not available. Through its Summer Food Service Program, FNS seeks to extend its commitment to children from low-income households during summer months when school meals are not available.
- Improved quality of food distribution commodities and service. FNS continues its support for agricultural markets with an emphasis on more healthful commodities and improved program efficiency through automation, reduced Federal and State inventories, and timely deliveries in its food distribution. It also takes the lead in USDA's gleaning intitiative for foods used in the FNS feeding and food distribution programs.

Forest Service

Mission: The mission of the Forest Service is to sustain the health, productivity, and diversity of the Nation's forest and rangelands to meet the needs of present and future generations. This includes protecting and managing the National Forest and Grasslands; providing technical and financial assistance to States, communities, and private forest landowners; and developing and providing scientific and technical assistance and scientific exchanges in support of international forest and range conservation.

Priorities: The President's environmental program includes incorporation of the principles of ecosystem management in natural resource planning for all units of the National Forest System. In support of that effort, proposed regulations will be published governing how future changes in direction will be made and how those changes will be documented. Guided by the recommendations of a recently chartered Committee of Scientists, the regulation also will streamline planning and update planning procedures and requirements to reflect Agency and public experience gained over the last 15 years. Emphasis will be placed on assessing ecosystem health through ecoregional and watershed-level assessments. The rule also will strengthen public participation opportunities in planning, as well as give greater emphasis to interaction and dialog with Federal, State, local, and Indian tribal governments.

Food Safety and Inspection Service

Mission: The Food Safety and Inspection Service (FSIS) is responsible for ensuring the Nation's meat, poultry, and egg products are safe, wholesome, and properly packaged and labeled.

Priorities: FSIS is continuing its comprehensive review of its existing regulations in light of the July 25, 1996,

final rule, "Pathogen Reduction; Hazard Analysis and Critical Control Points (HACCP) Systems," requiring that official meat and poultry establishments develop and implement HACCP, a science-based process control system for food safety. Establishments are responsible for developing and implementing HACCP plans incorporating the controls they have determined are necessary and appropriate to produce safe products. HACCP places the responsibility for food safety firmly on meat and poultry establishments but enables them to tailor their control systems to the needs of particular plants and processes and to take advantage of the latest technological innovations.

FSIS must revise its existing regulations to be consistent with HACCP principles; many are "command-and-control" regulations, prescribing the exact means establishments must use to ensure the safety of their products. Some specify, for example, precise cooking time-and-temperature combinations. Further, many of these regulations require prior approval of equipment and procedures by FSIS, thereby assigning the Agency responsibility for the means used by establishments to comply with the regulations. As a general matter, command-and-control regulations are incompatible with HACCP because they deprive plants of the flexibility to innovate and undercut the clear delineation of responsibility for food safety. Therefore, to prepare for the implementation of HACCP, FSIS is conducting a thorough review of its current regulations and, to the maximum extent possible, converting its command-and-control regulations to performance standards. Some of the Agency's recent and planned initiatives, both to convert command-and-control regulations to performance standards and to generally streamline and simplify the regulations, follow:

- FSIS is converting to performance standards the current regulations governing the production of cooked beef products, uncured meat patties, and certain poultry products.
- FSIS has proposed streamlining, consolidating, and making consistent with HACCP the rules of practice regarding suspension and withdrawal of inspection.
- FSIS has proposed to consolidate the sanitation regulations into a single part of the Code of Federal Regulations applicable to both meat and poultry establishments, eliminate unnecessary differences between the meat and poultry sanitation requirements, and convert many of the highly prescriptive requirements to performance standards.
- FSIS will be proposing to remove most requirements pertaining to partial quality control programs.

Risk Management Agency

Mission: The Risk Management Agency (RMA) provides and supports cost-effective means of managing risk for agricultural producers in order to improve the economic stability of agriculture.

Priorities: RMA's priority for 1999 will be to strengthen the safety net for agricultural producers through sound risk management programs and education by:

- Developing new programs and improving existing programs to ensure producers have economically sound risk management tools available to meet their needs;
- Promoting a risk management education effort to increase producers' awareness and effective utilization of risk management tools;
- Fostering a better public-private partnership with the crop insurance industry to facilitate the delivery of actuarially sound and affordable risk management products to the Nation's farmers;
- Providing reinsurance in circumstances where private crop insurance companies cannot accept excessive program risk; and
- Improving existing management programs to ensure wise management and protection of taxpayer funds.

USDA—Federal Crop Insurance Corporation (FCIC)

FINAL RULE STAGE

1. GENERAL ADMINISTRATIVE REGULATIONS; NONSTANDARD UNDERWRITING CLASSIFICATION SYSTEM

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

7 USC 1506(l); 7 USC 1506(p)

CFR Citation:

7 CFR 400

Legal Deadline:

None

Abstract:

The Federal Crop Insurance Corporation proposes to remove and reserve subpart O of the General Administrative Regulations, effective for the 1999 (2000 for Texas and Arizona and California Citrus) and succeeding crop years. This proposed action is intended to eliminate the unintended adverse effects of the Nonstandard Classification System (NCS), simplify and update program underwriting rules consistent with the program's current and future anticipated experience, and ensure that crop insurance premiums are applied to all producers in a fair and consistent manner.

Statement of Need:

This rule is being published as an initiative to respond to the needs of areas suffering repeated disasters and the complaints that the current system: (1) does not adequately exclude widespread causes of loss (disaster adjustment); (2) fails to recognize diverse conditions within a county; (3) unfairly hits new or struggling producers caught by repetitive disasters; (4) sets too high a premium for those producers listed on the NCS; and (5) applies unfairly to non-NCS insureds through share arrangements with insureds selected for NCS. Additionally, the current NCS process can be complicated to explain to insureds and agents who service crop insurance policies. The NCS process is also labor intensive for the Risk Management Agency and insurance providers at a time of increasingly smaller budgets and reduced resources. Reducing or eliminating program regulations that provide little benefit or can be accomplished through other more appropriate or cost efficient means is consistent with the Federal Crop Insurance Act requirement for simplification and the Administration's emphasis for regulatory reduction. It is for these reasons that this subpart is being suspended. FCIC will, during this suspension, consider and propose for comments an alternate method to the NCS program for the purpose of fairly and accurately determining coverage and premium consistent with the risk conditions under which the insurance offer is made.

Summary of the Legal Basis:

7 USC 1506(l); 7 USC 1506(p)

Alternatives:

None at this time.

Anticipated Costs and Benefits:

The review indicated that NCS had been applied to only a small percentage of the total number of insureds who had collected at least three losses, had adverse loss ratios, and were responsible for a significant share of the losses paid. The analysis also indicated that the number of active NCS policies had declined 52 percent from 1996 to 1997 (4,800 to 2,300) and that the liability associated with NCS policies declined from $37 million in 1996 to only $20 million in 1997. The results indicated that many insureds selected for NCS canceled their insurance policies because, in general, NCS was applied after losses had reached a point where the cost was too high for these insureds to continue to participate in the program. In summary, the analysis indicates that the costs of replacing NCS with a more efficient and effective process affects producers, taxpayers, and insurance providers differently. Estimated costs to producers increased by about $35 million for out-of-pocket premium costs. This amount is in lieu of premiums that ultimately would be assessed under the NCS procedures if producers elected to insure once they were identified under the system. Costs about equal the benefits to taxpayers as the increased subsidies associated with the higher premiums are offset by reduced excess losses. Taxpayers might have a small gain. Insurance providers gain additional administrative and operating subsidies and underwriting gains with the higher premiums.

Risks:

Any risks with eliminating the NCS program are minimal. Producers previously identified by the program will be able to purchase crop insurance at standard premium rates. Eliminating the program will assist the Risk Management Agency's effort to simplify the crop insurance program.

2. • GENERAL ADMINISTRATIVE REGULATIONS; SUBPART T - REGULATIONS FOR THE 1999 AND SUBSEQUENT REINSURANCE YEARS

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

7 USC 1506(l); 7 USC 1506(p)

CFR Citation:

7 CFR 400; 7 CFR 457

Legal Deadline:

Final, Statutory, July 1, 1998.

Abstract:

The Federal Crop Insurance Corporation (FCIC) amends subpart T in the General Administrative Regulations and the Common Crop Insurance Regulations, Basic Provisions, to conform with the statutory mandates of the Agricultural Research, Extension, and Education Reform Act of 1998 and to move those provisions that are terms of insurance from subpart T into the Basic Provisions. FCIC will also remove those provisions of subpart T that have been moved to the Basic Provisions.

Statement of Need:

On Thursday, July 30, 1998, the Federal Crop Insurance Corporation (FCIC) published an interim rule to amend subpart T in the General Administrative Regulations, to conform with the statutory mandates of the Agricultural Research, Extension, and Education Reform Act of 1998 (1998 Research Act), and to move provisions that are terms of insurance from subpart T into the Common Crop Insurance Regulations, Basic Provisions. The rule changes the administrative fee charged to producers who elect the Catastrophic Risk Protection (CAT) level of coverage or additional coverage. The effective date of the interim rule was July 1, 1998. Written comments and opinions on this rule will be accepted until the close of business September 28, 1998, and will be considered when the rule is to be made final. Producers that are affected by this rule must make critical risk management decisions and the deadline for the first 1999 crop year decisions is less than 60 days from the July 1, 1998, effective date of the 1998 Research Act. Further, FCIC was required to revise the Standard Reinsurance Agreement before the July 1, 1998, start of the 1999 reinsurance year to implement the provisions of the 1998 Research Act.

Summary of the Legal Basis:

7 USC 1506(l); 7 USC 1506 (p)

Alternatives:

None at this time.

Anticipated Costs and Benefits:

To be determined. The interim rule published on Thursday, July 30, 1998, stated that FCIC will complete the required cost-benefit analysis within 90 days of publication of the interim rule.

Risks:

The increased fees, as mandated by the 1998 Research Act, will either encourage producers to purchase higher levels of crop insurance coverage or may result in some producers declining to participate in the program.

3. • GENERAL ADMINISTRATIVE REGULATIONS; SUBPART U; AND CATASTROPHIC RISK PROTECTION ENDORSEMENT - REGULATIONS FOR THE 1999 AND SUBSEQUENT REINSURANCE YEARS

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

7 USC 1506(l); 7 USC 1506(p)

CFR Citation:

7 CFR 400; 7 CFR 402

Legal Deadline:

Final, Statutory, July 1, 1998.

Abstract:

The Federal Crop Insurance Corporation amends the General Administrative Regulations, subpart U - Ineligibility for Programs Under the Federal Crop Insurance Act and the Catastrophic Risk Protection Endorsement to conform with the statutory mandates of the Agricultural Research, Extension, and Education Reform Act of 1998.

Statement of Need:

On Thursday, July 30, 1998, the Federal Crop Insurance Corporation (FCIC) published an interim rule to amend subpart U in the General Administrative Regulations and part 402 to conform with the statutory mandates of the Agricultural Research, Extension, and Education Reform Act of 1998 (1998 Research Act). The rule allows unpaid administrative fees as required by the 1998 Research Act to be treated as debt. Therefore, producers who fail to pay applicable administrative fees may have their crop insurance policy canceled. The rule also changes the administrative fees charged to producers who elect the Catastrophic Risk Protection (CAT) level of coverage. The effective date of the interim rule was July 1, 1998. Written comments and opinions on this rule will be accepted until the close of business September 28, 1998, and will be considered when the rule is to be made final. Producers that are affected by this rule must make critical risk management decisions and the deadline for the first 1999 crop year decisions is less than 60 days from the July 1, 1998, effective date of the 1998 Research Act. Further, FCIC was required to revise the Standard Reinsurance Agreement before the July 1, 1998, start of the 1999 reinsurance year to implement the provisions of the 1998 Research Act.

Summary of the Legal Basis:

7 USC 1506(l); 7 USC 1506(p)

Alternatives:

None at this time.

Anticipated Costs and Benefits:

To be determined. The interim rule published on Thursday, July 30, 1998 stated that FCIC will complete the required cost-benefit analysis within 90 days of publication of the interim rule.

Risks:

Subpart U - Producers who fail to pay their administrative fees may have their crop insurance policy canceled for subsequent crop years. This could result in such producers being ineligible for other USDA program benefits. Part 402 - The increased fees, as mandated by the 1998 Research Act, will either encourage CAT producers to purchase higher levels of crop insurance coverage or may result in some CAT producers declining to participate in the program.

PROPOSED RULE STAGE

4. SPECIAL SUPPLEMENTAL FOOD PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC): FOOD DELIVERY SYSTEMS INTEGRITY

Priority:

Other Significant

Legal Authority:

42 USC 1786

CFR Citation:

7 CFR 246

Legal Deadline:

Final, Statutory, March 31, 2000.

Abstract:

A proposed rule addressing WIC Food Delivery Systems was published on December 28, 1990 (55 FR 53446). The Department provided a 120-day comment period for the proposed rule, which closed on April 28, 1991. Nearly 1,100 comments were received from a wide variety of sources. Despite the degree of preliminary input to the December 28, 1990, proposed rule, many of the commenters responding during the formal comment period suggested that the Department's food delivery regulations needed to be proposed again, rather than proceeding directly to a final rule. In addition, several members of Congress requested that the rule be reproposed in light of its impact on State agency food delivery systems. Therefore, the Department intends to issue a second proposed rule addressing WIC food delivery systems and requirements. This second rule will address all of the provisions contained in the previous rulemaking, but will contain significant modifications to some of the proposed provisions, as well as clarifications of several provisions that may not have been clearly understood in the earlier rule.

Statement of Need:

On December 28, 1990, the Department published a proposed rule designed primarily to strengthen State agency operations in vendor management and related food delivery areas for the WIC Program. This proposal was developed with input over several years' time from State agency experts in food delivery, and with the full support of and encouragement from Congress and the Department's Office of Inspector General (OIG). The Department provided a 120-day comment period for the proposed rule, which closed on April 28, 1991. During this comment period, nearly 1,100 comments were received from State and local WIC agencies, vendors, and associated groups, public interest groups, members of Congress, members of the public, and WIC participants.

Despite the degree of preliminary input to the December 28, 1990, proposed rule, many of the commenters suggested that the Department's food delivery regulations needed to be proposed again, rather than proceeding directly to a final rule. In addition, several members of Congress requested that the rule be reproposed in light of its impact on State agency food delivery systems.

The Department has therefore drafted a second proposed rule addressing WIC food delivery systems integrity and procedural requirements. This second rule addresses all of the provisions contained in the previous rulemaking, and contains significant modifications to some of the proposed revisions, as well as clarifications to a number of provisions that may not have been clearly understood in the earlier rule. The rule will provide for more cost effective and efficient management of WIC vendors by State agencies. A 120-day public comment period will be provided with this proposed rule. The Department intends to publish a final rule, based on all of the comments received, by the end of fiscal year 1999.

Although this rule does not have a direct impact on reducing risks to public health, safety, or the environment, it will significantly improve the operation and accountability of the WIC Program nationwide.

Alternatives:

Given the intensive input that has been gathered for the development of this rule since it was recommended by the General Accounting Office in 1988, and the comments that were received pertaining to the first proposed version of the rule in December 1990, the Department has determined that there are no viable alternatives to the provisions included in this reproposal. The alternative of proceeding directly to promulgation of a final rule based on the 1990 proposal has been rejected by Congress.

Anticipated Costs and Benefits:

The costs of this action include costs due to vendor overcharges and costs associated with the proposal. The estimated costs for implementation of the proposal include a shift of not more than $2.0 million in WIC Program Nutrition Services and Administration (NSA) funds within the 87 State agencies, partially from reduced requirements for management evaluations of local agencies and reduced costs due to elimination of representative on-site monitoring. They also include $0.5 million in additional costs to vendors to meet the proposed minimum training and authorization requirements. It should be noted that all the vendors are currently required to participate in some type of training and complete an application form for program authorization. The estimated $0.5 million in additional costs therefore represents those instances where current training and authorization requirements are below the level established in the proposal. In these instances, vendors may incur costs in attending more frequent training sessions or may be required to complete an application form at more frequent intervals. The estimated cost does not represent charges to the vendor for training or authorization. Rather, the cost represents the estimated cost of the vendor's time to participate in the training session and to complete the application form.

The gross benefit results from a significant reduction in vendor overcharges. A significant net benefit of $37 million is expected, as vendor overcharges are estimated at $39.5 million and costs associated with the proposal are a maximum of $2.5 million.

Risks:

This rule is intended to reduce and minimize the risk of vendor fraud and abuse of the WIC program.

5. FOOD STAMP PROGRAM: REVISIONS TO THE RETAIL FOOD STORE DEFINITION AND PROGRAM AUTHORIZATION GUIDANCE

Priority:

Other Significant

Legal Authority:

PL 103-225; 7 USC 2012; 7 USC 2018

CFR Citation:

7 CFR 271; 7 CFR 278

Legal Deadline:

Final, Statutory, March 25, 1994.

Abstract:

This proposed rule would implement provisions of Public Law 103-225 requiring firms to offer a variety of staple food items for sale or to have more than 50 percent of gross retail sales in staple foods. This rule also addresses the requirement in Public Law 103-225 to provide periodic notices to participating firms, clarifying certain eligibility criteria.

Statement of Need:

Public Law 103-225 amends the Food Stamp Act of 1977, to make changes in eligibility requirements for retail food stores to participate in the Food Stamp Program. Prior to enactment of these changes, a retail food store qualified to participate in the Food Stamp Program if more than 50 percent of its total eligible food sales were in staple foods. The new law changes that to require 50 percent of its total gross sales in staple foods. It also provides another option for stores not meeting the new 50 percent rule. Those stores can now qualify if they offer for sale, on a continuous basis, a variety of food in each of four categories of staple foods. The staple food categories are defined as "(1) meat, poultry, or fish; (2) bread or cereals; (3) vegetables or fruits; or (4) dairy products." This statutory change in eligibility will require developing policy definitions for the terms "continuous basis," "variety," and "perishable."

Alternatives:

None. The new law also requires the Secretary to issue new rules providing for the periodic reauthorization of retail food stores and wholesale food concerns. This must include providing periodic notice of the definitions for "retail food stores," "staple foods," and "perishable foods."

Anticipated Costs and Benefits:

It is not anticipated that this proposed rule will impact program costs. It is anticipated that the clarifications of program eligibility criteria in this proposed rule will make it easier for firms to understand and for the Food and Consumer Service to administer.

6. FSP: PERSONAL RESPONSIBILITY PROVISIONS OF THE PERSONAL RESPONSIBILITY AND WORK OPPORTUNITY RECONCILIATION ACT OF 1996

Priority:

Economically Significant. Major under 5 USC 801.

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

PL 104-193

CFR Citation:

7 CFR 271; 7 CFR 272; 7 CFR 273

Legal Deadline:

Other, Statutory, August 22, 1996.

Stat. implementation deadline of 8/22/96 for sec 813, 814, 820, 821, 837, and 911 of PL 104-193; stat. implementation deadline of 7/1/97 for sec 115, and 11/22/96 for sec 824 of PL 104-193.

Abstract:

This rule will implement 13 provisions of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996.

Statement of Need:

P.L. 104-193, the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, amends the Food Stamp Act of 1977, to add some new eligibility requirements and disqualifiers and increase some existing penalties for noncompliance with food stamp rules. The new law: (1) makes individuals convicted of drug-related felonies ineligible for food stamps; (2) doubles the penalties for violating food stamp program requirements; (3) permanently disqualifies individuals convicted of trafficking in food stamp benefits of $500 or more; (4) allows States to disqualify an individual from food stamps if the individual is disqualified from another means-tested program for failure to perform an action required by that program; (5) makes individuals ineligible for 10 years if they misrepresent their identity or residence in order to receive multiple food stamp benefits; (6) makes fleeing felons and probation and parole violators ineligible for the food stamp program; (7) allows States to require food stamp recipients to cooperate with child support agencies as a condition of food stamp eligibility; (8) allows States to disqualify individuals who are in arrears in court-ordered child support payments; (9) limits the food stamp participation of most able-bodied adults without dependents to three months in a three-year period during times the individual is not working or participating in a work program; (10) prohibits an increase in food stamp benefits when households' income is reduced because of a penalty imposed under a Federal, State, or local means-tested public assistance program for failure to perform a required action; (11) requires States to provide households' addresses, social security numbers, or photographs to law enforcement officers to assist them in locating fugitive felons or probation or parole violators; and (12) prohibits an increase in food stamp benefits when households' income is reduced because of a penalty imposed under a Federal, State, or local means-tested public assistance program for an act of fraud by the individual under the program.

Summary of the Legal Basis:

All of the provisions of this rule are mandated by P.L. 104-193, the Personal Responsibility and Work Opportunity Reconciliation Act of 1996.

Alternatives:

None.

Anticipated Costs and Benefits:

Over 7 years, the provisions are expected to reduce the cost of the Food Stamp Program by approximately $5.565 billion.

Risks:

None.

7. FSP: STATE FLEXIBILITY AND CERTIFICATION PROVISIONS OF PUBLIC LAW 104-193

Priority:

Economically Significant. Major under 5 USC 801.

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

PL 104-193; PL 104-208; 7 USC 2011 to 2032

CFR Citation:

7 CFR 272.3; 7 CFR 273.1; 7 CFR 273.2; 7 CFR 273.4; 7 CFR 273.9(c); 7 CFR 273.9(d); 7 CFR 273.10(a); 7 CFR 273.10(c) to 273.10(f); 7 CFR 273.11(a) to 273.11(c); 7 CFR 273.11(e); 7 CFR 273.11(j); 7 CFR 273.13; 7 CFR 273.14(b); 7 CFR 273.14(e)

Legal Deadline:

Other, Statutory, August 22, 1996.

For provisions effective upon enactment, the statutory implementation date is August 22, 1996.

Abstract:

This rule proposes to amend Food Stamp Program regulations to implement 14 provisions of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 and one provision of the Omnibus Consolidated Appropriations Act of 1996. These provisions would increase State agency flexibility in processing applications for the Food Stamp Program and allow greater use of standard amounts for determining deductions and self-employment expenses. The provisions would also give State agencies options to issue partial allotments for households in treatment centers, count all of the income of an ineligible noncitizen in determining the benefits of the rest of the household, issue combined allotments to certain expedited service households, and certify elderly or disabled households for 24 months. Other changes would revise requirements for determining noncitizen eligibility and the eligibility and benefits of sponsored noncitizens, eliminate the exclusion of certain transitional housing payments and State and local energy assistance, exclude the earnings of students under 18, and require proration of benefits following any break in certification.

Statement of Need:

This action is required by P. L. 104-193, P. L. 104-208, P. L. 105-53, and P. L. 105-185.

Summary of the Legal Basis:

This rule is required to implement the provisions of sections 402, 421, 801, 807, 808, 809, 811, 812, 818, 827, 828, 830, and 835 of P. L. 104-193; section 552 of P. L. 104-208; sections 5302, 5305, 5306, 5562, 5563, 5571, 5572, and 5573 of P. L. 105-53; and section 503 of P. L. 105-185.

Anticipated Costs and Benefits:

The provision of this rule would reduce Food Stamp Program costs for FY 1997-2002 by approximately $6.605 billion.

8. FSP: NONDISCRETIONARY PROVISIONS OF THE PERSONAL RESPONSIBILITY AND WORK OPPORTUNITY RECONCILIATION ACT OF 1996

Priority:

Economically Significant. Major under 5 USC 801.

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

PL 104-193, sec 803; PL 104-193, sec 804; PL 104-193, sec 805; PL 104-193, sec 809; PL 104-193, sec 810; PL 104-193, sec 838; PL 104-193, sec 109; PL 104-193, sec 826

CFR Citation:

7 CFR 271.2; 7 CFR 273.1; 7 CFR 273.2; 7 CFR 273.8; 7 CFR 273.9; 7 CFR 273.10; 7 CFR 276.2(e)

Legal Deadline:

Other, Statutory.

Statutory Implementation Dates: PL 104-193, sec 809 - 1/1/97; PL 104-193, sec 803, 805 and 838 - 08/22/96; PL 104-193, sec 804 and 810 - 10/01/96.

Abstract:

This proposed rule amends the Food Stamp Program regulations to implement 8 provisions of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996. These provisions require no interpretation or discretion: 1) freeze the minimum allotment at $10; 2) change the way the maximum allotments are calculated to use 100% of the Thrifty Food Plan as opposed to 103%; 3) freeze the standard deduction at current level and eliminate the adjustment procedures; 4) cap the excess shelter expense deduction; 5) change the household composition definition so that children under 22 years of age and living with their parents cannot be a separate household; 6) increase the time frame from 5 to 7 days for expedited service; 7) set a time limit of not more than 90 days living in another person's house for considering a person homeless; and 8) set the fair market value of vehicles at $4,600 through 9/30/96 and raise it to $4,650 effective 10/1/96 and eliminate future adjustments.

Statement of Need:

This action is required by P.L. 104-193.

Summary of the Legal Basis:

This rule is required to implement the provisions of sections 109, 803, 804, 805, 809, 810, 826, and 838 of P.L. 104-193, the Personal Responsibility and Work Opportunity Reconciliation Act of 1996.

Alternatives:

None. The provisions are mandated by statute.

Anticipated Costs and Benefits:

The provisions of this rule would reduce Food Stamp Program costs for FY 1997-2002 by $11.2 billion.

9. FOOD STAMP PROGRAM: WORK PROVISIONS OF THE PERSONAL RESPONSIBILITY AND WORK OPPORTUNITY RECONCILIATION ACT OF 1996

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

PL 104-193

CFR Citation:

7 CFR 273.7; 7 CFR 273.22

Legal Deadline:

None

Abstract:

This proposed rule will implement revisions to the Food Stamp Program's work and employment and training requirements, as well as new provisions for a work supplementation or support program and an employment initiative program.

Statement of Need:

This rule is necessary to implement revisions to the Food Stamp Program's work requirements.

Summary of the Legal Basis:

All provisions of this proposed rule are mandated by Public Law 104-193.

Alternatives:

The alternative is not to revise current rules. This is not practical. The current rules have been superseded by changes brought about by Public Law 104-193.

Anticipated Costs and Benefits:

Federal costs will increase by $15 million between Fiscal Year 1997 and Fiscal Year 2002. State agencies will benefit by achieving greater flexibility to encourage work and foster personal responsibility and independence.

Risks:

An increase in food stamp rolls would result by not implementing this rule.

FINAL RULE STAGE

10. FOOD STAMP PROGRAM: FOOD STAMP RECIPIENT CLAIM ESTABLISHMENT AND COLLECTION STANDARDS

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

7 USC 2011 to 2032

CFR Citation:

7 CFR 272; 7 CFR 273

Legal Deadline:

None

Abstract:

The Food and Nutrition Service is revising Food Stamp Program regulations which cover the establishment and collection of recipient claims. This action is the result of the enactment of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA) and is consistent with the President's regulatory reform effort. In addition, this rule revises existing discretionary areas to improve claim establishment and promote effective management. The inability of State agencies to establish and collect claims has continuously been cited as a deficiency by the Department's Office of Inspector General. The last significant revision to these regulations was in 1983. Subsequent activities, such as technological advances and general debt management regulations, have rendered many portions of the current rule obsolete. In addition, the current rule has been found to place unnecessary burdens on State agencies. State agencies are responsible for establishing and collecting recipient claims.

Statement of Need:

In addition to implementing PRWORA, this rule is necessary to improve the establishment and collection of recipient claims. The last significant revision to these regulations was in 1983. Subsequent activities, such as technological advances and general debt management regulations, have rendered many portions of the current rule obsolete. The current rule has also been found to place unnecessary burdens on State agencies. State agencies are responsible for establishing and collecting recipient claims. This rule will address two dimensions of the overissuance problem: establishing claims on excess allowances, and recovering overages where possible. Data from the food stamp quality control system for 1997 show that overissuances to recipients totaled over $1.4 billion, 7.28 percent of the $19.5 billion in total food stamp issuances that year. Claims against recipients are a direct means to recover overissuances and, to the extent that recipients know that recovery of overissuances will be sought, represent a deterrent to households who quietly accept the extra food benefits.

Alternatives:

The alternative is not to revise the current rule governing this aspect of the Program. In addition, the existing regulations must be changed to conform with the new legislative requirement. The current rule is not adequate to facilitate effective and efficient debt management. The inability of State agencies to establish and collect claims has continuously been cited as a deficiency by the Department's Office of Inspector General.

Anticipated Costs and Benefits:

Nationwide, as of October 1, 1997, there was over $1.2 billion in uncollected recipient claims. Inspector General reports have also noted that, in addition to large accounts receivable for established, uncollected claims, there are backlogs of hundreds of millions of claims that have not yet been established. These unestablished claims represent the most current, and typically the most collectable losses to the program. Updated regulations that incorporate recent debt management rules and technological advances, as well as practical suggestions and feedback received from State agencies, should improve the establishment and collection of recipient claims in the Food Stamp Program. In addition, efforts will be made to increase the degree of conformity with claims-related issues and procedures currently used in other social programs.

Risks:

The tolerance of program abuse or even the perception of such undermines the fundamental mission of the Food Stamp Program. The efficient and effective establishment and collection of recipient claims, which this rulemaking addresses, is essential in ensuring that this does not occur.

PROPOSED RULE STAGE

11. ELIMINATION OF REQUIREMENTS FOR PARTIAL QUALITY CONTROL PROGRAMS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will eliminate existing text in the CFR.

Legal Authority:

21 USC 451 et seq; 21 USC 601 et seq

CFR Citation:

9 CFR 317; 9 CFR 318; 9 CFR 319; 9 CFR 381

Legal Deadline:

None

Abstract:

This proposed rule would amend the meat and poultry inspection regulations by removing most requirements pertaining to partial quality control (PQC) programs. A PQC program controls a single product, operation, or part of an operation in a meat or poultry establishment. The proposal would remove the design requirements affecting most PQC programs that establishments have and most requirements for establishments to have PQC programs for certain products or processes. The proposal would also remove from the thermal processing regulations the requirements for FSIS prior approval, or approval before use, of systems and devices not specified in the regulations and all requirements concerning PQC programs. The proposal would expand the alternatives available to establishments under the thermal processing regulations for ensuring the safety of their products. However, the requirements for establishments to have quality control programs to control food irradiation processing and certain slaughtering inspection systems for poultry and the requirements concerning the design and content of those programs would be unaffected by this rulemaking. This proposal is intended to allow establishments under inspection additional flexibility, consistent with the Pathogen Reduction/Hazard Analysis and Critical Control Points (HACCP) regulations, to adopt new technologies and methods that will improve food safety and other consumer protections.

Statement of Need:

FSIS carries out programs designed to ensure that meat, poultry, and egg products are wholesome, not adulterated, and properly marked, labeled, and packaged. FSIS is implementing the "Pathogen Reduction; Hazard Analysis and Critical Control Point (HACCP) Systems" final rule promulgated July 25, 1996 (61 FR 38806), to reduce the risk of foodborne illness associated with consumption of meat and poultry products to the maximum extent possible. Under the Pathogen Reduction/HACCP final rule, establishments are to accomplish this objective by taking appropriate and feasible measures to prevent or reduce the likelihood of physical, chemical, and microbiological hazards in the production of meat and poultry products.

FSIS is reviewing its other regulations to determine how they can be made more consistent with the Pathogen Reduction/HACCP regulations and the regulations and the regulatory approach they embody. Included in this review are regulations concerning sanitation standards, the exclusion from the food supply of meat and poultry products with visible defects affecting safety or quality, and preventing the economic adulteration of meat and poultry products.

As stated in the December 29, 1995, advance notice of proposed rulemaking (ANPRM) "FSIS Agenda for Change" (60 FR 67469), FSIS plans to eliminate regulations that are unnecessary and, to the extent possible, modify or replace command-and-control prescriptions with performance standards. Command-and-control requirements specify, often in great detail, how a plant is to achieve particular food safety or other regulatory objectives, while performance standards state the objectives or levels of performance to be achieved, and the plant can then choose how to achieve them. Replacing command-and-control requirements with performance standards will afford inspected establishments the flexibility to adopt technological innovations that can yield food safety benefits.

This change is also compelled by the philosophy underlying HACCP systems. Under the HACCP approach, plant management builds into its food production processes science-based controls and related measures--the HACCP plans--required to ensure food safety. The HACCP plans can vary from plant to plant.

Where appropriate, command-and-control regulations must be changed to provide greater flexibility for industry to design and implement processes and HACCP systems of control, tailored to the circumstances of each plant. This is consistent with the HACCP approach, which clearly delineates industry and Government responsibility for food safety, with plants establishing procedures they will follow to ensure the production of safe food.

Among the regulations FSIS has identified as candidates for modification or elimination to be consistent with HACCP are restrictive, command-and-control-type regulations which delimit processing and treatment methods intended to eliminate specific food safety hazards and requirements concerning PQC programs. Among these are requirements that establishments have such programs for their products or processes and

requirements concerning the design of such programs.

Summary of the Legal Basis:

Under the Federal Meat Inspection Act (21 USC 601 et seq.) and the Poultry Products Inspection Act (21 USC 451 et seq.), FSIS issues regulations governing the production of meat and poultry products prepared for distribution in interstate commerce. The Agency also issues regulations concerning the sanitation conditions under which such products are prepared.

Alternatives:

The alternatives to this proposed rulemaking that FSIS considered were, in addition to the alternative of no rulemaking, market sampling of finished products, mandating additional in-plant controls, sampling finished products for chemical analysis, general requirements and standards for PQC programs, and the elimination of all TQC and PQC requirements.

Anticipated Costs and Benefits:

The proposed rule could save the regulated industry up to $14,000,000 in costs associated with developing PQC programs according to FSIS specifications and in operating PQC programs that are mandated by the regulations.

Risks:

None.

FINAL RULE STAGE

12. PERFORMANCE STANDARDS FOR CERTAIN MEAT PRODUCTS AND POULTRY PRODUCTS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

21 USC 451 et seq; 21 USC 60 et seq

CFR Citation:

9 CFR 301; 9 CFR 318; 9 CFR 320; 9 CFR 381

Legal Deadline:

None

Abstract:

The Food Safety and Inspection Service (FSIS) is amending the Federal meat and poultry inspection regulations by converting the current regulations governing the production of cooked beef products, uncured meat patties, and certain poultry products into performance standards. The performance standards spell out the objective level of performance establishments must meet during their operations in order to produce safe products, but allow the use of plant-specific processing procedures other than the procedures prescribed in the current regulations. All of the provisions in the previous regulations meet the proposed performance standards. Therefore, establishments probably would not be required to change any current practices in response to this proposed rule. Establishments that do not wish to change their processing practices may continue following the previous requirements for these products, which will be disseminated as "safe harbors" in Agency guidance materials.

Statement of Need:

Under the Federal Meat Inspection Act (21 USC 601 et seq.) and the Poultry Products Inspection Act (21 USC 451 et seq.), FSIS issues regulations governing the production of meat and poultry products prepared for distribution in interstate commerce. Many of these regulations employ the command-and-control approach, prescribing a precise sequence of steps to be followed when producing food that is safe and not adulterated. The command-and-control approach to rulemaking has ensured that all establishments are subject to the same rules and that no establishment has a technological advantage over another. However, this approach has several drawbacks: it can stifle innovation in meat and poultry processing technology; it does not account for the uniqueness of individual processing procedures and needs within different establishments; and it produces regulations that can have a negative economic impact on small businesses Command-and-control rulemaking often fails to account for the development of innovative processing technologies. By prescribing specific steps establishments must take during processing, command-and-control regulations often do not allow establishments to employ innovations in processing technology that may produce meat and poultry products that are as safe as, or even safer than, those produced in accordance with the command-and-control regulations. While FSIS endeavors to account for technological innovation when rulemaking, new processing technologies are developed at a faster pace than the Agency can amend the regulations. Also, command-and-control regulations often do not account for the uniqueness of individual processing procedures and needs within different establishments. FSIS command-and-control regulations require all establishments to produce meat and poultry products in the same manner. Such prescriptive regulations are impractical in many settings. Further, they can have disparate economic effects on establishments producing different volumes of the same product. By promulgating command-and-control regulations mandating the use of specific processes or technologies, FSIS often inadvertently imposes significant economic burdens on small businesses. Small establishments producing meat and poultry products at low volumes often must pay a high cost per product unit when required to employ a specific process or technology. Large establishments, however, are able to spread the cost of a required process or technology over their higher production volumes. While FSIS has attempted to incorporate prevailing industry processing practices into its command-and-control regulations in order to lessen the economic burden imposed on small establishments, many small establishments often find prevailing industry processing practices to be impractical and/or expensive. In light of these general problems, FSIS is substituting performance standards for the current command-and-control regulations governing the production of cooked beef products, uncured meat patties, and certain fully and partially cooked poultry products. The performance standards spell out the objective level of performance that establishments must meet during their operations in order to produce safe and nonadulterated products, but allow the use of plant-specific processing procedures other than the procedures prescribed in the current regulations. Accordingly, establishments may employ innovative or unique processing procedures customized to the nature and volume of their production, as long as their products meet the proposed performance standards for safe, nonadulterated food. Furthermore, all of the prescriptive, command-and-control provisions in the current regulations governing cooked beef products, uncured meat patties, and certain fully and partially cooked poultry products meet the proposed standards. Therefore, establishments producing these products will not be required to change any current practices in response to this proposed rule. By making final performance standards that may be met through adherence to the previous regulations, FSIS creates a "safe harbor" for establishments content with the previous regulations and mitigates any negative impact this proposal could have on such establishments.

Summary of the Legal Basis:

Under the Federal Meat Inspection Act (21 USC 601 et seq.) and the Poultry Products Inspection Act (21 USC 451 et seq.), FSIS issues regulations governing the production of meat and poultry products prepared for distribution in interstate commerce.

Alternatives:

FSIS could have maintained the command-and-control regulations governing cooked beef products, uncured meat patties, and certain poultry products. However, as explained above, these regulations have several drawbacks: they stifle innovation in meat and poultry processing technology; they do not account for the uniqueness of individual processing procedures and needs within different establishments; and they can have a negative economic impact on small businesses.

Anticipated Costs and Benefits:

By allowing establishments to meet performance standards for cooked beef products, uncured meat patties, and certain poultry products by means other than those prescribed in the current regulations, FSIS hopes to encourage innovation in meat and poultry processing technology and allow establishments to customize processes to meet their individual needs. Because employing alternative means to meet the proposed performance standards would be optional, FSIS concludes that this action would not have a significant economic impact on small or large establishments.

Risks:

The proposed performance standards would maintain a level of food safety equivalent to that which is ensured by the current regulations.

13. RULES OF PRACTICE

Priority:

Substantive, Nonsignificant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will eliminate existing text in the CFR.

Legal Authority:

21 USC 601; 21 USC 451

CFR Citation:

9 CFR 304; 9 CFR 305; 9 CFR 306; 9 CFR 327; 9 CFR 335; 9 CFR 381; 9 CFR 460

Legal Deadline:

None

Abstract:

The Food Safety and Inspection Service (FSIS) is proposing to revise and consolidate the regulations that address the rules of practice FSIS follows when inspection services are refused, suspended, or withdrawn. FSIS is proposing to add specific language regarding the refusal, suspension, or withdrawal of inspection when the Agency determines that an establishment's Hazard Analysis and Critical Control Points (HACCP) system is inadequate, an establishment is not meeting the Salmonella pathogen reduction performance standards, an establishment's Sanitation Standard Operating Procedure is inadequate, or an establishment is not conducting generic E. coli testing. Additionally, FSIS proposes to revise and consolidate the regulations regarding the procedures for appealing Agency decisions.

Statement of Need:

For the most part, FSIS's Supplemental Rules of Practice duplicate the Department's Uniform Rules of Practice regulations. FSIS's regulations do, however, establish procedures related to the suspension of inspection. However, these regulations are difficult to read and do not clearly outline the process.

Therefore, as part of FSIS's ongoing efforts to simplify, consolidate, and streamline the meat and poultry inspection regulations, FSIS is proposing to revise these regulations. FSIS intends to eliminate redundancy between its regulations and the Department's regulations and to more clearly identify the process and situations involved when FSIS suspends inspection prior to filing a complaint to withdraw the grant of inspection.

Summary of the Legal Basis:

Under the Federal Meat Inspection Act (21 USC 601 et seq.) and the Poultry Products Inspection Act (21 USC 451 et seq.), FSIS issues regulations governing the production of meat and poultry products prepared for distribution in interstate commerce. The Agency also issues regulations concerning the sanitation conditions

under which such products are prepared.

Alternatives:

No action.

Anticipated Costs and Benefits:

There are no direct costs or benefits associated with this proposal. At present time, there is no way to predict whether industry "down time" will increase or decrease under the proposed rules of practice. To the extent that disputes can be resolved in a timely and more efficient manner, there are potential benefits to both industry and the government. To the extent that clear rules of practice promote timely regulatory action there would be consumer protection benefits.

Risks:

None.

14. SANITATION REQUIREMENTS FOR OFFICIAL MEAT AND POULTRY ESTABLISHMENTS

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

21 USC 451 et seq; 21 USC 601 et seq

CFR Citation:

9 CFR 303; 9 CFR 308; 9 CFR 381; 9 CFR 416

Legal Deadline:

None

Abstract:

FSIS is consolidating the sanitation regulations into a single part applicable to both meat and poultry establishments, eliminating unnecessary differences between the meat and poultry sanitation requirements, and converting many of the highly prescriptive sanitation requirements to performance standards.

Statement of Need:

In the course of its ongoing regulatory review, FSIS identified the need to revise its sanitation requirements for official meat and poultry establishments. A number of the existing sanitation requirements are difficult to understand, redundant, or outdated. Also, there are unnecessary differences between the sanitation requirements for meat and poultry establishments. Further, some of the existing sanitation requirements are no longer needed in light of the Agency's recently finalized HACCP and Sanitation Standard Operating Procedure (SOP) requirements. Finally, some of the current sanitation regulations are unnecessarily prescriptive, may impede innovation, and blur the distinction between establishment and inspector responsibilities for maintaining sanitary conditions.

Summary of the Legal Basis:

Under the Federal Meat Inspection Act (21 USC 601 et seq.) and the Poultry Products Inspection Act (21 USC 451 et seq.), FSIS issues regulations governing the production of meat and poultry products prepared for distribution in interstate commerce. The Agency also issues regulations concerning the sanitation conditions under which such products are prepared.

Alternatives:

FSIS could put into place more comprehensive and prescriptive sanitation regulations. The requirements would then include very specific definitions of terms, such as definitions for food contact surfaces or premises; more prescriptive performance standards, such as microbial criteria for recently cleaned and sanitized food contact surfaces; detailed requirements currently contained in Agency guidance materials, such as an ambient temperature requirement for rooms in which certain processes are conducted; and a list of specific regulatory prohibitions, again largely drawn from existing regulatory and guidance material.

Anticipated Costs and Benefits:

In general, the streamlining, clarification, and consolidation of the sanitation regulations will benefit FSIS, the regulated industry, and consumers. User-friendly regulations simplify compliance and therefore bring about food safety enhancements in individual establishments. Further, consolidation of the separate sanitation requirements for meat and poultry products and the consequent elimination of unnecessary inconsistencies could enhance competition.

This rule allows individual establishments to develop and implement customized sanitation procedures other than those currently mandated, as long as those procedures produced sanitary conditions meeting the proposed performance standards. Establishments taking advantage of the performance standards to innovate thus can benefit from savings accrued through increased efficiency. However, since the currently mandated sanitation procedures meet the proposed performance standards, establishments lacking the resources to innovate could choose to continue employing current procedures. Such establishments should incur no additional expenses as a result of this rule. FSIS therefore anticipates that sanitation performance standards will have a generally favorable economic impact on all establishments, regardless of size.

Risks:

None.

BILLING CODE 3410-90-F

DEPARTMENT OF COMMERCE (DOC)

Statement of Regulatory and Deregulatory Priorities

Sustainable, long-term economic growth is a central focus of the President's policies and priorities. The mission of the Department of Commerce is to promote job creation, economic growth, sustainable development, and improved living standards for all Americans by working in partnership with business, universities, communities, and workers to:

- Build for the future and promote U.S. competitiveness in the global marketplace by strengthening and safeguarding the Nation's economic infrastructure;
- Keep America competitive with cutting-edge science and technology and an unrivaled information base; and
- Provide effective management and stewardship of our Nation's resources and assets to ensure sustainable economic opportunities.

The Commerce mission statement, containing our three strategic themes, provides the vehicle for understanding Commerce's aims, how they interlock, and how they are to be implemented through our programs. Working collectively, the bureaus of the Department (including the Office of the Secretary) developed it with the intent that it serve as both a statement of departmental philosophy and as the guiding force behind the Department's programs.

The importance that this mission statement and these strategic themes have for the Nation is amplified by the vision they pursue for America's communities, businesses, and families. Commerce is the smallest Cabinet agency, yet our presence is felt, and our contributions are found, in every State.

The Commerce Department touches Americans daily in many ways—we make possible the weather reports that all of us hear every morning; we facilitate the technology that all of us use in the workplace and in the home each day; we support the development, gathering, and transmitting of information essential to competitive business; we make possible the diversity of companies and goods found in America's (and the world's) marketplace; we support environmental and economic health for the communities in which Americans live.

The Department of Commerce has a clear and powerful vision for itself, for its role in the Federal Government, and for its roles supporting the American people, now and in the future. We confront the intersection of trade promotion, civilian technology, economic development, sustainable development, and economic analysis, and we want to provide leadership in these areas for the Nation. As a Department, we aspire to provide programs and services which serve our country's businesses, communities, and families, as initiated and supported by the President and the Congress. We are dedicated to making those programs and services as effective as possible and to their being delivered in cost-effective ways. We seek to function in close concert with other agencies having complementary responsibilities so that, collectively, our impact can be accurate and powerful. We seek to meet the needs of our customers quickly and efficiently with the programs, information, and services they require and deserve.

As a permanent part of the Federal Government, but serving an Administration and Congress that can vary with election results, we seek to serve the unchanging needs of the Nation, according to the priorities of the President and the Congress. We are able to do this effectively by functioning in accordance with the legislation that undergirds our programs and by working closely with the President and the committees in Congress which have program and financial oversight for our programs.

In his 1996 State of the Union message, the President said: "Now we move to an age of technology, information, and global competition. These changes have opened vast new opportunities, but they have also presented us with stiff challenges." The Vice President sounded a similar call: "Americans also understand that in a global economy, the only way to maintain America's competitive edge is to lead the world in innovation and new technologies. Investments in science and technology mean better jobs, higher wages, and a growing economy." In the 1997 State of the Union address, the President said: "Over the last four years, we have brought new economic growth by investing in our people, expanding our exports, cutting our deficits, creating over 11 million new jobs, a four-year record.... We face no imminent threat, but we do have an enemy. The enemy of our time is inaction." He continued: "To prepare America for the 21st century, we must harness the powerful forces of science and technology to benefit all Americans."

Again, in the 1998 State of the Union message, the President said: "Rarely have Americans lived through so much change, in so many ways, in so short a time. Quietly, but with gathering force, the ground has shifted beneath our feet as we have moved into an Information Age, a global economy, a truly new world. ... As we enter the 21st century, the global economy requires us to seek opportunity not just at home, but in all the markets of the world. We must shape this global economy, not shrink from it. ... Today, record high exports account for fully one-third of our economic growth. I want to keep them going, because that's the way to keep America growing and to advance a safer, more stable world."

These words help to make clear the role of the Commerce Department: To help keep America as the world's technology leader, to help American companies compete globally, to enable communities to conquer economic challenges, to stimulate the growth of high-pay, high-quality jobs, to preserve and protect the environment and our natural resources as well as safeguarding the public from the adverse impacts of undesirable environmental changes, and to provide information vital for good business and policy decisions.

Commerce promotes and expedites American exports, helps nurture business contacts abroad, protects our firms from unfair foreign competition, and makes how-to-export information accessible to small- and mid-sized companies throughout the Nation so that market opportunities span the globe.

Commerce encourages development in every community by clearing the way for private sector growth by building or rebuilding economically deprived and distressed communities. We promote minority entrepreneurship to establish businesses that frequently anchor neighborhoods and create new job opportunities. We work with the private sector to enhance competitive assets.

As the Nation looks to revitalize our industries and communities, Commerce works as a partner with private entities to build America with an eye on the future. So through technology, research and development, and innovation, we are making sure America is on the winning side.

Commerce's considerable information capacities help businesses understand clearly where our national and world economies are going and to take advantage of that knowledge by planning the road ahead. Armed with this information, businesses can undertake the new ventures, investments, and expansions that make our economy grow.

The capacity for managing the Nation's assets and resources is another key policy driver for Commerce, an essential one in our ability to help the Nation succeed in the future. These activities—ranging from protecting our fisheries to controlling the radio frequency spectrum to protecting intellectual property—affect the economy directly.

This Department of Commerce has instituted the programs and policies that mean cutting-edge, competitive, better paying jobs. We work everyday to boost exports, to deregulate business, to help smaller manufacturers battle foreign competition, to advance the technologies critical to our future prosperity, to invest in our communities, and to fuse economic and environmental goals.

The Department of Commerce is American business' surest ally in job creation, serving as a vital resource base, a tireless advocate, and its Cabinet-level voice.

The Department's regulatory plan directly tracks these policy and program priorities, only a few of which involve regulation of the private sector by the Department.

Responding to the Administration's Regulatory Philosophy and Principles

The vast majority of the Department's programs and activities do not involve regulation. Of the Department's 12 primary operating units, only 5—the Bureau of Export Administration, the International Trade Administration (ITA), the National Institute of Standards and Technology, the National Oceanic and Atmospheric Administration (NOAA), and the Patent and Trademark Office—plan significant preregulatory or regulatory actions for the Regulatory Plan year. Only two of these operating units—ITA and NOAA—have a regulatory action rising to the level of the most important of the Department's significant regulatory actions planned for the Regulatory Plan year.

Though not principally a regulatory agency, the Department of Commerce has long been a leader in advocating and using market-oriented regulatory approaches in lieu of traditional command-and-control regulations when such approaches offer a better alternative. All regulations are designed and implemented to maximize societal benefits while placing the smallest possible burden on those being regulated.

The Commerce Department is also refocusing on its regulatory mission by taking into account, among other things, the President's regulatory principles. To the extent permitted by law, all preregulatory and regulatory activities and decisions adhere to the Administration's statement of regulatory philosophy and principles, as set forth in section 1 of Executive Order 12866. Moreover, we have made bold and dramatic changes, never being satisfied with the status quo. Over the past 5 years, we have emphasized, initiated, and expanded programs that work in partnership with the American people to secure the Nation's economic future. At the same time, we have down-sized, cut regulations, closed offices, and eliminated programs and jobs that are not part of our core mission. The bottom line is that, after much thought and debate, we have made many hard choices needed to make this Department "state of the art."

The Secretary has prohibited the issuance of any regulation that discriminates on the basis of race, religion, gender, or any other suspect category and requires that all regulations be written in simple, plain English and be understandable to those affected by them. The Secretary also requires that the Department afford the public the maximum possible opportunity to participate in departmental rulemakings, even where public participation is not required by law.

Compliance with the Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act (SBREFA) requires, among other things, that agencies regulating the activities of small businesses establish two related programs. Section 213 of SBREFA requires each such agency to have a program for providing regulatory compliance guidance to small businesses. Section 223 requires agencies regulating the activities of small businesses to establish a program for reduction and, in appropriate cases, waiver of civil penalties for violations of a statutory or regulatory requirement by a small entity.

Within the Commerce Department, two agencies regulate the activities of small business, the National Oceanic and Atmospheric Administration (NOAA) and the Bureau of Export Administration (BXA). Both NOAA and BXA have established programs to comply with the requirements of SBREFA.

With respect to section 223, NOAA has established a Fix-It Notice (FIN) program for the reduction or waiver of civil penalties under several of the natural resource protection statutes NOAA enforces, including the Marine Mammal Protection Act, the Endangered Species Act, and the Magnuson-Stevens Fishery Conservation and Management Act. Under the FIN program, dozens of minor, first-time violations, which are of a technical nature and which do not have a direct natural resource impact, receive a Fix-It Notice which allows the violation to be corrected in lieu of a penalty. The Fix-It Notice identifies the violation and allows the violator a specified amount of time to "fix" the violation. At this time, there are over 130 types of violations that have been included in the FIN program. NOAA's Civil Administrative Penalty Schedule has been amended to reflect the FIN program.

Fix-It Notices may be issued by either the National Marine Fisheries Service Office for Law Enforcement or by U.S. Coast Guard Boarding Officers operating in their deputized capacity. Since March 1996, approximately 208 Fix-It Notices were issued in lieu of penalties, many to small entities. The FIN program has helped NOAA achieve compliance and has had a positive response from the regulated community, many of whom are small entities.

NOAA issues written warnings rather than penalties for many minor violations. Since March 1996, NOAA issued approximately 908 written warnings. In addition, NOAA has a "Summary Settlement System" which allows violators, including small entities, to choose not to contest an alleged violation and to pay a reduced penalty within a specified time period following receipt of the Summary Settlement Notice. Since March 1996, approximately 392 Summary Settlement offers were extended by NOAA.

With respect to section 213, NOAA has a comprehensive program for providing regulatory guidance to small entities, which comprise much of NOAA's regulated community. It has long been NOAA's practice to answer inquiries by small entities whenever appropriate in the interest of administering statutes and regulations. Inquiries are received via telephone, mail, and electronic mail; during public hearings, town hall meetings, and workshops held by NOAA throughout

the year; and in the day-to-day interactions that small entities have with NOAA personnel. As a result, NOAA answers tens of thousands of inquiries from small entities each year.

BXA administers a classification and advisory opinion program. Under the Export Administration Regulations (EAR), which sets the criteria for export of dual-use items, commercial items with potential military or weapons proliferation applications, an exporter has a responsibility to classify the item it seeks to export to determine if an export license is required. In light of this responsibility, BXA has established a program whereby an exporter can ask BXA whether the item is subject to the EAR and, if so, the correct classification of that item. Further, for a given end-use, end-user, or destination, BXA will advise an exporter whether an export license is required or likely to be granted. The regulations describing this program can be found at 15 CFR 748.3.

In addition, BXA spends a great deal of time working with industry to educate them about the export control provisions of the EAR. BXA has an aggressive outreach program which has trained over 3,000 exporters during fiscal year 1998. For example, as a standard part of the seminar, BXA provides guidelines entitled "Export Management System Guidelines" to assist firms in ensuring that their exports and export decisions are consistent with the EAR. The EAR also contain "Know Your Customer" guidelines and "red flag" indicators, designed to assist exporters in complying with regulatory requirements.

As violations of the EAR have significant national security and foreign policy implications, we do not believe it appropriate for BXA to develop a penalty reduction or waiver program for violations of the provisions of the EAR. Small and large businesses alike bear responsibility for safeguarding this Nation's overall security and foreign policy interests.

Description of Agency Regulations

International Trade Administration

The International Trade Administration (ITA) is responsible for most nonagricultural trade promotion and enforcement activities of the Federal Government. It works with the Office of the U.S. Trade Representative in coordinating U.S. trade policy. A large component of ITA's activities do not involve regulation. However, ITA has important regulatory authority under a number of U.S. trade laws.

ITA administers programs to strengthen domestic export competitiveness and to promote U.S. industry's increased participation in international markets. ITA's trade development program includes policy development, industry analysis, and promotion organized by industrial sectors such as science and electronics, basic industries, chemicals and allied products, energy, and textiles and apparel. Among its regulatory activities, ITA issues certificates of review providing export trading companies with limited immunity from liability under antitrust laws.

ITA helps achieve the major departmental goal of opening and expanding foreign markets and promoting increased exports of U.S. goods and services in markets with the highest potential for growth, such as Asia and Latin America, and in important growing sectors, such as computers, telecommunications, and environmental technologies. The report of the Trade Promotion Coordinating Committee outlined more than 60 specific actions to strengthen U.S. export promotion efforts. Many of these actions, such as increasing U.S. businesses' awareness of sources of and access to trade finance and the establishment of one-stop U.S. Export Assistance Centers, directly involve ITA but do not involve regulation.

ITA also enforces our trade laws to ensure free and fair competition in our domestic market between U.S.- and foreign-manufactured goods. It administers and enforces the antidumping and countervailing duty laws of the United States. It investigates whether exports to the United States are subsidized or sold at less than fair value; when it finds that they are, and the U.S. International Trade Commission finds that a U.S. industry has been injured or threatened with material injury as a result, it issues an order to the U.S. Customs Service to impose offsetting duties. In addition, ITA administers the Foreign Trade Zone and Watch Quota Programs and the Educational, Scientific, and Cultural Materials Importation Act.

Antidumping and Countervailing Duties Regulations

The top regulatory priority of ITA is completing revision of the countervailing duty regulations to conform to legislation implementing the results of the Uruguay Round multilateral trade negotiations.

The Subsidies/Countervailing Measures Agreement of the Uruguay Round (Agreement) establishes general principles regarding the administration of the countervailing duty law. In order to facilitate the administration of this law and to provide greater predictability for private parties affected by this law, it will be necessary to promulgate regulations which, where appropriate and feasible, translate the principles of the Agreement and the implementing legislation into specific and predictable rules. By clarifying the methodologies and procedures used in administering the countervailing duty law, the efficiency and fairness of this law will be enhanced at little, if any, additional cost. The manner in which these regulations are drafted could have a significant impact on various important sectors of the economy, including steel and lumber.

National Oceanic and Atmospheric Administration

The National Oceanic and Atmospheric Administration establishes and administers Federal policy for the conservation and management of the Nation's oceanic, coastal, and atmospheric resources. It provides a variety of essential environmental services vital to public safety and to the Nation's economy, such as weather forecasts and storm warnings. It is a source of objective information on the state of the environment. NOAA plays the lead role in achieving the departmental goal of promoting stewardship and assessment of the global environment.

In recognition that economic growth must go hand-in-hand with environmental stewardship, the Commerce Department, through NOAA, conducts programs designed to provide a better understanding of the connections between environmental health, economics, and national security. Commerce's emphasis on "sustainable fisheries" is saving fisheries and confronting short-term economic dislocation, while boosting long-term economic growth. The Department of Commerce is where business and environmental interests intersect, and the classic debate on the use of natural resources is transformed into a "win-win" situation for the environment and the economy.

Three of NOAA's major components, the National Marine Fisheries Service (NMFS), the National Ocean Service (NOS), and the National Environmental Satellite, Data, and Information Service (NESDIS), exercise regulatory authority.

NMFS oversees the management and conservation of the Nation's marine

fisheries, protects marine mammals, and promotes the economic development of the U.S. fishing industries. NOS assists the coastal States in their management of land and ocean resources in their coastal zones, including estuarine research reserves; manages the Nation's national marine sanctuaries; monitors marine pollution; and directs the national program for deep-seabed minerals and ocean thermal energy. NESDIS administers the civilian weather satellite program and licenses private organizations to operate commercial land-remote sensing satellite systems.

The Administration is committed to an environmental strategy that promotes sustainable economic development and rejects the false choice between environmental goals and economic growth. The intent is to have the Government's economic decisions be guided by a comprehensive understanding of the environment. The Department of Commerce through NOAA has a unique role in promoting stewardship of the global environment through effective management of the Nation's marine and coastal resources and in monitoring and predicting changes in the Earth's environment, thus linking trade, development, and technology with environmental issues. NOAA has the primary Federal responsibility for providing the sound scientific observations, assessments, and forecasts of environmental phenomena on which resource management and other societal decisions can be made.

In the environmental stewardship area, NOAA's goals include rebuilding U.S. fisheries by refocusing policies and fishery management planning on increased scientific information; increasing the populations of depleted, threatened, or endangered species of marine mammals by implementing recovery plans that provide for their recovery while still allowing for economic and recreational opportunities; promoting healthy coastal ecosystems by ensuring that economic development is managed in ways that maintain biodiversity and long-term productivity for sustained use; and modernizing navigation and positioning services. In the environmental assessment and prediction area, goals include modernizing the National Weather Service; implementing reliable seasonal and interannual climate forecasts to guide economic planning; providing science-based policy advice on options to deal with very long term (decadal to centennial) changes in the environment; and advancing and improving short-term warning and forecast services for the entire environment.

Magnuson-Stevens Act Rulemakings

Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) rulemakings concern the conservation and management of fishery resources in the U.S. 3-to-200-mile Exclusive Economic Zone (EEZ). Among the several hundred rulemakings that NOAA plans to issue in the Regulatory Plan year, a number of the preregulatory and regulatory actions will be significant. The exact number of such rulemakings is unknown, since they are usually initiated by the actions of eight regional Fishery Management Councils (FMCs) that are responsible for preparing fishery management plans (FMPs) and FMP amendments and for drafting implementing regulations for each managed fishery and by other circumstances which cannot be predicted. Once a rulemaking is triggered by a FMC, the Magnuson-Stevens Act places stringent deadlines upon NMFS in which it must exercise its rulemaking responsibilities. Most of these rulemakings will be minor, involving only the opening or closing of a fishery under an existing FMP. While no one Magnuson-Stevens Act rulemaking is among the Department's most important significant regulatory actions, and therefore none is specifically described below, the sum of these actions, and a few of the individual actions themselves, are highly significant.

The Magnuson-Stevens Act, which is the primary legal authority for Federal regulation to conserve and manage fishery resources, establishes eight regional FMCs responsible for preparing FMPs and FMP amendments. NMFS issues regulations to implement FMPs and FMP amendments. FMPs address a variety of fishery matters, including depressed stocks, over-fished stocks, gear conflicts, and foreign fishing. One of the problems that FMPs may use is preventing overcapitalization (preventing excess fishing capacity) of fisheries by limiting access to those dependent on the fishery in the past and/or by allocating the resource through individual transferable quotas which can be sold on the open market to other participants or those wishing access. Quotas set on good scientific information whether as a total fishing limit for a species in a fishery or as a share assigned to each vessel participant enable stressed stocks to rebuild. Other measures include staggering fishing seasons or limiting gear types to avoid gear conflicts on the fishing grounds and establishing seasonal and area closures to protect fishery stocks.

NMFS favors the concept of framework FMPs where applicable. Such FMPs provide ranges, boundaries, and decision rules within which NMFS can change management measures without formally amending the FMP. Further, consistent with the recommendations on improving regulatory systems accompanying the Report of the National Performance Review, NMFS favors using market-oriented approaches in managing fisheries. Open-access fisheries are destined to have too many people investing too much money in vessels and equipment. Access controls (e.g., a limited number of permits) represent a rational approach for managing fishery resources; they can be used to control fishing mortality levels and to prevent over-fishing, economic dissipation, and subsequent economic and social dislocation. Of course overall quotas will need to be set based on the best scientific information available as to such things as stock status and optimum yields.

The FMCs provide a forum for public debate and, using the best scientific information available, make the judgments needed to determine optimum yield on a fishery-by-fishery basis. Optional management measures are examined and selected in accordance with the national standards set forth in the Magnuson-Stevens Act. This process, including the selection of the preferred management measures, constitutes the development, in simplified form, of an FMP. The FMP, together with draft implementing regulations and supporting documentation, is submitted to NMFS for review against the national standards set forth in the Magnuson-Stevens Act, in other provisions of the Act, and other applicable laws. The same process applies to amending an existing approved FMP.

The Magnuson-Stevens Act contains 10 national standards against which fishery management measures are judged. NMFS has supplemented the standards with guidelines interpreting each standard and is currently in the process of updating and adding to those guidelines. One of the national standards requires that management measures, where practicable, minimize costs and avoid unnecessary duplication. Under the guidelines, NMFS will not approve management measures submitted by an FMC unless the fishery is in need of management.

Together, the standards and the guidelines correspond to many of the Administration's principles of regulation as set forth in section 1(b) of Executive Order 12866. One of the national standards establishes a qualitative equivalent to the Executive Order's "net benefits" requirement—one of the focuses of the Administration's statement of regulatory philosophy as stated in section 1(a) of the Order.

Licensing of Private Commercial Remote-Sensing Satellite Systems

NOAA/NESDIS is planning to issue final regulations revising its procedures governing the licensing of private commercial Earth remote-sensing space systems under title II of the Land Remote Sensing Policy Act of 1992, 15 U.S.C. 5601 et seq. (1992 Act).

Title II of the 1992 Act requires that any person subject to the jurisdiction or control of the United States obtain a license from the Secretary of Commerce before operating a private remote-sensing space system. The authority to issue licenses has been delegated to the Administrator of NOAA and redelegated to the Assistant Administrator for Satellite and Information Services.

On July 10, 1987, NOAA published final regulations implementing title IV of the Land Remote Sensing Act of 1984 (the 1984 Act) setting forth the procedural requirements for obtaining a license. In 1988, the Radio Television News Directors Association (RTNDA) filed a Petition for Rulemaking requesting NOAA to reopen these regulations in light of the President's January 5, 1988, Decision Directive encouraging commercial space development. On January 18, 1989, NOAA responded to this Petition, agreeing to reopen the regulations and incorporate certain principles favorable to commercial development that were consistent with the Directive. (See 54 FR 1945.)

Shortly thereafter, Congress began to review the 1984 Act and, on October 28, 1992, enacted the 1992 Act, which repealed and succeeded the 1984 Act. The 1992 Act made significant changes to the 1984 Act, particularly with regard to the latter's requirement that all unenhanced data must be provided on a nondiscriminatory basis. The 1992 Act also provided for judicial review of certain licensing and enforcement actions. NOAA has issued 10 licenses under the regime established in the 1992 Act.

On March 9, 1994, the President issued a Policy Decision to "support and enhance U.S. competitiveness in the field of remote-sensing space capabilities while at the same time protecting U.S. interests in national security and international obligations." This policy established a number of policies that promote an appropriate balance between these interests. Specifically, the President's policy announced the goal of enhancing U.S. competitiveness in a market that is projected to be worth approximately $2 billion worldwide by the year 2000, while at the same time addressing the national security concerns brought up by other Government agencies. The President's policy covers foreign access to remote-sensing systems, technology, products, and data. It states that there is a presumption that systems whose capabilities are already available in the global marketplace will be "favorably considered." It also elaborated eight more conditions that are to be applied to any license. The most significant of these conditions are:

1) During periods when national security or international obligations and/or foreign policies may be compromised, as defined by the Secretary of Defense or the Secretary of State respectively, the Secretary of Commerce may, after consultation with the appropriate agencies, require the licensee to limit data collection and/or distribution by the system to the extent necessitated by the given situation. Decisions to impose such limits only will be made by the Secretary of Commerce in consultation with the Secretary of Defense or Secretary of State, as appropriate. Disagreements between Cabinet Secretaries may be appealed to the President;

2) that the licenses are not subject to foreign ownership, above a specified threshold, without the explicit permission of the Secretary of Commerce; and

3) licensees must notify the U.S. Government of its intent to enter into significant or substantial agreements with new foreign customers. Interested agencies are to be given advance notice of such agreements to allow them to review the proposed agreement in light of national security, international obligations, and foreign policy concerns. The President's policy stated that the definition of a significant or substantial agreement, as well as the time frames and other details of this process, were to be defined by the Commerce Department in regulations.

On December 4, 1995, a Notice of Inquiry and Request for Public Comment was published in the Federal Register, wherein NOAA sought public comment to decide whether, and to what extent, the 1987 regulations needed revision in light of the President's Policy and the 1992 Act and, if so, which issues should be addressed. NOAA received seven sets of comments. Additionally, NOAA held a public hearing at the Department of Commerce on June 14, 1996, at which it received additional input from interested parties. The main theme that emerged at the public hearing was the need for transparency and predictability in the regulations.

On November 3, 1997, NOAA issued a proposed rule to revise its remote-sensing licensing procedures. The proposed regulations would update the 1987 regulations to reflect the above described intervening events and information gathered through the public process, as well as the experience gained during recent licensing procedures. The intent of the proposed regulations would be to help promote the development of the commercial remote-sensing industry by keeping Government oversight to the minimum necessary to ensure protection of U.S. national security and foreign policy interests and by making that role predictable and transparent to the affected applicants and licensees. An underlying premise is that the long-term national security and foreign policy interests of the United States are best served by helping the U.S. industry to lead this emerging market.

The November 3, 1997, proposed regulations incorporate the basic regulatory principle that any restrictions on a licensee, including those required for national security and foreign policy purposes, must be the least burdensome possible to achieve the stated objective. Further, the proposed rule would establish a notice mechanism for allowing up to 49 percent foreign ownership in the licensee and monitoring domestic investment so that control of the remote-sensing system cannot be transferred without a formal amendment to the license. As required by the President's 1994 policy, the rule sought to define what foreign agreements are significant or substantial and must be submitted for review. Agency actions under the regulation would be reviewable by an administrative law judge.

On April 1, 1998, NOAA held a public meeting to listen to public comments on the proposed regulations. The public comment period ended the next day, April 2, 1998. NOAA received 18 sets of substantive comments on the regulations and is currently reviewing these and revising the proposed regulations accordingly.

DOC—International Trade Administration (ITA)

FINAL RULE STAGE

15. ANTIDUMPING DUTIES; COUNTERVAILING DUTIES

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

19 USC 1671 et seq; 19 USC 1673 et seq; 19 USC 1303

CFR Citation:

19 CFR 351; 19 CFR 353; 19 CFR 355

Legal Deadline:

Other, Statutory, January 1, 1996.

Section 103(b) of the Uruguay Round Agreements Act establishes January 1, 1996, as the deadline for interim final regulations.

Abstract:

Revisions of the countervailing duty regulations are necessary due to enactment of legislation implementing the results of the Uruguay Round multilateral trade negotiations. By clarifying the methodologies and procedures used in administering the countervailing duty law, the efficiency and fairness of this law will be enhanced at little, if any, additional cost.

Statement of Need:

Regulations are needed to implement the results of the Uruguay Round with respect to the administration of the countervailing duty laws. The Subsidies/Countervailing Measures Agreement establishes general principles regarding the administration of this law. In order to facilitate the administration of this law and to provide greater predictability for private parties affected by it, it will be necessary to promulgate regulations which, where appropriate and feasible, translate the principles of the Agreement and the implementing legislation into specific and predictable rules. Amendments conforming the antidumping regulations with the Uruguay Round Agreements Act were issued in May 1997.

Summary of the Legal Basis:

The Secretary of Commerce is responsible for administering the countervailing duty laws pursuant to 19 USC 1671 et seq. The law conforms to the Agreement and reflects internationally agreed rules regarding unfair trade. The Secretary, acting through the Import Administration of the International Trade Administration, is responsible for processing petitions from firms that allege they have been harmed by unfair competition from imports, making preliminary and final determinations about whether such competition was subsidized and conducting periodic administrative reviews of countervailing duty orders. Merchandise found to be benefiting from subsidies is subject to duties in the amount of the subsidization.

Alternatives:

The Subsidies/Countervailing Measures Agreement establishes clearer rules and stronger disciplines in the subsidies area while also making certain subsidies nonactionable, provided they are subject to conditions designed to limit distorting effects. The Agreements create three categories of subsidies and remedies: (1) prohibited subsidies; (2) permissible subsidies which are actionable if they cause adverse trade effects; and (3) permissible subsidies which are nonactionable if they are structured according to criteria intended to limit their potential for distortion.

Anticipated Costs and Benefits:

The Uruguay Round agreements are anticipated to create hundreds of thousands of high-wage, high-skilled jobs in the United States. Further, economists estimate that the Uruguay Round will increase trade and will add between $100 and $200 billion to the United States economy after the Round is fully implemented. Finally, the Uruguay Round agreements create an effective set of rules for the prompt settlement of disputes by eliminating shortcomings in the current system that allows parties to prolong the process and block adverse determinations.

The costs of administering the countervailing duty system will be increased pursuant to the rules established in the Uruguay Round and the implementing legislation. The agreements dictate a number of new obligations in the investigation of petitions and the conduct of administrative reviews. Binding dispute settlement under the World Trade Organization (WTO) will also increase legal costs because substantially more challenges to ITA determinations will be brought to the WTO forum.

DOC—National Oceanic and Atmospheric Administration (NOAA)

FINAL RULE STAGE

16. LICENSING OF PRIVATE COMMERCIAL REMOTE-SENSING SATELLITE SYSTEMS

Priority:

Other Significant

Legal Authority:

15 USC 5601 et seq

CFR Citation:

50 CFR 960.1 et seq

Legal Deadline:

None

Abstract:

The final regulations would update the 1987 regulations to reflect the intervening events and information gathered through the public process, as well as the experience gained during recent licensing procedures. The intent of the regulations is to help promote the development of the commercial remote-sensing industry by keeping Government oversight to the minimum necessary to ensure protection of U.S. national security and foreign policy interests and by making that role predictable and transparent to the affected applicants and licensees. An underlying premise is that the long-term national security and foreign policy interests of the United States are best served by helping the U.S. industry to lead this emerging market.

Statement of Need:

On July 10, 1987, NOAA published final regulations implementing title IV of the Land Remote Sensing Act of 1984 (the 1984 Act) setting forth the procedural requirements for obtaining a license. In 1988, the Radio Television News Directors Association (RTNDA) filed a Petition for Rulemaking requesting NOAA to reopen these regulations in light of the President's January 5, 1988 Decision Directive encouraging commercial space development. On January 18, 1989, NOAA responded to this Petition, agreeing to reopen the regulations and incorporate certain principles favorable to commercial development that were consistent with the Directive (see 54 FR 1945).

Shortly thereafter, Congress began to review the 1984 Act and, in October 1992, enacted the 1992 Act, which repealed and succeeded the 1984 Act. The 1992 Act made significant changes to the 1984 Act, particularly with regard to the latter's requirement that all unenhanced data must be provided on a nondiscriminatory basis. The 1992 Act also provided for judicial review of certain licensing and enforcement actions.

On November 3, 1997, NOAA issued proposed regulations revising its procedures governing the licensing of private commercial Earth remote-sensing space systems under title II of the Land Remote Sensing Policy Act of 1992, 15 U.S.C. 5601 et seq. (1992 Act). On April 1, 1998, NOAA held a public meeting to listen to public comments on the proposed regulations. The public comment period ended the next day, April 2, 1998. NOAA received 18 sets of substantive comments on the regulations, and is currently reviewing these and revising the proposed regulations accordingly.

Summary of the Legal Basis:

Title II of the 1992 Act requires that any person subject to the jurisdiction or control of the United States obtain a license from the Secretary of Commerce (Secretary) before operating a private remote-sensing space system. The authority to issue licenses has been delegated to the Administrator of NOAA and redelegated to the Assistant Administrator for Satellite and Information Services.

Alternatives:

The November 3, 1997, proposed regulations incorporate the basic regulatory principle that any restrictions on a licensee, including those required for national security and foreign policy purposes, must be the least burdensome possible to achieve the stated objective. Further, the proposed rule would establish a notice mechanism for allowing up to 49 percent foreign ownership in the licensee and monitoring domestic investment so that control of the remote-sensing system can not be transferred without a formal amendment to the license. As required by the President's 1994 policy, the proposed rule would define what foreign agreements are significant or substantial and must be submitted for review. Agency actions would be reviewable by an administrative law judge.

The fundamental goal of the proposed rule was to support and enhance U.S. industrial competitiveness in the field of remote-sensing space capabilities while at the same time protecting U.S. national security and foreign policy interests. The measures included in the proposed rule are those necessary to protect U.S. interests. The alternatives to the measures proposed would be the establishment of national security and foreign policy controls that would hinder or prevent growth of the commercial market or allowing unrestricted commercial operations that could harm U.S. national security and foreign policy interests. The final regulations will achieve this goal.

Anticipated Costs and Benefits:

The intent of the regulations is to help promote the development of the commercial remote-sensing industry by keeping Government oversight to the minimum necessary to ensure protection of U.S. national security and foreign policy interests and by making that role predictable and transparent to the affected applicants and licensees. An underlying premise is that the long-term national security and foreign policy interests of the United States are best served by helping the U.S. industry to lead this emerging market. Failure to provide a regulatory regime which nurtures and fosters the development of this high-skilled, high-wage industry is likely to result in the United States losing not only its advantage in this technology, but also a great percentage of the projected growth in economic value of this industry. The costs of the licensing procedures would be borne, for the most part, by the Federal Government and would not be significant.

BILLING CODE 3510-BW-F

DEPARTMENT OF DEFENSE (DOD)

Statement of Regulatory Priorities

Background

The Department of Defense (DoD) is the largest Federal department consisting of 3 military departments (Army, Navy, and Air Force), 9 unified combatant commands, 15 Defense agencies, and 8 DoD field activities. It has over 1,395,000 military personnel and 725,000 civilians assigned as of May 31, 1998, and over 500 military installations and properties in the continental United States, U. S. territories, and foreign countries. The overall size, composition, and dispersion of the Department of Defense, coupled with an innovative regulatory program, presents a challenge to the management of the Defense regulatory efforts under Executive Order 12866 "Regulatory Planning and Review" of September 30, 1993.

Because of its diversified nature, DoD is impacted by the regulations issued by regulatory agencies such as the Departments of Energy, Health and Human Services, Housing and Urban Development, Labor, Transportation, and the Environmental Protection Agency. In order to develop the best possible regulations that embody the principles and objectives embedded in Executive Order 12866, there must be coordination of proposed regulations among the regulating agencies and the affected Defense components. Coordinating the proposed regulations in advance throughout an organization as large as DoD is straightforward, yet a formidable undertaking.

DoD is not a regulatory agency but occasionally issues regulations that have an impact on the public. These regulations, while small in number compared to the regulating agencies, can be significant as defined in Executive Order 12866. In addition, some of DoD's regulations may impact the regulatory agencies. DoD, as an integral part of its program, not only receives coordinating actions from the regulating agencies, but coordinates with the agencies that are impacted by its regulations, as well.

The Regulatory Program within DoD fully incorporates the provisions of the President's priorities and objectives under Executive Order 12866. Promulgating and implementing the regulatory program throughout DoD presents a unique challenge to the management of our regulatory efforts.

Coordination

Interagency

DoD annually receives regulatory plans from those agencies that impact the operation of the Department through the issuance of regulations. A system for coordinating the review process is in place, regulations are reviewed, and comments are forwarded to the Office of Management and Budget. The system is working in the Department, and the feedback from the Defense components is most encouraging since they are able to see and comment on regulations from the other agencies before they are required to comply with them. The coordination process in DoD continues to work as outlined in Executive Order 12866.

Internal

Through regulatory program points of contact in the Department, we have established a system that provides information from the Vice President and the Administrator of the Office of Information and Regulatory Affairs (OIRA) to the personnel responsible for the development and implementation of DoD regulations. Conversely, the system can provide feedback from DoD regulatory personnel to the Administrator, OIRA. DoD continues to refine its internal procedures, and this ongoing effort to improve coordination and communication practices is well received and supported within the Department.

Overall Priorities

The Department of Defense needs to function at a reasonable cost, while ensuring that it does not impose ineffective and unnecessarily burdensome regulations on the public. The rulemaking process should be responsive, efficient, cost-effective, and both fair and perceived as fair. This is being done at a time when there is a significant ongoing downsizing in the Department and it must react to the contradictory pressures of providing more services with fewer resources.

The Department of Defense, as a matter of overall priority for its regulatory program, adheres to the general principles set forth in Executive Order 12866 as amplified below.

Problem Identification

Congress typically passes legislation to authorize or require an agency to issue regulations and often is quite specific about the problem identified for correction. Therefore, DoD does not generally initiate regulations as a part of its mission.

Conflicting Regulations

Since DoD does not plan to issue any significant regulations this year, the probability of developing conflicting regulations is low. Conversely, DoD is impacted to a great degree by the regulating agencies. From that perspective, DoD is in a position to advise the regulatory agencies of conflicts that appear to exist using the coordination processes that exist in the DoD and other Federal agency regulatory programs. It is a priority in the Department to communicate with other agencies and the affected public to identify and proactively pursue regulatory problems that occur as a result of conflicting regulations both within and outside the Department.

Alternatives

DoD will identify feasible alternatives that will obtain the desired regulatory objectives. Where possible, the Department encourages the use of incentives to include financial, quality of life, and others to achieve the desired regulatory results.

Risk Assessment

Assessing and managing risk is a high priority in the DoD regulatory program. The Department is committed to risk prioritization and an "anticipatory" approach to regulatory planning which focuses attention on the identification of future risk. Predicting future regulatory risk is exceedingly difficult due to rapid introduction of new technologies, side effects of Government intervention, and changing societal concerns. These difficulties can be mitigated to a manageable degree through the incorporation of risk prioritization and anticipatory regulatory planning into DoD's decisionmaking process which results in an improved regulatory process and increases the customer's understanding of risk.

Cost-Effectiveness

One of the highest priority objectives of DoD is to obtain the desired regulatory objective by the most cost-effective method available. This may or may not be through the regulatory process. When a regulation is required, DoD considers incentives for innovation to achieve desired results, consistency in the application of the regulation, predictability of the activity outcome (achieving the expected results), and the costs for regulation development, enforcement, and compliance. These will include costs to the public, Government, and regulated entities, using the best available data or parametric analysis methods, in the

cost-benefit analysis and the decisionmaking process.

Cost-Benefit

Conducting cost-benefit analyses on regulation alternatives is a priority in the Department of Defense so as to ensure that the potential benefits to society outweigh the costs. Evaluations of these alternatives are done quantitatively or qualitatively or both, depending on the nature of the problem being solved and the type of information and data available on the subject. DoD is committed to considering the most important alternative approaches to the problem being solved and providing the reasoning for selecting the proposed regulatory change over the other alternatives.

Information-Based Decisions

The Defense Department uses the latest technology to provide access to the most current technical, scientific, and demographic information in a timely manner through the world-wide communications capabilities which are available on the "information highway." Realizing that increased public participation in the rulemaking process improves the quality and acceptability of regulations, DoD is committed to exploring the use of Information Technology (IT) in rule development and implementation. IT provides the public with easier and more meaningful access to the processing of regulations. Furthermore, the Department endeavors to increase the use of automation in the Notice and Comment Rulemaking process in an effort to reduce time pressures in the regulatory process.

Performance-Based Regulations

Where appropriate, DoD is incorporating performance-based standards that allow the regulated parties to achieve the regulatory objective in the most cost-effective manner.

Outreach Initiatives

DoD endeavors to obtain the views of appropriate State, local, and tribal officials and the public in implementing measures to enhance public awareness and participation both in developing and implementing regulatory efforts. Historically, this has included such activities as receiving comments from the public, holding hearings, and conducting focus groups. This reaching out to organizations and individuals who are affected by or involved in a particular regulatory action remains a significant regulatory priority of the Department and, we feel, results in much better regulations.

Coordination

DoD has enthusiastically embraced the coordination process between and among other Federal agencies in the development of new and revised regulations. Annually, DoD receives regulatory plans from key regulatory agencies and has established a systematic approach to providing the plans to the appropriate policy officials within the Department. Feedback from the DoD components indicates that this communication among the Federal agencies is a major step forward in improving regulations and the regulatory process, as well as in improving Government operations.

Minimize Burden

In the regulatory process, there are more complaints concerning burden than anything else. In DoD, much of the burden is in the acquisition area. Over the years, acquisition regulations have grown and become burdensome principally because of legislative action. But, in coordination with Congress, the Office of Federal Procurement Policy, and the public, DoD is initiating significant reforms in acquisition so as to effect major reductions in the regulatory burden on personnel in Government and the private sector.

DoD implemented a multi-year strategy for reducing the paperwork burden imposed on the public. This plan shows that DoD has met and will exceed the goals set forth in the Paperwork Reduction Act, which requires a 25 percent reduction in each agency's burden by the end of FY 1998. The Department achieved a 25 percent reduction by the end of FY 1996, and an additional 9 percent in FY 1997. During FY 1998, DoD achieved its second largest reduction ever, for a single collection, by reducing the paperwork burden by 17.2 million hours through program changes. Another significant reduction in the burden imposed on the public was achieved as a result of the review of the information collection requirement in support of the solicitation phase of the Department of Defense acquisition process. The information collection requirement pertains to information that an offeror must submit to DoD in response to DoD solicitations not covered by another OMB clearance. As a result of recent revisions to the duty-free entry information collection requirements, DoD reduced the burden hours imposed on the public under this information collection requirement by 530,884 hours per year. Further, DoD reduced 88,711 hours per year from the burden imposed on the public to support foreign acquisitions. This reduction is based on the most current data available in DoD data bases, as well as other information from other sources, such as the number of duty-free entry certificates processed and the number of reports received relating to contract performance outside the United States. It is the goal of the Department of Defense to impose upon the public the smallest burden viable, as infrequently as possible, and for no longer than absolutely necessary.

Plain Language

Ensuring that regulations are simple and easy to understand is a high regulatory priority in the Department of Defense. All too often, the regulations are complicated, difficult to understand, and subject to misinterpretation, all of which can result in the costly process of litigation. The objective in the development of regulations is to write them in clear, concise language that is simple and easy to understand.

DoD recognizes that it has a responsibility for drafting clearly written rules that are reader-oriented and easily understood. Rules will be written for the customer using natural expressions and simple words. Stilted jargon and complex construction will be avoided. Clearly written rules will tell our customers what to do and how to do it. DoD is committed to a more customer-oriented approach and uses Plain Language rules thereby improving compliance and reducing litigation. The Department will adhere to the timetable established in the President's memorandum of June 1, 1998, regarding Plain Language in Government Writing, for incorporation of plain writing techniques in official documents.

In summary, the rulemaking process in DoD should produce a rule that addresses an identifiable problem, implements the law, incorporates the President's policies defined in Executive Order 12866, is in the public interest, is consistent with other rules and policies, is based on the best information available, is rationally justified, is cost-effective, can actually be implemented, is acceptable and enforceable, is easily understood, and stays in effect only as long as is necessary. Moreover, the proposed rule or the elimination of a rule should simply make sense.

Specific Priorities

For this regulatory plan, there are three specific DoD priorities, all of which reflect the established regulatory principles. In those areas where rulemaking or participation in the regulatory process is required, DoD has studied and developed policy and regulation which incorporate not only the provisions of the President's priorities and objectives under the Executive order but also the National Performance Review, dated September 1993.

DoD has focused its regulatory resources on the most serious environmental, health, and safety risks. Perhaps most significant is that each of the three priorities described below promulgates regulations to offset the resource impacts of Federal decisions on the public or to improve the quality of public life such as those regulations concerning wetlands, acquisition, and health care delivery.

Preserve Quality and Quantity of Wetlands

During FY 1999, the U.S. Army Corps of Engineers is not proposing any significant regulations as defined by Executive Order 12866. The Office of the Assistant Secretary of the Army (Civil Works) and the Corps will propose and complete two regulations initiated as part of the President's August 24, 1993, Wetlands Protection Plan and the President's 1995 Regulatory Reinvention Initiative. The wetlands protection plan provides for a fair, flexible, and effective approach to protecting America's wetlands through both regulatory and nonregulatory mechanisms. The regulatory reinvention initiative reinforced those provisions and included additional regulatory reform and streamlining provisions.

During 1998 and 1999, the Corps will propose and finalize two regulations pursuant to its authorities under section 404 of the Clean Water Act and section 10 of the Rivers and Harbors Act of 1899. The first regulation will establish an administrative appeal process whereby permit applicants and landowners can appeal permit denial decisions. This regulation was proposed on July 19, 1995, with a similar regulation on appealing jurisdictional determinations. The permit denial appeal regulation will be finalized in 1999. The administrative appeal process will increase fairness to applicants and landowners in the permitting process by establishing a recourse to Corps permit denial decisions without pursuing litigation. The process will also provide for interested party involvement when the Corps reconsiders a previous denial. The jurisdictional determination appeal regulation has been deferred, pending adequate funding from Congress.

The second regulation will be to clarify the scope of analysis that the Corps has responsibility for under the Endangered Species Act (ESA). The Corps scope of analysis for the National Environmental Policy Act and the National Historic Preservation Act is established in 33 CFR part 325, appendices B and C, respectively. This regulation will adopt the Corps ESA scope of analysis consistent with the ESA, the ESA regulations, and the Corps authorities.

Reform Defense Acquisition

The Department continues its efforts to reengineer its acquisition system to achieve its vision of an acquisition system which is recognized as being the smartest, most efficient, most responsive buyer of best value goods and services which meet the warfighter's needs from a globally competitive base. To achieve this vision, the Department will focus in the acquisition regulations arena during this next year on implementing and institutionalizing initiatives which may include additional changes to existing and recently modified regulations to ensure that we are achieving the outcomes we desire (continuous process improvement). The Department will focus on reengineering the process by which it acquires services, focusing on the use of performance-based work statements. The Department also intends to improve its use of electronic commerce/electronic data interchange.

The Department is committed to acquisition reform and continues to make significant improvements in this area, consistent with the National Performance Review and Executive Order 12866. DoD is leading the following initiatives to reform the acquisition process, which include integrating commercial and military facilities and expanding the ability to buy commercial products and expanding the use of commercial procedures.

Integration of commercial and military facilities is critical to enable the Department to capitalize on and access commercial technology and generate funds for modernization, all within a balanced-budget environment. To accomplish civil-military integration, DoD is developing a plan to remove the current barriers to this integration and provide guidelines and incentives for industry to achieve the desired objective. The 1994 Coopers & Lybrand (C&L)/TASC, Inc., report "The DoD Cost Premium: A Quantitative Assessment" formed the basis for expectations of possible future cost reductions by defining the cost premium differential between the commercial and military sectors. The Department's plan is to capitalize on the foundation established by this effort.

The C&L/TASC, Inc., report identified the regulatory cost drivers that contributed to the average 18 percent premium that DoD pays for goods and services. In 1996, DoD developed comprehensive action plan assessments for the top 24 cost drivers and addressed the next 35 cost drivers. These assessments were last updated in June 1996. DoD is currently updating those regulatory cost driver plans. In those updates, the Department will address unresolved implementation challenges and other collateral reform efforts, as well as integrate Defense Reform Initiative, Management Reform Memorandum, and National Performance Review activities. In the fall of 1998, the Department will select a number of regulatory candidates designed to further integrate commercial and military facilities.

In addition to the need to integrate commercial and military facilities, the Department must expand on the ability to buy commercial products and expand the use of commercial procedures. DoD continuously reviews its supplement to the Federal Acquisition Regulation and continues to lead Governmentwide efforts to simplify the following acquisition processes:

- Rewrite of FAR part 45, Government Property. The goals of the FAR part 45 rewrite are to reduce contractor and Government costs to manage property in the possession of contractors by streamlining recordkeeping requirements; to eliminate requirements to track, report, and inventory property valued at $1,500 or less during contract performance; to replace five inventory schedules with a single inventory disposal schedule; and to shorten screening times prior to property disposal. The FAR part 45 rewrite also encourages the dual use of Government property introducing commercial rental practices and reducing property rental costs.
- Rewrite the FAR guidance pertaining to Progress Payments. The goal of this initiative is to simplify the progress payments process and to minimize the burdens imposed on contractors and contracting officers.
- Review of FAR representations. The goal of this initiative is to remove or reduce certain requirements for

representations and other statements from offerors and contractors. Removing or reducing these requirements will eliminate unnecessary burdens that are placed on offerors and contractors.

- Review of various FAR cost principles. The goal of this initiative is to determine whether certain FAR cost principles are still relevant in today's business environment, whether they place an unnecessary administrative burden on contractors and the Government, and whether they can be streamlined or simplified. For example, we are considering: (1) Revising the Relocation Cost Principle to remove ceilings imposed on specific relocation costs and to recognize the growing commercial practice of reimbursing relocation costs on a lump-sum basis; (2) deleting the Civil Defense Cost Principle since, with the end of the Cold War, the special guidance provided is no longer deemed necessary; (3) revising the Recruitment/Public Relations and Advertising Cost Principle to remove excessive wording and details for streamlining purposes; and (4) revising the Insurance and Indemnification Cost Principle to streamline the guidance.

Improve Health Care Delivery in the Defense Department

The Department of Defense is able to meet its dual mission of wartime readiness and peacetime healthcare by operating an extensive network of medical treatment facilities. This network includes DoD's own military treatment facilities and the civilian healthcare providers, facilities, and services under contract to DoD through the TRICARE program. TRICARE is a major healthcare initiative designed to improve the management and integration of DoD's healthcare delivery system. The program's goal is to increase access to healthcare services, improve healthcare quality, and control healthcare costs. TRICARE offers enrollment in an HMO-like option (Prime) and two options that do not require enrollment: A preferred provider-like option (Extra) and a fee for service option (Standard), formally known as CHAMPUS. Like the old CHAMPUS program, under TRICARE, DoD continues to share the cost of civilian healthcare with its eligible beneficiaries when services are not available in the military medical treatment facility. DoD initiated the TRICARE Senior Prime Demonstration Project with the Health Care Financing Administration (HCFA). This program enables DoD to offer beneficiaries over the age of 65 years the ability to enroll in the TRICARE HMO option. Once DoD meets the prescribed level of effort in providing healthcare to this population, HCFA will share the cost of the benefit with DoD. This demonstration project is conducted under the authority of section 1896 of the Social Security Act, as added by section 4015 of the Balanced Budget Act of 1997 (Pub. L. 105-33).

The principal health-related regulatory publications of the Department are based on CHAMPUS, the Civilian Health and Medical Program of the Uniformed Services (32 CFR part 199). CHAMPUS regulations are comprehensive and address issues such as: Eligibility, benefits, authorized providers, claims payment, appeals procedures, and the healthcare delivery options available under TRICARE.

DoD coordinates changes to CHAMPUS regulations with the Departments of Transportation (U. S. Coast Guard), Health and Human Services (Public Health Service), and Commerce (National Oceanic and Atmospheric Administration) whose beneficiaries are also eligible for CHAMPUS.

Revisions in the TRICARE/CHAMPUS Program's statutory base or DoD initiatives to improve the program may result in amendments to the regulation. DoD's regulatory priorities for the upcoming year include: Promulgation of regulations governing enrollment in military health system managed care programs and the management of high cost health care cases.

BILLING CODE 5000-04-F

DEPARTMENT OF EDUCATION (ED)

Statement of Regulatory and Deregulatory Priorities

General

The Department supports States, local communities, institutions of higher education, and others to improve education nationwide. The Department's roles include leadership and financial support for education to agencies, institutions, and individuals in situations where there is a national interest; monitoring and enforcing of civil rights in the area of education; and supporting research, evaluation, and dissemination of findings to improve the quality of education. ED works in partnership with parents, neighborhoods, schools, colleges, educators, business leaders, communities, and States across the country.

Since the announcement of President Clinton's "Regulatory Reinvention Initiative" on March 4, 1995, the Department has conducted a comprehensive review of its programs, legislation, and implementing regulations to enhance partnerships, increase flexibility, and improve accountability. In response to the initiative, the Department has eliminated approximately 39 percent of the pages of its regulations published in the Code of Federal Regulations—including a full 2/3 of the regulations applicable to elementary and secondary education programs—and simplified another third. Changes in additional regulations have also been proposed as a result of recently enacted or currently pending legislation.

The Department has accomplished these results through a departmentwide effort that recognizes that students and educational partners are best served by regulations that focus on critical steps and results, allow as much flexibility as possible consistent with statutory and program goals, and impose the least possible burden.

As part of its regulatory reinvention efforts and in response to the President's memorandum of June 1, 1998, on "Plain Language in Government Writing," the Department also seeks to draft all of its regulations and related documents clearly and concisely in plain language, so that potential program beneficiaries will better understand benefits and requirements.

Woven throughout the Department's reinvention is a commitment to provide quality customer service in the spirit of continuous improvement to assure that we are truly "putting people first." The Department listens to our customers to identify their needs and incorporates their suggestions into program goals and strategies.

In order to provide information and support enhanced exchange, the Department instituted 1-800-USA-LEARN to connect our customers to a "one-stop-shopping" center for information about departmental programs and initiatives; 1-800-4FED-AID for information on student aid; and an on-line library of information on education legislation, research, statistics, and promising programs. Internet address: http://www.ed.gov. More than 10,000 people take advantage of these resources every week.

The Department has forged effective partnerships with customers and others to develop policies, regulations, guidance, technical assistance, and compliance approaches. The Department has an impressive record of successful communication and shared policy development with affected persons and groups, including parents, representatives of State and local government, institutions of higher education, school administrators, teachers, students, special education and rehabilitation service providers, professional associations, advocacy organizations, business, and labor.

In particular, the Department continues to seek greater and more useful customer participation in its rulemaking activities through the use of consensual rulemaking and new technology. When rulemaking is determined to be absolutely necessary, customer participation is essential and sought at all stages—in advance of formal rulemaking, during rulemaking, and after rulemaking is completed in anticipation of further improvements through statutory or regulatory changes. The Department has expanded its outreach efforts through the use of satellite broadcasts, electronic bulletin boards, and teleconferencing. For example, the Department invites comments on all proposed rules through the Internet.

The Department is streamlining information collections, reducing burden on information providers involved in ED programs, and making information maintained by the Department easily available to the public. Coordinating similar information collections across programs may be one approach to reduce overlapping and inconsistent paperwork requirements. To the extent permitted by statute, regulations will be revised to eliminate barriers that inhibit coordination across programs (such as by creating common definitions), to reduce the frequency of reports, and to eliminate unnecessary data requirements. ED has reduced the information collection burden imposed on the public by 14.7 percent in fiscal year (FY) 1996, by 11 percent in FY 1997, and expects to achieve its goal of another 5 percent reduction in FY 1998.

The Department's Principles for Regulating, developed in October 1994 during planning to implement the Improving America's Schools Act of 1994, determine when and how it will regulate. Through aggressive application of the following principles, the Department has eliminated outdated or unnecessary regulations and identified situations in which major programs could be implemented without any regulations or with only limited regulations.

Principles for Regulating

The Department will regulate only if regulating improves the quality and equality of services to the Department's customers, learners of all ages. The Department will regulate only when absolutely necessary and then in the most flexible, most equitable, and least burdensome way possible.

Whether to Regulate:

- When essential to promote quality and equality of opportunity in education.
- When a demonstrated problem cannot be resolved without regulation.
- When necessary to provide legally binding interpretation to resolve ambiguity.
- Not if entities or situations to be regulated are so diverse that a uniform approach does more harm than good.

How to regulate:

- Regulate no more than necessary.
- Minimize burden and promote multiple approaches to meeting statutory requirements.
- Encourage federally funded activities to be integrated with State and local reform activities.
- Ensure that benefits justify costs of regulation.
- Establish performance objectives rather than specify compliance behavior.
- Encourage flexibility so institutional forces and incentives achieve desired results.

Regulatory and Deregulatory Priorities for the Next Year

Individuals with Disabilities Education Act Amendments of 1997

On June 4, 1997, the President signed into law Public Law 105-17, the

Individuals with Disabilities Education Act Amendments of 1997, amending the Individuals with Disabilities Education Act (IDEA). Enactment of these amendments provides an opportunity to consider improvements in all of the regulations implementing the IDEA, including both formula and discretionary grant programs, that would strengthen the Federal effort to give every child a world-class education based on high standards. The Department is also reviewing the impact of these regulations on small entities in accordance with section 610(c) of the Regulatory Flexibility Act. The Secretary invited public comment on the development of the regulations for educating all children with disabilities in a notice published in the Federal Register on June 27, 1997 (62 FR 35052), and published a notice of proposed rulemaking on October 22, 1997 (62 FR 55026). The comment period ended on January 20, 1998, and more than 4,500 written comments were received.

Higher Education Amendments of 1998

Legislation reauthorizing the Higher Education Act has recently been enacted (Pub. L. 105-244, enacted October 7, 1998). Development of any regulations necessary to implement the new law will be a Department priority in 1999. However, no specific regulations can be scheduled or anticipated at this time. To the extent regulations are necessary, they will be developed through regulatory negotiation with the participation of interested parties.

ED—Office of Special Education and Rehabilitative Services (OSERS)

FINAL RULE STAGE

17. ASSISTANCE FOR EDUCATION OF ALL CHILDREN WITH DISABILITIES (SECTION 610 REVIEW)

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

20 USC 1400 et seq

CFR Citation:

34 CFR 300; 34 CFR 301; 34 CFR 303

Legal Deadline:

None

Abstract:

These regulations would implement the Individuals with Disabilities Education Act Amendments of 1997 (Pub. L. 105-17, enacted June 4, 1997). This regulatory action includes a review of existing regulations in 34 CFR parts 300 and 301 pursuant to the Regulatory Flexibility Act (5 USC 610), although the proposed regulatory changes have been determined not to have a significant economic impact on a substantial number of small entities. Regulations are needed to ensure that the rights of children with disabilities and their parents under this statute are protected. Public comments are invited respecting the current regulations as well as the regulatory changes needed to implement Pub. L. 105-17.

Statement of Need:

These regulations would implement new legislation and are expected to reduce regulatory burden and increase flexibility by improving the regulations implementing the Individuals with Disabilities Education Act (IDEA). The Department is also completing its scheduled review of these regulations under section 610(c) of the Regulatory Flexibility Act.

Summary of the Legal Basis:

Pub. L. 105-17, enacted June 4, 1997.

Alternatives:

In addition to implementing new legislation, the purpose of reviewing these regulations is to determine whether there are appropriate alternatives.

Anticipated Costs and Benefits:

Existing regulatory provisions may be eliminated or improved as a result of this review.

Risks:

These proposed regulations would not address a risk to public health, safety, or the environment.

BILLING CODE 4000-01-F

DEPARTMENT OF ENERGY (DOE)

Statement of Regulatory Priorities

The Department makes vital contributions to the Nation's welfare through its extraordinary scientific and technical capabilities in energy research, environmental remediation, and national security. The Department's top priorities are:

- Enhancing the Nation's energy security by developing and deploying clean and affordable energy supplies and by improving the energy efficiency of our economy;
- Ensuring a safe and reliable nuclear weapons stockpile and reducing the global nuclear danger;
- Cleaning up former nuclear weapons sites and addressing the complex challenge of disposing of nuclear wastes; and
- Leveraging science and technology to advance fundamental knowledge and our country's competitiveness with stronger partnership with the private sector.

The Department of Energy's 1998 regulatory plan reflects the Department's continuing commitment to enhance safety, cut costs, reduce regulatory burden, and increase responsiveness to the public. While not primarily a major Federal regulatory agency, the Department's regulatory activities are essential to achieving its critical mission and priorities.

Energy Efficiency Program for Consumer Products and Commercial Equipment

In April 1997, the Department published a final rule (62 FR 23101) to revise energy efficiency standards for refrigerators and freezers manufactured after January 1, 2001. The energy savings from the new efficiency standards for refrigerators are expected to be 6.7 quadrillion BTUs or more than 580 billion kilowatt hours of electricity over 30 years. "That is equivalent to 4 years of electric power generated by the Tennessee Valley Authority, the Nation's largest public utility. It represents a mountain of coal a half mile high that doesn't have to be burned," said Vice President Al Gore. The new refrigerators, which will use 30 percent less energy, will save consumers over $1 billion in 2010 and over $2 billion in 2020.

In September 1997, the Department published a final rule (62 FR 50122) to establish energy efficiency standards for room air conditioners, which will result in a 10 percent energy saving. With more than 4.8 million room air conditioners sold annually in the United States, the new standards will save consumers up to 450 million dollars by 2030. The new room air conditioner standards are the result of a cooperative effort among industry, environmentalists, consumer advocates, utilities, and the Department. The new standards will reduce carbon dioxide emissions by 54 million metric tons over 30 years—or the equivalent of burning a football field full of coal three-and-a-half miles high. Saving the Nation the equivalent of 110 million barrels of oil over a 30-year period, the new standards are good for industry, good for consumers, and good for the environment.

In a final rule published in September 1998, the Department determined that new or revised energy efficiency standards for electric cooking products (i.e., kitchen ranges, ovens, and microwaves) could not be economically justified.

The Department established an Advisory Committee on Appliance Energy Efficiency Standards in January 1997. The advisory committee is made up of interested stakeholders and is chaired by the Assistant Secretary for Energy Efficiency and Renewable Energy. In April 1998, the committee made its most recent recommendations to the Department. The Department will be collecting data to implement these recommendations in future rulemaking analyses, including the use of marginal energy rates, a range of future energy prices, and primary energy conversion factors.

The Department's rulemaking activities related to energy efficiency standards and determinations have been categorized as high, medium, or low priority. The schedules in this regulatory plan and the Unified Agenda of Federal Regulatory and Deregulatory Actions reflect priorities established with significant input from the public. The standards rulemakings will incorporate the process improvements established in July 1996, including more workshops to collect public input and new, more transparent forecasting models developed with the help of industry experts, including manufacturers.

During fiscal year 1999, the Department expects to take substantial action with respect to the high priority standards rulemakings (i.e., clothes washers, fluorescent lamp ballasts, water heaters, and residential central air conditioning and central air conditioning heat pumps). Additional information and timetables for these actions are presented below. Information concerning the medium priority rulemakings (i.e., small electric motors and high intensity discharge lamps) and low priority rulemakings (i.e., clothes dryers, dishwashers, mobile home furnaces, residential furnaces and boilers, pool heaters, direct heating equipment, 1-200 HP motors, and fluorescent and incandescent lamps) and the test procedures rulemakings can be found in the Department's regulatory agenda, which appears elsewhere.

Nuclear Safety Regulations

The Department is committed to openness and public participation as it addresses one of its greatest challenges—managing the environment, health, and safety risks posed by its nuclear activities. A key element in the management of these risks is to establish the Department's expectations and requirements relative to nuclear safety and to hold its contractors accountable for safety performance. The 1988 Price-Anderson Amendments Act revisions to the Atomic Energy Act required the Department to enforce contractor violations of nuclear safety requirements through the imposition of civil and criminal penalties. As a result, new nuclear safety requirements were initiated with the publication of four notices of proposed rulemaking for review and comment in 1991. The Department's nuclear safety procedural regulations (10 CFR part 820) were published as a final rule in 1993. The Department is revising two rules on radiation protection (10 CFR parts 834 and 835) to establish additional reporting, monitoring, and discharge requirements and a dose limitation system for protecting the environment and the public, as well as the Department's Federal and contractor work force. Part 835 was published as a final rule in December 1994. Revisions to part 835 based on a comprehensive evaluation of the Department's radiation protection program are expected to be finalized this fall. The new nuclear safety management rule (10 CFR part 830) will codify and strengthen requirements applicable to contractors and subcontractors who manage and operate the Department's nuclear facilities. The quality assurance regulations of this rule (10 CFR 830.120) were published as a final rule in April 1995.

In August 1995, the Department published a notice of limited reopening of the comment period to request public

comments on the remaining part 830 and part 834 rulemakings. The Department has substantially completed the comment resolution process and has addressed the major issues raised by the Defense Nuclear Facilities Safety Board snd the Environmental Protection Agency (EPA). The Department expects to complete final action on the part 834 rulemaking before July 1999.

The Department recently established an integrated safety management initiative to ensure that safety activities at a DOE site or facility are integrated and appropriate for the work and hazards. One outcome of this initiative, incorporated as part of the contract reform final rule published on June 27, 1997, requires contractors to manage and perform work in accordance with a documented safety management system that ensures that safety is integrated into all phases of work. Part 830 is being reviewed to ensure its regulatory framework is consistent with integrated safety management and to avoid duplication and counterproductive efforts. The part 830 rulemaking will be completed in 2 phases. Phase 1 will address such issues as the conduct of operations, technical safety training, and safety reporting. Phase 2 will establish requirements for nuclear design criteria, fire protection, natural phenomena hazards mitigation, and nuclear criticality safety. The Department expects to complete final action on phase 1 and to issue a proposed rule on phase 2 of part 830 by the middle of 1999.

Additionally, the Department is conducting pilot projects to assess the feasibility of external regulation of its nuclear facilities and activities by the Nuclear Regulatory Commission (NRC). Both DOE and NRC are reviewing their respective nuclear safety rules as part of an ongoing pilot program. These reviews will determine (a) whether DOE facilities, which were designed, built, and operated under DOE requirements, could be operated and regulated under current NRC requirements and (b) whether any transition would be facilitated by revisions to either DOE or NRC rules. The time necessary to conduct these reviews is reflected in the revised schedule for completing the part 830 rule, which addresses facilities safety requirements.

In May 1997, the Department issued a notice of intent to form an advisory committee on beryllium. The purpose of this committee was to provide advice, information, and recommendations for a proposed rulemaking on occupational exposures to beryllium, which the Department expects to publish for comment in November 1998. As an interim measure, the Department issued an administrative directive to establish a chronic beryllium disease prevention program that enhances an existing worker protection program.

Regulatory Reform

The Department is committed to making its regulations less burdensome, more cost-effective, and more responsive to the needs of our stakeholders. Since 1995, the Department has eliminated over one-third of its regulations and reduced by one-quarter the paperwork burden it imposes on the public. In addition, the Department has revised over the past 3 years more than half of its existing regulations in an effort to make them simpler and easier to understand.

In June 1998, the President directed agencies to use plain language in regulations issued after January 1, 1999. In response to this initiative, the Department is including the use of plain language in its rulemaking development training program. The Department also is conducting a sunset review of its internal regulations (i.e., directives, manuals, and guides), which will provide an opportunity to either cancel old documents or revise them to make them more understandable.

DOE—Energy Efficiency and Renewable Energy (EE)

PRERULE STAGE

18. ENERGY EFFICIENCY STANDARDS RULEMAKINGS AND DETERMINATIONS FOR HIGH PRIORITY CONSUMER PRODUCTS AND COMMERCIAL EQUIPMENT

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect the private sector under PL 104-4.

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 6295

CFR Citation:

10 CFR 430

Legal Deadline:

Final, Statutory, January 1, 1992, (fluorescent lamp ballasts and water heaters).

Final, Statutory, January 1, 1994, (central air conditioners and heat pumps).

Final, Statutory, May 14, 1996, (clothes washers).

Abstract:

The Energy Policy and Conservation Act (EPCA), as amended, establishes initial energy efficiency standard levels for most types of major residential appliances and generally requires DOE to undergo two subsequent rulemakings, at specified times, to determine whether the current standard for a covered product should be amended.

This is the initial review of the statutory standards for fluorescent lamp ballasts, water heaters, and central air conditioners and heat pumps. This is the second review of the standard for clothes washers.

These actions are covered by RINs 1904-AA67, 1904-AA75, 1904-AA76, and 1904-AA77.

Statement of Need:

These rulemakings are required by statute. Experience has shown that the choice of residential appliances and commercial equipment being purchased by both builders and building owners is generally based on the initial cost rather than on life-cycle cost. Thus, the law requires minimum energy efficiency standards for appliances to eliminate inefficient appliances and equipment from the market.

Summary of the Legal Basis:

The Energy Policy and Conservation Act (EPCA), as amended, establishes initial energy efficiency standard levels for most types of major residential appliances and certain types of commercial equipment and generally requires DOE to undergo rulemakings, at specified times, to determine whether the standard for a covered product should be made more stringent.

Alternatives:

The statute requires DOE to conduct rulemakings to review standards and to revise standards to achieve the maximum improvement in energy efficiency that the Secretary determines is technologically feasible and economically justified. In making this determination, the Department conducts a thorough analysis of alternative standard levels, including the existing standard, based on criteria specified by statute. The process improvements that were recently announced (61 FR 36974, July 15, 1996) further enhance the analysis of alternative standards. For example, DOE will ask stakeholders and private sector technical experts to review its analyses of the likely impacts, costs, and benefits of alternative standard levels. In addition, the Department will solicit and consider information on non-regulatory approaches for encouraging the purchase of energy efficient products.

Anticipated Costs and Benefits:

The specific costs and benefits for these rulemakings have not been established because the final standard levels have not been determined. Nevertheless, existing appliance standards are projected to save 23 quadrillion Btu's of energy from 1993 to 2015, resulting in estimated consumer savings of $1.7 billion per year in the year 2000 and estimated annual emission reductions of 107 million tons of carbon dioxide and 280 thousand tons of nitrogen oxides in the year 2000. Under the existing standards, the discounted energy savings for consumers are 2.5 times greater than the up-front price premium paid for the appliance.

Risks:

Without appliance efficiency standards, energy use will continue to increase with resulting damage to the environment caused by atmospheric emissions. Enhancing appliance energy efficiency reduces atmospheric emissions of carbon dioxide and nitrogen oxides. Establishing standards that are too stringent could result in excessive increases in the cost of the product, possible reductions in product utility and may place an undue burden on manufacturers that could result in a loss of jobs or other adverse economic impacts.

Regulatory Flexibility Analysis Required:

No

Government Levels Affected:

State, Local

Additional Information:

Due to the Department's limited staff and financial resources, regulatory actions related to energy efficiency standards have been categorized as high, medium, and low priority based on significant input from the public. This action is a high priority, and the Department is working actively on this action.

DOE—Departmental and Others (ENDEP)

PROPOSED RULE STAGE

19. CHRONIC BERYLLIUM DISEASE PREVENTION PROGRAM

Priority:

Other Significant

Legal Authority:

42 USC 2201; 42 USC 7191

CFR Citation:

10 CFR 850

Legal Deadline:

None

Abstract:

This action will add requirements for the control of occupational exposures to beryllium at DOE and DOE contractor facilities and operations. This action reflects the Department's ongoing commitment to strengthen the protection of health, safety, and the environment from the hazards posed by its facilities.

Statement of Need:

The purpose of this rule is to ensure that the Department's obligation to provide a safe and healthy workplace is fulfilled.

Summary of the Legal Basis:

Under the Atomic Energy Act of 1954, as amended, the Department of Energy has the authority to regulate activities at facilities under its jurisdiction. The Department is committed to honoring its obligation to ensure the health and safety of workers and the public affected by its operations.

Alternatives:

The Department could continue to impose health and safety requirements through directives made applicable to DOE contractors through the terms of their contracts.

Anticipated Costs and Benefits:

The incremental costs of the proposed rule should be minimal. Full compliance with these requirements will enhance occupational health and safety at certain DOE facilities.

Risks:

This rulemaking would reduce the risk of an occupational hazard by clarifying worker protection program requirements applicable to DOE contractors.

DOE—ENDEP

FINAL RULE STAGE

20. NUCLEAR SAFETY MANAGEMENT

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 2201; 42 USC 7191

CFR Citation:

10 CFR 830

Legal Deadline:

None

Abstract:

This action will add regulations under 10 CFR 830 to establish nuclear safety management requirements for the Department's nuclear facilities. These requirements stem from the Department's obligations to assure adequate protection and to hold contractors who manage and operate these facilities accountable and responsible for safe operations. Under phase 1 of this action, major requirements will include conduct of operations, safety analysis reports, technical safety requirements training, maintenance, unreviewed safety questions and occurrence reporting. Under phase 2 of this action, major requirements will include nuclear design criteria, fire protection, natural phenomena hazards mitigation, and nuclear criticality safety. An initial phase adopted a quality assurance rule and definitions.

Statement of Need:

The purpose of this rule is to ensure that the Department's obligation to protect health and safety is fulfilled and to provide, if needed, a basis for the assessment of civil and criminal penalties consistent with the Price-Anderson Amendments Act of 1988. This action is consistent with the Department's commitment to the issuance of all new nuclear safety requirements using notice and comment rulemaking.

Summary of the Legal Basis:

Under the Atomic Energy Act of 1954, as amended, the Department of Energy has the authority to regulate activities at facilities under its jurisdiction. The Department is committed to honoring its obligation to ensure the health and safety of the public and the protection of the environs around its facilities.

Alternatives:

The Department could continue to impose nuclear safety requirements through directives made applicable to DOE contractors through the terms of their contracts.

Anticipated Costs and Benefits:

The incremental costs of the proposed rules should be minimal because contractors are currently bound by comparable contractual obligations. Full compliance by contractors with nuclear safety standards will result in substantial societal benefits.

Risks:

This rulemaking should reduce the risk of nuclear safety problems by clarifying safety requirements applicable to DOE contractors and improving compliance.

DOE—ENDEP

21. RADIATION PROTECTION OF THE PUBLIC AND THE ENVIRONMENT

Priority:

Other Significant

Legal Authority:

42 USC 2201; 42 USC 7191

CFR Citation:

10 CFR 834

Legal Deadline:

None

Abstract:

This action would add a new 10 CFR 834 to DOE's regulations establishing a body of rules setting forth the basic requirements for ensuring radiation protection of the public and environment in connection with DOE nuclear activities. These requirements stem from the Department's ongoing effort to strengthen the protection of health, safety, and the environment from the nuclear, radiological, and chemical hazards posed by these DOE activities. Major elements of the proposal included a dose limitation system for protection of the public; requirements for liquid discharges; reporting and monitoring requirements; and residual radioactive material requirements.

Statement of Need:

The purpose of this rule is to ensure that the Department's obligation to protect health and safety is fulfilled and to provide, if needed, a basis for the assessment of civil and criminal penalties consistent with the Price-Anderson Amendments Act of 1988. This action is consistent with the Department's commitment to the issuance of all new nuclear safety requirements using notice and comment rulemaking.

Summary of the Legal Basis:

Under the Atomic Energy Act of 1954, as amended, the Department of Energy has the authority to regulate activities at facilities under its jurisdiction. The Department is committed to honoring its obligation to ensure the health and safety of the public and workers affected by its operations and the protection of the environs around its facilities.

Alternatives:

The Department could continue to impose nuclear safety requirements through directives made applicable to DOE contractors through the terms of their contracts.

Anticipated Costs and Benefits:

The incremental costs of the proposed rules should be minimal because contractors are currently bound by comparable contractual obligations. Full compliance by contractors with nuclear safety standards will result in substantial societal benefits.

Risks:

This rulemaking should reduce the risk of nuclear safety problems by clarifying safety requirements applicable to DOE contractors and improving compliance.

BILLING CODE 6450-01-F

DEPARTMENT OF HEALTH AND HUMAN SERVICES (HHS)

Statement of Regulatory and Deregulatory Priorities

The Department of Health and Human Services (HHS) is the Federal Government's principal agency for protecting the health of all Americans and for providing essential human services, especially to those least able to help themselves.

The Department manages more than 300 programs, including some of the largest in the Federal Government such as Medicare and Medicaid, and some of the smallest. These programs range from efforts to improve infant health to programs providing home-delivered meals for the elderly; from the collecting of basic national health statistics to the providing of front-line clinical services; from the conduct of cutting-edge biomedical research to the ensuring of the safety of the Nation's food and drug products—25 percent of the Nation's GNP. HHS is of course heavily involved in assisting the States in the historic effort to help all former welfare recipients who can work to go to work.

For the foreseeable future, the Department's regulatory priorities, as presented in the individual plan entries that follow, reflect primarily the imperatives for Medicare restructuring mandated by numerous provisions of the Balanced Budget Act of 1997; the streamlining of programs and practices within the Food and Drug Administration (FDA) resulting from 1997's FDA Modernization Act; and implementation of welfare reform.

In addition, the Health Insurance Portability and Accountability Act of 1996 gave the Department major new responsibilities concerning health data standards and health record privacy; HHS has issued four notices of proposed rulemaking relating to the standards to be adopted. An additional NPRM and a Notice of Intent are under development.

Underlying our efforts to move forward in these areas in FY 1999 and beyond, there remains the new focus and discipline in regulatory policy established by the President's September 30, 1993, issuance of Executive Order 12866 "Regulatory Planning and Review." Under the principles enunciated in this Order and through the Administration's subsequent regulatory reform initiatives, the Department assures that its rules:

- Emphasize performance standards and market incentives over prescriptive, command-and-control requirements;
- Regularly use benefit-cost analysis to achieve policy objectives in the most efficient manner;
- Are developed in consultation with those most affected, especially our partners in the Federal system at the State and local levels; and
- Focus specifically on clearly identified problems and avoid overly broad, one-size-fits-all approaches to these problems.

Efforts to comply with these principles have been a continuing HHS priority since 1993. The resulting changes in our rulemaking approaches are leading to reduced burden, better communication with our customers, solid consensus building, and a less adversarial environment, while maintaining the stewardships that the Department is statutorily obligated to provide.

A few recent illustrative examples of such regulatory actions include:

- A final rule published on July 24, 1998, after consulting widely with grantees and other affected organizations, to clarify, streamline, simplify, and unify the Federal child care and development block grant program. Under this rule, the Department revised existing regulations in light of the child care amendments contained in the welfare reform legislation, thus assuring the health and safety of children in child care, achieving a balance between program flexibility and accountability, and recognizing that child care is a key support for work as envisioned in the Temporary Assistance for Needy Families program.
- A regulation implementing the new Medicare+Choice program, published on June 26, 1998, under which, starting January 1999, a broader array of health plans will join Medicare, including preferred provider organizations, provider-sponsored organizations, private fee-for-service plans, and a Medical Savings Account demonstration project. These expanded health plan choices, known as Medicare+Choice, will provide Medicare beneficiaries with expanded opportunities to tailor their choice of health care plan to their own needs.
- A proposal published on May 7, 1998, to streamline the processing of health care claims and reduce the amount of paperwork in the U.S. health care system. Under the proposal, hospitals, doctors, nursing homes, and other providers would use a unique alpha-numeric identifier when filing claims for reimbursement. In addition, a standard format for the electronic filing of these claims was proposed. It is estimated that these measures will lead to savings of at least $1.5 billion over the first 5 years they are in effect.
- A final rule published on October 15, 1997, pertaining to biologics establishments. Under preexisting regulations, biological product manufacturers had to name a "responsible head" who would exercise control of the manufacturing establishment in all matters and would represent the manufacturer in all pertinent matters with the Food and Drug Administration. However, because biological product manufacturing encompasses a range of complex functions, each with its own specific expertise, it became impractical to expect manufacturers to find a "responsibile head." Thus, to reduce unnecessary regulatory burdens on the biologics industry, the requirement was eliminated.

The bulk of HHS's regulatory activity emanates from programs of the Food and Drug Administration, the Health Care Financing Administration, and the Administration for Children and Families. There follow statements of regulatory priorities pertaining to these three HHS components, followed by their regulatory plan entries.

Food and Drug Administration

The Food and Drug Administration's regulatory strategy involves three main goals: (1) To reflect new technologies or programs that will benefit the public, affected industries, and the Agency or further protect the public health; (2) to provide more information to consumers so that they may use FDA-regulated products more safely or effectively; and (3) to eliminate unnecessary burdens on industry.

For example, on February 2, 1998, FDA issued regulations requiring the sponsor of any drug, including a biological product, or device marketing application (applicant), to submit certain information concerning the compensation to, and financial interests of, any clinical investigator conducting certain clinical studies. This requirement will apply to any covered clinical study of a drug or device submitted in a marketing application that the applicant or FDA relies on to establish that the product is effective, including studies that show equivalence to an effective product, or that make significant contribution to the demonstration of safety. This final rule requires applicants to certify to the absence of certain financial interests of clinical investigators and/or disclose those financial interests, as required, when covered clinical studies are submitted to FDA in support of product marketing. This regulation is intended to ensure that financial interests and arrangements of clinical investigators that could affect reliability of data submitted to FDA in support of product marketing are identified and disclosed by the sponsor of any application.

On October 28, 1997, FDA published final Mammography Quality Standards Act (MQSA) regulations in the Federal Register. Most of these regulations will take effect on April 28, 1999, while some (equipment, quality control tests) will be phased in from a period of 18 months to 5 years. The purpose of the regulations is to ensure high quality mammography for early breast cancer detection. The final regulations fulfill FDA's responsibility under MQSA to establish national quality standards for mammography services. All mammography facilities, except those of the Veterans Administration (VA), must meet these requirements. Facilities that do only interventional mammography are exempt at this time. The regulations establish criteria designed to enhance the quality of mammography services in a manner that is reasonably achievable by mammography facilities. The regulations substantially raise the standards for mammography personnel, equipment, quality assurance and control, patient notification of results, the mammography medical report, and performance of the accreditation body.

Better consumer information was the goal of the Juice Labeling final rule, which appeared in the Federal Register on July 8, 1998 (63 FR 37029). In this rule, FDA is revising its food labeling regulations to require a warning statement on fruit and vegetable juice products that have not been processed to prevent, reduce, or eliminate pathogenic microorganisms that may be present. FDA is taking this action to inform consumers, particularly those at greatest risk, of the hazard posed by such juice products. FDA expects that providing this information to consumers will allow them to make informed decisions on whether to purchase and consume such juice products, thereby reducing the incidence of foodborne illness and deaths caused by the consumption of these products.

In addition to the relief provided to the biologics industry in the rulemaking on a "responsible head" of biologics establishments noted above, FDA proposed to reduce unnecessary burden on the device industry as well. On March 5, 1998, FDA proposed to reclassify over-the-counter (OTC) test sample collection systems for drugs of abuse testing from class III (premarket approval) into class I (general controls) and to exempt them from the premarket notification (501(k)) and current good manufacturing practice (CGMP) requirements. FDA also proposed to designate OTC test sample collection systems for drugs of abuse testing as restricted devices under the Federal Food, Drug, and Cosmetic Act (the Act) and to establish restrictions intended to assure consumers that: The underlying laboratory test(s) are accurate and reliable; the laboratory performing the test(s) has adequate expertise and competency: and the product has adequate labeling and methods of communicating test results to consumers Finally, FDA proposed a conforming amendment to the existing classification regulation for specimen transport and storage containers to clarify that it does not apply to specimen transport and storage containers that are part of an OTC test sample collection system for the purpose of testing for the presence of drugs of abuse or their metabolites in a laboratory.

Plan Entries

FDA's plan continues to reflect the Agency's goals of using new programs to benefit the public and affected industries and protecting the public, providing more information to consumers so that they may use FDA-regulated products more safely or effectively, and eliminating unnecessary burdens on the industry.

The plan includes a final rule that would establish requirements for a comprehensive food safety assurance program for domestically produced and imported juices based on Hazard Analysis Critical Control Points (HACCP) principles. This initiative is a response to several outbreaks of illness associated with juice products. FDA's current view is that a HACCP system of preventative controls would be an effective and efficient way to ensure that these products are safe.

Another final rule would require manufacturers of human cellular and tissue-based products to register with FDA and to submit a list of all products. The rule is designed to provide a rational, comprehensive, and clear framework for a rapidly growing industry that produces human cellular and tissue-based products.

A third final rule would establish procedures and requirements pertaining to the dissemination of information on unapproved uses (also referred to as "new uses" and "off-label uses") for marketed drugs, including biologics, and devices. The final rule would include requirements concerning submissions to the Food and Drug Administration, requests to extend the time period for completing studies needed to submit a supplemental application for a new use, applications for an exemption from the requirement to conduct studies, recordkeeping, and reporting. The final rule would also cover Agency actions on such submissions, requests, and applications, as well as orders to cease or to terminate dissemination of information.

Also included in the plan is a proposal that would amend the regulation for hearing aids. Current regulations require consumers to be examined by a physician before they purchase a hearing aid but also allow for a waiver. Because this waiver provision may be misused, FDA is considering whether to eliminate the waiver provision and instead require a medical evaluation when certain previously undiagnosed conditions are found or when the prospective hearing aid user is under 18 years of age. Additionally, the proposal would restrict the dispensing of a hearing aid to patients who have undergone a comprehensive hearing assessment within the past 12 months. This proposal reflects changes in the nature of hearing aids because, in the past, hearing loss often was caused by medically treatable conditions. Due to advances in health care, such cases of hearing loss are less common today, so there may be less need for a medical examination. However, advances in hearing aid technology necessitate proper testing in order for a hearing aid to be effective.

In multiple rulemakings, the Food and Drug Administration is proposing to amend the biologics regulations by removing, revising, or updating specific regulations applicable to blood derivative products to be more consistent with current practices and to remove unnecessary or outdated requirements. This initiative is based on a comprehensive review of the regulations that has been performed. A key action is the "Lookback" requirements for hepatitis C virus (HCV). In this rulemaking, FDA will propose to amend the biolgics regulations to require that blood establishments prepare and follow written procedures for appropriate action when it is determined that blood and blood components at increased risk

for transmitting HCV infection have been collected from a donor who, at a later date, tested repeatedly reactive for evidence of HCV. For a complete listing of the rulemakings associated with the Blood Initative, see the Unified Agenda section. These actions are intended to help ensure the continued safety of the Nation's blood supply.

Another FDA final rule would create a standardized format and content requirements for over-the-counter (OTC) drug product labeling. As health costs increase and OTC drugs—including some drugs that were once available only by prescription—become increasingly available, consumers are engaging in self-medication. Consequently, it is increasingly important that consumers read and understand OTC drug product labeling, and so FDA's rule is intended to enable consumers to better read and understand OTC drug product labeling and to apply this information so they can use OTC drug products safely and effectively.

Lastly, a proposed rule highlighted in the Plan would amend the regulations governing the format and content of professional labeling for human prescription drug and biologic products. The proposal would also eliminate certain unnecessary statements that are currently required to appear on prescription drug labels and move certain information to patient labeling.

Administration for Children and Families

The Administration for Children and Families (ACF) continues to pursue regulatory reform as an integral part of the Agency's mission to improve the lives of children and families. With the passage of major welfare reform legislation in August 1996 (the Personal Responsibility and Work Opportunity Reconciliation Act of 1996), ACF is committed to meeting its responsibilties to implement this comprehensive law in ways that reflect both the letter and spirit of the President's Regulatory Reinvention Initiative.

For example, in developing proposed and final regulations on the Temporary Assistance for Needy Families (TANF) program, as well as on child care program, the child support enforcement program, and other welfare reform-related provisions, ACF conducted extensive consultations with hundreds of State and local government officials, advocates, labor organizations, academics, researchers, and technical experts. ACF also met with other Federal agencies and held a series of policy discussions within the Department. These productive consultations have informed our work through the regulatory development process. Once the proposed regulations were published, ACF considered carefully all the public comments received in developing final regulations. As a result, the proposed and final welfare reform regulations published to date have benefited from the broad input we received.

The following plan entry describes a final rule that will govern key provisions of the new welfare block grant program known as the Temporary Assistance for Needy Famililes—or TANF—program. The regulation addresses the work, accountability, 5-year time limit, and data collection and reporting provisions of the TANF program. It provides States with a basic set of rules which will assist them in implementing welfare reform; emphasizes the importance of work participation and the potential impact of TANF on needy children and families; demonstrates our good faith in implementing the law and assuming our new Federal role; and encourages and supports States' flexibility, innovation, and creativity.

ACF is committed to continuing this important process of consultation as we work with our partners in the coming year to develop and publish final regulations to implement the welfare reform law.

Health Care Financing Administration

The Balanced Budget Act

The short timeframe between the enactment of the Balanced Budget Act of 1997 (BBA) on August 5, 1997, and the effective date of the legislation, October 1, 1997, required HCFA and other offices of the Department to work at a furious pace to put forth the necessary guidance and regulations to implement the provisions of the Act.

Children's Health Insurance Program

As part of the BBA, the Children's Health Insurance Program (CHIP) provided for an optional program to allow States to initiate and expand child health assistance to uninsured, low-income children. Regulations to implement these provisions (HCFA-2114, State Child Health Initiative: State Allotments and Payments) will be published in the near future.

However, it is noteworthy that all of the guidance related to the Children's Health Insurance Program (CHIP), as authorized in the BBA, has been developed in less than a year's time and in the absence of formal regulations. Due to these extensive and continuing efforts, CHIP is now in operation prior to the completion of regulations.

While implementation of the new program involves a crosscutting effort throughout the Department, HCFA's Center for Medicaid and State Operations is administering the program. To assist States with developing their plans, a model application template was furnished that provides information on the requirements and options under the law. HCFA has developed and implemented a budget and expenditure reporting system and associated report forms for States to submit CHIP financial and statistical information. HCFA and the Department have also issued procedures for plan submittal and approval and for ensuring coordination with Medicaid programs.

To ensure clarity of program requirements and to foster enhanced State understanding of the complexity of statutory provisions, HCFA and the Department have worked with States as they develop their plans in accordance with the new law. HCFA sponsored nine regional conferences to help inform States of all the options available to cover children under CHIP. HCFA has also conducted onsite training for States in all 10 HCFA Regional Offices on the CHIP allotment and payment processes, the CHIP-related budget and expenditure system, and State financial and statistical reporting requirements. In addition, HCFA and the Department have been soliciting input and feedback from interested consumer and advocacy groups, the National Governors' Association and other State and local government groups, as well as individual States, throughout the process. This input and feedback has been sought to continuously improve HCFA processes and to be responsive to State needs. Indicative of HCFA's goal to approve CHIP plans expeditiously, plans have been approved for 22 States or territories as of June 29, 1998. Amendments have been approved for 2 States, and 19 States have submitted plans that are under review.

Medicare+Choice

Another significant program mandated by the BBA is the Medicare+Choice program. HCFA published an interim final regulation implementing the new Medicare+Choice program on June 26, 1998. Starting in January 1999, in addition to original fee-for-service Medicare and health maintenance organizations, a broader array of health plans will join Medicare, including preferred provider organizations, provider-sponsored organizations, private fee-for-service plans, and a Medical Savings Account demonstration project. Recognizing the myriad of health care delivery options that are emerging, Medicare+Choice provides Medicare beneficiaries with expanded opportunities to tailor their choice of health care plans to their own needs. The regulation established policies and standards for health plans and organizations to participate in the Medicare+Choice program. The standards cover enrollment, benefits, access and beneficiary protections, quality assurance, provider protections, payments, premiums, and sanctions. Access to Medicare+Choice options will depend on where the beneficiary lives and what types of plans are available in that community.

Given the array of new options that Medicare beneficiaries will soon have available to them, we are strongly committed to providing beneficiaries all the information they need to make the best possible decision about their health care. In the BBA, Congress directed us to embark on a broad educational effort, which we have named the National Medicare Education Campaign. This Campaign is designed to ensure that beneficiaries receive accurate and unbiased information about their benefits, rights, and health care options. This is the largest, most complex, and ambitious educational effort in the history of Medicare. We are committed to working with beneficiaries and their families, members of Congress, aging advocacy organziations, providers, and other experts to ensure that our educational program is the best that it can be.

This National Medicare Educational Program includes the mailing of the Medicare handbook "Medicare & You" and the establishment of a national 1-800 toll-free telephone number, which is being tested this year in five States and will be operating nationally by October 1999. In addition, a consumer-friendly Internet site, www.Medicare.gov, is already in place. This web-site offers information called Medicare Compare, which enables beneficiaries or those who assist them to compare health plans' benefits, out-of-pocket costs, and other important features.

PSO Solvency Standards

As part of its general implementation of the BBA, HCFA published three rules in 1998 concerning Provider-Sponsored Organizations ("PSOs"), a form of managed care entity that can now contract directly with Medicare. The BBA authorizes certain specifically defined types of PSOs to serve Medicare enrollees for up to 3 years without a State license as a risk-bearing entity. Under the terms of the exemption from State licensure (the "Waiver"), HCFA assumes the responsibility for monitoring the financial solvency and other factors that affect the quality of care provided to Medicare enrollees.

On April 14, 1998, HCFA issued an interim final rule with comment period that established the definition requirements that PSOs must meet to obtain a Waiver.

On May 7, 1998, HCFA published an interim final rule with comment period that establish the Waiver application process and the solvency standards that entities must meet to obtain a Waiver. This rule was developed through the negotiated rulemaking process. Over 50 individuals, representing over 25 different associations, coalitions, or companies were interviewed in order to identify relevant issues and to establish the negotiated rulemaking committee. The committee then met seven times from October 1997 to March 1998 to deliberate on relevant issues.

As mentioned earlier, HCFA published an interim final rule with comment period regarding the Medicare+Choice program on June 26, 1998. This rule, which enumerated the comprehensive provisions of the Medicare+Choice program, also defined the minimum enrollment requirements for PSOs and slightly modified the April and May rules mentioned previously.

HCFA anticipates signficiant implementation-related activity in fiscal year 1999. Such activity would include: Conducting beneficiary and provider information campaigns to clarify uncertainties about PSOs; developing administrative and operational policy; and communicating that policy via further regulation, policy statements, opinion letters, and statements of operating procedures. Note also that allowing certain PSOs to operate under a Federal Waiver without a State license will change the traditional model of shared Federal-State oversight and accountability for managed care organizations to a model of prinicipally Federal oversight and accountability. This change also represents a major increase in HCFA's responsibility.

Skilled Nursing Facilities

On May 12, 1998, HCFA published an interim final rule with a comment period (63 FR 26252) to implement changes made by section 4432 of the BBA with regard to skilled nursing facility (SNF) services. The rule establishes an SNF Prospective Payment System (PPS) for Part A stays, which makes a global per diem payment that is case-mix adjusted. The rule also describes the resident assessment procedures used in determining the appropriate classification for each resident. In addition, it establishes a consolidated billing requirement for SNFs under which almost all of the services that an SNF resident receives are billed to Medicare by the SNF itself, rather than by an outside supplier.

Other Current BBA Priorities

In addition to these efforts, HCFA currently has a number of other regulations under development to implement other provisions of the BBA.

One such regulation expands Medicare coverage for diabetes outpatient self-management training services. More than 16 million Americans have diabetes and nearly 75,000 new cases are reported every year. Newly expanded benefits will help provide people with the skills and resources that most diabetics need to control their diabetes.

Other BBA-related HCFA regulations included in the Department priorities include regulations to implement the Prospective Payment System (PPS) for Hospital Outpatient Services and for Home Health Agencies and regulations establishing rules related to quality of care and services under Medicaid managed care programs.

Additional Regulations

In addition to the activities related to the BBA, HCFA has also continued to work towards agency objectives such as increasing organ donations and combating fraud and abuse.

Organ Procurement

On June 22, 1998, HCFA-3005-F, Hospital Conditions of Participation; Identification of Potential Organ, Tissue, and Eye Donors and Transplant Hospitals Provision of Transplant-Related Data, was published in the Federal Register. This regulation is designed to increase organ donation and thus, lifesaving transplants, for individuals who need them. More than 10 individuals in the United States die every day while waiting for a transplant.

The provisions of the regulations are based on State "routine referral" laws, which have increased organ donations significantly in the States in which such

laws have been enacted. It is expected that the regulation will increase the Nation's organ donation and transplantation rates 20 percent in the 2 years following the effective date of the rule.

Fraud and Abuse

On March 20, 1998, HCFA published its proposed rule to implement the Medicare Integrity Program. Under this rule, HCFA will contract with eligible entities who meet certain requirements and comply with conflict of interest standards. Medicare Integrity Program contractors will perform program integrity functions including medical review; fraud and utilization review; cost report audits; Medicare secondary payor activities; education of providers, suppliers, and beneficiaries regarding integrity and developing a list of durable medical equipment subject to prior authorization.

In addition, on July 8, 1998, HCFA published HCFA-6144-C Medicare Program; Incentive Programs-Fraud and Abuse. This regulation establishes a program to encourage individuals to report information on individuals and entities that are engaged in or have engaged in acts or omissions that constitute grounds for the imposition of a sanction or who have otherwise engaged in sanctionable fraud and abuse against the Medicare program. By increasing the incentives for concerned citizens to report evidence of suspected fraudulent behavior, Congress hopes to protect beneficiaries and the Medicare Trust Funds. It is specified that a monetary reward can be made only for information that leads to a minimum recovery of $100 of Medicare funds.

HHS—Food and Drug Administration (FDA)

PROPOSED RULE STAGE

---

22. HEARING AIDS; PROFESSIONAL AND PATIENT LABELING; CONDITIONS FOR SALE

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

This action may affect State, local or tribal governments and the private sector.

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

21 USC 351; 21 USC 352; 21 USC 360d; 21 USC 371; 21 USC 360j(e)

CFR Citation:

21 CFR 801.420; 21 CFR 801.421

Legal Deadline:

None

Abstract:

FDA is considering revising its present regulation governing the labeling and conditions for sale of hearing aids. The present rule requires an examination by a physician before purchase of a hearing aid, but permits an informed adult to waive that requirement. There is some evidence that this waiver provision is being misused. FDA is considering eliminating the waiver provision and instead requiring a medical evaluation when certain previously undiagnosed medical conditions are found or when the prospective hearing aid user is under 18 years of age. In addition, FDA is considering restricting the dispensing of a hearing aid to patients who have undergone a comprehensive hearing assessment within the past 12 months and an evaluation to select and fit a hearing aid, both of which would be required to be conducted by hearing care professionals licensed by the States as competent to conduct such assessments and evaluations. FDA is also considering revisions to its professional and patient labeling requirements to require updated information.

Statement of Need:

FDA has become aware of changes in the nature of the causes of hearing loss and the technology of hearing aids that necessitate reconsideration of the regulations governing the types of testing needed before a hearing aid purchase and the labeling for health professionals and patients. In the past, hearing loss often was caused by medically treatable conditions. Today, medical and/or surgical intervention will correct hearing loss in only 5 to 10 percent of the cases. Therefore, there may be less of a need for medical evaluation. FDA believes, however, that patients should receive proper testing in order for a hearing aid to be effective.

Summary of the Legal Basis:

Under 21 USC 360j(e), FDA has the authority to restrict the sale, distribution, or use of a medical device, if FDA determines that, without such restrictions, there cannot be reasonable assurance of its safety and effectiveness. Under 21 USC 352, FDA has the authority to require that the labeling of a medical device include adequate directions for use.

Alternatives:

FDA considered applying the rule only to first time purchasers of hearing aids. FDA believes, however, that this would not adequately protect present users of inappropriate or unneeded hearing aids. FDA also considered requiring additional tests, but has preliminarily determined to list these tests as recommended only in order to provide additional flexibility.

Anticipated Costs and Benefits:

FDA has estimated the costs of the mandatory testing required by the rule would add an additional $24.8 million to $51.7 million depending upon the assumptions concerning present practices. On the average, FDA estimates that this would add about $24 to the cost of a hearing aid. FDA expects that the benefits from the rule would include: (1) Improving the quality of life of hearing aid users; (2) avoiding the cost of inappropriate hearing aid purchase; (3) reducing doctor visits for hearing aid evaluations; (4) lowering treatment costs due to early detection of serious conditions; and (5) encouraging the dissemination of accurate information concerning the benefits and limitations of hearing aids.

Risks:

If the hearing aid purchaser inappropriately waives the medical evaluation requirement under the existing rule, treatable causes of hearing loss may go undetected. Many purchasers who have not had proper testing before a hearing aid purchase will forego the use of a hearing aid because the one purchased does not adequately improve their hearing ability. At this time, FDA believes that many hearing impaired people who may benefit from a hearing aid do not purchase one because they fear that they will not benefit from one due to inaccurate information.

HHS—FDA

23. LABELING FOR HUMAN PRESCRIPTION DRUGS; REVISED FORMAT

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

21 USC 321; 21 USC 331; 21 USC 351; 21 USC 352; 21 USC 353; 21 USC 355; 21 USC 356; 21 USC 357; 21 USC 358; 21 USC 360; 21 USC 360b; 21 USC 360gg to 360ss; 21 USC 371; 21 USC 374; 21 USC 379e

CFR Citation:

21 CFR 201

Legal Deadline:

None

Abstract:

The proposed regulation would amend the regulations governing the format and content of professional labeling for human prescription drug and biologic products, 21 CFR 201.56 and 201.57. The proposal would require that professional labeling include a section containing highlights of prescribing information, a section containing an index to prescribing information, reorder currently required information and make minor changes to its content, and establish minimum graphical requirements for professional labeling. The proposal would also eliminate certain unnecessary statements that are currently required to appear on prescription drug labels and move certain information to patient labeling.

Statement of Need:

The current format and content requirements in sections 201.56 and 201.57 were established to help ensure that labeling includes adequate information to enable health care practitioners to prescribe drugs safely and effectively. However, various developments in recent years, such as technological advances in drug product development, have contributed to an increase in the amount, detail, and complexity of labeling information. This has made it harder for practitioners to find specific information and to discern the most critical information in product labeling.

FDA took numerous steps to evaluate the usefulness of prescription drug labeling for its principle audience and to determine whether, and how, its format and content can be improved. The agency conducted focus groups and a national survey of office-based physicians to ascertain how prescription drug labeling is used by health care practitioners, what labeling information is most important to practitioners, and how professional labeling should be revised to improve its usefulness to prescribing practitioners.

Based on the concerns cited by practitioners in the focus groups and physician survey, FDA developed and tested two prototypes of revised labeling formats designed to facilitate access to important labeling information. Based on this testing, FDA developed a third revised prototype that it made available to the public for comment. Ten written comments were received on the prototype. FDA also presented the revised prototype at an informal public meeting held on October 30, 1995. At the public meeting, the agency also presented the background research and provided a forum for oral feedback from invited panelists and members of the audience. The panelists generally supported the prototype.

The proposed rule attempts to establish format and content standards for prescription drug labeling that incorporate information and ideas gathered during this process.

Summary of the Legal Basis:

The agency has broad authority under sections 502, 505, and 701 of the Federal Food, Drug, and Cosmetic Act (the act)(21 USC 352, 355, 371) and section 351 of the Public Health Service Act (42 USC 262) to regulate the content and format of prescription drug labeling to help ensure that products are safe and effective for their intended uses. A major part of FDA's efforts regarding the safe and effective use of drug products involves FDA's review, approval, and monitoring of drug labeling. Under section 502(f)(1) of the act, a drug is misbranded unless its labeling bears "adequate directions for use" or it is exempted from this requirement by regulation. Under section 201.100 (21 CFR 201.100), a prescription drug is exempted from the requirement in section 502(f)(1) only if, among other things, it contains the information required, in the format specified, by sections 201.56 and 201.57.

Under section 502(a) of the act, a drug product is misbranded if its labeling is false or misleading in any particular. Under section 505(d) and 505(e) of the act, FDA must refuse to approve an application and may withdraw the approval of an application if the labeling for the drug is false or misleading in any particular. Section 201(n) of the act provides that in determining whether the labeling of a drug is misleading, there shall be taken into account not only representations or suggestions made in the labeling, but also the extent to which the labeling fails to reveal facts that are material in light of such representations or material with respect to the consequences which may result from use of the drug product under the conditions of use prescribed in the labeling or under customary usual conditions of use.

These statutory provisions, combined with section 701(a) of the act and section 351 of the Public Health Service Act, clearly authorize FDA to promulgate a regulation designed to help ensure that practitioners prescribing drugs (including biological products) will receive information essential to their safe and effective use

in a format that makes the information easier to access, read, and use.

Alternatives:

The alternatives to the proposal include not amending the content and format requirements in sections 201.56 and 201.57 at all, or amending them to a lesser extent. The agency has determined that although drug product labeling, as currently designed, is useful to physicians, many find it difficult to locate specific information in labeling, and some of the most frequently consulted and most important information is obscured by other information. In addition, the agency's research showed that physicians strongly support the concept of including a summary of the most important prescribing information, an index and numbering system that permits specific information to be easily located, and other proposed requirements, such as the requirement for a minimum type size. Thus, the agency believes that the proposed requirements will greatly facilitate health care practitioners' access and use of prescription drug and biological labeling information.

Anticipated Costs and Benefits:

The expected benefits from the proposed rule include reduced time needed for health care professionals to read or review labeling for desired information, increased effectiveness of treatment, and a decrease in adverse events resulting from avoidable drug-related errors. For example, the proposed revised format is expected to significantly reduce the time spent on reading labeling by highlighting often used information at the beginning of labeling and facilitating access to detailed information.

The potential costs associated with the proposed rule include the cost of redesigning labeling for previously approved products to which the proposed rule would apply and submitting the new labeling to FDA for approval. In addition, one-time and ongoing incremental costs would be associated with printing the longer labeling that would result from additional required sections. These costs would be minimized by applying the amended requirements only to newer products and by staggering the implementation date for previously approved products.

Risks:

None.

24. • CURRENT GOOD MANUFACTURING PRACTICES FOR BLOOD AND BLOOD COMPONENTS: NOTIFICATION OF CONSIGNEES RECEIVING BLOOD AND BLOOD COMPONENTS AT INCREASED RISK FOR TRANSMITTING HCV INFECTION

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

21 USC 321; 21 USC 331; 21 USC 351; 21 USC 352; 21 USC 353; 21 USC 355; 21 USC 360; 21 USC 371; 21 USC 374; 42 USC 216; 42 USC 262; 42 USC 263; 42 USC 263a; 42 USC 264; 42 USC 300aa-25

CFR Citation:

21 CFR 606; 21 CFR 610

Legal Deadline:

None

Abstract:

This rulemaking is one of a number of actions being taken to amend the biologics regulations to remove, revise, or update the regulations applicable to blood, blood components, and blood derivatives. These actions are based on a comprehensive review of the regulations performed by FDA, and are also based on reports by the U.S. House of Representatives Committee on Government Reform and Oversight, Subcommittee on House Resources and Intergovernmental Relations; the General Accounting Office; the Institute of Medicine, as well as public comments. In this rulemaking, FDA will propose to amend the biologics regulations to require that blood establishments prepare and follow written procedures for appropriate action when it is determined that blood and blood components at increased risk for transmitting hepatitis C virus (HCV) infection have been collected from a donor who, at a later date, tested repeatedly reactive for evidence of HCV.

Statement of Need:

In the Federal Register of March 20, 1998 (63 FR 13675), FDA announced the availability of guidance, which updated previous guidance, providing recommendations for donor screening and further testing for antibody to HCV, notification of consignees, transfusion recipient tracing and notification, and counseling by physicians regarding transfusion with blood components at increased risk for transmitting HCV (often called "Lookback"). While available evidence indicates that blood establishments are following these recommendations, FDA believes that regulations should be codified, consistent with the previous recommendations, to assure there is clear enforcement authority in case deficiencies in an establishment's lookback program are found and to provide clear instructions for continuing lookback activities.

Summary of the Legal Basis:

The Public Health Service Act (21 USC 216 et seq.) and the Federal Food, Drug, and Cosmetic Act (21 USC 321 et seq.) authorize FDA to regulate biological products and to ensure that the products are safe, pure, potent, and effective. The Public Health Service Act also contains the authority under which FDA can promulgate regulations to prevent the spread of communicable diseases. These regulations would assure that appropriate action is taken when blood components have been transfused which may potentially be capable of transmitting HCV, that persons who may have been transfused with such blood components receive proper counseling and treatment, and to help prevent the further transmission of HCV.

Alternatives:

FDA has considered permitting the continued voluntary compliance with the recommendations that have already issued. However, the ability of FDA to enforce appropriate lookback procedures would be unclear. In addition, because lookback will remain appropriate for the foreseeable future, FDA believes that the procedures should be clearly established in the regulations.

Anticipated Costs and Benefits:

FDA is in the process of analyzing the costs related to the rulemaking. Monetary burdens will be associated to the tracing of previous donations of donors, identifying the recipients of these previous blood donations, and notifying these recipients, as appropriate. FDA believes these costs will be more than compensated by the public health benefits, including benefits related to the notification of past transfusion recipients who may be unaware that they may be infected with HCV.

Risks:

FDA believes there are minimum risks posed by requiring that appropriate lookback procedures for HCV be prepared and followed.

HHS—FDA

FINAL RULE STAGE

25. FRUIT AND VEGETABLE JUICES: DEVELOPMENT OF HACCP AND LABEL WARNING STATEMENTS FOR JUICES

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

21 USC 321 et seq; 42 USC 264

CFR Citation:

21 CFR 120

Legal Deadline:

None

Abstract:

The Food and Drug Administration (FDA) announced in an advance notice of proposed rulemaking of August 4, 1994, its plans to consider the development of regulations establishing requirements for a new comprehensive food safety assurance program for both domestically produced and imported foods that would be based on the principles of Hazard Analysis Critical Control Points (HACCP). The new food safety program would respond to new challenges, such as new food processing and packaging technologies, new food distribution and consumption patterns, exposure to industrial chemicals and chemical waste, the increasing importation of foods, new microbial pathogens, and resource constraints. Current information shows that the most serious of these challenges is presented by food-borne pathogens. The number of recognized food-borne pathogens has broadened considerably, as has the awareness of long-term complications from certain food-borne illnesses--such as arthritis, heart disease, and kidney and neurological damage. To meet such challenges, FDA intends to shift the focus of its food safety assurance program away from periodic visual inspection and end-product testing and toward prevention of food safety risks and problems, utilizing the state-of-the-art HACCP preventive approach. A first step was taken when FDA published a HACCP regulation for fish and fishery products on December 18, 1995. Consistent with FDA's HACCP efforts, USDA published a HACCP regulation for meat and poultry on July 25, 1996. As a next step in this food safety program, FDA proposed on April 24, 1998 to adopt a HACCP regulation for the processing of juice. As part of the development of this document, FDA considered information obtained during agency HACCP pilot activities, and comments and scientific and technological information relating to fresh juices provided during and after an agency public meeting on juice held on December 16 and 17, 1996. On July 8, 1998, the agency finalized regulations requiring warning statements on the labels or in labeling for juice products that have not been processed to reduce, control, or eliminate the presence of harmful bacteria. Such labeling will serve to reduce the risk of food-borne illness, pending development of a final HACCP rule for juice.

Statement of Need:

FDA is adopting regulations that would establish requirements for a new comprehensive food safety assurance program for both domestically produced and imported fruit and vegetable juices that would be based on the principles of Hazard Analysis Critical Control Points (HACCP). FDA intends to adopt a juice HACCP regulation because there have been a number of outbreaks of illnesses associated with juice products, including some directly affecting children, and because the agency believes that a system of preventive controls is the most effective and efficient way to ensure that these products will be safe.

Summary of the Legal Basis:

Failure of a processor to have and implement a HACCP system will render the food products of that processor adulterated under section 402(a)(4) of the Federal Food, Drug, and Cosmetic Act. Whether a processor's actions are consistent with ensuring the safety of food will be determined through an evaluation of the overall implementation of the firm's HACCP system.

Alternatives:

The two principal alternatives to HACCP are end-product testing and comprehensive current good manufacturing practices (CGMPs). FDA has concluded, based on information available at this time, that these alternatives lack the distinct advantages of a HACCP-based approach. End-product testing does not address the root causes of food safety problems, is not preventive by design, and requires that a large number of samples be analyzed to ensure product integrity. CGMPs are not practical because they are plant-wide operating procedures and do not concentrate on the identification and prevention of food hazards.

Anticipated Costs and Benefits:

In general terms, HACCP focuses on prevention and is designed to prevent the occurrence of hazards affecting food; HACCP permits more effective and efficient oversight by Federal, State, and local governments; and HACCP appropriately places primary responsibility for ensuring food safety on the food manufacturer/distributor to analyze, in a rational, scientific manner, its production processes in order to identify critical control points and establish critical limits and monitoring procedures. FDA anticipates that costs to industry generated by implementation of HACCP would be offset in four ways: (1) by reducing the amount of food-borne illnesses (for example, total illness reduction benefits estimated to result from FDA's HACCP-based requirements for seafood regulation are between $15 and $75 million per year); (2) by increasing public confidence in the Nation's food supply; (3) by enabling U.S. food companies to compete more effectively in the world market (for example, current recommendations of the Codex Alimentarius Commission's Committee on Food Hygiene encourage the use of the HACCP system, and the European Community (EC) has begun to require that foods produced within the EC be processed under HACCP requirements); and (4) by decreasing the number of future product recalls.

Risks:

Any potential for contamination of the food supply with industrial chemicals or microbial pathogens must be considered a very serious risk because of the possibility that such contamination could be widespread, affecting whole segments of the population, causing some severe long-term effects and even loss of life. FDA made a decision to adopt a HACCP-based approach to regulate seafood, based on a considerable body of literature and expertise in this area. Likewise, FDA has reviewed current information on hazards associated with unprocessed juice, and intends to propose that processors use HACCP in the manufacture of certain juice products.

26. OVER-THE-COUNTER HUMAN DRUGS; LABELING REQUIREMENTS

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

21 USC 321; 21 USC 351; 21 USC 352; 21 USC 353; 21 USC 355; 21 USC 360; 21 USC 371

CFR Citation:

21 CFR 201; 21 CFR 330

Legal Deadline:

None

Abstract:

The final rule will provide standardized format and content requirements for over-the-counter (OTC) drug product labeling, including legibility and design features of such information as the uses for the drug, directions for use, warnings, drug interactions, active ingredients, and other information that the consumer would need to know to use the product safely and effectively.

Statement of Need:

Currently, the design, format, and placement of required labeling information varies considerably among OTC drug products. As a result, consumers often have difficulty finding, reading, and understanding this important labeling information. Modifying and simplifying the manner in which the information is presented can improve the legibility and understandability of OTC drug product labeling. Therefore, this final rule will establish a standardized format for the labeling of all marketed OTC drug products. This action is intended to enable consumers to better read and understand OTC drug product labeling and to apply this information to the safe and effective use of OTC drug products.

Summary of the Legal Basis:

FDA's legal authority to modify and simplify the manner in which certain information is presented in OTC drug product labeling derives from sections 201, 502, 505, and 701 of the Federal Food, Drug, and Cosmetic Act (the act). Regulating the order, appearance, and format of OTC drug product labeling is consistent with the agency's authority to ensure that drug labeling convey all material information to the consumer (21 USC 321(n) and 352(a)), and that the labeling communicates this information in a manner that is "likely to be read and understood by the ordinary individual under customary conditions of purchase and use." (21 USC 352(c)). Regulating the content of OTC drug product labeling is consistent with FDA's authority to ensure that the products are safe and effective for use (sections 201(n) and (p), 502, and 505 of the act).

Alternatives:

FDA considered several alternatives. First, the agency considered but rejected a voluntary labeling scheme, since previous industry efforts have been unsuccessful in achieving both a uniform format and an acceptable minimum print size for a majority of the products on the market. Second, the agency considered but rejected revising all OTC monographs on an individual basis because this approach would not achieve a standardized labeling format for a majority of the marketed products in a timely manner. Third, the agency considered alternative implementation periods but chose the option proposed because it believed that the chosen approach provides significant reduction in cost while meeting the agency objective of achieving a standardized labeling format for a majority of the products in a timely manner.

Anticipated Costs and Benefits:

The proposed rule was estimated to cost a total of $14 million when implemented. This cost includes a 1-year extension for implementation time of individual OTC drug products having sales of less than $25,000 per year. However, based on comments received for the proposed rule and amendments contained in the final rule, the agency is currently re-evaluating the estimated costs.

In general, the rule will benefit consumers by allowing them to make more appropriate choices for self-treatment, and to reduce trial and error approaches to self-medication. Consequently, this could lead to decreased overall health care costs resulting from reduced visits to the doctor or hospital for treatment. Additionally, the easy to read, standardized format will directly benefit consumers by helping ensure the safe and effective use of the product.

Risks:

None.

27. ESTABLISHMENT REGISTRATION AND LISTING OF HUMAN CELLULAR AND TISSUE-BASED PRODUCTS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 264

CFR Citation:

21 CFR 207; 21 CFR 807; 21 CFR 1271

Legal Deadline:

None

Abstract:

This action is a continuation of FDA's approach for the regulation of human tissues and is part of FDA's reinventing government initiative. The final rule requires manufacturers of human cellular and tissue-based products to register with the agency and submit a list of all such products produced. Future regulations would include the promulgation of good tissue practices (GTP) that will provide good manufacturing standards and regulations for donor screening and testing, promotion and labeling, and compliance and procedural issues. The proposed approach would provide a rational, comprehensive, and clear framework under which tissue processors can develop and market their products without being subjected to unnecessary regulation and without sacrificing the protection of the public health.

Statement of Need:

Presently, FDA can only approximate the numbers of manufacturers involved in the production of human cellular and tissue-based products. Recent innovations in the methods of manipulating human cells and tissues for therapeutic purposes have resulted in the rapid growth of the industry producing human cellular and tissue-based products. The growth has occurred in industry segments that normally communicate with the agency as well as in segments that have not previously had any contact with FDA. In order to characterize the industry and establish a basis for communication with that industry, FDA is requiring that all manufacturers of human cellular and tissue-based products register with FDA and submit lists of all their products to the agency.

Summary of the Legal Basis:

The Public Health Service Act (42 USC 216 et seq.) and the Federal Food, Drug, and Cosmetic Act (21 USC 321 et seq.) authorize FDA to regulate biological products and to ensure that the products are safe, pure, potent, and effective. The Public Health Service Act also contains the authority under which FDA can promulgate regulations designed to prevent the spread of communicable diseases. In order to meet these objectives, FDA must be able to identify those manufacturers participating in activities that may be subject to regulation. FDA is establishing the registration and listing as a simple and efficient means of acquiring the needed information.

Alternatives:

FDA has considered two alternatives. The first alternative would be an information collection undertaken by the agency that would be entirely dependent on voluntary compliance. FDA considers this alternative inefficient and lacking in inducements to ensure compliance.

The second alternative is to compel the registration of manufacturers and require registrants to list their products with the agency. Such a system has been proposed to industry and gained

general acceptance. Manufacturers would simply fill out an electronically available registration and listing form and fax or mail the completed form to the agency with periodic updates. No other paperwork should be required.

Anticipated Costs and Benefits:

Registration and listing will enable FDA to characterize the industry without imposing any significant procedural or monetary burdens. Registration and listing would provide effective means by which FDA can monitor the production of human cellular and tissue-based products. The costs of registration and listing are expected to be minimal because, as stated above, the process will require only the information necessary for FDA to identify the affected industry.

Risks:

FDA believes that the risks posed by requiring registration and listing of human cellular and tissue-based products are minimal. In contrast, failure to identify manufacturers involved in the production of human cellular and tissue-based products would subject the public to the great and avoidable risk of contracting debilitating communicable diseases. Without any mechanism to target regulations intended to reduce the risk of transmission of communicable diseases through the use of human cellular and tissue-based products, FDA's oversight of the industry would be severely hindered and the protection of the public health jeopardized.

28. DISSEMINATION OF TREATMENT INFORMATION ON UNAPPROVED USES FOR MARKETED DRUGS AND DEVICES

Priority:

Other Significant

Legal Authority:

21 USC 321; 21 USC 331; 21 USC 351; 21 USC 352; 21 USC 355; 21 USC 360b; 21 USC 360c; 21 USC 360e; 21 USC 371; 21 USC 374; PL 105-115 sec. 401

CFR Citation:

21 CFR 99

Legal Deadline:

Final, Statutory, November 21, 1998.

Abstract:

The final rule would establish the procedures and requirements for the dissemination of information on unapproved new uses of marketed drugs, biologics, and devices. The final rule would include requirements concerning submissions to the Food and Drug Administration, requests to extend the time period for completing studies needed to submit a supplemental application for a new use, applications for an exemption from the requirement to conduct studies, recordkeeping, and reporting. The final rule would also cover agency actions on such submissions, requests, and applications, as well as orders to cease or to terminate dissemination of information.

Statement of Need:

The final rule would implement section 401 of the Food and Drug Administration Modernization Act of 1997 (FDAMA) by describing the new/unapproved use information that a manufacturer may disseminate to health care practitioners, pharmacy benefit managers, health insurance issuers, group health plans, and Federal and State agencies and setting forth the procedures that manufacturers must follow before disseminating information on the new use.

FDA has long recognized that in certain circumstances new/unapproved uses of approved products are appropriate, rational, and accepted medical practice. There are important unapproved uses of approved products. In the past, however, the concept of allowing manufacturers to disseminate unapproved use information raised concerns about diminishing a manufacturers' incentive to develop the safety and efficacy data about these uses that would lead to their approval. There were also concerns about the reliability and balance of such information. FDAMA and the proposed rule address these concerns by tying the dissemination of the unapproved use information to a commitment to do the research and submit a supplemental application on the new use and by limiting the information that can be disseminated to information that is both reliable and balanced. The statute and regulation set forth narrow exemptions to the requirement to submit a supplemental application.

The implementation of these regulations will ensure that the statutory provisions are properly implemented, that exemptions from the requirement to submit a supplemental application are granted only in appropriate circumstances, and that the agency can best respond to submissions regarding the dissemination of information on unapproved uses.

Summary of the Legal Basis:

Section 401 of FDAMA established a comprehensive scheme for the dissemination of information about unapproved uses to health care practitioners, pharmacy benefit managers, health insurance issuers, group health plans, and Federal and State agencies. Section 401 directed FDA to issue regulations to implement the new scheme by November 21, 1998.

Alternatives:

The statute is prescriptive and does not allow for a substantially different regulatory approach than is being taken by FDA. It allows for discretion in some of the details regarding procedural requirements for submissions relating to the new use information and it allows FDA to define the limited exemptions to the requirement for submission of a supplemental application. FDA believes that the procedural requirements included in the proposed regulation are consistent with the statutory scheme and that the proposed exemption criteria reflect Congressional intent to make such exemptions rare.

Anticipated Costs and Benefits:

The benefits of the final rule will derive from the public health gains associated with the earlier dissemination of objective, balanced, accurate information about important new uses of approved products. In addition, the final rule may actually stimulate new studies or the collection of evidence about these new uses.

The costs of the final rule are modest. Firms typically conduct clinical studies in support of supplemental applications for new uses only where the firm believes that the added revenues associated with the new use would exceed the cost of the supporting studies. Because this rule will accelerate the receipt of these revenues, it is possible that some new use supplemental applications that would not have been economically justified in the absence of this rule will now be submitted. FDA cannot estimate the number or cost of the additional clinical studies that would accompany these applications, but emphasizes that they would be undertaken voluntarily by the affected firms in the expectation that they would raise company profitability.

Risks:

The risk from the final rule is that, despite the protections set forth in the statute and regulation, health care practitioners will not receive reliable information about these unapproved uses and patients will accordingly, not receive the appropriate treatments. There is also a risk that, despite the requirement that the dissemination be tied to the commitment to complete the studies needed for submission of a supplemental application, the studies will not be completed and it will never be known if these unapproved uses really work. In recognition of these lingering concerns, Congress included a sunset of the provision and a requirement for a study of the effect of this new scheme to determine if it should be extended beyond the sunset date. The study will look at issues relating to the effectiveness of the provision in providing useful scientific information to health care practitioners, the quality of the information being disseminated, and the impact of the new scheme on research in the area of new uses.

PROPOSED RULE STAGE

29. MEDICARE PROGRAM; PROSPECTIVE PAYMENT SYSTEM FOR HOSPITAL OUTPATIENT (HCFA-1005-P)

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect the private sector under PL 104-4.

Legal Authority:

PL 105-33, sec 4521; PL 105-33, sec 4522; PL 105-33, sec 4523; PL 99-509, sec 9343(c)

CFR Citation:

42 CFR 409.10; 42 CFR 410.2; 42 CFR 410.27; 42 CFR 410.28; 42 CFR 410.30; 42 CFR 411.15; 42 CFR 412.50; 42 CFR 413.118; 42 CFR 413.122; 42 CFR 413.124; 42 CFR 413.130; 42 CFR 413; 42 CFR 489.20; 42 CFR 1003.101 to 102; 42 CFR 1003.105

Legal Deadline:

Final, Statutory, November 1, 1998.

Abstract:

The Balanced Budget Act of 1997 (BBA) (Public Law 105-33), enacted on August 5, 1997, provides for implementation of a Prospective Payment System (PPS) for hospital outpatient services (and for part B services furnished to inpatients who have no Part A coverage) furnished on or after January 1, 1999. This system will also apply to partial hospitalization services furnished by community mental health centers. The BBA also requires a new method for calculating beneficiary copayments for the hospital outpatient services included under the PPS. The PPS will consist of about 340 groups of services, called "Ambulatory Payment Classifications" or APCs, that are related clinically and in terms of their resource use. We will assign a group weight to each group, based on the median cost (operating and capital) of the services included in the group. We will convert the weights for each group to payment rates using a national conversion factor, taking into account group weights and the projected volume of services for each group. In addition, this proposed rule would establish in regulations the requirements for designating certain entities as provider based or as a department of a hospital.

Statement of Need:

The law was later amended to limit payment to the lesser of a hospital reasonable costs or to its customary charges. In 1983, section 601 of the Social Security Amendments of 1983 (Public Law 98-21) completely revised the cost based payment system for most hospital inpatient services by enacting section 1886(d) of the Social Security Act (the Act). This section provided for a PPS for acute inpatient hospital stays, effective with hospital cost reporting periods beginning on or after October 1, 1983.

Although payment for most inpatient services became subject to PPS, hospital outpatient services continue to be paid based on hospital-specific costs which provided little incentive for hospital efficiency for outpatient services. At the same time, advances in medical technology and changes in practice patterns were bringing about a shift in the site of medical care from the inpatient to the outpatient setting. During the 1980's, the Congress took steps to control the escalating costs of providing outpatient care. The Congress amended the statute to implement across-the-board reductions of 5.8 percent and 10 percent to the amounts otherwise payable for hospital operating costs and capital costs, respectively, and legislated a number of

different payment methods for specific types of hospital outpatient services. These methods included fee schedules for clinical diagnostic laboratory tests, orthotics, prosthetics, and durable medical equipment (DME); composite rate payment for dialysis for persons with end-stage renal disease; and payments based on blends of hospital costs in the rates paid in other ambulatory settings, such as separately certified ambulatory surgical centers (ASCs) or physician offices for certain surgery, radiology, and other diagnostic procedures. Nevertheless, Medicare payment for services performed in the hospital outpatient setting remains largely cost-based.

Summary of the Legal Basis:

In section 9343 of the Omnibus Budget Reconciliation Act of 1986 (OBRA 1986) (Public Law 99-509) and in section 4151(b)(2) of the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508), the Congress required the Secretary to develop a proposal to replace the current hospital outpatient payment system with a PPS and to submit a report to Congress on the system. In section 9343 of OBRA 1986, the Congress paved the way for development of a PPS by requiring hospitals to report claims for services under the HCFA Common Procedure Coding System (HCPCS), and by extending the prohibition against unbundling of hospital services under section 1862(a)(14) of the Social Security Act (the Act) to include outpatient services as well as inpatient services. HCPCS coding enabled us to determined what specific procedures and services were being billed, while the extension of the prohibition against unbundling ensured that all non-practitioner services provided to hospital outpatient would be billed only by the hospital not by an outside supplier, and therefore, would be reported on hospital bills and captured in the hospital outpatient data used in developing an outpatient PPS.

The Secretary submitted a Report to Congress on March 17, 1995. The report summarized the research HCFA conducted in searching for a way to classify outpatient services for purposes of developing an outpatient PPS. The report cited Ambulatory Patient Groups (APGs), developed by 3M-Health Information Systems under a cooperative grant with HCFA, as the most promising classification system for grouping outpatient services and recommended that the APG-like groups be used in designing a hospital outpatient PPS.

The report also presented a number of options that could be used, once the PPS was in place, for addressing the issue of rapidly growing beneficiary copayment. As a separate issue we recommended that the Congress amend the provisions of the law pertaining to the blended payment methods for ASC surgery, radiology, and other diagnostic services to correct an anomaly that resulted in a less than full recognition of the amount paid by the beneficiary in calculating program payment (referred to as the formula-driven overpayment).

The Balanced Budget Act of 1997 (BBA) (Public Law 105- 33), enacted on August 5, 1997, contains a number of provisions that affect Medicare payment for hospital outpatient services. The purpose of this proposed rule is to implement sections 4521, 4522, and 4523 of the BBA. Section 4521 of the BBA eliminates the formula-driven overpayment, effective for services furnished on or after October 1, 1997. Section 4522 extends the current cost reduction of 5.8% and 10% (applicable to hospital outpatient operating cost and hospital capital costs, respectively) through December 31, 1999. Section 4523 provides for implementation of a PPS for hospital outpatient services (and for part B services furnished to inpatients who have no part A coverage) furnished on or after January 1, 1999. This system will also apply to partial hospitalization services furnished by community mental health centers. Section 4523 also requires a new method for calculating beneficiary copayments for the hospital outpatient services included under the PPS.

This proposed rule would also implement section 9343(c) of the Omnibus Reconciliation Act of 1986, which prohibits Medicare payment for non-physician services furnished to a hospital outpatient by a provider or supplier other than a hospital, unless the services are furnished under an arrangement with a hospital. This section also authorizes HHS's Office of Inspector General to impose a civil money penalty against any individual or entity who knowingly or willfully presents a bill for non-physician or other bundled services not provided directly or under such an arrangement.

The Secretary has the authority under the BBA to determine which services are included (with the exception of ambulance services and physical, occupational, and speech therapies, for which fee schedules are being separately created). We will continue to pay for laboratory services and for orthotics and prosthetics on their perspective fee schedules, and for chronic dialysis using the composite rate. The 10 cancer centers exempt from inpatient PPS will not come under this system until the year 2000.

Alternatives:

If this final rule were not published, we would not implement the Balanced Budget Act of 1997 provision mandating a prospective payment system for hospital outpatient services. In addition, there would be no relief for beneficiaries from the large coinsurance burdens that they have been bearing for outpatient services.

Anticipated Costs and Benefits:

The primary benefit of this rule is the elimination of a cost based system, which provides little incentive for hospital efficiency for outpatient services. In addition, the regulation will provide considerable relief overtime to beneficiaries from high coinsurance payments under the current system. Finally, the proposed rules governing provider based status will alleviate an important area of program abuse.

30. MEDICAID MANAGED CARE; REGULATORY PROGRAM TO IMPLEMENT CERTAIN MEDICAID PROVISIONS OF THE BALANCED BUDGET ACT OF 1997 (HCFA-2001-P)

Priority:

Other Significant. Major under 5 USC 801.

Legal Authority:

PL 105-33, sec 4701(a); 42 USC 1396w

CFR Citation:

42 CFR 438

Legal Deadline:

None

Abstract:

This notice of proposed rulemaking establishes rules for Medicaid managed care programs which involve quality of care and services under Medicaid managed care programs. It implements certain provisions in sections 4701 through 4710 of the Balanced Budget Act of 1997 (BBA) (Pub. L. 105-33).

Statement of Need:

The BBA significantly modifies Medicaid managed care programs by providing a new state plan amendment vehicle for States to furnish managed health care to beneficiaries, enhanced enrollee protections; and an emphasis on the quality of health care delivered to Medicaid enrollees.

Summary of the Legal Basis:

Section 1903(m) of the Social Security Act and implementing regulations at 42 CFR part 434 contain a number of requirements related to Medicaid managed care contracts. Among other things, the requirements relate to contract provisions involving enrollment and disenrollment in a Medicaid managed care organization (MCO), marketing, choice of health professionals within an MCO, quality assurance systems, grievance procedures, and plan solvency. Statutory amendments made by sections 4701 through 4710 of the BBA modify those requirements.

To control cost while enhancing quality of care, States are increasingly delivering services to their Medicaid populations through Medicaid managed care organizations (MCOs) and other managed care arrangements. These arrangements vary according to the comprehensiveness of the services they provide and the degree to which they accept risk. Fully capitated plans contract on a risk basis to provide beneficiaries with a comprehensive set of covered services in return for a monthly capitation payment. In general, partially capitated plans provide a less than comprehensive set of services on a risk basis; services not included in the contract are reimbursed on a fee-for-service basis. In addition, some States implement a primary care case management (PCCM) system in which a Medicaid beneficiary selects or is assigned to a single primary care provider that provides or arranges for all covered services and is reimbursed on a fee-for-service basis. Under each of these managed care arrangements, beneficiaries have a regular source of coordinated care and States have predictable, controlled spending per beneficiary.

The BBA creates a new section of the Social Security Act relating to managed care arrangements. The new section 1932 establishes increased enrollee protections, quality assessment and performance improvement strategies for States, and enrollee rights and responsibilities.

Alternatives:

If this rule is not published, we would not implement many of the provisions in the Balanced Budget Act of 1997 related to Medicaid managed care.

Anticipated Costs and Benefits:

Estimates of the economic impact (if any) that will stem from these rules have not yet been completed.

Risks:

This rule will potentially improve the quality of health care provided to Medicaid managed care enrollees and provide States with new tools to become more effective purchasers of health care services. Failure to publish this rule would jeopardize broad-based improvement in the quality of care our beneficiaries receive and would deprive States of many tools that would improve their managed care programs.

HHS—HCFA

31. • EXPANDED COVERAGE FOR DIABETES OUTPATIENT SELF-MANAGEMENT TRAINING SERVICES HCFA-3002-P

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

42 USC 1302; 42 USC 1395hh; 42 USC 1395x

CFR Citation:

42 CFR 410; 42 CFR 414; 42 CFR 476

Legal Deadline:

None

Abstract:

This rule would provide for uniform coverage of Diabetes outpatient self-management training services. These services include educational and training services furnished to a beneficiary with diabetes by an entity approved to furnish the services. The physician or qualified nonphysician practitioner treating the beneficiary's diabetes would certify that these services are needed as part of a comprehensive plan of care. This rule proposes the quality standards that an entity would be required to meet in order to participate in furnishing diabetes outpatient self-management training services. It sets forth proposed payment amounts that have been established in consultation with appropriate diabetes organizations. It would implement section 4105 of the Balanced Budget Act of 1997 (BBA).

Statement of Need:

Section 4105 of the BBA provided for coverage of diabetes self-management training to include services provided in non-hospital-based-programs. This proposed rule would expand Medicare coverage for diabetes outpatient self-management training; define who may

be a certified provider of services that may provide diabetes outpatient management training services; explain that the physician managing the patient's diabetes must certify that the services are needed under a comprehensive plan of care; and sets standards for certified providers that have been established in consultation with appropriate diabetes organizations.

Summary of the Legal Basis:

Section 4105(a) of the BBA provides coverage for diabetes outpatient self-management training. Under this coverage training would include educational and training services furnished in an outpatient setting (according to frequency standards established by the Secretary) to a beneficiary with diabetes by a "certified provider" that meets certain quality standards.

Alternatives:

Coverage is provided for in section 4105(a) of the BBA, therefore, no alternatives to issuing this regulation exist.

Anticipated Costs and Benefits:

Projected Budget Impact of New Benefit ($ in millions): FY 1998 -- $60 FY 1999 -- $560 FY 2000 -- $230 FY 2001 -- $80 FY 2002 -- $80 An estimate of benefits has not been established.

Risks:

If the diabetes self-management training is not implemented, our diabetic beneficiaries will not receive information for improving their long term health that would result from this rule.

HHS—HCFA

FINAL RULE STAGE

32. MEDICARE PROGRAM; REVISIONS TO PAYMENT POLICIES UNDER THE PHYSICIAN FEE SCHEDULE FOR CALENDAR YEAR 1999 (HCFA-1006-FC) (HCFA-1006-P)

Priority:

Other Significant

Legal Authority:

42 USC 1395w(4); PL 105-33, sec 4505; PL 105-33, sec 4507; PL 105-33, sec 4511; PL 105-33, sec 4512; PL 105-33, sec 4541; PL 105-33, sec 4556

CFR Citation:

42 CFR 410; 42 CFR 414

Legal Deadline:

NPRM, Statutory, January 1, 1999.

Abstract:

This final rule will update physician payments by Medicare as required by section 1848 of the Social Security Act. It includes a provision to change the method of determining practice expense relative value units from the current charge-based system to a resource based system. In addition, new procedure codes for 1999 have been added. It also will include several policy changes involving medical direction of anesthesia services, and separate payment for abnormal papanicolaou smears. A provision to make some minor rebasing and revisions to the Medicare Economic Index is also included. Several changes are being made to clarify some provisions of the Balanced Budget Act of 1997 (BBA).

Statement of Need:

As pertinent to this regulation, the BBA requires implementation of resource-based practice expense relative value units on January 1, 1999. In addition, the BBA provided for the payment of drugs and biologicals on a new payment basis, implemented private contracting with Medicare beneficiaries, and provided for a new payment system for outpatient rehabilitation services. The BBA expanded the Medicare scope of practice for nurse practitioners and physician assistants.

Furthermore, since we established the physician fee schedule on January 1, 1992, our experience indicates that some of our part B payment policies need to be reconsidered. This final rule is intended to correct some of these payment policies. Also, we are rebasing and revising the Medicare Economic Index, which is used in formulas to update payments for physicians services and other part B services. In addition, we are finalizing the 1998 interim work RVUs and are issuing interim work RVUs for new and revised codes for 1999.

Summary of the Legal Basis:

Since January 1, 1992, Medicare has paid for physician services under section 1848 of the Social Security Act (the Act), "Payment for Physician Services." This section contains three major elements: (1) A fee schedule for the payment of physician services; (2) a sustainable growth rate system for the rate of increase in Medicare expenditures for physician services; and (3) limits on the amounts that nonparticipating physicians can charge beneficiaries. The Act requires that payment under the fee schedule be based on national uniform RVUs based on the resources used in furnishing a service. Section 1848(c) of the Act requires that national RVUs be established for physician work, practice expense, and malpractice expense. Section 1848(c)(2)(ii)(II) of the Act provides that adjustments in RVUs because of charges resulting from a review of those RVUs may not cause total physician fee schedule payments to differ by more than $20 million from what they would have been had the adjustments not been made. If this tolerance is exceeded, we must make adjustments to the conversion factors (CFs) to preserve budget neutrality.

Alternatives:

If this final rule is not published, we would not implement the BBA provisions related to physician services, physician assistants, nurse practitioners, payment for drugs and biologicals, and payment for outpatient rehabilitation services. In addition, known payment problems would not be resolved for the 1999 physician fee schedule and for other payment policies that need to be further clarified.

Anticipated Costs and Benefits:

The practice expense provision is, by statute, budget neutral. The statute requires that revisions to payment policies not cause total annual physician fee schedule payments to differ by more than $20 million from what they would have been had the revisions not been made. If this threshold is exceeded, we would make adjustments to the conversion factor to preserve budget neutrality.

Risks:

We expect a reaction to the practice expense proposal since there is a reallocation of relative value units for practice expenses between physician specialties and between codes. We expect that some physicians will argue that the relative value units are too low for them to provide the service. Also, we expect comments about the fundamental methodology used to calculate the practice expense relative values.

HHS—HCFA

33. • HOME HEALTH PROSPECTIVE PAYMENT SYSTEM (HCFA-1102-FC)

Priority:

Other Significant

Legal Authority:

PL 105-33, sec 4603

CFR Citation:

42 CFR ch IV

Legal Deadline:

NPRM, Statutory, October 1, 1999.

Abstract:

This interim final rule will establish requirements for the new prospective payment system (PPS) for home health agencies as governed by section 4603 of the Balanced Budget Act of 1997 (BBA) (Pub. L. 105-33).

Statement of Need:

The BBA significantly changed the way we pay for Medicare home health services. It requires the establishment of a facility-specific PPS and provide for interim steps until the PPS is established. Under the interim system HHAs will receive payment under the interim payment system in accordance with section 4602 of the Balanced Budget Act of 1997. The interim payment system establishes two sets of cost limits for home health agencies. The long-standing home health per visit cost limits are reduced from 112 percent of the mean labor-related and non-labor per visit costs for freestanding agencies to 105 in percent the median. In addition, home health agency costs will be subject to an aggregate per-beneficiary cost limitation. For those providers with a cost report ending in Federal fiscal year 1994, the per-beneficiary cost limitation is based on a blend of costs (75 percent on 98 percent of the agency-specific costs and 25 percent on 98 percent of the standardized regional average of the costs for the agency's census region). For new providers and those providers without a 12-month cost reporting period ending in fiscal year 1994, the per-beneficiary limitation will be the national median of the per beneficiary limits for HHAs. Under the interim system, HHAs will be paid the lesser of 1) actual costs; 2) the per visit limits; 3) the per-beneficiary limits. The result of the interim system will be to create a strong incentive for HHAs to reduce utilization to at least 1994 levels to fall within the aggregate cost limit. Effective 10/1/97, the interim payment system will exist until prospective payment for home health agencies is implemented.

Section 4603 of the BBA establishes section 1895 of the Social Security Act, which specifies the authority for the development of a prospective payment system for home health services effective 10/1/99 which will ultimately be based on units of payment, most likely episodes of care. In developing the PPS, the Secretary will consider: an appropriate unit of service, the number of visits provided within the unit, and their cost. Payment for a unit of home health service will be modified by a case mix adjustor, set by the Secretary, to explain a significant amount of the variation in the cost of different units of service. The HHA would have the potential of profit or loss on each individual patient. Over many patients, the HHA would presumably make or lose money based on its ability to provide needed care effectively and efficiently.

Summary of the Legal Basis:

Section 1861(v)(1)(A) of the Social Security Act requires the limits that comprise the interim system. Under this authority, HCFA has maintained limitations on home health agency per-visit costs since 1975. Additional statutory provisions specifically governing limitations applicable to home health agencies are contained at section 1861(v)(1)(L) of the Social Security Act. These limits will be replaced by the establishment of a prospective payment system as defined in section 4603 of the BBA that requires the Secretary to establish and implement the interim payment system of payment limitations prior to establishment and implementation of the prospective payment system.

Alternatives:

Section 4603 of the BBA specifies the authority for the development of a prospective payment system for home health services effective 10/1/99. However, there is contingency language for the home health prospective payment system provided in BBA. If the Secretary for any reason does not establish and implement the prospective payment system for home health services, the Secretary shall provide for a reduction by 15% the cost limits and per-beneficiary limits, as those limits would otherwise be in effect on September 30, 1999.

Anticipated Costs and Benefits:

The Congress anticipates that the implementation of a PPS for home health services will achieve the combined benefits of establishing a system which will enable HCFA to find the provision of medically necessary HHA care to beneficiaries consistent with the HHA's own case mix and will also prevent the development of further

unsustainable growth in HHA costs. The combined effects of the "interim" and final systems are required to achieve this result.

Risks:

The statutory contingency for reducing cost caps under the interim system by 15% if the PPS is not implemented timely is not the preferred method for achieving the desired savings because the interim system does not adjust fully for case mix, as the PPS is required to do. Therefore, the longer the delay in implementation of the PPS, the greater the potential disparity between the case mix of an individual HHa and its payments.

FINAL RULE STAGE

34. TEMPORARY ASSISTANCE FOR NEEDY FAMILIES (TANF)

Priority:

Other Significant

Legal Authority:

42 USC 601; 42 USC 601 note; 42 USC 603 to 604; 42 USC 606 to 611; 42 USC 613; 42 USC 617; 42 USC 619; 42 USC 862a; 42 USC 1302; 42 USC 1308

CFR Citation:

45 CFR 260 to 265 (new)

Legal Deadline:

None

Abstract:

This regulation governs key provisions of the new welfare block grant program enacted in August 1996 as part of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (PRWORA). This new program, called the Temporary Assistance for Needy Families -- or TANF -- program, replaced the national welfare program known as Aid to Families with Dependent Children (AFDC) and the related programs known as the Job Opportunities and Basic Skills Training Program (JOBS) and the Emergency Assistance (EA) program. The regulation addresses the five-year time limit, work, accountability, and data collection and reporting provisions of the new TANF program.

Statement of Need:

This regulation is necessary to provide States with a basic set of rules which will assist them in implementing the TANF program.

Alternatives:

There are no viable alternatives.

Anticipated Costs and Benefits:

This regulation reflects the intent of PRWORA to achieve a balance between granting States the flexibility they need to develop and operate effective and responsive programs, and ensuring that the objectives of the programs are met. The financial impacts of these rules should be minimal because of the fix level of funding provided through the block grant. A State's Federal grant could be affected by the penalty decisions made under the law in these rules, and State expenditures on needy families could be affected by the rules on caseload reduction. Otherwise, the regulation should not affect the overall level of expenditures. However, it could have minor impacts on the nature and distribution of such expenditures. The impacts of these rules on needy individuals and families will depend on the choices the State makes in implementing the new law.

Risks:

None.

BILLING CODE 4150-04-F

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT (HUD)

Statement of Regulatory Priorities

Linkage to the HUD 2020 Management Reform Plan

The regulatory plan of the Department of Housing and Urban Development for fiscal year 1999 continues to reflect the revitalized mission that Secretary Andrew Cuomo established for HUD upon assuming the leadership of HUD and further reflects the fundamental redesign of HUD under the HUD 2020 Management Reform Plan. On June 26, 1997, Secretary Cuomo released his plan for significant management reforms at HUD—the "HUD 2020 Management Reform Plan." The HUD 2020 Management Reform Plan is directed to (1) empowering people and communities to improve themselves and (2) restoring HUD's reputation and credibility by improving the efficiency and effectiveness of the Department's programs, operations, and delivery of services.

To improve the efficiency and effectiveness of HUD's programs, operations, and delivery of services, the HUD 2020 Management Reform Plan calls for the restructuring of HUD's internal operations to reallocate resources and consolidate major functions. The HUD 2020 Management Reform Plan also calls for the resources to be allocated in a way that is designed to align HUD's resources with its long-term mission of empowering people and communities to improve themselves and succeed in today's world. Consolidation of functions is designed to avoid duplication of effort, achieve consistency and uniformity in the performance of those functions, and ensure fairness.

In fiscal year 1998, HUD began implementing the management reforms called for by the HUD 2020 Management Reform Plan. These reforms include the establishment of several centers at which key functions and operations have been consolidated and are now being carried out. Since issuance of the HUD 2020 Management Reform Plan, HUD has moved from discussion of the reforms to on-the-ground operations. The following describes some of the new HUD centers.

The Real Estate Assessment Center is charged with responsibility for assessing and scoring the condition of properties in which HUD has an interest and the performance of entities that manage and own those properties. The Enforcement Center assumes responsibility for the majority of HUD's existing enforcement operations. The Enforcement Center is the central departmental focus for taking aggressive action against HUD's troubled housing and public housing portfolios. The Troubled Agency Recovery Center will assist public housing agencies designated as troubled to reach improved performance through development and implementation of sustainable solutions. The Section 8 Financial Management Center provides a unified center for Section 8 payments processing. HUD also has established a new Office of Procurement and Contracts which will perform all operational contracting activities except simplified acquisitions and contract ordering. The consolidation of all operational activity within a single office, which reports directly to the Chief Procurement Officer will assure the Department's procurement reform initiatives and policies are implemented in a consistent manner. These are some of the key management reform changes that have already been instituted under the HUD 2020 Management Reform Plan.

Consolidation of functions and the resulting consistency and uniformity that is brought about through the consolidation not only make these functions easier for HUD employees to perform but make the HUD programs simpler, more comprehensible, and more fair for HUD's program participants. Several regulations issued by HUD in fiscal year 1998 reflect how consolidation of functions has achieved a key objective of HUD 2020 Management Reform and that is to strive to treat program participants fairly, on the basis of uniform standards, not on the basis of which HUD program office administers the program. Examples of such regulations are as follows:

Public Housing Assessment System. In FY 1998, HUD issued regulations to establish a revised performance evaluation system for public housing that expanded and improved on the previous assessment system—the Public Housing Management Assessment Program (PHMAP). The new system—the Public Housing Assessment System (PHAS) provides for the evaluation of the performance of public housing agencies (PHAs) in four critical areas: (1) The physical condition of the public housing; (2) the financial stability of the PHA; (3) the management capabilities of the PHA; and (4) the resident satisfaction with PHA services. This new system answers criticisms of the former PHMAP by placing greater emphasis on the physical condition of properties, objective evidence and third-party verification, basic real estate functions, and input from those served directly by the system (the "customers"). This new assessment system for public housing should increase the confidence of everyone involved—HUD, PHAs, residents, the Congress, the public—that it accurately determines whether PHAs are doing an acceptable or outstanding job and are providing decent, safe, and sanitary housing to their residents. This is critical because the consequences of that determination are significant—less scrutiny and additional flexibility for PHAs to be determined performing well and intensive technical assistance and short term deadlines to show improvement for those PHAs determined to be troubled. The new system should better indicate to everyone the degree of success of the public housing program under current levels.

Uniform Physical Condition Standards for Certain HUD Housing. This rule establishes for housing assisted under certain HUD programs uniform physical condition standards. These standards are intended to ensure that such housing is decent, safe, sanitary, and in good repair. HUD's Section 8 housing, public housing, HUD-insured multifamily housing, and other HUD assisted housing must currently meet certain standards and must undergo an annual physical inspection to determine that the housing qualifies as decent, safe, sanitary, and in good repair. Before issuance of this rule, the description or components of what constitutes acceptable physical housing quality varied from HUD program to HUD program. To the extent possible, HUD's position is that housing assisted under its programs should be subject to uniform physical standards regardless of the source of the subsidy or assistance. Additionally, to the extent feasible, HUD believes that the physical inspection procedures by which the standards will be assessed should be uniform in the covered programs. This rule provides for certain HUD housing to meet uniform physical condition standards to ensure that the housing is decent, safe, sanitary, and in good repair.

Uniform Financial Reporting Requirements. This rule establishes for HUD's public housing, Section 8 housing, and multifamily insured housing programs uniform annual financial reporting standards. The rule requires public housing agencies and project owners of HUD-assisted housing

to submit electronically to HUD, on an annual basis, certain financial information in a standardized format. Electronic submission was determined necessary because the manual submission of annual financial information to HUD has become a significant administrative burden to housing authorities, project owners, and mortgagees, as well as to HUD. This rule also provides that the annual financial information to be submitted to HUD must be prepared in accordance with generally accepted accounting principles.

Section 8 Certificate and Voucher Conforming Rule. This final rule completed the process of combining and conforming the regulations for tenant-based rental assistance under the Section 8 Certificate and Voucher programs. The merger of the Section 8 Certificate and Voucher programs and implementation of steamlining measures will make tenant-based assistance easier for HUD, housing authorities, and private landlords to administer.

These are some of the rules issued in fiscal year 1998 that reflect the HUD 2020 management reforms already instituted and underway at HUD.

Implementation of the HUD 2020 Management Reform Plan ensures HUD's relevance and effectiveness for the 21st century and focuses HUD resources and energy on two distinct yet interrelated missions:

The Departmental Mission: Empower communities and their residents, particularly the poor and disadvantaged, so that, together with HUD, they can develop viable urban communities, provide decent housing and suitable living environment for all citizens, without discrimination, in order to improve themselves, both as individuals and as a community, to succeed in today's time of transition.

The Secretary's Personal Mission: Restore the public trust by achieving and demonstrating competence.

Under the empowerment mission, HUD focuses on shifting: (1) From top-down programs with flexible mandates to bottom-up, community-driven partnerships that demonstrate a comprehensive community development strategy, (2) from long-term dependence programs to those that nurture self-sufficiency and self-reliance, (3) from working in isolation to collaboration with other Federal agencies to provide vital community resources, (4) from working against the free market to harnessing market forces wherever possible to use these forces to help people become self-sufficient.

Under the public trust mission, HUD focuses on moving from process and perpetuation to performance and product. HUD will continue to consolidate programs and reorganize and retrain staff to align the agency's resources; develop and implement stringent internal controls; and increase program monitoring and measurement to ensure higher performance.

To continue efforts directed at accomplishing these two revitalizing missions, the Secretary has directed HUD to focus on the following strategic objectives that are designed to reflect the core business of HUD:

1. Fight for fair housing.

2. Increase affordable housing and homeownership.

3. Reduce homelessness.

4. Promote jobs and economic opportunity.

5. Empower people and communities.

6. Restore public trust.

The regulatory priorities in HUD's regulatory plan for fiscal year 1999 and the regulations in HUD's semiannual regulatory agenda are designed to implement HUD's mission and address the core business of HUD. HUD's regulatory priorities for fiscal year 1999 may change if new legislation affecting HUD programs is enacted.

Regulatory Action: CDBG National Objective to Eliminate Slums or Blighting Conditions

This rule is designed to facilitate the redevelopment of underutilized property for housing or economic development purposes. The rule will increase CDBG recipients' flexibility to undertake activities which meet the national objective of preventing or eliminating slums or blighting conditions. The criteria for meeting the slum/blight national objective will be revised to specifically recognize economic obsolescence of buildings and the presence of environmental contaminants as blighting influences on an area or property.

(Furthers Strategic Objectives 2 and 4)

Regulatory Action: Clarification of the Nature of Required CDBG Expenditure Documentation

The rule will clarify the level of expenditure documentation that is needed to meet the financial management requirement that grantees and subrecipients maintain adequate records to identify the use of funds provided for assisted activities. This rule ensures better grantee and subrecipient accounting for all CDBG expenditures, as well as applicable credits to those expenditures.

(Furthers Strategic Objective 5)

Regulatory Action: Sanctions for Underreporting of Income in the Assisted Housing Programs

This rule is designed to promote program integrity and encourage housing assistance recipients to accurately report their income by imposing sanctions on them when they underreport their income. The entities that administer the low rent public housing program, the Section 8 housing assistance payments programs, and other HUD-subsidized housing programs will be required to take action against program participants when there is a discrepancy between the amount of income reported by the participant and by another source that exceeds a threshold amount. The actions to be taken will range from reporting the deficiency in rental payment based on the underreported income to a credit bureau to garnishment of wages of the amount owed. Action will be taken only after the program participant has been given an opportunity to contest the existence and amount of a reported discrepancy in income, as well as being given the opportunity to execute a repayment agreement. The purpose of this rule is to prevent potential losses to HUD and taxpayers from substantial underreported income and to assure that worthy participants benefit from HUD housing programs.

(Furthers Strategic Objective 6)

Regulatory Action: Assessment of the Reasonable Revitalization of Certain Public Housing

On September 26, 1996, the Department published at 61 FR 50632 a notice to implement section 202 of the Omnibus Consolidated Rescissions and Appropriations Act of 1996 (Pub. L. 104-134, approved April 26, 1996) (OCRA). Section 202 requires PHAs to identify certain distressed public housing developments that cost more than Section 8 rental assistance and cannot be reasonably revitalized. Households in occupancy that will be affected by the activities will be offered tenant-based or project-based assistance (that can include other public housing units) and will be relocated to other decent, safe, sanitary, and affordable housing which is, to the maximum extent practicable, housing of their choice. After residents are relocated, the distressed developments (or affected buildings) for which no reasonable means of revitalization exists will be removed from the public housing inventory. The September 26, 1996, notice invited public comments, which were taken into consideration in the interim rule published on September 22, 1997. The interim rule also invited public comments. The final rule to be issued in fiscal year 1999 will take into consideration the public comments received on the September 22, 1997, interim rule.

(Furthers Strategic Objectives 2 and 5)

Regulatory Action: Multifamily Housing Restructuring Program (Mark-to-Market)—Preserving Low-Income Rental Housing While Reducing Long-Term Costs of Project-Based Rental Assistance

This rule implements the FHA-Insured Multifamily Housing Mortgage and Housing Assistance Restructuring Program. This program was enacted in the Department's FY 1998 Appropriations Act. The legislation gives HUD permanent authority to address the problem of expiring project based Section 8 assistance contracts. The program, which provides for mortgage restructuring plans, is intended to reduce long-term costs while maintaining the units as affordable housing.

(Furthers Strategic Objectives 2 and 6)

Regulatory Action: Public Housing Admission and Occupancy Reforms and Streamlining

This rule includes provisions that help make public housing a more desirable place to live. It provides Public Housing Agencies (PHAs) the authority to screen out applicants and to terminate tenancies of tenants who are engaged in criminal and antisocial behavior. Specifically, PHAs will take action against those involved in drug or alcohol abuse that "may interfere with the health, safety, or right to peaceful enjoyment of the premises by other residents of the project" or who have been evicted previously for drug-related criminal activity. The screening process is to include appropriate criminal background checks. These changes implement the Housing Opportunity Program Extension Act of 1996 (Pub. L. 104-120, 110 Stat. 834). Additional changes are being made to streamline the rule and to respond to relevant recommendations contained in the report issued by the statutorily created Public and Assisted Housing Occupancy Task Force.

(Furthers Strategic Objectives 2, 5, and 6)

Regulatory Action: Strengthening the Title I Property Improvement Loan Insurance Program

This rule would amend the Department's title I regulations to require that a certain amount of the proceeds of property improvement loans must be used for correcting code violations, health and safety defects, accessibility improvements, or energy improvements. This rule would establish time limits for completing improvements.

(Furthers Strategic Objectives 2 and 6)

Regulatory Action: Disclosure of Fees Paid to Mortgage Brokers

This rule would provide consumers with increased disclosure concerning the mortgage broker's function and fees and would provide mortgage brokers with greater clarity regarding application of the Real Estate Settlement Procedures Act (RESPA) to mortgage broker fees. The mortgage brokers would be encouraged to enter into a contract with the consumer early in a mortgage financing transaction in order to provide the consumer with information about the mortgage broker's duties and compensation.

(Furthers Strategic Objectives 2 and 6)

Regulatory Action: Fair Housing Planning Performance Standard

This rule will assist communities in complying with the legal requirement to certify that they are affirmatively furthering fair housing. It will provide a standard by which the Department will assess grantees' performance in affirmatively furthering fair housing. Thus, communities will have a clear idea of what is expected of them and the standards HUD will use in reviewing their certifications.

(Furthers Strategic Objectives 1 and 5)

Regulatory Action: Lead-Based Paint Poisoning Prevention in Certain Residential Structures

This rule will implement sections 1012 and 1013 of the Residential Lead-Based Paint Hazard Reduction Act of 1992, which establishes significant new requirements concerning lead-based paint hazard notification, evaluation, and reduction for federally owned residential property and housing receiving Federal assistance.

(Furthers Strategic Objective 2)

HUD—Office of the Secretary (HUDSEC)

PROPOSED RULE STAGE

35. SANCTIONS FOR UNDERREPORTING OF INCOME IN THE ASSISTED HOUSING PROGRAMS (FR-4334)

Priority:

Other Significant

Legal Authority:

42 USC 3543; 42 USC 3544; 42 USC 11901 et seq; 42 USC 3535(d)

CFR Citation:

24 CFR 5

Legal Deadline:

None

Abstract:

This rule proposes to amend HUD's regulations for disclosure and verification of income information submitted by participants in its assisted housing programs to inciude sanctions for inaccurate reporting. The amount participants pay for their housing is dependent on their income, and any underpayment of rent by them generally results in overpayment of housing assistance by HUD. This rule is being undertaken to assure that there are adequate measures in place to assure that participants in these programs will fully report their income and to reduce overpayments by HUD from scarce taxpayer dollars. It would require housing agencies or owners to take action against program participants when they find a discrepancy between the amount of annual income reported by the participant and by another reliable source, if the discrepancy exceeds a threshold amount.

Statement of Need:

HUD's Inspector General and the General Accounting Office (GAO) have indicated that HUD has not taken enough measures to assure accurate income reporting and housing assistance payments in its public housing and section 8 rental assistance programs. This finding has contributed to GAO's classification of HUD as a "high risk" agency with respect to financial management. This rulemaking is part of a coordinated effort by HUD to reduce the incidence of fraud, waste, and abuse in its assisted housing programs and to restore public trust in the Department.

Summary of the Legal Basis:

The statutory provision entitled, "Preventing fraud and abuse in housing and urban development programs", 42 U.S.C. 3544, requires periodic review of a participant's income to assure that the level of benefits provided under the program is correct. It authorizes use of a consent form to request various kind of information pertinent to the participant's eligibility or level of benefits, including information from State agencies with wage data and from the Social Security Administration and Internal Revenue Service.

Alternatives:

A number of initiatives were considered to reduce the incidence of fraud, waste, and abuse in the housing assistance programs of HUD. A number of them are being pursued as separate initiatives. The scope of this rule is to require the entities that administer HUD's assisted housing programs--including Federal Housing Administration insured, subsidized projects as well as public housing and section 8 assisted housing--to impose sanctions on participants found to have underreported their annual income by more than $3,000. The sanctions to be imposed are reporting of the resulting deficiency in rental payment to a credit bureau, charging interest and/or penalty on the amount owed, and--to the extent such actions are cost effective and consistent with State law--seeking an offset against any State income tax refund or garnishment of wages.

Other alternatives considered were to revise HUD regulations to require: (1) tenants to sign a consent from permitting the IRS to disclose tax data to administrators of HUD-assisted housing; (2) administrators to garnish the wages of Federal employees participating in these programs who have underreported income.

Anticipated Costs and Benefits:

The first two actions included in the rule, credit bureau reporting and charging interest and penalties, are expected to involve minimal cost to program administrators. Reporting on debts owed to a credit bureau is expected to be very beneficial as an incentive to report income accurately, since use of credit is so pervasive in our society and affects even the participant's future attempts to rent a housing unit. The assessment of interest and/or penalties also will involve minimal cost to the program administrators. Its primary benefit is in encouraging a participant who has a rental deficiency attributable to underreporting of income to agree to repay the amounts owed before the enforcement activity reaches this stage.

The second two actions, State refund offsets and garnishment, are likely to involve more cost to the program administrators; hence, the rule permits them to be undertaken only where they are cost-effective for the administrator. Of the two alternatives that were considered but not included in the rule, the second one--limiting the garnishment action to Federal employees--was rejected as being unnecessarily limited. Instead, the garnishment option was expanded to include not only Federal employees but any employed person who owes a rental deficiency based on underreported income. The other alternative that was not included in the rule -- broadening the scope of entities to which income verification data would be revealed -- was subject to some policy concerns, so the rule was limited to the four initiatives.

Risks:

The rule poses no threat to public safety, health or the environment.

FINAL RULE STAGE

36. LEAD-BASED PAINT POISONING PREVENTION IN CERTAIN RESIDENTIAL STRUCTURES (FR-3482)

Priority:

Economically Significant

Unfunded Mandates:

Undetermined

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 4822; 42 USC 3535(d)

CFR Citation:

24 CFR 35

Legal Deadline:

Final, Statutory, January 1, 1995.

Abstract:

The Office of Lead Hazard Control was established by Congress within the Office of the Secretary of HUD. The Office provides overall direction to HUD's lead-based paint activities.

Currently, 24 CFR part 35 addresses the Department's requirements on lead hazards in housing. Additional requirements are specified for each housing program in the CFR part pertaining to each program. Sections 1012 and 1013 of the Residential Lead-Based Paint Hazard Reduction Act of 1992, which is title X of the Housing and Community Development Act of 1992 (title X) require substantial revisions to HUD's current regulations for the evaluation and control of lead-based paint hazards in federally assisted and federally owned housing. The legislation evidences a concern with developing a national strategy to build the infrastructure necessary to eliminate lead-based paint hazards in all pre-1978 housing that may be occupied by young children. Because of the scope of the problem, the strategy will be implemented on a priority basis and, in part, is to be based on guidelines issued by the Department on August 25, 1995, on the conduct of federally supported work involving risk assessments inspections, interim controls and abatement of lead-based paint hazards ("Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing"). The revisions required by title X will affect HUD's housing programs and the housing programs of other Federal agencies.

HUD is consolidating in a revised part 35 of title 24 of the Code of Federal Regulations the multitude of lead-based paint regulations found throughout HUD programs and will make them consistent, creating a single point of reference for the Department's lead-based paint requirements. Proposed regulations were published for public comment on June 7, 1996.

Statement of Need:

The Centers for Disease Control and Prevention (CDC), the American Academy of Pediatrics, and the National Academy of Sciences have labeled lead poisoning as the leading environmental health hazard facing America's children. Childhood lead exposure has been shown to cause damage to the brain and nervous system which causes behavior and learning problems; reduced IQ; slowed growth; hearing problems; hypertension and heart disease; reproductive problems for both men and women; kidney damage; and many other adverse health effects, in some cases even seizures coma, and death. These effects result in increased medical care costs, increased special education costs, and decreased lifetime earnings. The reductions in IQ appear to be irreversible, and because lead is stored primarily in bone, internal exposures can occur for decades, even if environmental exposures are controlled.

The results of CDC's third National Health and Nutrition Examination Survey indicate that population blood lead levels have continued to decrease dramatically as a result of the de-leading of gasoline and the elimination of lead in solder in food canning, as well as the ban on lead in household paint (which was effective in 1978). Nevertheless, CDC found that during the period 1991-1994, 4.4 percent of all American children aged 1-5, or 930,000 children, had blood lead levels greater than the CDC level of concern (10 ug/dl). CDC has concluded that the most serious remaining sources of lead exposure are lead in deteriorated paint in older housing and dust and soil contaminated by paint and residues from past emissions of leaded gasoline. These sources must be controlled to assure continued declines in childhood lead poisoning.

The prevalence of elevated blood lead levels is statistically associated with low family income, older housing, and African-American or Mexican-American race/ethnicity. For instance, approximately 8.6 percent of children aged 1-5 living in housing built before 1946 had elevated blood lead levels during the 1991-1994 period, compared to 4.4 percent for all children of that age. For children in low income families living in pre-1946 housing, the percentage was 16.4; and among non-Hispanic black children living in pre-1946 housing, the percentage was 21.9.

Summary of the Legal Basis:

Title X amends the Lead-Based Paint Poisoning Prevention Act (42 USC 4822) to focus attention and resources on identifying and controlling lead-based paint hazards in federally assisted and federally owned housing before children are poisoned.

Alternatives:

The statute is generally prescriptive in requiring regulatory action to be taken by HUD. For certain HUD programs the Department has some discretion in the level of hazard evaluation and control measures to be undertaken. Alternatives being considered are related primarily to: (1) the amount of on-site work that is required for hazard evaluation and control; (2) targeting by year of construction; and (3) likelihood of occupancy by families with children.

Anticipated Costs and Benefits:

The Department has estimated the present value of some of the major benefits of protecting children from lead exposure that would flow from first-year activities required under the regulations proposed on June 7, 1996. These quantified benefits included increased lifetime earnings associated with higher IQs for children with lower blood lead levels, and avoided costs of special education and medical treatment. Estimated benefits also included market-value increases resulting from housing renovation associated with lead-based paint hazard controls. Using a three percent discount rate for lifetime earnings, total estimated benefits were approximately $1.5 billion; using a seven percent rate, the estimate was approximately $500 million. Costs of activities that would be newly required in the first year of the proposed regulations were estimated at approximately $460 million, for a net benefit of over $1 billion using a three percent discount rate and $40 million using seven percent.

Additional possible benefits not included in these estimates are: reduced infant mortality; reduced hypertension; improvements to children's stature, hearing and vitamin D metabolism; reductions in juvenile delinquency and the burden on the educational system; avoidance of the parental and family time expense and emotional costs of caring for poisoned children; and reductions in personal injury claims and court cases.

This analysis may be modified for the final rule.

Risks:

Without the regulatory changes required by title X, childhood lead exposures will continue at or near current levels.

37. MULTIFAMILY HOUSING MORTGAGE AND HOUSING ASSISTANCE RESTRUCTURING PROGRAM (MARK TO MARKET) AND RENEWAL OF EXPIRING SECTION 8 PROJECT-BASED ASSISTANCE (FR-4298)

Priority:

Other Significant

Legal Authority:

12 USC 1715z-1; 42 USC 1436f note.

CFR Citation:

24 CFR 401; 24 CFR 402

Legal Deadline:

Final, Statutory, Final rule issued by the later of 10/27/98 or 3 months following the appointment of a Director of OMHAR.

Abstract:

This rule will implement recently enacted legislation that created a Mark-to-Market Program through which section 8 rents for multifamily projects with HUD-insured or HUD-held mortgages will be reduced in order to preserve low-income rental housing affordability while reducing the long-term costs of project-based rental assistance and minimizing the adverse effect on the FHA insurance funds. The rule also implements legislation for renewal of section 8 project-based assistance contracts for projects outside of the Mark-to-Market Program.

Statement of Need:

Regulations are necessary to implement the new authority and the statute requires the issuance of regulations.

Summary of the Legal Basis:

The Multifamily Assisted Housing Reform and Affordability Act of 1997 (title V of Pub.L. 105-65, approved October 27, 1997).

Alternatives:

There is no alternative. The program, created by statute, is designed to address the problem of expiring section 8 contracts, while preserving affordable housing. The statute requires the issuance of regulations.

Anticipated Costs and Benefits:

The anticipated benefits are section 8 discretionary outlays are reduced, losses to the FHA insurance fund are reduced and affordable housing is preserved.

Risks:

The rule poses no threat to public safety, health, or the environment.

PROPOSED RULE STAGE

38. STRENGTHENING THE TITLE I PROPERTY IMPROVEMENT LOAN INSURANCE PROGRAM (FR-4246)

Priority:

Other Significant

Legal Authority:

12 USC 1703; 42 USC 1436a; 42 USC 3535(d)

CFR Citation:

24 CFR 201

Legal Deadline:

None

Abstract:

This rule proposes to amend HUD's regulations for the title I Property Improvement Loan Insurance Program. This rule would require that at least some of the loan proceeds must be used for correcting code violations, health and safety defects accessibility improvements, or energy improvements. This rule would also require the lender to certify that no party that is debarred or subject to a limited denial of participation will be involved in connection with the loan; that the property has been inspected and the proposed work meets the eligibility requirements; and that a post-completion inspection and verification of completion of the work has occurred. This rule would also establish time limits for completing improvements and streamline requirements, where appropriate. HUD anticipates that this rule will be finalized in conjunction with FR-3718.

Statement of Need:

This rule will propose changes to the title I Property Improvement Loan Program necessary to reflect the market and economic changes in home improvement lending in this country. With regard to the market, many new conventional no-equity or low-equity loan products have been introduced in the last few years. Economically, the Department wants to reduce fraud and abuse in the program to mitigate the financial impact on the FHA Insurance Fund. In addition, changes are needed to ensure that use of the program complies with the Congressional intent of the program.

Summary of the Legal Basis:

Title I of the National Housing Act, as amended.

Alternatives:

There has been too much abuse and fraud in the existing program to leave the current rules unchanged. Insufficient information is available to judge the merits and disadvantages of terminating the whole program.

Anticipated Costs and Benefits:

Lenders will incur some minor additional costs for additional documentation and review of borrower and contractor performance. However, the benefits of the reduced defaults that are projected should offset these additional costs. A program with less fraud and abuse should attract additional lenders to the program making the program more readily available to borrowers.

Risks:

Some existing lenders have already decided to reduce their participation in the current program by focusing on alternative loan products. These changes could accelerate this situation and reduce the availability of title I loans in some markets.

HUD—OH

FINAL RULE STAGE

39. RESPA: DISCLOSURE OF FEES PAID TO RETAIL LENDERS (BROKERS) (FR-3780)

Priority:

Economically Significant

Legal Authority:

12 USC 2601; 42 USC 3535(d)

CFR Citation:

24 CFR 3500

Legal Deadline:

None

Abstract:

A final rule will provide consumers with increased disclosure concerning the mortgage broker's function and fees and would provide mortgage brokers with greater clarity regarding application of the Real Estate Settlement Procedures Act (RESPA) to mortgage broker fees.

Statement of Need:

Confusion about how RESPA applies to mortgage broker fees has led to litigation and numerous requests for clarification. The proposed rule was developed after receiving comments on a prior proposed rule and after parties to a negotiated rulemaking process, including consumer and industry groups, could not reach a consensus.

In order to benefit from greater clarity about permissibility of fees, mortgage brokers would be encouraged to provide information to the consumer early in a mortgage financing transaction. The information would include a statement regarding information about the mortgage broker's duties and compensation.

Summary of the Legal Basis:

The Real Estate Settlement Procedures Act, 12 U.S.C. 2601 et seq., prohibits the payment of certain fees which are unearned or for the referral of business. Under this rule, HUD will clarify the circumstances when certain fees to mortgage brokers are permissible and when they are prohibited under RESPA.

Alternatives:

The Department attempted to reach consensus through the negotiated rulemaking process, however, a consensus was not achieved.

Anticipated Costs and Benefits:

There are some costs for mortgage brokers associated with the additional disclosure. However, these may be offset by the benefits of greater certainty about which fees are permitted and which are prohibited. Consumers will benefit because increased clarity about the mortgage broker's rule and fees associated with the transaction will allow them to more effectively shop for a competitive loan.

Risks:

This rule poses no threat to public safety, health, or the environment.

PROPOSED RULE STAGE

40. CDBG SLUM/BLIGHT NATIONAL OBJECTIVE RULE (FR-4260)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 3535; 42 USC 5300 to 5320

CFR Citation:

24 CFR 570.208; 24 CFR 570.483

Legal Deadline:

None

Abstract:

This rule will be a key step in the implementation of the Department's Brownfields Initiative. (The Brownfields Initiative will stimulate economic development through the redevelopment of contaminated industrial properties.) It will increase Community Development Block Grant (CDBG) recipients' flexibility to undertake activities which meet the national objective of preventing or eliminating slums or blighting conditions. The criteria for meeting the slum/blight national objective will be revised to specifically recognize economic obsolescence of buildings and the presence of environmental contaminants as blighting influences on an area or property. This rule also will propose clarifications of the standards for meeting the slum/blight national objective criteria on a spot basis.

Statement of Need:

Current CDBG regulations concerning the slum/blight national objective only recognize the presence of physically deteriorated buildings or public improvements as blighting influences on an area or property. Professional practice and thinking in the community development field is evolving toward a more encompassing view of the factors which influence urban decay. Failure to update and streamline CDBG program rules would hinder grantees' efforts to redevelop underutilized properties and improve physical conditions in neighborhoods. At the same time, an audit report by the Office of the Inspector General has recommended that HUD consider revising its definition of what constitutes spot blight to resolve possible ambiguities.

Summary of the Legal Basis:

Section 104 of the Housing and Community Development Act of 1974 establishes certain national objectives for CDBG assisted activities. Among other goals, section 104 makes the prevention or elimination of slums or blight a national objective for the CDBG program.

Alternatives:

Regulations are needed to provide clear and uniform criteria for meeting the national objective to address the slum/blight issue.

Anticipated Costs and Benefits:

Costs: None. Benefits: Grantees will gain the flexibility to use CDBG funds to assist in redeveloping a larger universe of properties whose conditions negatively influence the condition of the surrounding area.

Risks:

This rule poses no threat to public safety, health or the environment. Any cleanup of contaminated sites will be governed by existing Federal and State standards for environmental remediation.

41. CLARIFICATION OF THE NATURE OF REQUIRED CDBG EXPENDITURE DOCUMENTATION (FR-4261)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 3535 (d); 42 USC 5300 to 5320

CFR Citation:

24 CFR 570.200; 24 CFR 570.502; 24 CFR 570.506

Legal Deadline:

None

Abstract:

This rule will clarify the level of expenditure documentation that is needed to meet the financial management requirement that grantees and subrecipients maintain adequate records to identify the use of funds provided for assisted activities.

Statement of Need:

Office of Inspector General (OIG) audits have found various cases in which grantees and subrecipients were not maintaining sufficient documentation to clearly identify the actual use of CDBG funds provided to assisted projects. This issue has particularly arisen in regard to special economic development projects where the funds are ultimately expended by for-profit businesses. Such findings increase the potential for misuse of CDBG funds.

Summary of the Legal Basis:

Section 104 of the Housing and Community Development Act of 1974 provides the statutory authority for this rule.

Alternatives:

None considered.

Anticipated Costs and Benefits:

Costs: None. Benefits: The public will be more assured that CDBG funds are used only for allowable purposes.

Risks:

This rule poses no threat to public safety, health or the environment.

HUD—Office of Fair Housing and Equal Opportunity (FHEO)

PROPOSED RULE STAGE

42. FAIR HOUSING PLANNING PERFORMANCE STANDARD (FR-4133)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 3535(d); 42 USC 3600 to 3620

CFR Citation:

24 CFR 91; 24 CFR 570

Legal Deadline:

None

Abstract:

This rule will assist communities in complying with the legal requirement to certify that they are affirmatively furthering fair housing. It will provide a standard for determining the accuracy of the certification so that communities will have a clear idea of what is expected of them and how HUD will review their certifications as well as measure performance for determining compliance with fair housing requirements.

Statement of Need:

Currently, the CDBG regulation provides for HUD review and oversight. However, the regulation does not contain a performance standard for grantee actions to affirmatively further fair housing. Without such a performance standard, HUD cannot adequately assess compliance with fair housing requirements. This revision to the existing CDBG regulation would provide a clearer standard for assessing performance of grantee actions to affirmatively further fair housing.

Furthermore, the Consolidated Plan regulations at 24 CFR part 91 require grantees to certify that they are affirmatively furthering fair housing. This will provide a standard for determining the accuracy of the certification.

Summary of the Legal Basis:

Section 104 of the Housing and Community Development Act of 1974,

HUD's regulations at 24 CFR part 570, subpart O, section 105 of the Cranston-Gonzalez National Affordable Housing Act and HUD's regulations at 24 CFR part 91 establish the legal basis for this rule.

Alternatives:

None considered.

Anticipated Costs and Benefits:

Costs: None.

Benefit: The benefit is that there will be more certainty for grantees about the standards that HUD will use to review their certifications and assess performance.

Risks:

This rule poses no threat to public safety, health, or the environment.

HUD—Office of Public and Indian Housing (PIH)

FINAL RULE STAGE

43. PUBLIC HOUSING ADMISSION AND OCCUPANCY REFORMS AND STREAMLINING (FR-4084)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 1437a; 42 USC 1437c; 42 USC 1437d; 42 USC 1437n; 42 USC 3535(d)

CFR Citation:

24 CFR 960; 24 CFR 966

Legal Deadline:

None

Abstract:

This rule streamlines admission and occupancy regulations, and implements relevant parts of the Housing Opportunity Program Extension Act of 1996.

Additional administrative flexibility is provided to housing authorities through this rule: HAs can verify information about an applicant's disability to determine appropriate accommodations, to verify information relative to qualification for a preference, and to determine deductions for calculating adjusted income. It clarifies that the HA makes the final determination of whether an applicant's failure to meet the HA's tenant selection criteria is outweighed with respect to these issues. The rule also provides explicit authorization for HAs to adopt income limits for continued occupancy and removes language that required a tenant's approval for direct payment of a utility reimbursement to a utility provider.

The Housing Opportunity Program Extension Act of 1996 amended the U.S. Housing Act of 1937 to make drug-related criminal activity a criterion for denial of admission to housing assisted under the 1937 Act and make drug use and/or alcohol abuse a criterion for eviction from housing assisted under the 1937 Act.

Statement of Need:

On March 4, 1995, President Clinton issued a memorandum to all Federal departments and agencies regarding regulatory reinvention. In response to this memorandum, HUD determined that the regulations under 24 CFR parts 960 and 966 could be improved and streamlined by eliminating unnecessary language and by simplifying remaining requirements. On March 28, 1996, the Housing Opportunity Program Extension Act of 1996 was passed.

Summary of the Legal Basis:

The Housing Opportunity Program Extension Act of 1996 and the U.S. Housing Act of 1937, as amended.

Alternatives:

None considered.

Anticipated Costs and Benefits:

This rule will have the benefit of increasing administrative flexibility for housing authorities. Additional costs will be negligible.

Risks:

This rule does not pose a risk to public health, safety, or the environment.

Timetable:

44. ASSESSMENT OF THE REASONABLE REVITALIZATION POTENTIAL OF CERTAIN PUBLIC HOUSING REQUIRED BY LAW (FR-4120)

Priority:

Other Significant

Legal Authority:

PL 104-134 Sec. 202 of the OCRA of 1996

CFR Citation:

24 CFR 971

Legal Deadline:

None

Abstract:

Section 202 of the Omnibus Consolidated Rescissions Act (OCRA) of 1996 requires PHAs to identify certain distressed public housing developments which may be required to be converted to section 8 vouchers or certificates. The requirement covers developments that are on the same or contiguous sites, are more expensive

than tenant-based assistance, and cannot be revitalized through reasonable programs. To be subject to these requirements, the developments must have more than 300 dwelling units and have a vacancy rate of at least ten percent for dwelling units not in funded on-schedule modernization programs.

Statement of Need:

Based on public comments received, the rule provides further information on statutory provisions that are already in effect through a notice published on September 26, 1996, and an interim rule published on September 22, 1997.

Summary of the Legal Basis:

Section 202 of the Omnibus Consolidated Rescissions Act of 1996 requires PHAs to identify certain distressed public housing developments that will be required to be replaced with tenant-based assistance if they cannot be revitalized by any reasonable means.

Alternatives:

None considered.

Anticipated Costs and Benefits:

The rule will have the benefit of speeding and making more rational the reduction and restructuring of the public housing inventory. Additional costs to the PHA or to HUD would be negligible.

Risks:

The rule poses no risk to public health, safety, or to the environment. A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50 that implement section 102(2)(c) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. To the extent the new rule hastened the reduction of non-viable units it would improve public health and safety.

BILLING CODE 4210-01-F

DEPARTMENT OF THE INTERIOR (DOI)

Statement of Regulatory Priorities

The Department of the Interior (DOI) is the principal steward of natural resources for the American public and serves as trustee to Native Americans and Alaska Natives. In total the Department manages more than 450 million acres of Federal lands, approximately 3 billion acres of the Outer Continental Shelf, and more than 57,000 buildings. Also, DOI has a directorate responsible for activities concerning island territories under the jurisdiction of the United States. In carrying out its many responsiblities in conservation, land management, natural resource protection, and as trustee, the Department has increasingly embraced creative options to ensure the long-term viability of our resources and the environment in which they are found. The Department has used the same creative approach to maximize benefits to society and minimize negative effects.

DOI is also the steward of many of our Nation's cultural resources and serves as trustee to Native Americans and Alaska Natives.

Interior's bureaus and offices seek to ease the burdens imposed by regulations while increasing the protection of resources under their jurisdiction. Examples of this include:

- Establishing a community approach to maintaining the environmental systems which support native species. The expected result is a reduction in the rate by which individual species become threatened and endangered. This approach enlists the voluntary support of land owners to achieve environmental goals while potentially reducing the regulatory cost.
- Using performance-based regulations rather than process-based regulations. This gives local entities the option of using the most cost effective method to meet the spirit and letter of the law while providing the best result tailored to the specific instance and location.
- Incorporating scientific standards, where applicable into regulations.
- Continuing to reduce the number of regulations and converting those that remain to plain language. This will improve the public's ability to understand regulatory requirements and will result in improved compliance.

The Department's overall goal is to maintain or improve the quality of the environment while:

- Reducing the financial burden on the general public;
- Increasing the flexibility of the public to use the best means available to ensure that the laws are met; and
- Making regulations easy to understand and administer.

This approach to improving regulations will help DOI better execute its mission and meet the requirements of the eight bureaus and the following objectives:

- Conserve, protect, and enhance the Nation's national parks, wilderness, and fish and wildlife resources;
- Manage, develop, and protect the quality of water resources;
- Promote economic opportunity and improve the trust assets of Native Americans, Native American tribes, Alaska Natives, and people of the U.S. territorial governments; and
- Enhance America's ability to meet its needs for domestic energy and mineral resources.

Major Regulatory Areas

Among the Department's bureaus and offices, the Office of Surface Mining Reclamation and Enforcement (OSM) has the highest concentration of regulatory responsibilities. OSM, in partnership with the States and Indian tribes, has the responsibility for setting and enforcing environmental standards during coal mining and reclamation operations. OSM is considering an innovative approach to facilitate the reclamation of abandoned mine lands by allowing the party conducting the reclamation to offset the cost of reclamation through the sale of coal extracted as an incidental part of the reclamation project.

Other DOI bureaus rely on regulations to implement legislatively mandated programs by focusing on the management of natural resources and public or trust lands. Some of these regulatory activities include:

- Management of migratory birds and preservation of certain marine mammals and endangered species;
- Management of dedicated lands, such as national parks, wildlife refuges, and American Indian trust lands;
- Management of public lands open to multiple use;
- Leasing and oversight of development of Federal energy, minerals, and renewable resources;
- Management of revenues from American Indian and Federal minerals;
- Fulfillment of trust and other responsibilities pertaining to American Indian tribes;
- Natural resource damage assessments; and
- Management of financial and nonfinancial assistance programs.

Regulatory Policy

How DOI Regulatory Procedures Relate to the Administration's Regulatory Policies

Within the general requirements and guidance in Executive Orders 12866, 12612, and 12630, DOI's regulatory program seeks to:

- Fulfill all legal requirements as specified by statutes or court orders;
- Perform essential functions that cannot be handled by non-Federal entities;
- Minimize regulatory costs to society while maximizing societal benefits; and
- Operate programs openly, efficiently, and in cooperation with Federal and non-Federal entities.

DOI bureaus have taken the initiative in working with other Federal agencies, non-Federal government agencies, and public entities to make DOI regulations easier to comply with and understand. Because regulatory reform is a continuing process that requires the participation of all affected parties, DOI is continually enhancing its efforts to include affected entities in the decisionmaking process and to better coordinate the rulemaking process.

In order to facilitate better overall management and review of the regulatory process, DOI revised Part 318 of the Departmental Manual (318 DM), the Department's comprehensive and definitive guidance on promulgating regulations. Results have included:

- Increased awareness by the bureaus of responsibilities under the Small Business Regulatory Enforcement Fairness Act (SBREFA) and the incorporation of the requirements of SBREFA into new and updated rules and regulations;
- A Departmentwide effort to evaluate the economic impacts of rules and regulations that are planned; and
- Issuance of new guidance in the Departmental Manual to ensure the use of plain language in Government writing.

DOI is committed to improving the regulatory process through the use of plain English, and simplifying regulations has resulted in a major rewrite of the regulations for onshore oil and gas leasing and operations in an easily understandable form that: a) Puts previously published rules into one location in a logical sequence; b) eliminates duplication by consolidating existing regulations and onshore orders and national notices to lessees; c)

incorporates industry standards by reference; and d) implements performance standards in some of the operating regulations.

DOI's regulatory process ensures that bureaus responsible for regulations share ideas on how to reduce regulatory burden while meeting the requirements of the laws they enforce and improving their stewardship of the environment and resources under their purview.

Encouraging Responsible Management of the Nation's Resources

The Department's mission is to protect and provide access to our Nation's natural and cultural heritage and to honor our trust responsibilities to tribes. DOI is committed to this mission and to applying laws and regulations fairly and effectively. The Department's priorities are compliance, enforcement, prevention, solving problems, and protecting public health and safety. To this end, DOI bureaus encourage users of public resources to adopt long-term strategies designed to meet current needs while preserving resources for future generations.

An example of this is the "no suprises" policy of the U.S. Fish and Wildlife Service (FWS). This policy gives property owners an incentive to implement voluntary conservation measures for a proposed or candidate species, or a species likely to become a candidate or proposed in the near future. These property owners will receive assurances from FWS that additional conservation measures will not be required and additional land, water, or resource use restrictions will not be imposed should the species become listed in the future. This policy results in fewer fines, no "suprises" (in the form of unexpected fines) for conforming landowners, and better overall compliance with the Endangered Species Act.

Minimizing Regulatory Burdens

DOI is using the regulatory process to ease the burdens on various entities throughout the country. For instance, the Endangered Species Act (ESA) allows for the delisting of threatened and endangered species if they no longer need the protection of the ESA. DOI has identified approximately 40 species for which delisting or downlisting (reclassification from endangered to threatened) may be appropriate. In FY 99, DOI intends to delist the American peregrine falcon (due to species recovery) and the Dismal Swamp southeastern shrew (due to new information regarding the taxonomy and abundance of the species).

Experience has shown us that changing the planning process for land use and water development can reduce unnecessary delays and paperwork associated with agency decisionmaking. For some projects, an improved planning process has dramatically reduced the time required for paperwork.

We have attempted to use performance standards in a variety of regulations. These allow the affected entity to choose the most economical method to accomplish a goal provided it meets the requirements of the regulations. An example of this is Minerals Management Service's (MMS) proposed training rule, which will allow companies with operations in the Outer Continental Shelf (OCS) to select their own training courses or programs for employees. Currently MMS has a prescriptive program where employees working on the OCS must attend an MMS-certified school. This rule will put the responsibility on lessees and contractors to properly train the employees by any method they choose as long as the employees are competent. We anticipate that this will result in new and innovative training techniques and allow companies added flexibility in tailoring their training to employees' specific duties.

Encouraging Public Participation and Involvement in the Regulatory Procedure Process

One of the goals of Executive Order 12866 is to ensure that the public has adequate opportunities to participate in developing new regulations. Under this Administration, encouraging increased public participation in the regulatory process to make regulatory policies more responsive to our customers' needs is a priority.

The Department is reaching out to communities to seek their input on a variety of regulatory issues. For example, every year the FWS establishes migratory bird hunting seasons in partnership with "flyway councils," which are made up of State fish and wildlife agencies. As the process evolves each year, FWS holds a series of public meetings to give other interested parties, including hunters and other groups, adequate opportunity to participate in establishing the upcoming season's regulations.

Likewise, the Bureau of Land Management (BLM) uses Resource Advisory Councils (RACs) made up of affected parties to help prepare the regulations promulgated under the Rangeland Reform Act.

We also encourage public consultation in the regulatory process. For example:

- OSM is continuing its outreach to interested groups to improve the substance and quality of rules and, to the greatest extent possible, achieve a consensus on regulatory issues;
- The National Park Service (NPS) used negotiated rulemaking to amend its rules governing off-road vehicle use at Cape Cod National Seashore; and
- The Bureau of Indian Affairs is developing its roads program rule using the negotiated rulemaking process. Because of the importance of the roads program to the individual tribes and because of the varying needs of the tribal governments, the negotiated rulemaking process will result in a rule that better serves the diverse needs of the Native American community.

The Future of DOI

In compliance with the Government Performance and Results Act of 1993 (GPRA), DOI has developed a comprehensive agencywide strategic plan to prepare DOI for the 21st century. The strategic plan covers the period from 1997 through 2002. It provides employees and managers with clear goals and strategies to help the Department meet its mission and fulfill its commitment to the Nation. The strategic plan includes a departmental overview, goals, and initiatives for the indivdual bureaus. We believe that this plan must evolve in response to the changing natural and human environments. For this reason, DOI bureaus have already begun their strategic plans to respond to those changes and to prepare for others that may take place in the future.

A copy of DOI's strategic plan (including updates that have been made during FY 1998) can be seen on our web site at this address:

http://www.doi.gov/master2.html

Bureaus and Offices Within DOI

The following are brief descriptions of the regulatory functions of DOI's major regulatory bureaus and offices.

Office of the Secretary, Office of Environmental Policy and Compliance

The regulatory functions of the Office of Environmental Policy and Compliance (OEPC) stem from requirements under section 301(c) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (CERCLA). Section 301(c) requires the development of natural resource damage assessment rules and the biennial review and revision, as appropriate, of these rules. Rules have been promulgated for the optional use of natural resource trustees to assess compensation for damages to natural resources caused by hazardous substances. OEPC is overseeing the study and possible promulgation of additional rules pursuant to section 301(c)(2) and the review and possible revision of the existing rules in compliance with section 301(c)(3).

In undertaking DOI's responsibilities under section 301(c), OEPC is striving to meet three regulatory objectives: (a) That the minimum amount of regulation necessary be developed; (b) that the assessment process provide for tailoring to specific discharges or releases; and (c) that the process not be considered punitive, but rather a system to achieve fair and just compensation for injuries sustained.

Bureau of Indian Affairs

The philosophy of the Bureau of Indian Affairs (BIA) is to encourage the development and management of human and other resources among American Indians and Alaska Natives, to encourage tribal assumption of BIA programs, and to fulfill trust and other responsibilities of the U.S. Government. BIA regulatory actions serve to balance its dual role as: (a) Advocate in assisting tribes and encouraging their participation in BIA programs and (b) trustee protecting and/or enhancing American Indian trust resources.

Important BIA programs are promulgated through regulations, rather than informal guidelines, so that American Indians are aware of and have an opportunity to participate in the development of standards and procedures affecting them. BIA regulatory policies seek to accomplish the following: (a) Ensure consistent policies throughout American Indian country; (b) promote American Indian involvement in the operation, management, planning, and evaluation of BIA programs and services; (c) provide guidance to applicants for BIA services; and (d) govern the development of American Indian lands and provide for the protection of American Indian treaty and statutory rights.

BIA's regulatory program is designed (a) to promote American Indian self-determination, (b) to provide American Indians and Alaska Natives with high-quality education and tribal development opportunities, (c) to meet BIA's trust responsibilities, and (d) to meet the needs of tribes and their members.

Bureau of Land Management

The Bureau of Land Management manages about 268 million acres of land surface and about 570 million acres of mineral estate in the 17 coterminous western States and Alaska and the 31 States east of or adjoining the Mississippi River. These lands consist of extensive grasslands, forests, mountains, arctic tundra, and deserts. Resources on the lands include energy and minerals, timber, forage, wild horse and burro populations, habitat for fish and wildlife, wilderness areas, and archeological and cultural sites. BLM manages these lands and resources for multiple use and the sustained yield of renewable resources. Primary statutes under which the Agency must operate include: The Federal Land Policy and Management Act of 1976; the General Mining Law of 1872; the Mineral Leasing Act of 1920, as amended; the Recreation and Public Purposes Act; the Taylor Grazing Act; and the Wild, Free-Roaming Horses and Burros Act.

The regulatory program mirrors statutory responsibilities and Agency objectives. Agency objectives include:

- Providing for a wide variety of public uses without compromising the long-term health and diversity of the land and without sacrificing significant natural, cultural, and historical resource values;
- Understanding the arid, semi-arid, arctic, and other ecosystems we manage and committing to using the best scientific and technical information to make resource management decisions;
- Understanding the needs of the public that use BLM-managed lands and providing them with quality service;
- Committing to recovering a fair return for using publicly owned resources and avoiding the creation of long-term liabilities for American taxpayers; and
- Resolving problems and implementing decisions in cooperation with other agencies, States, tribal governments, and the public.

The regulatory program contains its own objectives. These include preparing regulations that:

- Are the product of coordination and consultation with all affected members of the public;
- Are understandable to the general public, especially those to whom they are directly applicable; and
- Are reviewed periodically to determine whether or not BLM still needs them and whether or not they need to be updated to reflect statutory and policy changes.

Minerals Management Service

The Minerals Management Service (MMS) has two major responsibilities: (1) Timely and accurate collecting, distributing, accounting for, and auditing of revenues owed by holders of Federal onshore, offshore, and tribal land mineral leases in a manner that meets or exceeds Federal financial integrity requirements and recipient expectations and (2) management of the resources of the Outer Continental Shelf in a manner that provides for safety, protection of the environment, and conservation of natural resources. These responsibilities are carried out under the provisions of the Federal Oil and Gas Royalty Management Act, the Minerals Leasing Act, the Outer Continental Shelf Lands Act, the Indian Mineral Leasing Act, and other related statutes.

The regulatory philosophy of MMS is to develop clear, enforceable rules that support the missions of each program. For the Offshore Program, MMS will issue final regulations implementing the Deep Water Royalty Relief Act. MMS will also publish a final rule to address financial responsibility under the Oil Pollution Act of 1990. MMS will continue to review rules and issue amendments in response to new technology and new industry practices.

MMS also plans to continue its review of existing regulations and to issue rules to refine the royalty management regulations in chapter II of 30 CFR. Revisions to the royalty management regulations cover oil and gas valuation of Federal and Indian leases. The Federal Oil and Gas Royalty Simplification and Fairness Act of 1996 will require numerous additional changes to the royalty management regulations, including the delegation of royalty collection and related activities to States.

Office of Surface Mining Reclamation and Enforcement

The Office of Surface Mining Reclamation and Enforcement (OSM) was created by the Surface Mining Control and Reclamation Act of 1977 (SMCRA) to "strike a balance between protection of the environment and agricultural productivity and the Nation's need for coal as an essential source of energy."

The principal regulatory provisions contained in title V of SMCRA set minimum requirements for obtaining a

permit for surface coal mining operations, set standards for surface coal mining operations, require land reclamation once mining ends, and require rules and enforcement procedures to ensure that the standards are met. Under SMCRA, OSM serves as the primary enforcer of SMCRA until the States achieve "primacy"; that is, until they demonstrate that their regulatory programs meet all the specifications in SMCRA and have regulations consistent with those issued by OSM.

A primacy State takes over the permitting, inspection, and enforcement activities of the Federal Government. OSM then changes its role from regulating mining activities directly to overseeing and evaluating State programs. Today, 24 of the 27 key coal-producing States have primacy. In return for assuming primacy, States are entitled to regulatory grants and to grants for reclaiming abandoned mine lands. In addition, under cooperative agreements, some primacy States have agreed to regulate mining on Federal lands within their borders. Thus, OSM regulates mining directly only in nonprimacy States, on Federal lands in States where no cooperative agreements are in effect, and on American Indian lands.

SMCRA charges OSM with the responsibility of publishing rules as necessary to carry out the purposes of the Act. The most fundamental mechanism for ensuring that the purposes of SMCRA are achieved is the basic policy and guidance established through OSM's permanent regulatory program and related rulemakings. Its regulatory framework is developed, reviewed, and applied according to policy directives and legal requirements.

Litigation by the coal industry and environmental groups is responsible for some of the rules now being considered by OSM. Others are the result of efforts by OSM to address areas of concern that have arisen during the course of implementing OSM's regulatory program, and one is the result of legislation.

OSM has sought to develop an economical, safe, and environmentally sound program for the surface mining of coal by providing a stable and consistent regulatory framework.

At the same time, however, OSM has recognized the need (a) to respond to local conditions, (b) to provide flexibility to react to technological change, (c) to be sensitive to geographic diversity, and (d) to eliminate burdensome recordkeeping and reporting requirements that over time have proved unnecessary to ensure an effective regulatory program.

Major regulatory objectives regarding the mining of surface coal include:

- Continuing outreach activities with interested groups during the rulemaking process to increase the quality of the rulemaking process, improve the substance of the rules, and, to the greatest extent possible, reflect consensus on regulatory issues;
- Minimizing the recordkeeping and regulatory compliance burden during rulemaking; and
- Publishing final rules to implement the Energy Policy Act of 1992, Public Law 102-486.

U.S. Fish and Wildlife Service

The U.S. Fish and Wildlife Service has three basic mission objectives:

- To assist in the development and application of an environmental stewardship ethic based on ecological principles and scientific knowledge of fish and wildlife;
- To guide the conservation, development, and management of the Nation's fish and wildlife resources; and
- To administer a national program to provide the public with opportunities to understand, appreciate, and wisely use fish and wildlife resources.

These objectives are met through the following regulatory programs:

- Management of Service lands, primarily national wildlife refuges;
- Management of migratory bird resources;
- Conservation of certain marine mammals and endangered species;
- Allowance of certain activities that would otherwise be prohibited by law; and
- Administration of grant and assistance programs.

The Service maintains a comprehensive set of regulations in the first category—those that govern public access, use, and recreation on more than 500 national wildlife refuges and in national fish hatcheries. Such uses are authorized only if they are compatible with the purpose for which each area was established, are consistent with State and local laws where practicable, and afford the public economic and recreational opportunity as appropriate. These regulations are developed and continually reviewed for improvements, with a substantial amount of public input, and are typically of limited geographical interest.

Management of migratory bird resources is covered by the second category of regulations, required by various international treaties. Annually, the Department issues a regulation on migratory bird hunting seasons and bag limits, developed in partnership with the States, American Indian tribal governments, and the Canadian Wildlife Service. Although issued annually, regulations such as these have been in existence for more than 50 years and have not significantly changed over that period of time. The regulations are necessary to permit migratory bird hunting that would otherwise be prohibited. Although recent declines in waterfowl populations have reduced the numbers of such birds that may be harvested, the regulations generally do not change significantly from one year to another.

The third category includes regulations to fulfill the statutory obligation to identify and conserve species faced with extinction. The basis for determining endangered species is limited by law to biological considerations, although priorities for allocating Service resources are established consistent with the President's policies (by directing the Service's efforts to species most threatened and those whose protection is of the most benefit to the natural resource). Included in this program are regulations to enhance the conservation of listed species and of marine mammals for which DOI has management responsibility. This program also contains regulations that provide guidance to other Federal agencies to assist them in complying with section 7 of the Endangered Species Act, which requires them not to conduct activities that would jeopardize the existence of endangered species or adversely modify critical habitat of listed species. In designating critical habitat, the Service considers biological information and economic and other impacts of the designation. Areas may be excluded from the designation where the benefits of exclusion outweigh the benefits of inclusion, provided that the exclusion will not result in the extinction of the species.

The fourth category—the Service's regulatory program that permits activities otherwise prohibited by law—entails regulating possession, sale or trade, scientific research, and educational activities involving fish and wildlife and their parts or products. Generally, these regulations are supplemental to State protective regulations and cover activities that involve interstate or foreign commerce, which must comply with various laws and international obligations. The Service is continually working with foreign and State governments, the industry and individuals affected, and other interested parties to minimize the burdens associated with Service-related activities. The easing of such burdens through regulatory actions continues to balance the benefits that may be made available with the necessity to ensure adequate protection to the natural resource. Most of the regulatory activities are permissive in nature, and the concerns of the public generally center on technical issues.

The last category—the Service's assistance programs—includes a limited number of regulations necessary to ensure that assistance recipients comply with applicable laws and Office of Management and Budget (OMB) Circulars. Regulations in this program help the affected parties to obtain assistance and to comply with requirements imposed by Congress and OMB.

National Park Sevice

The National Park Service is dedicated to conserving the natural and cultural resources and values of the National Park System for the enjoyment, education, and inspiration of this and future generations. The Service is also responsible for managing a great variety of national and international programs designed to help extend the benefits of natural and cultural resource conservation and outdoor recreation throughout this country and the world.

There are more than 375 units in the National Park System, including national parks and monuments; scenic parkways, preserves, trails, riverways, seashores, lakeshores, and recreation areas; and historic sites associated with important movements, events, and personalities of the American past.

The National Park Service develops and implements park management plans and staffs the areas under its administration. It relates the natural values and historical significance of these areas to the public through talks, tours, films, exhibits, and other interpretive media. It operates campgrounds and other visitor facilities and provides, usually through concessions, lodging, food, and transportation services in many areas.

The National Park Service also administers the following programs: The State portion of the Land and Water Conservation Fund, Nationwide Outdoor Recreation coordination and information and State comprehensive outdoor recreation planning, planning and technical assistance for the National Wild and Scenic Rivers System, and the National Trails System, natural area programs, the National Register of Historic Places, national historic landmarks, historic preservation, technical preservation services, Historic American Buildings survey, Historic American Engineering Record, and interagency archeological services.

The National Park Service maintains a set of regulations that help manage public use, access, and recreation in units of the National Park System. The Service provides visitor and resource protection to ensure public safety and prevent derogation of resources. The regulatory program develops and reviews regulations, maintaining consistency with State and local laws, to allow such uses only if they are compatible with the purpose for which each area was established.

Bureau of Reclamation

The Bureau of Reclamation's mission is to manage, develop, and protect water and related resources in an environmentally and economically sound manner in the interest of the American public. To accomplish this mission, Reclamation applies management, engineering, and scientific skills that result in effective and environmentally sensitive solutions.

Reclamation projects provide for some or all of the following concurrent purposes: Irrigation water service, municipal and industrial water supply, hydroelectric power generation, water quality improvement, groundwater management, fish and wildlife enhancement, outdoor recreation, flood control, navigation, river regulation and control, system optimization, and related uses.

The Bureau's regulatory program is designed to ensure that its mission is carried out expeditiously and efficiently.

DOI—Bureau of Indian Affairs (BIA)

FINAL RULE STAGE

45. TRIBAL SELF-GOVERNANCE

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

PL 103-413

CFR Citation:

25 CFR 1000

Legal Deadline:

None

Abstract:

This rule will clarify how the Department and tribes will carry out their respective responsibilities under the Tribal Self-Governance Act of 1994. At the request of a majority of Indian tribes with self-governance agreements, the Secretary has established a negotiated rulemaking committee to negotiate and promulgate such regulations as are necessary to carry out the Act.

Statement of Need:

The Department of the Interior (DOI) needs to clarify how it and the tribes will carry out their respective responsibilities under the Tribal Self-Governance Act of 1994. Provisions are needed to clarify or establish:

- Procedures for conducting negotiations, defining stable base budgets, time lines for the transfer of funds for tribes, and the amount of residual funds to be retained;
- The processes for accepting new tribes into the self-governance program planning and negotiation process, for awarding planning and negotiation grants, for approving waiver requests, and for determining and negotiating tribal shares of BIA and eligible non-BIA programs;
- Mechanisms for reviewing tribal trust functions;
- Retrocession procedures;
- Procedures for ensuring that proper health and safety standards exist in construction projects and are included in annual funding agreements;
- Reporting requirements of tribes and DOI; and
- A mechanism for negotiating the inclusion of specific provisions of Federal procurement regulations into annual funding agreements.

DOI expects that the rulemaking process will identify other components of the program that require clarification.

Summary of the Legal Basis:

The Tribal Self-Governance Act of 1994 requires DOI, upon request of a majority of self-governance tribes, to negotiate and promulgate regulations to carry out the tribal self-governance program. The Act calls for a negotiated rulemaking committee under 5 USC

565, composed of Federal and tribal representatives, with a majority of the tribal representatives from self-governance tribes. The Act also authorizes DOI to adapt negotiated rulemaking procedures to the unique context of self-governance and the government-to-government relationship between the United States and the Indian tribes. On November 1, 1994, a majority of self-governance tribes wrote the Secretary requesting the immediate initiation of negotiated rulemaking.

Alternatives:

There is a range of alternatives for each of the program components, from maintaining discretion and flexibility at the local level to standardizing requirements and procedures on the national level.

Anticipated Costs and Benefits:

The rule is expected to promote greater efficiency of Federal and tribal government operations. It is also expected to reduce opportunity costs resulting from untimely Federal actions. The rule will improve the ability of Federal and tribal governments to plan their self-governance activities. This should lead to greater stability of operations. Clarifying procedures for conducting operations will improve the ability of governments to plan for the time and cost of conducting negotiations. Clarifying time lines for transfer of base funding and other funds to tribes will improve planning and reduce the opportunity costs resulting from the untimely transfer of funds under the self-governance program. Budget and operation planning will be improved by specifying the process for accepting additional tribes into the self-governance program planning and negotiating process as well as the process for awarding planning and negotiation grants. Since retrocession procedures will be specified, governments will be better able to plan for retrocessions. Standardization of tribal shares will allow the self-governance program to comply with statutory requirements not to limit or reduce the services, contracts, or funds that any other Indian tribe or tribal organization is eligible to receive.

Risks:

By removing uncertainty and promoting a more stable framework for the program, the rule will greatly lower the risk of not achieving the stated goals of tribal self-governance. It will change the role of Federal agencies that serve tribes by shifting their responsibilities from day-to-day management of tribal affairs to those concerned with protecting and advocating tribal interests.

FINAL RULE STAGE

---

46. VALUATION OF OIL FROM FEDERAL MINERAL LEASES

Priority:

Other Significant

Legal Authority:

30 USC 181 et seq; 30 USC 351 et seq; 30 USC 1701 et seq; 30 USC 1001 et seq; 43 USC 1301 et seq; 43 USC 1331 et seq; 43 USC 1801 et seq

CFR Citation:

30 CFR 206

Legal Deadline:

None

Abstract:

This rule would modify the valuation procedures for both arm's-length and non-arm's-length crude oil transactions, establish a new MMS form for collecting value differential data, and amend the valuation procedures for the sale of Federal royalty oil. These changes would decrease reliance on oil posted prices and assign a value to crude oil that better reflects market value.

Statement of Need:

Current oil valuation regulations rely primarily on posted prices and prices under arm's-length sales. Recently, posted prices have become increasingly suspect as a fair measure of market value. This rulemaking would modify valuation regulations to eliminate any direct reliance on posted prices.

Summary of the Legal Basis:

The primary legal basis for this rulemaking is the Federal Oil and Gas Royalty Management Act of 1982, as amended, which defines the Secretary of the Interior's authority to implement and maintain a royalty management system for Federal oil and gas leases.

Alternatives:

MMS considered a range of valuation alternatives such as making minor adjustments to the current gross proceeds valuation method using futures prices adjusted for location and quality, using spot prices tabulated by various publications, using the P-plus market, and taking oil in-kind. MMS chose to rely primarily on arm's-length sales prices and spot market prices as market value indicators. To account for regional and geographic differences this rule establishes different valuation procedures for each of three regions: California and Alaska, the Rocky Mountain region and the rest of the country.

Anticipated Costs and Benefits:

MMS estimates compliance with this rulemaking would cost the oil and gas industry approximately $160,000 in the first year. Annual burden will decline as industry becomes more familiar with the reporting requirements. The benefits of this rulemaking would be an estimated $66 million increase in annual royalties collected on oil produced from Federal leases. Additional benefits would include simplification and increased certainty of oil pricing, reduced audit efforts, and reduced valuation determinations. These changes should also reduce litigation.

Risks:

The risk of not modifying current oil valuation regulations is that royalty recipients such as State and local governments and the U.S. Treasury would not receive royalties based on the true market value of oil produced from Federal leases.

47. VALUATION OF OIL FROM INDIAN LEASES

Priority:

Other Significant. Major under 5 USC 801.

Legal Authority:

25 USC 396 et seq; 25 USC 2101 et seq; 30 USC 181 et seq; 30 USC 351 et seq; 30 USC 1001 et seq; 30 USC 1701 et seq

CFR Citation:

30 CFR 206

Legal Deadline:

None

Abstract:

This rule would modify the regulations that establish royalty value for oil produced from Indian leases and create a new form for collecting value and value differential data. These changes would decrease reliance on oil posted prices and make Indian oil royalty valuation more consistent with the terms of Indian leases.

Statement of Need:

Current oil valuation regulations rely primarily on posted prices and prices under arm's-length sales. Recently, posted prices have become increasingly suspect as a fair measure of market value. This rulemaking would modify valuation regulations to place substantial reliance on the highest of crude oil futures prices, major portion prices, or gross proceeds. It would eliminate any direct reliance on posted prices. This rulemaking would also add more certainty to valuation of oil produced from Indian leases.

Summary of the Legal Basis:

The primary legal basis for this rulemaking is the Federal Oil and Gas Royalty Management Act of 1982, as amended, which defines the Secretary of the Interior's (1) authority to implement and maintain a royalty management system for oil and gas leases on Indian lands, and (2) trust responsibility to administer Indian oil and gas resources.

Alternatives:

MMS considered a range of valuation alternatives. Among these were: (1) Making minor adjustments to the current gross proceeds valuation method using spot prices; (2) using index-based prices with fixed adjustments for production from specific geographic zones; (3) relying on some type of field pricing other than posted prices; and (4) taking oil in-kind.

Anticipated Costs and Benefits:

MMS estimates compliance with this rulemaking would cost the oil and gas industry approximately $46,000 annually. Additional costs to industry and MMS would be up-front computer programming and other administrative costs associated with processing the new form. The benefits of this rulemaking would be an estimated $3.6 million increase in annual royalties collected on oil produced from Indian leases. Additional benefits would include simplification and increased certainty of oil pricing, reduced audit efforts, and reduced valuation determinations and associated litigation.

Risks:

The risk of not modifying current oil valuation regulations is that Indian recipients may not receive royalties based on the highest paid price or offered for the major portion of oil produced--a common requirement in most Indian leases. These modifications ensure that the Department fulfills its trust responsibilities for administering Indian oil and gas leases under governing mineral leasing laws, treaties, and lease terms.

PROPOSED RULE STAGE

---

48. OIL AND GAS LEASING AND OPERATIONS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will

revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

30 USC 181 et seq

CFR Citation:

43 CFR 3100 to 3160

Legal Deadline:

None

Abstract:

This rule will revise BLM's current Federal oil and gas leasing and operations regulations, except those concerning drainage (section 3100.2-2), combined hydrocarbon leasing (part 3140), and oil and gas leasing in the National Petroleum Reserve--Alaska (part 3130), to: (1) use performance standards in certain places instead of prescriptive requirements, to allow more flexibility for operators and protect the environment and Federal royalty interests; (2) cite industry standards and incorporate them by reference rather than repeating those standards in the rule itself; (3) incorporate the requirements of the Onshore Oil and Gas Orders and national notices to lessees into the regulations to eliminate their overlap with the current regulations; (4) revise and replace BLM's current unitization regulations with a more flexible unit agreement process; and (5) eliminate redundancies, clarify procedures and regulatory requirements and streamline procedures.

Statement of Need:

This rulemaking complies with the requirements of the Government Performance and Results Act, the recommendations of the National Performance Review, and other initiatives. It will be presented in a user-friendly format, presented by process rather than than by subject matter.

Summary of the Legal Basis:

The Mineral Leasing Act gives BLM the authority to issue and administer the terms of oil and gas leases on Federal lands, to conduct inspections of drilling operations and to promulgate and enforce regulations pertaining to oil and gas leasing and operations. BLM is the only Federal agency with authority to issue leases for publicly owned oil and gas resources.

Alternatives:

The only alternative to the proposed regulations would be to continue to operate under the existing regulations. These regulations are not performance-based and are at times ambiguous and hard to understand. Further, the important information found in Onshore Operating Orders is published separately from the regulations and at irregular intervals. The proposed rule is preferable.

Anticipated Costs and Benefits:

BLM anticipates the following benefits: (1) more clearly written rules will be better understood by both oil and gas lessees and operators and members of the general public; (2) performance standards, rather than prescriptive requirements, will allow lessees and operators and BLM greater flexibility to deal with unique geological or engineering circumstances within the standards set by the rule; and (3) streamlining and clarifying procedures will result in better customer service and decreased time and money for both BLM and the user public.

Risks:

The public may misunderstand one or more performance standards. BLM will publish user guides that explain in detail the standards and will provide examples of how operators might meet specific standards.

RIN: 1004–AC94

DOI—BLM

49. SURFACE MANAGEMENT (LOCATABLE MINERALS)

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

18 USC 1001; 30 USC 22; 30 USC 42; 30 USC 612; 43 USC 1061 et seq; 18 USC 3571 et seq

CFR Citation:

43 CFR 3809

Legal Deadline:

None

Abstract:

The proposed rule would: (1) redefine "unnecessary and undue degradation" to require the use of the "best available technology and practices" or other technology-based standards during the mining of locatable minerals and during the reclamation of mined lands, (2) incorporate performance standards for locatable mineral exploration and development, and (3) treat mining operations involving disturbance to 5 acres or less in a more stringent fashion.

Statement of Need:

Current locatable mineral mining regulations provide insufficient environmental protection and insufficient enforcement authority for BLM to regulate mining activities which disturb 5 acres or less of public lands. The proposed regulations would strengthen environmental protection and would increase BLM's oversight of mining operations on 5 acres or less of public lands.

Summary of the Legal Basis:

Section 302(b) of the Federal Land Policy and Management Act gives the Secretary of the Interior or his or her delegated representative the authority to regulate the use, occupancy, and development of public lands. Although the Secretary may not impair the rights of mining claimants by regulating these activities, he or she may take any action necessary to prevent the unnecessary and undue degradation of the public lands.

Alternatives:

The proposed rule could consider three alternatives for increasing oversight on mining activities which disturb 5 acres or less of public lands: (1) repeal the current notice provision and treat these small operations like large ones; (2) narrow the scope of the notice exception so that it does not apply in areas of environmental sensitivity; and (3) better protect the environment against abuse by measures such as requiring more information from operators, giving BLM a longer time to review the notices, and imposing greater penalties for not meeting notice requirements.

Anticipated Costs and Benefits:

A cost-benefit analysis has not yet been prepared. On balance the general public is expected to benefit by decreasing the public health and safety costs associated with the clean-up of hazardous and toxic substances generated by the mining of various locatable minerals (acid, draining, etc.). There may or may not be increased costs to operators on mining claims from their exploration, development, and reclamation activities, if the surface management regulations require using the best available technology in exploration, mining, and reclamation activities.

Risks:

Claimants unable to comply with increased mining costs could cease operations and go out of business. Some portion of the mining industry could cease exploration and mining operations in the United States and begin or increase mining operations in other countries whose policies are less stringent.

BILLING CODE 4310-RK-F

DEPARTMENT OF JUSTICE (DOJ)

Statement of Regulatory Priorities

The Department of Justice is not a major regulatory agency, and it carries out its vital investigative, prosecutorial, and other law enforcement activities principally through means other than the regulatory process. Even so, the Department does have significant responsibilities for implementing the Americans with Disabilities Act (ADA), as well as the immigration laws, including the Immigration Reform and Control Act of 1986 and the Immigration Act of 1990. The Department's key regulatory goals and initiatives are set forth in detail below.

The Department has worked actively to implement the general regulatory principles of Executive Order 12866. Relatively few of the Department's rules are significant regulatory actions requiring review by the Office of Management and Budget (OMB) under the Executive order. Accordingly, the orientation of the OMB review process to focus on significant rules has required the Department to increase its own efforts to ensure that all of its regulations are carefully reviewed for consistency with the Administration's regulatory principles, including the large majority of rules that are not reviewed directly by OMB as significant regulatory actions.

Pursuant to section 4(c) of Executive Order 12866, the Department of Justice provides the following statement of regulatory priorities, focusing in particular on four regulatory initiatives in the areas of civil rights and immigration.

In addition to the specific initiatives set forth below, several other components of the Department carry out important responsibilities through the regulatory process. Although their regulatory efforts are not singled out for specific attention in this regulatory plan, those components carry out key roles in implementing the Department's law enforcement priorities. In particular, the Drug Enforcement Administration (DEA) is responsible for controlling abuse of narcotics and dangerous drugs by restricting the aggregate supply of those drugs. DEA accomplishes its objectives through coordination with State, local, and other Federal officials in drug enforcement activities, development and maintenance of drug intelligence systems, regulation of legitimate controlled substances, and enforcement coordination and intelligence-gathering activities with foreign government agencies. DEA has various regulatory actions under development relating to the diversion control requirements and to the requirements of the Comprehensive Methamphetamine Control Act of 1996 which regulates certain drug products that are being diverted for the production of methamphetamine.

Also, on March 20, 1997, the Federal Bureau of Investigation promulgated final cost recovery regulations under the Communications Assistance to Law Enforcement Act of 1994 (CALEA). Congress enacted CALEA to address the recent and continuing advances in telecommunications technology, which have impaired and, in some instances, precluded law enforcement agencies from fully conducting various types of court-authorized electronic surveillance. The Attorney General is authorized to reimburse carriers for all of the reasonable costs directly associated with the modifications they perform on equipment, facilities, and services deployed on or before January 1, 1995. These regulations provide the cost accounting standards for reimbursements.

In response to public comments during the cost recovery rulemaking, the FBI has published on April 20, 1998, a proposed rule defining the terms "significant upgrade" and "major modification." The FBI is considering the comments it has received and anticipates publishing a final rule in the first calendar quarter of 1999. On March 12, 1998, the FBI, on behalf of law enforcement, published a final Notice of Capacity (following two previously published notices on the same subject) informing telecommunications carriers offering local exchange services and certain commercial mobile radio services (specifically cellular service and broadband PCS) of the estimated actual and maximum number of simultaneous interceptions that law enforcement might conduct on or after specified dates. Later this year, the FBI will publish a Notice of Inquiry (NOI) soliciting information and suggestions from interested parties for developing reasonable methodologies for characterizing the capacity requirements for telecommunications services other than those covered by the March 12, 1998, final notice. Comments received on this NOI will assist the FBI in developing future Notice(s) of Capacity requirements for these other services, as the FBI is obligated to do by CALEA.

Civil Rights

The Department and its Civil Rights Division are deeply committed to a rigorous and revitalized approach to the enforcement of this Nation's civil rights laws. In keeping with that commitment, the Division will be reviewing, updating, and improving its civil rights regulations; implementing the Americans with Disabilities Act of 1990 (ADA); and promulgating regulations implementing the prohibition against sex discrimination in federally assisted education programs and activities that is contained in title IX of the Education Amendments of 1972. The Department's regulatory plan has two civil rights initiatives.

The Department is planning to make revisions in its regulations implementing titles II and III of the ADA to amend the ADA Standards for Accessible Design to be consistent with the revised accessibility guidelines for State and local facilities and children's facilities that have been developed by the Architectural and Transportation Barriers Compliance Board (Access Board) and to make conforming changes in the Department's rules. Title II of the ADA prohibits discrimination on the basis of disability by public entities and title III prohibits such discrimination by places of public accommodation and requires accessible design and construction of places of public accommodation and commercial facilities. The Access Board's new accessibility guidelines for State and local facilities and children's facilities are the subject of related, pending rulemakings that are expected to be completed during fiscal year 1999. These rulemakings have been the subject of considerable scrutiny through the Board's regulatory process. The Department of Justice, which is required by statute to promulgate standards that are consistent with the guidelines developed by the Access Board, has proposed to incorporate them in the Department's regulations.

These amendments to the ADA regulations are an important step forward in fulfilling the promise of the ADA in ushering in a new era of opportunity and dignity for the many millions of Americans with disabilities. These regulations will open doors that have shut out people with disabilities in the past.

In addition, the Department will be promulgating regulations implementing the prohibition against sex discrimination in federally assisted education programs and activities that is contained in title IX of the Education Amendments of 1972. The Department will be issuing this regulation as part of a joint rulemaking by several Federal agencies in the coming year.

The Department's promulgation of a regulation implementing title IX will provide guidance to its recipients who administer education programs or activities. Since all departments and agencies should interpret title IX consistently, it is important that they all be governed by similar regulatory standards. The Department's regulation will closely follow that of the Department of Education, which funds most educational institutions covered by title IX. A regulation is essential for adequate enforcement of title IX because a regulation contains administrative requirements (such as promulgation of grievance procedures, designation of a coordinator, and processing of complaints), as well as essential statutory interpretations.

Immigration

The Immigration and Naturalization Service (INS) is responsible for facilitating the entry of persons legally admissible as visitors or as immigrants to the United States, for preventing unlawful entry or receipt of immigration benefits by those who are not entitled to receive them, and for apprehending or removing those aliens who enter or remain illegally in the United States. Though many of the Administration's goals for more effective immigration process flow from either new statutory authority or increased resources, the regulatory process is a vital aspect of carrying out the goals of the immigration laws.

Certainly, one of the regulatory challenges facing the Department of Justice is to improve the effectiveness of those regulatory efforts. Commissioner Meissner established three fundamental goals at the time of her confirmation: To increase the professionalism of the Service, to provide immigration control with compassion, and to build the Service's role in immigration policy leadership and communication. The regulatory priorities for the Service follow those priorities, though other desired improvements may require legislative action. Two INS initiatives are included in this regulatory plan.

First, the Service will publish a proposed rule to implement the new grounds of inadmissibility and their waivers, especially those established under the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA). This regulation will clarify the interplay between the new grounds of inadmissibility and existing law and will set forth changes in procedures and policies. Second is the Service's ongoing effort to facilitate the U.S. business community's ability to comply with the employer sanctions provisions of the Immigration Control and Reform Act.

The Service anticipates additional progress in its efforts to simplify the employers' compliance with employment verification (Form I-9) requirements of the Act. The Service published a proposed rule on February 2, 1998. This proposal reflected numerous changes stemming from IIRIRA and from a comprehensive review of the 10-year-old verification regulations, as required by the Regulatory Flexibility Act. The result was a comprehensive overhaul of the regulations. The Service adopted a "plain language" approach and simplified the structure of the regulation. Both steps were well received by the public. In addition, the list of documents acceptable for employment verification was shortened, and several other requirements were clarified. The Service received thoughtful comments from the public on the proposal. Those are now being reviewed, and the Service anticipates publishing a final rule during the coming fiscal year.

DOJ—Civil Rights Division (CRT)

PROPOSED RULE STAGE

---

50. NONDISCRIMINATION ON THE BASIS OF SEX IN FEDERALLY ASSISTED PROGRAMS AND ACTIVITIES—IMPLEMENTATION OF TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

Priority:

Other Significant

Legal Authority:

20 USC 1682 et seq

CFR Citation:

28 CFR 54 (New)

Legal Deadline:

None

Abstract:

On June 17, 1980, the Department published a proposed regulation to implement the requirements of title IX of the Education Amendments of 1972, as amended, which prohibits discrimination on the basis of an individual's sex in federally assisted educational programs. That regulation was never issued in final form. As a result of subsequent statutory amendments, it is necessary to revise the prior proposed title IX regulation and begin a new rulemaking process. The Department's regulation will be published as a common rule with other agencies that need title IX regulations.

Statement of Need:

Title IX directs each department and agency that provides Federal financial assistance to effectuate its provisions by issuing rules, regulations, or orders of general applicability, 20 U.S.C. 1682. The Department must issue a title IX regulation because it funds many educational programs. Since all departments and agencies should interpret title IX consistently, it is important that they all be governed by similar regulatory standards. The Department's regulation will closely follow that of the Department of Education, which funds most educational institutions covered by title IX. A regulation is essential for adequate enforcement of title IX because a regulation contains administrative requirements (such as promulgation of grievance procedures, designation of a coordinator, and processing of complaints) as well as essential statutory interpretations.

Summary of the Legal Basis:

Title IX specifically authorized the promulgation of regulations to effectuate the statute, 20 U.S.C. 1682.

Alternatives:

Because title IX requires an agency (such as the Department of Justice) that funds educational programs to issue an implementing regulation, issuance of a title IX regulation is mandatory. With respect to the contents of a title IX regulation, the Department will consider all comments received during the public comment period before issuing a final regulation.

Anticipated Costs and Benefits:

In order to carry out this Administration's commitment to equal educational opportunity for women, it is essential that the Department of Justice issue its own regulation implementing title IX. Currently, the Department has no regulation in place to provide guidance to recipients on compliance or identify formal procedures for addressing complaints of sex discrimination in funded programs. In providing Federal financial

assistance to educational programs, the Department and its recipients have been subject to the requirements of title IX since it was enacted in 1972. Therefore, promulgating this regulation should not impose any new costs upon recipients of Federal financial assistance.

Risks:

Without a regulation, individuals who are granted protection from discrimination on the basis of sex will not have their rights protected in the Department's programs to the same extent as if they participated in programs funded by agencies with title IX regulations.

FINAL RULE STAGE

---

51. NONDISCRIMINATION ON THE BASIS OF DISABILITY IN STATE AND LOCAL GOVERNMENT SERVICES; PUBLIC ACCOMMODATIONS AND COMMERCIAL FACILITIES; ACCESSIBILITY STANDARDS

Priority:

Other Significant

Legal Authority:

42 USC 12134; 42 USC 12186; 5 USC 301; 28 USC 509; 28 USC 510; PL 101-336

CFR Citation:

28 CFR 35; 28 CFR 36; 28 CFR 38

Legal Deadline:

None

Abstract:

On July 26, 1991, the Department published its final rules implementing titles II and III of the Americans with Disabilities Act (ADA), which prohibits discrimination on the basis of disability by public entities (title II) and in places of public accommodation and commercial facilities (title III). Those regulations included accessibility guidelines required for facilities covered by title III -- the ADA Standards for Accessible Design (ADA Standards) -- but did not specifically include guidelines for facilities covered by title II, such as courthouses or prisons. Title II entities now have the option of using the ADA Standards (without certain exceptions applicable only to title III facilities) or another existing standard, the Uniform Federal Accessibility Standards.

The final rule will amend titles II and III to adopt a revised version of the ADA Standards, which incorporates new guidelines for facilities typically covered by title II. The new guidelines were issued as the interim final ADA Accessibility Guidelines (ADAAG) by the Architectural and Transportation Barriers Compliance Board (Access Board) and were published on the same day as the Department's proposed rule.

Statement of Need:

Section 504 of the ADA requires the Access Board to issue supplemental minimum guidelines and requirements for accessible design of buildings and facilities subject to the ADA, including titles II and III. Sections 204(c) and 306(c) of the ADA provide that the Attorney General shall promulgate regulations implementing titles II and III that are consistent with the Access Board's ADA guidelines. Because the Department of Justice is required by statute to promulgate regulations that do not go below the Access Board's minimum guidelines, and because this rule will adopt standards that are consistent with the guidelines issued by the Access Board, as also required by statute, this rule is required by statute.

Summary of the Legal Basis:

The summary of the legal basis of authority for this regulation is set forth above in the Legal Authority and in the Statement of Need.

Alternatives:

The Department is required by the ADA to issue this regulation as described in the Statement of Need above. All comments (including those that suggest alternatives to the current proposed guidelines) received by the Department on the proposed rule and by the Access Board on its current interim rule and its guidelines published December 21, 1992, have been thoroughly analyzed and considered by the Department.

Anticipated Costs and Benefits:

The Clinton Administration is deeply committed to ensuring that the goals of the ADA are met. Promulgating this amendment to the Department's ADA regulations will ensure that entities subject to the ADA will have one comprehensive regulation to follow. Currently, entities subject to title II of the ADA (State and local governments) have a choice between following the Department's ADA standards for title III, which were adopted for places of public accommodation and commercial facilities and which do not contain standards for common State and local government buildings (such as courthouses and prisons), or the Uniform Federal Accessibility Standards (UFAS). By developing one comprehensive standard, the Department will eliminate the confusion that arises when governments try to mesh two different standards. As a result, the overarching goal of improving access to the built environment to persons with disabilities will be better served.

The Access Board has analyzed the impact of applying its proposed amendments to ADAAG to entities covered by titles II and III of the ADA and has determined that they are a significant regulatory action for purposes of Executive Order 12866. The Access Board has prepared a Regulatory Assessment, which includes a cost impact analysis for certain accessibility elements and a discussion of the regulatory alternatives considered.

The Access Board's proposed rule contained provisions that would have had a significant economic impact on a substantial number of small entities. Therefore, the Board included a regulatory flexibility analysis in its regulatory assessment. Because of significant changes that were made to the final rule pursuant to public comment, the final rule published by the Access Board does not have a significant economic impact on small entities. The Access Board's determination will apply as well to the revised ADA Standards published by the Department. The Department's proposed procedural amendments will not have a significant impact on small entities.

The Access Board has made every effort to lessen the impact of its proposed guidelines on State and local governments, but recognizes that the guidelines will have some federalism impacts. These impacts are discussed in the Access Board's Regulatory Assessment, which also applies to the Department's proposed rule.

Risks:

Without this amendment to the Department's ADA regulations, regulated entities will be subject to confusion and delay as they attempt to sort out the requirements of conflicting design standards. This amendment should eliminate the costs and risks associated with that process.

Legal Deadline:

None

Abstract:

This regulation covers the grounds of inadmissibility applicable to those aliens seeking admission to the United States temporarily or permanently. On September 30, 1996, the President signed the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA) which substantially revised most grounds of inadmissibility under section 212 of the Act and the waivers available to both immigrants and nonimmigrants. The Immigration and Naturalization Service will publish regulations implementing these new grounds of inadmissibility and new/revised waiver provisions. In addition, this rule will incorporate the changes made to the grounds of inadmissibility and waivers provided for in the Immigration Act of 1990 (IMMACT 90), Pub. L. 101-649; the Miscellaneous and Technical Immigration and Naturalization Amendments of 1991 (MTINA), Pub. L. 102-232; the National Institutes of Health Revitalization Act of 1993, Pub. L. 103-43; the Immigration and Nationality Technical Corrections Act of 1991 (INTCA), Pub. L. 103-416; and the Anti-Terrorism and Effective Death Penalty Act of 1996 (AEDPA), Pub. L. 104-132.

Statement of Need:

This regulation is necessary to implement the IIRIRA and IMMACT 90, Pub. L. 101-649; the MTINA, Pub. L. 102-232; the National Institutes of Health Revitalization Act of 1996, Pub. L. 103-43; and the AEDPA, Pub. L. 104-132.

Summary of the Legal Basis:

See Statement of Need.

Alternatives:

None

Anticipated Costs and Benefits:

The INS anticipates a relatively low cost for staff time and resources necessary to conduct training and disseminate new guidelines to the field on implementation of the revised grounds of inadmissibility and waivers available to both immigrants and nonimmigrants. With respect to certain waivers for the new vaccination requirements that fall under the health-related grounds of inadmissibility, the blanket waiver procedures (that entail a delegation of authority from INS to Department of State consular officers) minimize the administrative burdens not only on the agencies responsible for administering this requirement--Center for Disease Control, Department of State, and INS--but also the administrative burden on the alien applicant for such waiver. This, in turn, reduces the incentive for fraud, that enhances the public health initiative contemplated by the newly enacted vaccination requirements. Moreover, the new application for waiver, Form I-724, that will be implemented concurrently with the promulgation of the regulation will consolidate numerous forms currently used to determine eligibility for such classes of aliens.

Risks:

This regulatory initiative is critical for complete and clear implementation of the new grounds of inadmissibility and their waivers, especially those established under IIRIRA. The regulation will clarify the confusion that presently exists due to the interplay between the new grounds of inadmissibility and existing law. It will also clarify changes in procedures or policies.

FINAL RULE STAGE

53. REDUCTION OF THE NUMBER OF ACCEPTABLE DOCUMENTS AND OTHER CHANGES TO EMPLOYMENT VERIFICATION REQUIREMENTS (SECTION 610 REVIEW)

Priority:

Other Significant. Major under 5 USC 801.

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

8 USC 1324a; PL 104-208

CFR Citation:

8 CFR 274a

Legal Deadline:

Final, Statutory, March 31, 1998.

An interim rule, published Sept. 30, 1997, makes the minimal changes required by statute. The provisions will remain in effect until completion of this rulemaking.

Abstract:

On September 30, 1996, the President signed the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA). Section 412(a) of IIRIRA requires a reduction in the number of documents that may be accepted in the employment verification process. Section 412(d) clarifies the applicability of section 274A to the Federal Government. Section 610 of the Regulatory Flexibility Act requires agencies to review rules that have a significant economic impact on a substantial number of small entities every 10 years. The Service is conducting this review in conjunction with IIRIRA implementation. The proposed rulemaking published 2/12/98 implements sections 212(a) and (d) of IIRIRA and proposes other changes to the employment verification process identified through that review. A revised Form I-9 was included with the proposed rulemaking.

The comment period closed on 4/3/98. The Service is analyzing the comments. It should be noted that this action supersedes the previously published regulatory plan titled "Reduction in the Number of Documents Accepted for Employment Verification." In order to avoid confusion, this regulatory action is being referenced under the current RIN, which captures all prior actions related to employment verification.

Statement of Need:

The Immigration Reform and Control Act of 1986 amended the Immigration and Nationality Act (INA) to require employers to hire only persons who are eligible to work in the United States and to verify the work eligibility of all new hires. Form I-9 was designated for that purpose. Newly hired individuals must attest to the status that makes them eligible to work and present documents that establish their identity and eligibility to work. In its third review of employer sanctions regulations, the GAO reported that employer confusion over the "multiplicity" of acceptable documents contributed to discrimination against authorized workers. See GAO/GGD Report No. 90-62, dated March 29, 1990. Section 412(a) of IIRIRA requires a reduction in the number of documents that may be accepted in the employment verification process. Implementation of these provisions along with other simplifications and clarifications will reduce potential employment discrimination based upon misapplication of the verification requirements.

Summary of the Legal Basis:

The legal basis of authority for this regulation is set forth above in Legal Authority. Parts of this regulatory action are required by IIRIRA.

Alternatives:

The lists of documents for employment verification have been controversial throughout the 10 years that employer sanctions have been in effect. When the INS first published implementing regulations in 1987, the supplementary information noted that the list of identity documents had been expanded in response to public comment. When the law was new, a consensus emerged that an inclusive list of documents would ensure that all persons who are eligible to work could easily meet the requirements. As early as 1990, there was evidence that some employers found the list confusing. As noted in the "Statement of Need," GAO linked employer confusion over the "multiplicity" of acceptable documents to discrimination against authorized workers. The INS has taken steps to address this criticism. In July 1988, INS committed to the establishment of a uniform employment authorization policy. First the INS limited the number and types of "paper" documents on which employment could be authorized. Second, a standardized Employment Authorization Document (EAD) I-688B was introduced in 1989. In February 1997, a more secure EAD Form (I-766) was produced with state of the art technology.

Anticipated Costs and Benefits:

Employment is often the magnet that attracts individuals to come to or stay in the United States illegally. The employer sanctions provisions help reduce the strength of this magnet by requiring employers to hire only those individuals who may legally work in the United States. This rule, by reducing the number of documents that are acceptable for employment eligibility verification purposes and clarifying other requirements, will reduce confusion on the part of employers. This in turn, will increase employer compliance, preserving jobs for persons who are eligible to work in the United States.

Risks:

An employment eligibility verification system that relies on a wide range of documents may result in employment discrimination based upon misapplication of the employment eligibility verification requirements. In addition, a complicated system may encourage fraud and result in individuals who are authorized to work in the United States being displaced by unauthorized individuals.

DEPARTMENT OF LABOR (DOL)

Statement of Regulatory Priorities

Executive Summary

The Secretary of Labor has set three strategic goals for the Department: First, to enhance opportunities for America's workforce; second, to promote the economic security of workers and their families; and third, to foster quality workplaces that are safe, healthy, and fair. The 180 labor laws and related regulations that the Department of Labor (DOL) administers advance these goals.

Regulations that implement newly enacted legislation help DOL and its stakeholders work together to achieve that statute's goal by providing clear, effective, flexible plans of action for the regulated community. Rules that revise existing regulations also facilitate the achievement of DOL's goals by updating old or ineffective standards or by making them easier to understand and use. DOL has always recognized that changes in the workplace, such as new business practices, improved or safer technologies, or new hazards, may render existing rules ineffective or demand the creation of new ones.

In keeping with the President's plain language memorandum of June 1, 1998, the Department remains committed to issuing regulations that are easy to understand, effective, and that minimize burdens on the regulated community. Regulations that are easy to understand help promote voluntary compliance and improve customer satisfaction. Most of the regulated community would comply with workplace regulations if given the information and knowledge they need. When writing or revising rules, DOL will explore new approaches to achieve our regulatory goals at lower costs and with greater flexibility for the regulated community. DOL will also ensure that those who are protected by the new rules or must abide by them have been given the opportunity to participate in the rulemaking process and that they have been provided timely, user-friendly compliance assistance materials.

DOL's 1998 regulatory plan highlights the Department's 29 most important, significant regulations from five of our major regulatory agencies: Employment Standards Administration (ESA), Mine Safety and Health Administration (MSHA), Occupational Safety and Health Administration (OSHA), Pension and Welfare Benefits Administration (PWBA), and Employment and Training Administration (ETA). The entries in the regulatory plan were carefully selected as the most important; that is, they are essential to the fulfillment of the Department's three strategic goals.

The Secretary of Labor's Strategic Goals

A Prepared Workforce: This first goal is to assure that American workers have the opportunity to obtain the information and tools they will need throughout their careers to enhance their productivity and raise their standard of living. The new economy requires workers to continue their education beyond a high school diploma or even a college degree—education must mean lifelong learning and continuous development of new skills.

A Secure Workforce: The rapidly changing global economy imposes economic security concerns on both employers and employees. The life cycles of many products are shorter and shorter, requiring quick adjustments by both industry and labor. Competitive forces can lead to plant closures and layoffs, plant and employee relocations, and in some cases, to an attempt to avoid legal obligations. The Department will continue to do all it can to increase compliance with worker protection laws, protect workers' benefits, and provide workers with retraining.

Quality Workplaces: The intensely competitive global economy offers unparalleled opportunities for both business and labor, but also can pressure some unscrupulous employers to shrink from their responsibilities to their employees. Smart employers recognize that they must utilize all of the talent that is available to them and that a quality workplace is a productive workplace. The Department works with employers to prevent workplace discrimination and to help them recognize the benefits of ensuring equal opportunity for all workers. DOL also is committed to doing all it can to guarantee safety and health in the workplace and to obtain compliance with other important labor standards such as the minimum wage, overtime, and family and medical leave requirements. The Department is particularly committed to reducing the exploitation of child labor. The Department's ultimate goal is full compliance with employment laws which will ensure workers a safe, healthy, and fair workplace.

The Department's Regulatory Priorities

The Employment Standards Administration's (ESA's) Wage and Hour Division enforces several statutes establishing minimum labor standards that protect the Nation's work force, including the Fair Labor Standards Act (FLSA), the Migrant and Seasonal Agricultural Worker Protection Act, the Family and Medical Leave Act, the Service Contract Act, the Davis-Bacon Act, the Employee Polygraph Protection Act, and certain provisions of the Immigration and Nationality Act. These labor standards include requirements for payment of minimum wages and overtime pay, protections for working youth under child labor standards, job protection for employees who take leave for certain family or medical reasons, and minimum working conditions for agricultural workers. The regulatory activities required to implement these statutory responsibilities represent an important aspect of the Division's work—affecting over 100 million employees in the workforce. When developing regulatory proposals, the Division's focus is to assure fair, safe, and healthful workplaces for the Nation's workers, while at the same time providing clear compliance guidance and minimizing burdens on the regulated community.

Updating the child labor regulations issued under the FLSA will help guarantee a safe, healthy, and fair workplace for the Nation's working youth to balance their education with job-related experiences. Many workers first gain job-related skills through their initial exposure to work as teenagers. Updated child labor regulations that better reflect today's workplace will assist young workers in having safe jobs and enhance their opportunity to gain the skills to find and hold good jobs with the potential to increase their earnings over time. Ensuring safe and reasonable work hours for working youth will also ensure that top priority is given to education while allowing young workers to contribute to the economic security of their family.

Updating and clarifying the criteria that define the minimum wage and overtime exemptions for "executive," "administrative," "professional," and "outside sales" employees under the FLSA and clarifying when "helpers" may be used on federally funded and assisted construction contracts covered by the prevailing wage requirements of the Davis-Bacon and related acts will help guarantee workers a secure and quality workplace. Revising and updating these regulations will help employers meet their obligations voluntarily and enhance employees' understanding of their rights and benefits.

ESA's Office of Federal Contract Compliance Programs (OFCCP) is charged with enforcing the requirements of Executive Order 11246, selected provisions of the Vietnam Era Veterans' Readjustment Assistance Act of 1974 (VEVRAA), and section 503 of the Rehabilitation Act of 1973. Regulations issued under the Executive Order and the two acts cover nondiscrimination and affirmative action obligations for Federal contractors and subcontractors. They help to ensure that workplace policies and practices are fair and provide equal opportunity to all workers. OFCCP's regulatory plan entry, the proposed amendments to regulations implementing Executive Order 11246, some of which became effective in 1997, will streamline and clarify the existing regulatory language and reduce paperwork requirements of covered Federal contractors while ensuring that their obligations under the Executive Order and the two acts are met.

The mission of the Mine Safety and Health Administration (MSHA) is to protect the safety and health of the Nation's miners. The Federal Mine Safety and Health Act of 1977 (Mine Act) places primary responsibility for preventing unsafe and unhealthful working conditions in mines on the operators, with the assistance of the miners. The Mine Act requires MSHA to determine compliance with Federal safety and health standards through inspections and investigations and to work cooperatively with States and the mining industry to improve training programs aimed at preventing accidents and occupationally caused diseases.

MSHA is committed to providing the Nation's miners with a safer and healthier workplace. Despite MSHA's past efforts, miners face safety and health hazards daily at levels unknown in most other occupations. Government intervention alone cannot eliminate occupational deaths, injuries, and illnesses in mining. The commitment of miners, mine operators, and Government is needed. MSHA's 1998 regulatory plan reflects this commitment. It will continue to concentrate on improving existing health standards and addressing emerging health hazards in mining—especially occupational exposure to coal mine dust, noise, and diesel exhaust particulate. These health hazards are pervasive in all types of mines; that is, surface and underground mines and large and small mines.

Several significant regulatory actions exemplify MSHA's commitment to improving workplace health for miners. The first action addresses the need to update the Agency's existing standard for exposure to noise. The noise final rule will improve the level of protection provided by existing standards. Many miners are currently exposed to the maximum noise levels currently permitted by MSHA regulations and, as a result, may be suffering hearing impairments.

To complement the recently finalized diesel-powered equipment standard, MSHA has issued a proposed rule for diesel particulate for underground coal miners to reduce the potential health hazards associated with the exhaust emitted by diesel-powered equipment in the mining environment. MSHA soon plans to issue a proposed rule for diesel particulate for underground metal and nonmetal miners.

While there have been significant reductions in levels of respirable coal mine dust over the years, some miners exposed to respirable coal mine dust at certain mine operations continue to develop coal workers' pneumoconiosis (black lung) and silicosis. In February 1996, the Secretary convened a Federal Advisory Committee (Advisory Committee) to assess the adequacy of MSHA's current coal dust program and standards, as well as other ways to eliminate black lung and silicosis among coal miners. The Advisory Committee submitted its report to the Secretary in November 1996. MSHA is continuing its efforts to implement the Advisory Committee's recommendations, which involve both regulatory and administrative actions. Based on the recommendations of the Advisory Committee and other findings, the Agency is considering rulemaking to lower the exposure limit to coal mine dust, to extend the x-ray medical surveillance program to surface coal miners, and to provide a means to verify operators' dust control plans.

MSHA identified the above actions for the 1998 regulatory plan because occupational lung diseases and hearing loss are the most serious and pervasive occupational illnesses in mining. Together, MSHA believes that these expanded health initiatives will greatly improve health protection for miners, thereby helping achieve the Secretary's goals of a safe and secure workplace.

Several years ago, the Occupational Safety and Health Administration (OSHA) recognized the need to find a better way to carry out its mission—to save the lives and improve the safety and health of America's working men and women. In the regulatory arena, this meant that OSHA had to define a regulatory approach to support its Strategic Plan objectives, establish clear and sensible priorities, emphasize consensus-based approaches to rulemaking, focus on developing a basic safety and health programs rule, and rewrite difficult-to-follow rules in plain language.

The 10 regulations in OSHA's regulatory plan directly support OSHA's mission, as well as the Secretary's goal of assuring America's workers a quality workplace by fostering workplaces that are safe, healthy, and fair. Each regulation is designed to reduce occupational deaths, injuries, and illnesses among America's workers or to enhance compliance through "plain language" revision of detailed, out-dated, and confusing regulations. OSHA's plan entries address the causes of the most dangerous occupational injuries; i.e., those with fatal or disabling consequences, those affecting large numbers of workers, those for which recognized solutions are available, and those identified as top priorities by the Agency's Strategic Plan. In addition, some entries, such as OSHA's revision to its reporting and recordkeeping system, are included because employers, employees, academics, and safety and health professionals have long recognized these efforts as essential to obtaining better data on workplace injuries, fatalities, and illnesses.

Some of OSHA's standards, particularly those adopted wholesale from national consensus standards in 1971, are written in highly detailed, specification-driven language that limits compliance flexibility and makes it difficult for employers and employees to comply. To address these problems, OSHA has launched a series of initiatives aimed at streamlining and rationalizing the Agency's regulations and ensuring that all future OSHA rules will pass plain language and common sense tests. In addition, the Agency is actively soliciting input from stakeholders—business, labor, small employers, professional associations, and affected government entities—as it moves forward on these rulemaking initiatives. The OSHA rules in the 1998 regulatory plan reflect the rulemaking approach that is being followed by the "New OSHA." For example, the Agency is actively working with stakeholders to develop permissible exposure limits (PELs) for a group of air contaminants that both OSHA and the regulated community recognize as hazardous to worker health. The rulemaking requires

the development of new risk assessment methods for linking exposure to these substances to such potentially life-threatening effects as neurological damage, occupational asthma, and heart disease.

One of the most important regulatory initiatives ever undertaken by OSHA—development of a safety and health programs rule—is the centerpiece of the Agency's current regulatory plan. This rule will ensure that employers in the general and maritime industries treat worker protection as a fundamental goal of their business and will help employers identify job-related hazards in the workplace, correct those so identified, and prevent others from occurring. Evidence of the effectiveness of safety and health programs in achieving OSHA's ultimate goal—the prevention of deaths, injuries, and illnesses on the job—is widespread and growing daily, as more and more companies report that their accident rates and their workers' compensation costs have fallen after the implementation of such programs. OSHA has held a series of stakeholder meetings designed to identify ways of meeting the business community's need for a strong but simple rule and of recognizing existing safety and health programs that are demonstrably effective. Included among these was a series of regional meetings with small businesses, and employees at small businesses, to gain input on the rule at the grassroots level. The Department believes that, by actively involving both employers and employees in the implementation of safety and health programs, this rule will help to produce the high-performance workplaces of tomorrow. In summary, OSHA's regulatory strategy is designed to achieve a body of rules that will make sense to ordinary people and protect the safety and health of the U.S. work force.

The Pension and Welfare Benefits Administration (PWBA) administers and enforces the provsions of the Employee Retirement Income Security Act of 1974, as amended (ERISA). ERISA establishes reporting, disclosure, and other standards applicable to an estimated 700,000 private-sector employee pension benefit plans, covering approximately 85 million participants, and an estimated 6 million employee welfare benefit plans, including group health plans covering approximately 185 million participants. PWBA's regulatory priorities for 1998 continue to focus on efforts to simplify and otherwise facilitate compliance with benefit laws, to improve pension and welfare plan coverage, and to protect the benefits of American workers. PWBA's top regulatory priorities involve implementation of the President's directive to adopt regulatory changes for group health plans, consistent with the recommendations of the President's Advisory Commission on Consumer Protection and Quality in the Health Care Industry; to improve the disclosure of health care benefit information; and to strengthen the claims review processes to ensure timely claim determinations and full and fair reviews of denied claims. A continuing high regulatory priority for PWBA is implementation of the Health Insurance Portability and Accountability Act of 1996 and the Newborns' and Mothers' Health Protection Act of 1996, amendments to ERISA.

PWBA's other top regulatory priority is to work with the Department of Health and Human Services to develop regulations under the Child Support Performance and Incentive Act of 1998, establishing a model qualified medical child support order for use by State child support agencies to facilitate the extension of health care coverage to children under their jurisdiction.

Section 5001 of the Balanced Budget Act of 1997 authorized the Department of Labor to provide Welfare-to-Work Grants to State and local communities to create additional job opportunities for the hardest-to-employ recipients of the Temporary Assistance for Needy Families (TANF)—the new system of block grants created by passage of the new welfare reform legislation. The Employment and Training Administration (ETA) has issued interim planning guidance under this legislation. Moving people from welfare to work is not only a primary goal of Federal welfare to work opportunities but also responds to the Secretary's goal of a Prepared Workforce. Guidance and regulations reflect minimal amplification of the law and were written only when further information or clarification was needed to make the program operational. Reporting requirements assure program integrity and provide timely information for tracking performance against established measures. Performance measures will be consistent with long-term goals. Wherever possible, existing regulations and systems will be used.

The Workforce Investment Act of 1998, signed into law by President Clinton on August 7, 1998, makes significant changes to employment and training programs. The Act establishes a single delivery system for adult employment and training and for dislocated worker employment and training that maximizes worker choice in the selection of occupations and training providers. The Employment and Training Administration will issue regulations and other guidance and provide technical assistance designed to permit maximum State and local government flexibility in implementing the Act.

DOL—Employment Standards Administration (ESA)

PROPOSED RULE STAGE

54. GOVERNMENT CONTRACTORS: NONDISCRIMINATION AND AFFIRMATIVE ACTION OBLIGATIONS, EXECUTIVE ORDER 11246 (ESA/OFCCP) (SECTION 610 REVIEW)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

EO 11246, as amended

CFR Citation:

41 CFR 60-1; 41 CFR 60-2

Legal Deadline:

None

Abstract:

These regulations cover nondiscrimination and affirmative action obligations of Federal contractors under Executive Order 11246, as amended. The part 60-1 Final Rule, published 8/19/97, revised parts of the regulations implementing E.O. 11246. OFCCP's review of regulatory options continues with emphasis on streamlining and clarifying the regulatory language and reducing paperwork requirements associated with compliance. OFCCP plans to propose revisions to written affirmative action program (AAP) requirements to reduce burdens on the regulated community and to improve the enforcement of the Executive Order.

Statement of Need:

Parts of the regulations implementing Executive Order 11246 need to be revised to reflect changes in the law that have occurred over time, streamlined, and clarified. Executive Order 11246 requires all Federal contractors and subcontractors and federally assisted construction contractors and subcontractors to apply a policy of nondiscrimination and affirmative action in employment with respect to race, color, religion, sex, and national origin. The regulatory revisions are necessary in order to allow the DOL to effectively and efficiently enforce the provisions of the Executive Order. As a first step in updating its Executive Order regulations, the Department published changes to the provisions that govern preaward review requirements; recordkeeping and record retention requirements; certification requirements; and related provisions. In addition, other revisions have been made that conform Executive Order 11246 regulations to the recent changes made in the Department's regulations implementing Section 503 of the Rehabilitation Act.

A second phase of revision will contain proposals to change provisions that govern requirements for written affirmative action plans and the provisions concerning evaluation of contractor procedures.

Summary of the Legal Basis:

No aspect of this action is required by statute or court order.

Alternatives:

After careful review, it was decided that the most effective way to improve compliance with the Executive Order 11246 provisions and reduce burdens on contractors, was to propose revisions to these regulations. Administrative actions alone could not produce the desired results.

Anticipated Costs and Benefits:

It is anticipated that the net effect of the proposed changes will increase compliance with the nondiscrimination and affirmative action requirements of the Executive Order and reduce compliance costs to Federal contractors. The Department will also be able to utilize its resources more efficiently and more effectively.

Risks:

Failure to move forward with OFCCP's regulatory agenda would cause the continuation of outdated methods of evaluating contractor compliance and impede effective enforcement of the E.O. 11246.

Timetable:

Action	Date	FR Cite
NPRM Affirmative Action Plans (60-2)	03/00/99	

Regulatory Flexibility Analysis Required:

Undetermined

Government Levels Affected:

Undetermined

Additional Information:

Under the reinventing government initiative, OFCCP's emphasis is on regulatory reform, e.g., to revise the Executive Order 11246 regulations to reduce paperwork burdens, eliminate unnecessary regulations, and simplify and clarify the regulations while improving the efficiency and effectiveness of the contract compliance program.

DOL—ESA

55. CHILD LABOR REGULATIONS, ORDERS, AND STATEMENTS OF INTERPRETATION (ESA/W-H)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

29 USC 203(e)

CFR Citation:

29 CFR 570

Legal Deadline:

None

Abstract:

Section 3(l) of the Fair Labor Standards Act requires the Secretary of Labor to issue regulations with respect to minors between 14 and 16 years of age ensuring that the periods and conditions of their employment do not interfere with their schooling, health, or well-being. The Secretary is also directed to designate occupations that may be particularly hazardous for minors 16 and 17 years of age. Child Labor Regulation No. 3 sets forth the permissible industries and occupations in which 14- and 15-year-olds may be employed, and specifies the number of hours in a day and in a week, and time periods within a day, that such minors may be employed. The Department has invited public comment in considering whether changes in technology in the workplace and job content over the years require new hazardous occupation orders, and whether changes are needed in some of the applicable hazardous occupation orders. Comment has also been solicited on whether revisions should be considered in the permissible hours and time of day standards for 14- and 15-year-olds. Comment has been sought on appropriate changes required to implement school-to-work transition programs. Additionally, Congress enacted Public Law 104-174 (August 6, 1996), which amended FLSA section 13(c) and requires changes in the regulations under Hazardous Occupation Order No. 12 regarding power-driven paper balers and compactors, to allow 16- and 17-year-olds to load, but not operate or unload, machines meeting applicable American National Standards Institute (ANSI) safety standards and certain other conditions.

Statement of Need:

Because of changes in the workplace and the introduction of new processes and technologies, the Department is undertaking a comprehensive review of the regulatory criteria applicable to child labor. Other factors necessitating a review of the child labor regulations are changes in places where young workers find employment opportunities, the existence of differing Federal and State standards, and the divergent views on how best to correlate school and work experiences.

Under the Fair Labor Standards Act, the Secretary of Labor is directed to provide by regulation or by order for the employment of youth between 14 and 16 years of age under periods and conditions which will not interfere with their schooling, health and well-being. The Secretary is also directed to designate occupations that may be particularly hazardous for youth between the ages of 16 and 18 years

or detrimental to their health or well-being. The Secretary has done so by specifying, in regulations, the permissible industries and occupations in which 14- and 15-year-olds may be employed, and the number of hours per day and week and the time periods within a day in which they may be employed. In addition, these regulations designate the occupations declared particularly hazardous for minors between 16 and 18 years of age or detrimental to their health or well-being.

Public comment has been invited in considering whether changes in technology in the workplace and job content over the years require new hazardous occupation orders or necessitate revision to some of the existing hazardous orders. Comment has also been invited on whether revisions should be considered in the permissible hours and time-of-day standards for the employment of 14- and 15-year-olds, and whether revisions should be considered to facilitate school-to-work transition programs. When developing regulatory proposals (after receipt of public comment on the advance notice of proposed rulemaking), the Department's focus will be on assuring healthy, safe and fair workplaces for young workers, and at the same time promoting job opportunities for young people and making regulatory standards less burdensome to the regulated community.

Summary of the Legal Basis:

These regulations are issued under sections 3(1), 11, and 12 of the Fair Labor Standards Act, 29 USC Secs. 203(1), 211, and 212, which require the Secretary of Labor to issue regulations prescribing permissible time periods and conditions of employment for minors between 14 and 16 years old so as not to interfere with their schooling, health, or well-being, and to designate occupations that may be particularly hazardous or detrimental to the health or well-being of minors under 18 years old.

Alternatives:

Regulatory alternatives will be developed based on the public comments responding to the advance notice of proposed rulemaking. Alternatives likely to be considered include specific additions or modifications to the hazardous occupation orders and changes to the hours 14- and 15-year-olds may work.

Anticipated Costs and Benefits:

Preliminary estimates of the anticipated costs and benefits of this regulatory action will be developed once decisions are reached on particular proposed changes in the child labor regulations. Benefits will include safer working environments and the avoidance of injuries with respect to young workers.

Risks:

An assessment of the magnitude of the risk addressed by this action will be prepared once decisions are reached on particular proposed changes in the child labor regulations.

DOL—ESA

56. DEFINING AND DELIMITING THE TERM "ANY EMPLOYEE EMPLOYED IN A BONA FIDE EXECUTIVE, ADMINISTRATIVE, OR PROFESSIONAL CAPACITY" (ESA/W-H)

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect State, local or tribal governments and the private sector.

Legal Authority:

29 USC 213(a)(1)

CFR Citation:

29 CFR 541

Legal Deadline:

None

Abstract:

These regulations set forth the criteria for exemption from the Fair Labor Standards Act's minimum wage and overtime requirements for "executive," "administrative," "professional" and "outside sales employees." To be exempt, employees must meet certain tests relating to duties and responsibilities and be paid on a salary basis at specified levels. A final rule increasing the salary test levels was published on January 13, 1981 (46 FR 3010), to become effective on February 13, 1981, but was indefinitely stayed on February 12, 1981 (46 FR 11972). On March 27, 1981, a proposal to suspend the final rule indefinitely was published (46 FR 18998), with comments due by April 28, 1981. As a result of numerous comments and petitions from industry groups on the duties and responsibilities tests, and as a result of recent case law developments, the Department concluded that a more comprehensive review of these regulations was needed. An ANPRM reopening the comment period and broadening the scope of review to include all aspects of the regulations was published on November 19, 1985, with the comment period subsequently extended to March 22, 1986.

The Department has revised these regulations since the ANPRM to address specific issues. In 1991, as the result of an amendment to the Fair Labor Standards Act (FLSA), the regulations were revised to permit certain computer systems analysts, computer programmers, software engineers, and other similarly skilled professional employees to qualify for the exemption, including those paid on an hourly basis if their rates of pay exceed 6-1/2 times the applicable minimum wage. Also, in 1992 the Department issued a final rule which provided, in part, that an otherwise exempt public sector employee would not be disqualified from the exemption's requirement for payment on a "salary basis" solely because the employee is paid according to a public pay and leave system that, absent the use of paid leave, requires the employee's pay to be reduced for absences of less than one workday. In addition, a number of court rulings have caused confusion on the factors

to consider in meeting the regulation's "salary basis" criteria, in both the public and private sectors.

Statement of Need:

These regulations set forth the criteria used in the determination of the application of the FLSA exemption for "executive," "administrative," "professional," and "outside sales employees." The existing salary test levels used in determining which employees qualify as exempt from the minimum wage and overtime rules were adopted in 1975 on an interim basis. These salary level tests are outdated and offer little practical guidance in the application of the exemption. In addition numerous comments and petitions have been received in recent years from industry groups regarding the duties and responsibilities tests in the regulations. These factors, as well as recent case law developments, have led the Department to conclude that a review of these regulations is needed.

These regulations have been revised in recent years to deal with specific issues. In 1991, as the result of an amendment to the FLSA, the regulations were revised to permit certain computer systems analysts, computer programmers, software engineers, and other similarly skilled professional employees to qualify for the exemption, including those paid on an hourly basis if their rates of pay exceed 6 1/2 times the applicable minimum wage. Also in 1991, the Department undertook separate rulemaking on another aspect of the regulations, the definition of "salary basis" for public-sector employees. This interim final rule provided, in part, that an otherwise exempt public-sector employee would not be disqualified from the exemption's requirement for payment on a "salary basis" solely because the employee is paid according to a public pay and leave system that, absent the use of paid leave, requires the employee's pay to be reduced for absences of less than one workday. In 1992, the Department issued its final rule on this matter.

Because of the limited nature of these revisions, the regulations are still in need of updating and clarification. In addition, recent court rulings have caused confusion as to what constitutes compliance with the regulation's "salary basis" criteria in both the public and private sectors.

Summary of the Legal Basis:

These regulations are issued under the statutory exemption from minimum wage and overtime pay provided by section 13(a)(1) of the Fair Labor Standards Act, 29 USC 213(a)(1), which requires the Secretary of Labor to issue regulations that define and delimit the terms "any employee employed in a bona fide executive, administrative, or professional capacity ..., or in the capacity of outside salesman...," for purposes of applying the exemption to employees who meet the specified criteria.

Alternatives:

The Department will involve affected interest groups in developing regulatory alternatives. Following completion of these outreach and consultation activities, full regulatory alternatives will be developed.

Although legislative proposals have been introduced in the Congress to address certain aspects of these regulations, the Department will continue to pursue revisions to the regulations as the appropriate response to the concerns raised. Alternatives likely to be considered include particular changes to address "salary basis" and salary level issues to a comprehensive overhaul of the regulations that also addresses the duties and responsibilities tests.

Anticipated Costs and Benefits:

Some 23 million employees are estimated to be within the scope of these regulations. Legal developments in court cases are causing progressive loss of control of the guiding interpretations under this exemption and are creating law without considering a comprehensive analytical approach to current compensation concepts and workplace practices. These court rulings are creating apprehension in both the private and public sectors. Clear, comprehensive, and up-to-date regulations would provide for central, uniform control over the application of these regulations and ameliorate this apprehension. In the public sector, State and local government employers contend that the rules are based on production workplace environments from the 1940s and 1950s, and that they do not readily adapt to contemporary government functions. The Federal government also has concerns regarding the manner in which the courts and arbitration decisions are applying the exemption to the Federal workforce. Resolution of confusion over how the regulations are to be applied in the public sector will ensure that employees are protected, that employers are able to comply with their responsibilities under the law, and that the regulations are enforceable. Preliminary estimates of the specific costs and benefits of this regulatory action will be developed once the various regulatory alternatives are identified.

Risks:

This action does not affect public health, safety, or the environment.

57. PROCEDURES FOR PREDETERMINATION OF WAGE RATES (29 CFR PART 1) AND LABOR STANDARDS PROVISIONS APPLICABLE TO CONTRACTS COVERING FEDERALLY FINANCED AND ASSISTED CONSTRUCTION (29 CFR PART 5)

Priority:

Other Significant

Legal Authority:

40 USC 276a to 276a(7)

CFR Citation:

29 CFR 1; 29 CFR 5

Legal Deadline:

None

Abstract:

The Department attempted to implement revised rules governing the circumstances in which "helpers" may be used on federally funded and assisted construction contracts subject to the Davis-Bacon Act in May 1982 (see 47 FR 23644, 23658 (May 28, 1982); 47 FR 32090 (July 20, 1982)). After protracted litigation, a final rule was published in January 1989 (see 54 FR 4234) which became effective on February 4, 1991. Thereafter, on two occasions, Congress acted to prevent the Department from expending any funds to implement these revised helper regulations--through the Dire Emergency Supplemental Appropriations Act of 1991, PL 102-27, 105 Stat. 130,151 (1991), and then through section 104 of the DOL Appropriations Act of 1994, PL 103-112. There is no such prohibition in the DOL's Appropriations Act for fiscal year 1998, Public Law 105-78 (November 13, 1997). Given the uncertainty of continuation of such moratoriums, the Department has determined that the helper issue needs to be addressed through further rulemaking. A notice inviting public comment on a proposal to continue the suspension of the former helper regulations while the Department conducts additional rulemaking proceedings was published August 2, 1996 (61 FR 40366). A final rule continuing the suspension while further rulemaking is considered was published December 30, 1996 (61 FR 68641).

Statement of Need:

The current helper rules are difficult to administer and enforce and--as evidenced by the prolonged litigation history and subsequent Congressional actions--are highly controversial. In May 1982, the Department attempted to implement revised rules governing the circumstances in which "helpers" may be used on federally funded and assisted construction contracts subject to the Davis-Bacon Act. After protracted litigation, a final rule was published in January 1989 and became effective on February 4, 1991. Thereafter, on two occasions, Congress acted to prevent the Department from expending any funds to implement these revised helper regulations through appropriations riders. Given the uncertainty of continuation of such moratoriums, the Department has determined that the helper issue needs to be addressed through further rulemaking.

Summary of the Legal Basis:

These regulations are issued under the authority conferred upon the Secretary of Labor by Reorganization Plan No. 14 of 1950 (64 Stat. 1267, 5 USC Appendix) and the Copeland Act (40 USC 276c), in order to provide coordinated enforcement of the prevailing wage provisions of the Davis-Bacon Act (40 USC 276a-276a-7) and several additional Federal statutes that require payment of prevailing wages as determined by the Secretary of Labor according to the Davis-Bacon Act to laborers and mechanics working on federally funded or assisted construction contracts (see list of statutes in 29 CFR Sec. 5.1).

Alternatives:

The Administration has determined that there are only limited alternatives to addressing this issue through rulemaking, in addition to possible legislative changes.

Anticipated Costs and Benefits:

A new rulemaking regarding the helper criteria will seek to make administration of the Davis-Bacon Act more efficient by establishing reasonable "helper" criteria and methodology--thus resolving the controversy and uncertainty currently experienced by interested parties. Changes in the helper regulations may affect prior estimates of potential construction procurement cost savings anticipated from the earlier rulemaking. Estimates of the financial impacts of revised "helper" regulations will be prepared for inclusion in the NPRM.

Risks:

This action does not affect public health, safety, or the environment.

DOL—Employment and Training Administration (ETA)

FINAL RULE STAGE

58. WELFARE-TO-WORK (WTW) GRANTS

Priority:

Other Significant

Legal Authority:

42 USC 601 to 619

CFR Citation:

20 CFR 645

Legal Deadline:

Final, Statutory, November 3, 1997, 90 days from enactment.

Abstract:

The Employment and Training Administration published interim final regulations on November 18, 1997, implementing the Welfare-to-Work Grants Program. The Personal Responsibility and Work Opportunity Reconciliation Act reformed the Nation's welfare laws, when enacted in August 1996, by creating a new system of block grants to the States for Temporary Assistance for Needy Families (TANF). Moving people from welfare to work is one of the primary goals of Federal welfare policy as well as one of five goals the Secretary of Labor has identified for the Department of Labor. Section 5001 of the Balanced Budget Act of 1997 authorized the Department of Labor to provide Welfare-to-Work Grants to States and local communities to create additional job opportunities for the hardest-to-employ recipients of TANF. The Welfare-to-Work Grants will be provided to the States through the use of a formula, and in a competitive process to local communities. A small amount of total grant funds will be set aside for special purposes: one percent for Indian tribes; 0.8 percent for evaluation; and $100 million for performance bonuses to successful States.

The interim final regulations and other guidance focus on providing maximum local flexibility. Guidance and regulations reflect minimal amplification of the law and provide further information or clarification as needed to make the program operational. Existing regulations and systems are used wherever possible. Reporting requirements will assure program integrity and provide timely information for tracking performance. Performance measures will be established and will serve as the basis for the award of FY 2000 bonus grants to the States based on successful performance. Products provided link welfare agencies and workforce development system agencies at the operational level in order to maximize resources available and avoid duplication and overlap. Leveraging of non-Federal resources at the State and local level is encouraged.

These funds will allow States and local communities to help move eligible individuals into jobs by: job creation through public or private sector wage subsidies; on-the-job training; contracts with public or private providers of job readiness, job placement, and post-employment services; job vouchers for similar services; community service or work experience; or job retention and supportive services (if such services are not otherwise available).

Statement of Need:

Since the passage of the Personal Responsibility and Work Opportunity Reconciliation Act, the President and the Congress recognized the need for a measure to complement the Temporary Assistance for Needy Families (TANF) block grant created as a result of the Act. On August 5, 1997, President Clinton signed into law the Balanced Budget Act of 1997, which authorized the Department of Labor to provide Welfare-to-Work Grants to States and local communities to create additional job opportunities for the hardest-to-employ recipients of TANF. The basic goal of the program is to move welfare recipients into unsubsidized jobs with good career potential for economic self-sufficiency. Welfare-to-Work formula and competitive grants provide States and local communities with an array of tools to help them accomplish this goal in ways that make sense and are most effective for their particular population needs. The Employment and Training Administration will issue final regulations and other guidance, provide technical assistance, and establish performance standards which will drive State and local efforts towards the program's goal while still allowing maximum local flexibility.

Summary of the Legal Basis:

Promulgation of these regulations is authorized by SSA section 403 (a)(1)(5)(C)(viii).

Alternatives:

Regulatory alternatives will be developed once determinations have been made with regard to the scope and nature of the regulatory guidance which will be necessary to carry out the new provisions.

Anticipated Costs and Benefits:

Preliminary estimates of the anticipated costs of this regulatory action have not been determined at this time and will be determined at a later date. Welfare recipients will receive job placement and temporary, transitional employment opportunities leading to lasting employment and self-sufficiency. Employers will have ready access to a large pool of motivated hard-working entry-level workers who will be eligible for job retention and support services to maintain employment. Businesses will be eligible to receive wage and on-the-job training subsidies when they hire the hard-to-employ welfare recipients.

Risks:

This action does not affect public health, safety, or the environment.

59. • WORKFORCE INVESTMENT ACT OF 1998

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

Workforce Investment Act of 1998, section 506c

CFR Citation:

20 CFR 660

Legal Deadline:

Other, Statutory, February 7, 1999, Interim Final Rule.

Final, Statutory, December 31, 1999.

Abstract:

The Workforce Investment Act of 1998 was signed into law by President Clinton on August 7, 1998. titles I, III and V of the Act fall under the purview of the Employment and Training Administration. The Act makes significant changes in the way this country's employment and training programs do business. The Act will ensure that Americans have the information and training they need to qualify for good jobs and successfully manage their careers. The interim final regulations, final regulations, and other guidance will focus on providing maximum local flexibility. Guidance and regulations will reflect minimal amplification of the law and will provide further information or clarification as needed to make the program operational. Reporting requirements will assure program integrity and provide timely information for tracking performance.

Statement of Need:

The purpose of title I of the Workforce Investment Act of 1998 is to provide workforce investment activities, through statewide and local workforce investment systems, that increase the

employment, retention, and earnings of participants, and skill attainment of participants, and as a result, improve the quality of the workforce, reduce welfare dependency, and enhance the productivity and competitiveness of the Nation. The Employment and Training Administration will issue regulations and other guidance and provide technical assistance that will focus State and local efforts towards the program's goal while allowing maximum local flexibility. The Department of Labor and its partners must move quickly to implement the reforms contained in the legislation. The law requires that interim final regulations be published no later than 180 days after the date of enactment, and that final regulations be published no later than December 31, 1999.

Alternatives:

Regulatory alternatives will be developed once determinations have been made with regard to the scope and nature of the regulatory guidance necessary to carry out new provisions under the new legislation, the Workforce Investment Act of 1998.

Anticipated Costs and Benefits:

Preliminary estimates of the anticipated costs of this newly enacted legislation have not been determined at this time, but will be at a later date. It is anticipated, however, that successful implementation of this legislation will result in changes in the way this country's employment and training programs do business, and will ensure that Americans have the training they need to qualify for good jobs and successfully manage their careers. The Act consolidates more than 60 Federal programs. It will significantly enhance the ability of State and local areas to effectively implement welfare reform and move welfare recipients from welfare to work. It establishes a single delivery system for adult employment and training and for dislocated worker employment and training that maximizes choice in the selection of occupations and training providers. Under the Act, individuals with disabilities will have access to a comprehensive job training system capable of serving all. Unemployed individuals with disabilities will have broader job opportunities allowing them to re-enter or in some cases enter the workforce for the first time.

Risks:

This action does not affect public health, safety, or the environment.

DOL—Pension and Welfare Benefits Administration (PWBA)

PROPOSED RULE STAGE

60. REVISION OF THE FORM 5500 SERIES AND IMPLEMENTING AND RELATED REGULATIONS UNDER THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974 (ERISA)

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

29 USC 1021; 29 USC 1022; 29 USC 1023; 29 USC 1024; 29 USC 1025; 29 USC 1026; 29 USC 1027; 29 USC 1029; 29 USC 1030; 29 USC 1059; 29 USC 1135; 29 USC 1166; 29 USC 1168

CFR Citation:

29 CFR 2520

Legal Deadline:

None

Abstract:

Under title I of ERISA, title IV of ERISA, and the Internal Revenue Code, as amended, pension and other employee benefit plans are generally required to file returns/reports annually concerning, among other things, the financial condition and operations of the plan. These annual reporting requirements are satisfied generally by filing the Form 5500 series in accordance with its instructions and related regulations. The Department of Labor, IRS, and PBGC have undertaken a comprehensive review of the annual return/report forms in an effort to streamline the information required to be reported and the methods by which such information is filed and processed.

Statement of Need:

This project was included in prior PWBA regulatory plans. The Form 5500 Series is the primary source of information concerning the operation funding, assets and investments of pension and other employee benefit plans, and is both an important compliance and research tool for the Department, and a disclosure document for plan participants and beneficiaries and a source of information and data for use by other Federal agencies, Congress, and the private sector in assessing employee benefit, tax, and economic trends and policies.

Summary of the Legal Basis:

Title I of ERISA, sections 101 through 105, 107, 209, and 606 impose specific reporting and disclosure obligations on administrators of employee benefit plans. Sections 104(a)(2), 104(a)(3) and 110 of ERISA provide the Secretary with the authority to prescribe simplified reports, exemptions and alternative methods of compliance for employee welfare benefit plans and employee pension benefit plans. Section 505 provides the Secretary with general authority to prescribe regulations necessary or appropriate to carry out the provisions of title I of ERISA.

Alternatives:

Amendments to the annual report regulations implementing the revisions to the Form 5500 Series are in development.

Anticipated Costs and Benefits:

By simplifying the Form 5500 Series and creating an automated processing system for the filed reports, it is anticipated that filer costs of preparing forms and Government processing costs will be reduced. These measures will eliminate reporting requirements for information that is not needed for the discharge of the Department's statutory responsibilities, while ensuring that participants and beneficiaries have access to the information they need to protect their rights and benefits under ERISA.

Risks:

Failure to revise the Form 5500 Series Annual Reports for Employee Benefit Plans could deprive plans, sponsors and participants and beneficiaries, as well as the Government, of the cost savings and related benefits associated with streamlining the forms and their processing.

61. AMENDMENTS TO SUMMARY PLAN DESCRIPTION REGULATIONS

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

29 USC 1024; 29 USC 1135

CFR Citation:

29 CFR 2520.102-3; 29 CFR 2520.102-5

Legal Deadline:

None

Abstract:

These proposed amendments to the regulations governing the contents of summary plan descriptions are intended to ensure that all participants in group health plans are provided, consistent with the recommendations of the President's Advisory Commission on Consumer Protection and Quality in the Health Care Industry, understandable information concerning their plan; provider network composition; preauthorization and utilization review procedures; whether, and under what circumstances, coverage is provided for existing and new drugs; and whether, and under what circumstances, coverage is provided for experimental drugs devices and procedures. These amendments will include the repeal of special rules limiting the information that must be included in summary plan descriptions with respect to certain health maintenance organizations. In addition, the proposed amendments will include provisions that are intended to update or clarify the application of certain SPD content requirements affecting both pension and welfare benefit plans.

Statement of Need:

This regulation is necessary to improve the disclosure of group health plan benefit information, consistent with the recommendations of the President's Advisory Commission on Consumer Protection and Quality in the Health Care Industry, as set forth in its November 20, 1997, report. The amendments will also update the general SPD content requirements and update other relevant regulatory provisions.

Summary of the Legal Basis:

Promulgation of this regulation is authorized by sections 101(a), 102(b), and 505 of ERISA

Alternatives:

Regulatory alternatives will be developed once determinations have been made with regard to the scope and nature of the amendments which are necessary to improve the disclosure of benefit information to participants and beneficiaries of group health plans under the applicable ERISA regulations.

Anticipated Costs and Benefits:

The Department estimates that the aggregate additional costs associated with the proposed regulation would average approximately $76 million per year for the years 1999, 2000, and 2001, although the Department believes that this estimate may be conservatively high. However, the Department believes that the proposed regulation would assure that participants have better access to more complete information on their benefit plans. Better information will lead both participants and plan sponsors to make more economically efficient decisions regarding benefit plans. This enhanced value and efficiency from better information constitute the benefits of the regulation.

Risks:

Failure to issue the regulation would deprive participants, beneficiaries, and plan sponsors of the improvements in health care market efficiency which would be generated by the regulatory amendments specified therein.

FINAL RULE STAGE

62. REGULATIONS IMPLEMENTING THE HEALTH CARE ACCESS, PORTABILITY AND RENEWABILITY PROVISIONS OF THE HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT OF 1996

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

PL 104-91 section 101; 29 USC 1027; 29 USC 1059; 29 USC 1135; 29 USC 1171; 29 USC 1172; 29 USC 1177

CFR Citation:

29 CFR 2590

Legal Deadline:

Other, Statutory, April 1, 1997, Per Section 734 of ERISA as added by Section 101 of HIPAA.

Abstract:

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) amended title I of ERISA by adding a new part 7, designed to improve health care access, portability and renewability. This rulemaking will provide regulatory guidance to implement these provisions.

Statement of Need:

HIPAA added a new part 7 to title I of ERISA, containing provisions designed to improve the availability and portability of health insurance coverage. Part 7 includes provisions limiting exclusions for preexisting conditions and providing credit for prior coverage, guaranteeing availability of health coverage for small employers, prohibiting discrimination against employees and dependents based on health status, and guaranteeing renewability of health coverage to employers and individuals.

Summary of the Legal Basis:

Promulgation of these regulations is authorized by sections 505 and 734 of ERISA.

Alternatives:

Regulatory alternatives will be developed once determinations have been made, in conjunction with other concerned agencies with regard to the scope and nature of the final regulatory guidance which will be necessary to carry out the new provisions.

Anticipated Costs and Benefits:

Preliminary estimates of the anticipated costs and benefits of the regulatory actions found to be necessary to implement the new provision will be developed once decisions are reached on which specific actions are necessary.

Risks:

Failure to provide regulatory guidance necessary to carry out these important health care reforms would adversely impact the availability and portability of health insurance coverage for American families.

63. AMENDMENT OF SUMMARY PLAN DESCRIPTION AND RELATED ERISA REGULATIONS TO IMPLEMENT STATUTORY CHANGES IN THE HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT OF 1996

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

PL 104-191 section 101; PL 104-204 section 603

CFR Citation:

29 CFR 2520.102-3; 29 CFR 2520.104b-1; 29 CFR 2520.104b-3

Legal Deadline:

NPRM, Statutory, April 1, 1997, Per Section 707 of ERISA as added by Section 101 of HIPAA.

Abstract:

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) amended ERISA's summary plan description (SPD) and related reporting and disclosure provisions to require that participants and beneficiaries receive from their group health plans: (i) more timely notice if there is a material reduction in services or benefits under the plan; (ii) more information regarding the financing and administration of the plan; and (iii) specific identification of Department of Labor offices through which they can seek assistance or information about HIPAA. The Newborns' and Mothers' Health Protection Act of 1996 (NMHPA) also amended ERISA's SPD and related reporting and disclosure provisions. This rulemaking will amend the Department's SPD and related regulations to implement those statutory changes.

Statement of Need:

The existing SPD and related reporting and disclosure provisions need to be revised to reflect the changes made by HIPAA. HIPAA's statutory changes modify the requirements concerning the manner and timing of how certain important plan information is communicated to participants and beneficiaries by plan administrators. Without revised regulatory guidance, administrators may not be able to improve the timely disclosure of plan information on both a quantitative and qualitative basis. HIPAA also requires the Secretary to issue regulations within 180 days after its enactment providing alternative mechanisms to delivery by mail through which group health plans may notify participants and beneficiaries of material reductions in covered services or benefits.

Summary of the Legal Basis:

Promulgation of these regulations is authorized by sections 104(b), 505 and 734 of ERISA.

Alternatives:

Regulatory alternatives will be developed once determinations have been made with regard to the scope and nature of the regulatory guidance which will be necessary to carry out the new provisions.

Anticipated Costs and Benefits:

There is estimated to be no capital/start-up cost. Total burden cost for operating maintenance is to average $73,000,000 annually for the years 1997, 1998, and 1999. However, the Department believes that the regulation assures that participants have better access to more complete information about their benefit plans.

Risks:

The SPD is a critical plan document for participants and beneficiaries. Without access to accurate and timely information participants and beneficiaries will not be able to protect their rights under ERISA. Improved disclosure requirements also should serve to facilitate compliance by plan administrators, thereby reducing litigation and penalty risks to plan administrators. The failure to issue revised disclosure regulations also may result in a failure to achieve HIPAA's objective of improving the disclosure of plan information.

64. AMENDMENTS TO EMPLOYEE BENEFIT PLAN CLAIMS PROCEDURES REGULATION

Priority:

Other Significant

Legal Authority:

29 USC 1133; 29 USC 1135

CFR Citation:

29 CFR 2560.503-1

Legal Deadline:

None

Abstract:

The Department is proposing to amend the regulation governing the establishment and maintenance of benefit claims procedures by employee benefit plans covered by title I of the Employee Retirement Income Security Act (ERISA). The proposal would establish new standards for the processing of group health and other employee benefit plan claims filed by participants and beneficiaries. In the case of group health plans, as well as certain plans providing disability benefits, the new standards are intended to ensure more timely benefit determinations, improved access to information on which a benefit determination is based, and greater assurance that participants and beneficiaries will be afforded a full and fair review of denied claims.

Statement of Need:

This regulation is necessary to insure more timely benefit determinations, improve access to information on which a benefit determination is made, and provide greater assurance that participants and beneficiaries will be afforded a full and fair review of denied claims.

Summary of the Legal Basis:

Promulgation of this regulation is authorized by sections 503 and 505 of ERISA.

Alternatives:

Regulatory alternatives will be developed once determinations have been made with regard to the scope and nature of the amendments which are necessary to update the rules which implement section 503 of ERISA.

Anticipated Costs and Benefits:

On the basis of available data, the Department believes that the projected benefits of this proposed regulation would outweigh its projected costs. In particular, updating the existing regulation to address recent changes in the delivery and financing of health care services would improve health care quality by averting harmful, inappropriate delays and denials of health benefits, thereby yielding substantial social benefits.

Risks:

Failure to issue this regulation would deprive many plan participants and beneficiaries of the benefits of an improved claims review process.

65. HEALTH CARE STANDARDS FOR MOTHERS AND NEWBORNS

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

29 USC 1181 (PL 104-204; 110 Stat 2935); 29 USC 1135; 29 USC 1194

CFR Citation:

29 CFR 2590.711

Legal Deadline:

None

Abstract:

The Newborns' and Mothers' Health Protection Act of 1996 (NMHPA) was enacted on September 26, 1996 (PL 104-204). NMHPA amended the Public Health Service Act (PHSA) and the Employee Retirement Income Security Act of 1974, as amended, (ERISA) to provide protection for mothers and their newborn children with regard to the length of hospital stays following the birth of a child. NMHPA provisions are set forth in title XXVII of the PHSA and part 7 of subtitle B of title I of ERISA. The interim rules will provide guidance with regard to the provisions of the NMHPA.

Statement of Need:

These regulations are needed to provide guidance to the public concerning the application of the provisions of section 711 of ERISA, which establishes requirements for group health plan standards for minimum hospital stays following birth.

Summary of the Legal Basis:

Promulgation of these regulations is authorized by sections 505 and 734 of ERISA.

Alternatives:

Regulatory alternatives will be developed once determinations have been made with regard to the scope and nature of the regulatory guidance which will be necessary to implement Section 711 of ERISA.

Anticipated Costs and Benefits:

Preliminary estimates of the anticipated costs and benefits of the regulatory actions found to be necessary to implement the new provision will be developed once decisions are reached on which specific actions are necessary.

Risks:

Failure to issue these regulations would be likely to impair compliance by group health plans with the new standards established by section 711 of ERISA for mothers' and newborns' health care.

66. • NATIONAL MEDICAL SUPPORT NOTICE

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

PL 105-200, section 401(b); 29 USC 1135; 29 USC 1169

CFR Citation:

29 CFR 2565

Legal Deadline:

Other, Statutory, May 16, 1999, Interim Final Rule.

Final, Statutory, May 16, 2000.

Abstract:

The purpose of this rulemaking is to develop regulations which establish a model qualified medical child support order for use by State child support agencies to facilitate the extension of health care coverage to children under their jurisdiction. This initiative is mandated by the Child Support Performance and Incentive Act of 1998, P.L.105-200.

Statement of Need:

These regulations are needed to provide guidance to the public concerning the application of the provisions of section 401 of the Child Support Performance and Incentive Act of 1998 (CSPIA) and section 609 of ERISA, which require, respectively, the promulgation of a National Medical Support Notice to be used by State child support agencies to order health care coverage for children under their jurisdiction, and that such notice is to be deemed a qualified medical child support order for purposes of section 609 of ERISA.

Summary of the Legal Basis:

Promulgation of these regulations is mandated by section 401 of CSPIA, and authorized by sections 505 and 609 of ERISA.

Alternatives:

Regulatory alternatives will be developed once determinations have been made with regard to the scope and nature of the regulatory guidance which will be necessary to implement section 401 of CSPIA and section 609 of ERISA. Section 401 of CSPIA mandates the promulgation of a National Medical Support Notice.

Anticipated Costs and Benefits:

Preliminary estimates of the anticipated costs and benefits of the regulatory actions found necessary to implement the new provisions will be developed once decisions are reached on which specific actions are necessary.

Risks:

Failure to issue these regulations would be likely to impair compliance by State child support agencies with the new standards established by section 401 of CSPIA and by group health plans with the requirements of section 609 of ERISA for the extension of health care coverage to children of plan participants.

PRERULE STAGE

67. OCCUPATIONAL EXPOSURE TO COAL MINE DUST (LOWERING EXPOSURE LIMIT)

Priority:

Other Significant

Legal Authority:

30 USC 811; 30 USC 812

CFR Citation:

30 CFR 70; 30 CFR 71; 30 CFR 75; 30 CFR 90

Legal Deadline:

None

Abstract:

The Federal Coal Mine Health and Safety Act of 1969 established the first comprehensive respirable dust standards for coal mines. These standards were designed to reduce the incidence of coal workers' pneumoconiosis (black Lung) and silicosis and eventually eliminate these diseases. While significant progress has been made toward improving the health conditions in our Nation's coal mines, miners continue to be at risk of developing occupational lung disease, according to the National Institute for Occupational Safety and Health (NIOSH) . In September 1995, NIOSH issued a Criteria Document in which it recommended that the respirable coal mine dust permissible exposure limit (PEL) be cut in half. In February 1996, the Secretary of Labor convened a Federal Advisory Committee on the Elimination of Pneumoconiosis Among Coal Miners (Advisory Committee) to assess the adequacy of MSHA's current program and standards to control respirable dust in underground and surface coal mines, as well as other ways to eliminate black lung and silicosis among coal miners. The Committee represented the labor, industry, and academic communities. The Committee submitted its report to the Secretary of Labor in November 1996, with the majority of the recommendations unanimously supported by the Committee members. The Committee recommended that MSHA consider lowering the coal dust PEL.

Statement of Need:

Respirable coal mine dust levels in this country are significantly lower than they were over two decades ago. Despite this progress, there continues to be concern about the respirable coal mine dust sampling program and its effectiveness in presenting an accurate picture of exposure levels in mines. Coal workers exposed after the implementation of the current PEL continue to develop pneumoconiosis. In response to this concern, MSHA undertook an extensive review of the Agency's respirable coal mine dust program. The MSHA Coal Mine Respirable Dust Task Group, which issued its report in June 1992, found that vulnerabilities exist which could impact miner health protection and made recommendations for improving the monitoring program. The Advisory Committee also addressed this issue and made recommendations.

The Agency has carefully reviewed the NIOSH Criteria Document Occupational Exposure to Respirable Coal Mine Dust and the recommendations of the Advisory Committee on Elimination of Pneumoconiosis among Coal Mine Workers. MSHA finds that there remains unacceptable risk to miners' health at the current exposure limit for dust in coal mines. Therefore, the Agency is in the preliminary rulemaking process for seeking information to lower this risk.

Alternatives:

MSHA will consider all recommendations carefully and will seek the public's input into alternatives through the use of an Advance Notice of Proposed Rulemaking (ANPRM). In the ANPRM, the Agency includes suggestions of alternative approaches, e.g., operation specific PEL, or an action level to trigger certain protective measures.

Anticipated Costs and Benefits:

Benefits sought are reduced dust levels over a miner's working lifetime, the key to eliminating black lung and silicosis as a risk to coal miners. Enhanced protection of miners from these diseases also will reduce the cost of future black lung benefits and lead to lower operator insurance premiums. MSHA is considering a rule to reduce the amount of respirable coal mine dust permitted in mines but has not yet developed cost estimates. As the Agency proceeds with the rulemaking, however, estimates will be developed and made available for public review.

Risks:

Respirable coal mine dust is one of the most serious occupational hazards in the mining industry. Long-term exposure to excessive levels of respirable coal mine dust can cause black lung and silicosis, which are both potentially disabling and can cause death.

PROPOSED RULE STAGE

68. DIESEL PARTICULATE (UNDERGROUND COAL)

Priority:

Other Significant

Legal Authority:

30 USC 811; 30 USC 813; 30 USC 957; 30 USC 961

CFR Citation:

30 CFR 72; 30 CFR 75

Legal Deadline:

None

Abstract:

Several epidemiological studies have found that diesel exhaust presents potential health risks to workers. These possible health effects range from headaches and nausea to respiratory disease and cancer. In 1988, the National Institute for Occupational Safety and Health recommended that "whole diesel exhaust be regarded as a potential occupational carcinogen." In addition, in 1989 the International Agency for Research on Cancer concluded that "diesel engine exhaust is probably carcinogenic to humans."

In 1988, an advisory committee made recommendations to the Secretary of Labor concerning safety and health standards for the use of diesel-powered equipment in underground coal mines. One of the recommendations was that the Secretary of Labor set in motion a mechanism whereby a diesel particulate standard could be set. Based on that recommendation, MSHA published an advance notice of proposed rulemaking, in January 1992, seeking information relative to exposure limits, risk assessment, sampling and monitoring methods, and control feasibility. In April 1998, MSHA issued a proposed rule to control diesel particulate matter in underground coal mines.

Statement of Need:

The use of diesel-powered equipment in underground mines has increased significantly and rapidly during the past decade. MSHA estimates that approximately 13,000 miners are occupationally exposed to diesel exhaust emissions in underground mines.

Several epidemiological studies have shown a positive carcinogenic risk associated with exposure to diesel exhaust. Other reported health effects associated with exposure to diesel exhaust include dizziness, drowsiness, headaches, nausea decreased visual acuity, and forced expiratory volume. In addition, studies by MSHA and the former Bureau of Mines show that miners working in underground mining operations that use diesel equipment are probably the most heavily exposed workers of any occupational group. Based on the levels of diesel particulate measured in underground mining operations and the evidence of adverse health effects associated with exposure to diesel exhaust, MSHA is concerned about the potential health risk to miners. The proposed rule would control exposure of miners to diesel particulate matter by requiring the installation of high-efficiency filters on diesel powered equipment to trap diesel particulates before they enter the mine atmosphere.

Alternatives:

In the fall of 1995, MSHA held a series of public workshops to gather suggestions for possible approaches to limit miners' exposure to diesel particulate. In addition, over the past 10 years, MSHA and the former Bureau of Mines have conducted research on methodologies for the measurement and control of diesel particulate in the mining environment. This research has demonstrated that the use of low sulfur fuel, good engine maintenance, exhaust after-treatment, new engine technology, and optimized application of ventilating air all play a role in reducing miners' exposure to diesel exhaust particulate matter.

MSHA considered establishing a PEL for diesel particulate, but found that technology for measuring it in the presence of coal mine dust is not currently feasible. MSHA encourages the mining community to continue to voluntarily use protective measures to address exposure to diesel exhaust. In addition, the proposal provides for MSHA technical assistance to operators and a phased-in period for compliance.

Anticipated Costs and Benefits:

MSHA estimates that the per year compliance costs are just over $10 million, of which underground coal mine operators would incur about $10 million and manufacturers of diesel engines and equipment would incur about $30,000.

The proposed rule would reduce a significant health risk to underground miners, reducing the potential for acute sensory irritations and respiratory symptoms, lung cancer, and premature death, along with the attendant suffering and costs thereof to their employees, their families, and society.

Risks:

Several epidemiological studies have found that exposure to diesel exhaust presents potential health risks to workers. In addition, laboratory tests have shown diesel exhaust to be carcinogenic in rats, as well as toxic and mutagenic. These potential adverse health effects range from headaches and nausea to respiratory disease and cancer. In the confined space of the underground mine environment, occupational exposure to diesel exhaust may present a greater hazard due to ventilation limitations and the presence of other airborne contaminants, such as toxic mine dusts or mine gases. The Agency believes that the health evidence forms a reasonable basis for exploring possible methods to reduce miners' exposure to diesel particulate.

69. X-RAY SURVEILLANCE PROGRAM FOR SURFACE COAL MINERS

Priority:

Other Significant

Legal Authority:

30 USC 811; 30 USC 812

CFR Citation:

30 CFR 70; 30 CFR 72; 30 CFR 90

Legal Deadline:

None

Abstract:

The Federal Coal Mine Health and Safety Act of 1969 established the first comprehensive respirable dust standards for coal mines. These standards were designed to reduce the incidence of coal workers' pneumoconiosis (black lung) and silicosis and eventually eliminate these diseases. While significant progress has been made toward improving the health conditions in our Nation's coal mines, miners continue to be at risk of developing occupational lung disease, according to the National Institute for Occupational Safety and Health (NIOSH). In February 1996, the Secretary of Labor convened a Federal Advisory Committee on the Elimination of Pneumoconiosis Among Coal Miners (Advisory Committee) to assess the adequacy of MSHA's current program and standards to control respirable dust in underground and surface coal mines, as well as other ways to eliminate black lung and silicosis among coal miners. The Committee represented the labor, industry, and academic communities. The Committee submitted its report to the Secretary of Labor in November 1995, with the majority of the recommendations unanimously supported by the Committee members.

MSHA has completed an indepth review of the Advisory Committee's recommendations. There are 20 principal recommendations set out in the Advisory Committee report, which are further subdivided into a total of approximately 100 distinct action items. The recommendations are both extensive and significant. The Agency is giving each careful consideration and has prioritized them for regulatory or administrative action.

The Agency will provide information to the mining community as it determines how to implement the Advisory Committee recommendations.

Statement of Need:

Respirable coal mine dust levels in this country are significantly lower than they were over two decades ago. Despite this progress, there continues to be concern about the respirable coal mine dust sampling program and its effectiveness in presenting an accurate picture of exposure levels in mines. Such exposure levels are linked directly to the development of pneumoconiosis. In response to this concern, MSHA undertook an extensive review of the Agency's respirable coal mine dust program. The MSHA Coal Mine Respirable Dust Task Group, which issued its report in June 1992, found that vulnerabilities exist which could impact miner health protection and made recommendations for improving the monitoring program. The Advisory Committee also addressed this issue and made recommendations.

Recommendations contained in the NIOSH Criteria Document Occupational Exposure to Respirable Coal Mine Dust, and the Advisory Committee's report state that surface coal miners should be included in the x-ray medical surveillance program. Therefore, the Agency is considering regulatory action.

Alternatives:

MSHA will consider all related recommendations carefully. MSHA is considering extending the x-ray surveillance program to surface coal miners. MSHA is also considering programs for greater outreach, training and education, and approaches to increase participation in the program.

Anticipated Costs and Benefits:

Benefits sought are detection of black lung and silicosis because of the significance of health risk to coal miners. Enhanced protection of miners from progression of these diseases also will reduce the cost of future black lung benefits and lead to lower operator insurance premiums. MSHA is developing a proposed rule; however, at this stage, MSHA does not have cost estimates. As we proceed, however, we will develop estimates and make them available for public review.

Risks:

Respirable coal mine dust is one of the most serious occupational hazards in the mining industry. Long-term exposure to excessive levels of respirable coal mine dust can cause black lung and silicosis, which are both potentially disabling and can cause death. MSHA recognizes the continuing risks presented to miners by inhalation of coal mine dust and is developing an integrated approach to reduce this risk.

70. DIESEL PARTICULATE (UNDERGROUND METAL AND NONMETAL MINES)

Priority:

Other Significant

Legal Authority:

30 USC 811; 30 USC 813; 30 USC 961; 30 USC 957

CFR Citation:

30 CFR 57

Legal Deadline:

None

Abstract:

Several epidemiological studies have found that diesel exhaust presents potential health risks to workers. These possible health effects range from headaches and nausea to respiratory disease and cancer. In 1988, the National Institute for Occupational Safety and Health recommended that "whole diesel exhaust be regarded as a potential occupational carcinogen." In addition, in 1989, the International Agency for Research on Cancer concluded that "diesel engine exhaust is probably carcinogenic to humans."

In 1988, an advisory committee made recommendations to the Secretary of Labor concerning safety and health standards for the use of diesel-powered equipment in underground coal mines. One of the recommendations was that

the Secretary of Labor set in motion a mechanism whereby a diesel particulate standard could be set. Based on that recommendation, MSHA published an Advance Notice of Proposed Rulemaking (ANPRM) in January 1992, seeking information relative to exposure limits, risk assessment, sampling and monitoring methods, and control feasibility. In April 1998, MSHA issued a proposed rule to control diesel particulate matter in underground coal mines. The underground coal proposal would require the use of a very effective control technology (filters) to reduce exposures, because of a problem with measuring diesel particulate matter in coal mines. Due to differences in mining conditions, MSHA will be proposing a rule for underground metal and nonmetal mines that is different from the proposed rule for underground coal mines.

The proposed rule for underground metal nonmetal mines would establish a concentration limit for diesel particulate matter.

Statement of Need:

The use of diesel-powered equipment in underground mines has increased significantly and rapidly during the past decade. MSHA estimates that about 7,500 miners working in production or development areas are occupationally exposed to diesel exhaust emissions in underground metal and nonmetal mines.

Several epidemiological studies have shown a positive carcinogenic risk associated with exposure to diesel exhaust. Other reported health effects associated with exposure to diesel exhaust include dizziness, drowsiness, headaches, nausea, decreased visual activity, and decreased forced expiratory volume. In addition, studies by MSHA and the former Bureau of Mines show that miners working in underground mining operations that use diesel equipment are probably the most heavily exposed workers of any occupational group. Based on the levels of diesel particulate measured in underground mining operations and the evidence of adverse health effects associated with exposure to diesel exhaust, MSHA is concerned about the potential health risk to miners. The proposed rule for underground metal and nonmetal mines would establish a concentration limit for diesel particulate matter.

Alternatives:

In the fall of 1995, MSHA held a series of public workshops to gather suggestions for possible approaches to limit miners' exposure to diesel particulate. In addition, over the past 10 years, MSHA and the former Bureau of Mines have conducted research on methodologies for the measurement and control of diesel particulate in the mining environment. This research has demonstrated that the use of low sulfur fuel, good engine maintenance, exhaust after-treatment, new engine technology, and optimized application of ventilating air all play a role in reducing miners' exposure to diesel exhaust particulate matter.

MSHA encourages the mining community to continue to voluntarily use protective measures to address exposure to diesel exhaust. In addition, the proposal provides for MSHA technical assistance to operators and a phase-in period for compliance.

Anticipated Costs and Benefits:

MSHA estimates that the compliance costs for underground metal and nonmetal operators would be approximately $19 million. The compliance costs to manufacturers are assumed to be passed through to underground metal and nonmetal operators and, therefore, they would not incur any direct costs as a result on the rule. The proposed rule would reduce a significant health risk to underground miners, reducing the potential for acute sensory irritations and respiratory symptoms, lung cancer, and premature death, along with the attendant suffering and costs thereof to their employees, their families, and society. In addition to savings related to acute health effects, MSHA estimates that some lung cancer would also be avoided.

Risks:

Several epidemiological studies have found that exposure to diesel exhaust presents potential health risks to workers. Laboratory tests have shown diesel exhaust to be carcinogenic in rats, as well as toxic and mutagenic. Potential adverse health effects range from headaches and nausea to respiratory disease and cancer. In the confined space of the underground mine environment, occupational exposure to diesel exhaust may present a greater hazard due to ventilation limitations and the presence of other airborne contaminants, such as toxic mine dusts or mine gases. The Agency believes that the health evidence forms a reasonable basis for reducing miners' exposure to diesel particulate.

71. VERIFICATION OF DUST CONTROL PLAN

Priority:

Other Significant

Legal Authority:

30 USC 811; 30 USC 812

CFR Citation:

30 CFR 70; 30 CFR 75

Legal Deadline:

None

Abstract:

The Federal Mine Safety and Health Act of 1969 established the first comprehensive respirable dust standards for coal mines. These standards were designed to reduce the incidence of coal workers' pneumoconiosis (black lung) and silicosis and eventually eliminate these diseases. While significant progress has been made toward improving the health conditions in our Nation's coal mines, miners continue to be at risk of developing occupational lung disease,

according to the National Institute for Occupational Safety and Health (NIOSH). In February 1996, the Secretary of Labor convened a Federal Advisory Committee on the Elimination of Pneumoconiosis Among Coal Miners (Advisory Committee) to assess the adequacy of MSHA's current program and standards to control respirable dust in underground and surface coal mines, as well as other ways to eliminate black lung and silicosis among coal miners. The Committee represented the labor, industry, and academic communities. The committee submitted its report to the Secretary of Labor in November 1996, with the majority of the recommendations unanimously supported by the Committee members.

MSHA has completed an in-depth review of the Advisory Committee's recommendations. There are 20 principal recommendations set out in the Advisory Committee report, which are further subdivided into a total of approximately 100 distinct action items. The recommendations are both extensive and significant. The Agency is giving each recommendation careful consideration and has prioritized them for regulatory or administrative action.

The Agency will provide information to the mining community as it determines how to implement the Advisory Committee recommendations.

Statement of Need:

Respirable coal mine dust levels in this country are significantly lower than they were over two decades ago. Despite this progress, there continues to be concern about the respirable coal mine dust sampling program and its effectiveness in presenting an accurate picture of exposure levels in mines. MSHA regulations require that all underground coal mine operators develop and follow a mine ventilation plan approved by the Agency. The dust control portion of the mine ventilation plan is the key element of an operator's strategy to control respirable dust in the work environment. Although such plans are required to be designed to control respirable dust, there is no current requirement that provides for early in-mine verification of the proposed plan's effectiveness under typical mining conditions. Consequently, plans may be implemented that may later be shown as inadequate to control respirable dust. To minimize this from occurring, the Advisory Committee recommended that MSHA should require coal mine operators to verify the adequacy of the dust control provisions in new or revised plans by demonstrating that the plan will be effective under typical mining conditions.

Therefore, MSHA is considering regulatory actions which would require mine operators to verify a plan's adequacy in controlling respirable dust.

Alternatives:

In developing the proposed rule, MSHA will consider alternatives related to typical production levels and the use of appropriate dust control strategies.

Anticipated Costs and Benefits:

Benefits sought are reduced dust levels over a miner's working lifetime, the key to eliminating black lung and silicosis as a risk to coal miners. Enhanced protection of miners from these diseases also will reduce the cost of future black lung benefits and lead to lower operator insurance premiums. MSHA is in the early stages of developing proposed rules and does not have cost estimates. As we proceed, however, we will develop estimates and make them available for public review.

Risks:

Respirable coal mine dust is one of the most serious occupational hazards in the mining industry. Long-term exposure to excessive levels of respirable coal mine dust can cause black lung and silicosis, which are both potentially disabling and can cause death. MSHA is pursuing both regulatory and nonregulatory actions to eliminate pneumoconiosis through the control of coal mine respirable dust levels in mines and the reduction of miners' exposure.

FINAL RULE STAGE

72. NOISE STANDARD

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

30 USC 811; 30 USC 813

CFR Citation:

30 CFR 56; 30 CFR 57; 30 CFR 62; 30 CFR 70; 30 CFR 71

Legal Deadline:

None

Abstract:

Notwithstanding MSHA's firm enforcement of its current noise regulations, miners are continuing to incur hearing impairment. Data indicate that hearing impairment can be reduced significantly, however, if effective protective action is used both to reduce or eliminate the noise and to minimize exposure to the noise. MSHA has published a proposed rule applicable to all types of mining which would require that protective measures be taken where exposure to noise is at a level lower than that which is currently permitted. The final rule would address, for example, a hearing conservation plan and an "action level."

Consistent with the Mine Act and in response to comments, the final rule would include a new provision providing affected miners and their representatives with an opportunity to observe required operator monitoring.

Statement of Need:

MSHA's existing standards, in spite of enforcement efforts, do not provide adequate protection against exposure to hazardous occupational noise levels. Several factors have shown that there is a need to replace the existing standards so that miners are adequately protected. One factor is that miners are continuing to incur occupational, noise-induced hearing loss. Another factor is that existing MSHA standards no longer reflect the opinions of experts or the current scientific evidence. In addition, MSHA's current noise standards for coal mines differ from those for metal and nonmetal mines. MSHA's final rule will provide consistent requirements for all mines.

Section 103(c) of the Mine Act requires, among other things, that when the Secretary issues regulations requiring operator monitoring, such regulations "shall provide the miners' or their representatives with an opportunity to observe such monitoring or measuring, and to have access to the records thereof." The final rule would implement section 103(c) of the Mine Act.

Summary of the Legal Basis:

Section 101(a) of the Mine Act requires that MSHA's promulgation of health standards adequately assure, on the basis of the best available evidence, that no miner will suffer material impairment of health or functional capacity over the miner's working lifetime. In addition to the attainment of the highest degree of health and safety protection for the miner, the Mine Act requires that factors, such as the latest scientific data in the field, the feasibility of the standard, and the experience gained under the Mine Act and other health and safety laws, be considered when promulgating mandatory standards pertaining to toxic materials or harmful physical agents.

Alternatives:

MSHA published a proposed rule which requested comments and data on a number of regulatory alternatives. In addition, MSHA held six public hearings providing the public an opportunity to comment on the noise proposal and submit data. Based upon its own research and experience, and data and information submitted to the record, MSHA is considering the respective roles of engineering controls and administrative controls and the use of personal hearing protection in controlling noise exposure; lowering the permissible exposure level and implementing a new action level; the lowering of the exchange rate; and the parameters and criteria for audiometric testing, exposure monitoring, and miner training. The proposed rule reflected the Agency's tentative decisions on these alternatives, mindful of their economic impact on small mines. The final rule will derive from MSHA's deliberations and decisions on the issues and alternatives.

Anticipated Costs and Benefits:

MSHA prepared an analysis of benefits which compared the numbers of miners projected to incur a material impairment of hearing under the existing standards and under the proposal. At this stage in the development of the final rule, MSHA anticipates that the rule would reduce the risk of impairment by 67 percent protecting about 709 incidents of occupationally related material impairments of hearing per year. MSHA anticipates that the incremental annual cost of the final rule would be about $5.56 million. Since the final rule is still under development, these estimates are preliminary.

Risks:

Noise is a serious occupational hazard in the mining industry. Occupational exposure to loud noises results in hearing loss and hearing impairment, which affect both quality of life and functional capacity. In addition, cases of hearing loss reported to MSHA indicate that a significant number of these miners received all of their noise exposure under existing standards. The Agency believes that the health evidence forms a reasonable basis for revising MSHA's existing noise standards.

DOL—Occupational Safety and Health Administration (OSHA)

PRERULE STAGE

73. STANDARDS ADVISORY COMMITTEE ON METALWORKING FLUIDS

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

29 USC 655(b)(1); 29 USC 656(b)

CFR Citation:

29 CFR 1910

Legal Deadline:

None

Abstract:

In December 1993, the International Union, United Automobile Aerospace and Agricultural Implement Workers of America petitioned OSHA to take emergency regulatory action to protect workers from the risks of occupational cancers and respiratory illnesses due to exposure to metalworking fluids. OSHA sent an interim response to the UAW stating that the decision to proceed with rulemaking would depend on the results of the OSHA Priority Planning Process. Following the Priority Planning Process report, which identified metalworking fluids as an issue worthy of Agency action, the Assistant Secretary asked the National Advisory Committee on Occupational Safety and Health (NACOSH) for a recommendation about how to proceed with metalworking fluids. NACOSH unanimously recommended that OSHA form a Standards Advisory Committee (SAC) to address the health risks caused by occupational exposure to metalworking fluids. The Assistant Secretary accepted the recommendation of NACOSH; OSHA has established a 15-member SAC to make recommendations regarding a standard, a guideline, or other appropriate response to the dangers of occupational exposures to metalworking fluids. The Committee has a balanced membership, including individuals appointed to represent the following affected interests: industry; labor; Federal and State safety and health organizations; professional organizations; and national standards-setting groups.

Statement of Need:

Under Table Z-1 of the 1971 air contaminants rule, OSHA enforces a permissible exposure limit of 5 mg/m3 for mineral oil mists, but evidence suggests this level is outdated and that exposure to metalworking fluids can lead to cancer, non-malignant lung disease, and dermatitis. Giving a SAC the opportunity to examine and comment upon current studies and data concerning the risks associated with all metalworking fluid mixtures (straight oils, synthetic, and semisynthetic) will provide valuable information the Agency can use to develop a proposed rule for metalworking fluids or other appropriate response to hazards posed by occupational exposure to metalworking fluids. The SAC will also report on related issues such as fluid management, engineering controls, medical surveillance, and economic and technological feasibility.

Summary of the Legal Basis:

The legal basis for convening this standards advisory committee is found at section 7(b) of the OSH Act.

Alternatives:

The Agency recognizes the complex and difficult nature of the issues surrounding the regulation of metalworking fluids and believes a SAC can best alleviate some areas of confusion. The Committee has a unique opportunity to provide needed data and academic and professional expertise, as well as large and small industry and labor perspectives. Through OSHA's exhaustive Priority Planning Process and NACOSH recommendations, metalworking fluids were identified as a regulatory candidate that could be handled most successfully through a SAC. The option of going directly to 6(b) rulemaking has been bypassed in favor of a SAC, which will give beneficial input to the agency as to how best to deal with the problems and the opportunity to build some consensus before a proposal is issued.

Anticipated Costs and Benefits:

Because the SAC is still considering the issues, the form of the Committee's recommendations is unknown at the present time. However, once the SAC report is written, OSHA will review it and determine how to proceed with a proposed rule and other actions to protect employees. Quantitative estimates of costs and benefits will be made only after the proposed rule has been drafted.

Risks:

OSHA has not yet assessed the risks confronting workers exposed to metalworking fluids, although the National Institute for Occupational Safety and Health has published risk estimates for some of the adverse health effects of interest to the SAC.

Additional Information:

The Agency is particularly concerned with the potential impact a metalworking fluids rule would have on small businesses. OSHA has been working closely with the Small Business Administration to reach small employers in order to involve them in the process at the earliest possible time. At least 30 small business interests have been identified to date. The Agency is required to have balanced committee representation and small business is represented on the SAC.

74. OCCUPATIONAL EXPOSURE TO CRYSTALLINE SILICA

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

29 USC 655(b); 29 USC 657

CFR Citation:

29 CFR 1910; 29 CFR 1926; 29 CFR 1915; 29 CFR 1916; 29 CFR 1917; 29 CFR 1918

Legal Deadline:

None

Abstract:

Silica exposure remains a serious threat to nearly 2 million U.S. workers, including more that 100,000 workers in high risk jobs such as abrasive blasting, foundry work, stonecutting, rock drilling, quarry work and tunneling. The seriousness of the health hazards associated with silica exposure is demonstrated by the fatalities and disabling illnesses that continue to occur in sandblasters and rock drillers and by recent studies that demonstrate

a statistically significant increase in lung cancer among silica-exposed workers. In October 1996, the International Agency for Research on Cancer classified crystalline silica as "carcinogenic to humans." Exposure studies indicate that some workers are still exposed to very high levels of silica. Although OSHA currently has a permissible exposure limit for crystalline silica (10mg/m3 divided by the percent of silica in the dust + 2, respirable), more than 30 percent of OSHA-collected silica samples from 1982 through 1991 exceeded this limit. Additionally, recent studies suggest that the current OSHA standard is insufficient to protect against silicosis. For example, a recent study concluded that a 45-year exposure under the current OSHA standard would lead to a lifetime risk of silicosis of 35 percent to 47 percent.

OSHA plans to publish a proposed rule on crystalline silica because the agency has preliminarily concluded that there will be no significant progress in the prevention of silica-related diseases without the adoption of a full and comprehensive silica standard, including provisions for exposure monitoring, engineering and work practice controls, training and education, respiratory protection, and medical surveillance. A comprehensive standard will improve worker protection, ensure adequate prevention programs, and further reduce the incidence of silica-related diseases.

Statement of Need:

The current OSHA permissible exposure limit for silica is 10mg/m3 divided by the percent of silica in the dust + 2 (respirable) and 30 mg/m3 divided by the percent of silica in the dust + 2 (total dust). In the interval since this limit was promulgated, there have been a number of studies of workers that have estimated that close to 50 percent of workers exposed to silica at the current limit for a 45-year working lifetime would develop silicosis, a disabling, progressive and sometimes fatal disease involving scarring of the lung, coughing, and shortness of breath. There are currently about 300 deaths reported per year from silicosis. However, the actual number of cases and the true risk is unknown due to inadequate case ascertainment, which means that the number of deaths is probably under-reported. Also, since the promulgation of OSHA's permissible exposure limit studies have demonstrated a statistically significant, dose-related increase in lung cancer in several occupational groups.

Because of these recent findings, OSHA believes that it will be necessary to conduct a risk assessment to determine whether the current permissible exposure limit is protective of worker health. OSHA also believes that, in addition to the permissible exposure limit, the ancillary provisions, such as engineering controls, provided by a comprehensive standard will be necessary to reduce worker exposure to crystalline silica.

Summary of the Legal Basis:

The legal basis for the proposed rule is a preliminary determination by the Secretary of Labor that exposure to silica at the Agency's current permissible exposure limits poses a significant risk of material impairment of health and that a standard will substantially reduce that risk.

Alternatives:

OSHA has considered or conducted several programs designed to reduce worker exposure to crystalline silica. The OSHA Special Emphasis Program for Silicosis provides inspection targeting to reduce or eliminate workplace exposures to crystalline silica. The National Campaign to Eliminate Silicosis being conducted by OSHA (in conjunction with the National Institute for Occupational Safety and Health, the Mine Safety and Health Administration, and the American Lung Association) is an ongoing program involving outreach and education and the dissemination of materials on methods to reduce worker exposure to crystalline silica. Other nonregulatory approaches might include the issuance of nonmandatory guidelines, enforcing lower limits through the "general duty" clause of the OSH Act in cases where substantial evidence exists that exposure presents a recognized hazard of death or serious physical harm, and the issuance of hazard alerts. Although these approaches may be partially effective in reducing worker exposure to crystalline silica and reducing disease risk, OSHA believes that progress in the prevention of silica-related diseases demands the issuance of a comprehensive silica standard.

Anticipated Costs and Benefits:

The scope of the proposed rule is currently under development, and thus quantitative estimates of costs and benefits have not been determined at this time.

Risks:

OSHA has not yet completed an assessment of the risks of exposure to crystalline silica. Other studies have shown risks ranging from 35 to 47 percent among workers exposed over a working lifetime and have additionally identified silica as a potential occupational carcinogen.

PROPOSED RULE STAGE

---

75. STEEL ERECTION (PART 1926) (SAFETY PROTECTION FOR IRONWORKERS)

Priority:

Economically Significant. Major under 5 USC 801.

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

29 USC 655; 40 USC 333

CFR Citation:

29 CFR 1926.750 (Revision); 29 CFR 1926.751 (Revision); 29 CFR 1926.752 (Revision)

Legal Deadline:

None

Abstract:

On December 29, 1992, the Occupational Safety and Health Administration (OSHA) announced its intention to form a negotiated rulemaking advisory committee to negotiate issues associated with a revision of the existing steel erection standard. The Steel Erection Negotiated Rulemaking Advisory Committee (SENRAC), a 20-member committee, was established, and the SENRAC charter was signed by Secretary Reich on May 26, 1994 and was recently re-chartered for a 2-year period. The primary issues the committee negotiated include the need to expand the scope and application of the existing standard to include construction specifications and work practices, written construction safety erection plans, and fall protection. The Committee met 11 times over an 18-month period and completed work on the draft regulatory text for the proposed steel erection standard on December 1, 1995.

The negotiated rulemaking process has been successful in bringing together the interested parties that will be affected by the proposed revision to the steel erection rule to work out contrasting positions, find common ground on the major issues, and develop language for a proposed rule. The use of this process and a neutral facilitator allowed the stakeholders to develop an ownership stake in the proposal that they would not have had without the use of this process.

The process has led to a proposed revision to subpart R of 29 CFR 1926 that contains innovative provisions that will help to minimize the major causes of steel erection injuries and fatalities. Many of these provisions could not have been developed without this process, which has brought together industry and labor experts, via face-to-face negotiations, to discuss different approaches to resolving the issues. This process has proved mutually beneficial to all the parties involved (including OSHA), with each Committee member participating in resolving the issues and developing practical and effective rules to make the steel erection industry safer.

Statement of Need:

In 1989, OSHA was petitioned by the Ironworkers Union and National Erectors Association to revise its construction safety standard for steel erection through the negotiated rulemaking process. OSHA asked an independent consultant to review the issues involved in a steel erection revision, render an independent opinion, and recommend a course of action to revise the standard. The consultant recommended that OSHA address the issues through negotiated rulemaking. Based on the consultant's findings and the continued requests for negotiated rulemaking, OSHA decided to use the negotiated rulemaking process to develop a proposed revision of subpart R. The use of negotiated rulemaking was thought to be the best approach to resolving steel erection safety issues, some of which have proven intractable in the past.

Summary of the Legal Basis:

The legal basis for the proposed steel erection rule is a preliminary finding that workers engaged in steel erection work are at significant risk of serious injury or death as a result of that work.

Alternatives:

An alternative to using the negotiated rulemaking process is to publish a notice of proposed rulemaking developed by Agency staff and consider the concerns of the affected interests through the public comment and public hearing process. OSHA anticipated that this alternative would result in an extremely long and contentious rulemaking proceeding, with subsequent challenge in the Court of Appeals. Another alternative would be not to revise the Agency's current steel erection rules for construction. This alternative was rejected because it would permit steel erection-related injuries and fatalities to continue.

Anticipated Costs and Benefits:

The estimated compliance costs of the proposal are approximately $50 million per year, and the Agency believes that the benefits of the standard would include the prevention of an estimated 14 fatalities and 824 lost workday injuries per year.

Risks:

The risk associated with steel erection activities is great. OSHA estimates that 28 workers are killed every year during steel erection activities. Falls are currently the number one killer of construction workers, and since the erection of buildings necessarily involves high exposure to fall hazards, the central focus of this rule will be to eliminate or reduce the risks associated with falls.

76. PREVENTION OF WORK-RELATED MUSCULOSKELETAL DISORDERS

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

29 USC 651; 29 USC 652; 29 USC 655; 29 USC 657; 33 USC 941; 40 USC 333

CFR Citation:

29 CFR 1910; 29 CFR 1915

Legal Deadline:

None

Abstract:

Work-related musculoskeletal disorders (MSDs) are a leading cause of pain, suffering, and disability in American workplaces. Since the 1980's, the Occupational Safety and Health Administration (OSHA) has had a number of initiatives related to addressing these problems, including enforcement under the general duty clause, issuance of guidelines for the meatpacking industry, and

development of other compliance-assistance materials.

Ultimately, the Agency decided that, given the increasing magnitude of the problem, a regulatory approach should be explored to ensure that the largest possible number of employers and employees become aware of the problems and ways of preventing work-related musculoskeletal disorders. OSHA has examined and analyzed the extensive scientific literature documenting the problem of work-related musculoskeletal disorders, the causes of the problem, and effective solutions; conducted a telephone survey of over 3,000 establishments regarding their current practices to prevent work-related musculoskeletal disorders; and completed a number of site visits to facilities with existing programs. The Agency has also held numerous stakeholder meetings to solicit input from individuals regarding the possible contents of a standard to prevent work-related musculoskeletal disorders. Agency representatives have delivered numerous outreach presentations to people who are interested in this subject and consulted professionals in the field to obtain expert opinions on the options considered by the Agency. Information obtained from these activities is undergoing Agency review. Options for regulatory action are being developed.

The Agency believes that the scientific evidence supports the need for a standard and that the availability of effective and reasonable means to control these hazards has been demonstrated. The criteria that have been developed for setting OSHA priorities support the need to reduce the incidence of work-related musculoskeletal disorders. The Agency is currently developing a proposed rule for ergonomics. The National Institute for Occupational Safety and Health (NIOSH) has issued a report evaluating the scientific basis for the relationship of workplace stressors to MSDs. The report concludes that such a relationship exists for many stressors.

Statement of Need:

OSHA estimates that work-related musculoskeletal disorders in the United States account for over 600,000 injuries and illnesses (34 percent of all lost workdays reported to the Bureau of Labor Statistics (BLS)). These disorders now account for one out of every three dollars spent on workers' compensation. It is estimated that employers spend $20 billion a year on direct costs for MSD-related workers' compensation, and up to five times that much for indirect costs, such as those associated with hiring and training replacement workers. In addition to these monetary effects, MSDs often impose a substantial personal toll on affected workers who can no longer work or perform simple personal tasks like buttoning their clothes or brushing their hair.

Scientific evidence associates MSDs with stresses to various body parts caused by the way certain tasks are performed. The positioning of the body and the type of physical work that must be done to complete a job may cause persistent pain and lead to deterioration of the affected joints, tissues, and muscles. The longer the worker must maintain a fixed or awkward posture, exert force, repeat the same movements, experience vibration, or handle heavy items, the greater the chance that such a disorder will occur. These job-related stresses are referred to as "workplace risk factors," and the scientific literature demonstrates that exposure to these risk factors, particularly in combination, significantly increases an employee's risk of developing a work-related musculoskeletal disorder. Jobs involving exposure to workplace risk factors appear in all types of industries and in all sizes of facilities.

Musculoskeletal disorders occur in all parts of the body-- the upper extremity, the lower extremity, and the back. An example of the increasing magnitude of the problem involves repeated trauma to the upper extremity, or that portion of the body above the waist, in forms such as carpal tunnel syndrome and shoulder tendinitis. In 1996, employers reported 281,000 repeated trauma cases to the BLS. As a point of comparison, the number of reported cases in this category was only 22,700 in 1981. When the data are adjusted to reflect changes in the size of the employee population, they indicate that such cases have increased more than 7-fold in the last ten years. In industries such as meatpacking and automotive assembly, approximately 10 out of 100 workers report work-related MSDs from repeated trauma each year. The number of work-related back injuries occurring each year is even larger than the number of upper extremity disorders. Industries reporting a large number of cases of back injuries include hospitals and personal care facilities.

The evidence OSHA has assembled and analyzed indicates that technologically and economically feasible measures are available to significantly reduce exposures to workplace risk factors and the risk of developing work-related musculoskeletal disorders. Many companies that have voluntarily implemented ergonomics programs have demonstrated that effective ergonomic interventions are available to reduce MSDs. Many of these interventions are simple and inexpensive, but nevertheless have a significant effect on the occurrence of work-related musculoskeletal disorders. Benefits include substantial savings in workers' compensation costs, increased productivity, and decreased turnover.

Summary of the Legal Basis:

The legal basis for this proposed rule is a preliminary finding by the Secretary of Labor that workers in workplaces within OSHA's jurisdiction are at significant risk of incurring work-related musculoskeletal disorders.

Alternatives:

OSHA is considering many different regulatory alternatives. These include variations in the scope of coverage, particularly with regard to industrial sectors, work processes, and degree of hazard. The Agency has also considered various phase-in options related to the size of the facility. The agency is still developing and refining its regulatory alternatives.

Anticipated Costs and Benefits:

Implementation costs of a regulation would include those related to identifying and correcting problem jobs using engineering and administrative controls. Benefits expected include reduced pain and suffering, both from prevented disorders as well as reduced severity in those disorders that do occur, decreased numbers of workers' compensation claims, and reduced lost work time. Secondary benefits may accrue from improved quality and productivity due to better designed work systems.

Risks:

The data OSHA has obtained and analyzed indicate that employees are at a significant risk of developing or aggravating musculoskeletal disorders due to exposure to risk factors in the workplace. In addition, information from site visits, the scientific literature, the Agency's compliance experience, and other sources indicates that there are economically and technologically feasible means of addressing and reducing these risks to prevent the development or aggravation of such disorders, or to reduce their severity. These data and analyses will be presented in the preamble to any proposed standard published in the Federal Register.

Abstract:

The Occupational Safety and Health Administration (OSHA), many of the States, members of the safety and health community, insurance companies, professional organizations, companies participating in the Agency's Voluntary Protection Program, and many proactive employers in all industries have recognized the value of worksite-specific safety and health programs in preventing job-related injuries, illnesses, and fatalities. The effectiveness of these programs is seen most dramatically in the reductions in job-related injuries and illnesses, workers' compensation costs, and absenteeism that occur after employers implement such programs. To assist employers in establishing safety and health programs, OSHA in 1989 (54 FR 3904) published nonmandatory guidelines that were based on a distillation of the best safety and health management practices observed by OSHA in the years since the Agency was established. OSHA's decision to expand on these guidelines by developing a safety and health programs rule is based on the Agency's recognition that occupational injuries, illnesses, and fatalities are continuing to occur at an unacceptably high rate; for example, an average of about 17 workers were killed each day in 1997 in occupational fatalities.

The safety and health programs required by the proposed rule will include at least the following elements: management leadership of the program; active employee participation in the program; analysis of the worksite to identify serious safety and health hazards of all types; and requirements that employers eliminate or control those hazards in an effective and timely way. In addition, in response to extensive stakeholder involvement, OSHA has, among other things, focused the rule on significant hazards and reduced burdens on small business to the extent consistent with the goals of the OSH Act.

Statement of Need:

Worksite-specific safety and health programs are increasingly being recognized as the most effective way of reducing job-related accidents, injuries, and illnesses. Many States have to date passed legislation and/or regulations mandating such programs for some or all employers, and insurance companies have also been encouraging their client companies to implement these programs, because the results they have achieved have been dramatic. In addition, all of the companies in OSHA's Voluntary Protection Program have established such programs and are reporting injury and illness rates that are sometimes only 20 percent of the average for other establishments in their industry. Safety and health programs apparently achieve these results by actively engaging front-line employees, who are closest to operations in the workplace and have the highest stake in preventing job-related accidents, in the process of identifying and correcting occupational hazards. Finding and fixing workplace hazards is a cost-effective process, both in terms of the avoidance of pain and suffering and the prevention of the expenditure of large sums of money to pay for the direct and indirect costs of these injuries and illnesses. For example, many employers report that these programs return between $5 and $9 for every dollar invested in the program, and almost all employers with such programs experience substantial reductions in their workers' compensation premiums. OSHA believes that having employers evaluate the job-related safety and health hazards in their workplace and address any hazards identified before they cause occupational injuries, illnesses, or deaths is an excellent example of "regulating smarter," because all parties will benefit: workers will avoid the injuries and illnesses they are currently experiencing; employers will save substantial sums of money and increase their productivity and competitiveness; and OSHA's scarce resources will be leveraged as employers and employees join together to identify, correct, and prevent job-related safety and health hazards.

Summary of the Legal Basis:

The legal basis for the proposed rule is a preliminary finding by the Secretary of Labor that employees in industries within OSHA's jurisdiction are at significant risk of injury, illness, and death as a result of their work and that the safety and health programs required by the rule are necessary and appropriate to reduce that risk.

Alternatives:

In the last few years, OSHA has considered both nonregulatory and regulatory alternatives in the area of safety and health program management. First, OSHA published, in 1989, a set of voluntary management guidelines designed to assist employers to establish and maintain programs such as the one envisioned by the proposed safety and health programs rule. Although these guidelines have received widespread praise from many employers and professional safety and health associations, they have not been adequately effective in reducing job-related deaths, injuries, and illnesses, which have continued to occur at unacceptably high levels. Many of the States have also recognized the value

of these programs and have mandated that some or all covered employers establish them; this has led to inconsistent coverage from State to State, with many States having no coverage and others imposing stringent program requirements.

Anticipated Costs and Benefits:

Costs and benefits have not been determined at this time.

Risks:

Workers in all major industry sectors in the United States continue to experience an unacceptably high rate of occupational fatalities, injuries, and illnesses. In 1996 the Bureau of Labor Statistics reports that 6.2 million injuries and illnesses occurred within private industry, and in 1997, 6,218 workers lost their lives on the job. There is increasing evidence that addressing hazards in a piecemeal fashion, as employers tend to do in the absence of a comprehensive safety and health program, is considerably less effective in reducing accidents than a systematic approach. Dramatic evidence of the seriousness of this problem can be found in the staggering workers' compensation bill paid by America's employers and employees: approximately $54 billion annually. These risks can be reduced by the implementation of safety and health programs, as evidenced by the experience of OSHA's Voluntary Protection Program participants, who regularly achieve injury and illness rates averaging one-fifth to one-third those of competing firms in their industries. Other benefits of reducing accidents include enhanced productivity, improved employee morale, and reduced absenteeism. Because these programs address all significant job-related hazards--including those that are covered by OSHA standards as well as those not currently addressed by these standards--the proposed rule will be effective in ensuring a systematic approach to the control of long-recognized hazards, such as lead, and emerging hazards, such as lasers and violence in the workplace.

78. OCCUPATIONAL EXPOSURE TO TUBERCULOSIS

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect the private sector under PL 104-4.

Legal Authority:

29 USC 655(b)

CFR Citation:

29 CFR 1910.1035

Legal Deadline:

None

Abstract:

On August 25, 1993, the Occupational Safety and Health Administration (OSHA) was petitioned by the Labor Coalition to Fight TB in the Workplace to initiate rulemaking for a permanent standard to protect workers against occupational transmission of tuberculosis (TB). Although the Centers for Disease Control and Prevention (CDC) have developed recommendations for controlling the spread of TB in several work settings (e.g., correctional institutions, health-care facilities, and homeless shelters), the petitioners stated that in every recent TB outbreak investigated by the CDC, noncompliance with CDC's TB control guidelines was evident. After reviewing the available information, OSHA preliminarily concluded that a significant risk of occupational transmission of TB exists for some workers and has accordingly issued a proposed rule. OSHA already regulates the exposure to the biological hazard of bloodborne pathogens (e.g. HIV, hepatitis B) under 29 CFR 1910.1030 and believes that development of a TB standard is consistent with the Agency's mission and previous activity. On October 17, 1997, OSHA published its proposed standard for occupational exposure to tuberculosis (62 FR 54160). The proposed rule covers workers in hospitals, nursing homes, hospices, correctional facilities, homeless shelters, and certain other work settings where workers are at significant risk of incurring TB infection while caring for their patients and clients or performing certain procedures. The proposed standard would require employers to protect TB-exposed employees by means of infection prevention and control measures that have been demonstrated to be highly effective in reducing or eliminating job-related TB infections. Such measures include procedures for early identification of individuals with infectious TB, isolation of individuals with infectious TB using appropriate ventilation, use of respiratory protection in certain situations, skin testing and training of employees with occupational exposure, and medical management and follow-up after exposure incidents or skin test conversions.

The written comment period ended on February 17, 1998. Subsequently, informal public hearings were held in Washington, DC (April 7-17), Los Angeles, CA (May 5-7), New York City, NY (May 19-21) and Chicago, IL (June 2-4). At the end of the hearings a post-hearing comment period was established. The deadline for final summation, briefs and written comments is October 5, 1998.

In addition to the public hearings, OSHA consulted with parties outside of the Agency with regard to the proposal. The preliminary Risk Assessment was peer-reviewed by four individuals with specific knowledge in the areas of tuberculosis and risk assessment. In addition, OSHA conducted stakeholder meetings with representatives of relevant professional organizations, trade associations, labor unions, and other groups. The proposal was also reviewed and commented on by affected small business entities under the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA). In addition, the draft proposed standard and preamble were reviewed by the Office of Management and Budget.

Statement of Need:

For centuries, TB has been responsible for the deaths of millions of people throughout the world. TB is a contagious disease caused by the bacterium *Mycobacterium tuberculosis*. Infection is generally acquired by the inhalation of airborne particles carrying the bacterium. These airborne particles, called droplet nuclei, can be generated when persons with pulmonary or laryngeal tuberculosis in the infectious state of the disease cough, sneeze, speak, or sing. In some individuals exposed to droplet nuclei, TB bacilli enter the alveoli and establish an infection. In most cases, the bacilli are contained by the individual's immune response. However, in some cases, the bacilli are not contained by the immune system and continue to grow and invade the tissue, leading to the progressive destruction of the organ involved. Although in most cases this organ is the lung (i.e., pulmonary tuberculosis), other organs outside of the lung may also be infected and become diseased (i.e. extrapulmonary tuberculosis).

From 1953, when active cases began to be reported in the United States, until 1984, the number of annual reported cases declined 74 percent, from 84,304 to 22,255. However, this steady decline in TB cases has not continued. Instead, from 1985 through 1992, the number of reported TB cases increased 20.1 percent. In 1992, more than 26,000 new cases of active TB were reported in the United States. In New York City alone, 3,700 cases of active TB were reported in 1991. While a decrease in active cases has been observed recently, there were still 21,337 reported cases in 1996. A large portion of the decrease occurred in high incidence areas where intervention efforts have been focused. However, over twenty states showed an increase or no change in the number of reported cases in 1996. In addition, the factors that led to the recent resurgence of TB (e.g., increases in homelessness, HIV infection, immigration from countries with high rates of infection) still exist and the job duties of certain workers require them to be exposed to patients and clients with suspected or confirmed infectious TB. In addition, strains of tuberculosis have emerged that are resistant to several of the first-line anti-TB drugs. This multidrug-resistant TB (MDR-TB) is often fatal due to the difficulty of halting the progression of the disease. Individuals with MDR-TB often remain infectious for longer periods of time due to delays in diagnosing resistance patterns and initiating proper treatment. This lengthened period of infectiousness increases the risk that the organism will be transmitted to other persons coming in contact with such individuals.

Providing health care for individuals with TB increases the risk of occupational exposure among health care workers. In fact, several outbreaks of tuberculosis, including MDR-TB, have recently occurred in health care facilities, resulting in transmission to both patients and health care workers. CDC found that factors contributing to these outbreaks included delayed diagnosis of TB, delayed recognition of drug resistance, delayed initiation of effective therapy, delayed initiation and inadequate duration of TB isolation, inadequate ventilation in TB isolation rooms, lapses in TB isolation practices, inadequate precautions for cough-inducing procedures, and lack of adequate respiratory protection. CDC analyzed data from three of the health care facilities involved in the outbreaks, and determined that transmission of TB decreased significantly or ceased entirely in areas where recommended TB control measures were implemented. In addition workers outside of health care may provide services to patient or client populations that have an increased rate of TB. For example, occupational transmission of TB has been documented in correctional facilities.

Summary of the Legal Basis:

The legal basis for the proposed TB standard is a preliminary finding by the Secretary of Labor that workers in hospitals, nursing homes, hospices, correctional facilities, homeless shelters, and certain other work settings are at significant risk of incurring TB infection while caring for their patients and clients or performing certain procedures.

Alternatives:

Prior to a decision to publish a proposal, OSHA considered a number of options, including whether or not to develop an emergency temporary standard, publish an advance notice of proposed rulemaking, or to enforce existing regulations.

Anticipated Costs and Benefits:

Costs will be incurred by employers for engineering controls, respiratory protection, medical surveillance, training, exposure control, recordkeeping, and work practice controls. Benefits will include the prevention of occupationally-related TB transmissions and infections, and a corresponding reduced risk of exposure among the general population. OSHA estimates that more than 5 million workers are exposed to TB in the course of their work. The Agency estimates that the proposed provisions will result in an annual cost of 245 million dollars. Implementation of the standard is estimated to reduce the number of job-related cases of TB by 70-90 percent in the work settings covered, thus preventing approximately 21,400 to 25,800 work-related infections per year, 1,500 to 1,700 active cases of TB resulting from these infections, and 115 to 136 deaths resulting from these active cases.

Risks:

From 1985 to 1992, the number of reported cases of TB in the U.S. increased, reversing a previous 30-year downward trend. While there has been a recent decrease in the reported number of cases of TB in the general population, a large part of this decrease can be attributed to focused intervention efforts in areas of high incidence of TB. Over 20 states showed an increase or no change in the number of reported TB cases in 1996, and the factors that contributed to the resurgence continue to exist, along with exposure of certain workers to patient and client populations with an increased rate of TB. In addition, strains of multidrug-resistant TB have emerged which are more often fatal. Therefore, employees in work settings such as health care or correctional facilities, who have contact with infectious individuals, are at high risk of occupational transmission. TB is a contagious disease spread by airborne particles known as droplet nuclei. Active disease can cause signs and symptoms such as fatigue, weight loss, fever, night sweats, loss of appetite, persistent cough, and shortness of breath, and may possibly result in serious respiratory illness or death.

79. PERMISSIBLE EXPOSURE LIMITS (PELS) FOR AIR CONTAMINANTS

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect the private sector under PL 104-4.

Legal Authority:

29 USC 655 (b)

CFR Citation:

29 CFR 1910.1000

Legal Deadline:

None

Abstract:

OSHA enforces hundreds of permissible exposure limits (PELs) for toxic air contaminants found in U.S. workplaces. These PELs set OSHA-enforceable limits on the magnitude and duration of employee exposure to each contaminant. The amount of exposure permitted by a given PEL depends on the toxicity and other characteristics of the particular substance. OSHA's PELs for air contaminants are codified in 29 CFR 1910.1000, Tables Z-1, Z-2, and Z-3. The air contaminant limits were adopted by OSHA in 1971 from existing national consensus standards issued by the American Conference of Governmental Industrial Hygienists and the American National Standards Institute. These PELs, which have not been updated since 1971, thus reflect the results of research conducted in the 1950s and 1960s. Since then, much new information has become available that indicates that, in most cases, these early limits are outdated and insufficiently protective of worker health. To correct this situation, OSHA published a proposal in 1988 updating the air contaminant limits in general industry. That proposal became a final rule in 1989 (54 FR 2332); it lowered the existing PELs for 212 toxic air contaminants and established PELs for 164 previously unregulated air contaminants. On June 12, 1992 (57 FR 26001), OSHA proposed a rule that would have extended these limits to workplaces in the construction, maritime, and agriculture industries. However, on July 10, 1992, the Eleventh Circuit Court of Appeals vacated the 1989 final rule on the grounds that "(1) OSHA failed to establish that existing exposure limits in the workplace presented significant risk of material health impairment or that new standards eliminated or substantially lessened the risk; (2) OSHA did not meet its burden of establishing that its 428 new permissible exposure limits (PELs) were either economically or technologically feasible." The Court's decision to vacate the rule forced the Agency to return to the earlier, insufficiently protective limits.

OSHA continues to believe that establishing a rulemaking approach that will permit the Agency to update existing air contaminant limits and establish new ones as toxicological evidence of the need to do so becomes available is a high priority. The rulemaking described in this Regulatory Plan entry reflects OSHA's intention to move forward with this process. In determining how to proceed, OSHA is being guided by the OSH Act and the Eleventh District Court decision regarding the extent of the risk and feasibility analyses required to support revised and new air contaminant limits. The Agency will rely on a risk-based prioritization system to identify those air contaminants that present significant risks to exposed employees and for which technologically and economically feasible controls exist. State-of-the-art risk assessment methodologies will be utilized for both carcinogens and noncarcinogens, and the determinations of feasibility contained in the economic analysis accompanying the proposal will be extensive. OSHA published (61 FR 1947) the substances selected for proposed new PELs for the first update of the air contaminants rule: carbon disulfide, carbon monoxide, chloroform, dimethyl sulfate, epichlorohydrin, ethylene dichloride, glutaraldehyde, n-hexane, 2-hexanone, hydrazine, hydrogen sulfide, manganese and compounds, mercury and compounds, nitrogen dioxide, perchloroethylene, sulfur dioxide, toluene, toluene diisocyanate, trimellitic anhydride, and vinyl bromide. The specific hazards associated with the air contaminants preliminarily selected for regulation include cancer, neurotoxicity, respiratory sensitivity, etc. Using the same criteria as those used in the Priority Planning Process, OSHA evaluated each substance: severity of the health effect, the number of exposed workers, toxicity of the substance, uses and prevailing exposure levels of the substance, the potential risk reduction, availability and quality of information useful in quantitative risk assessment to ensure that significant risks are addressed and that workers will experience substantial benefits in the form of enhanced health and safety. Publication of the proposal will allow OSHA to institutionalize a mechanism for updating and extending its air contaminant limits, which will, at the same time, provide added protection to many workers who are currently being overexposed to toxic substances in the workplace. OSHA is also considering supplemental mechanisms proposed by stakeholders to increase the effectiveness of the process.

Statement of Need:

OSHA's current Tables Z-1, Z-2, and Z-3 contain approximately 470 PELs for various forms (e.g., dust, fumes, vapors) of the regulated contaminants, many of which are widely used in industrial settings. These PELs, which were adopted wholesale by OSHA in 1971 and have not been revised since then, often lead to adverse effects when workers are exposed to them. In addition, new chemicals are constantly being introduced into the working environment, and exposure to these substances can result in both acute and chronic health effects. Acute effects include respiratory and sensory irritation, chemical burns, and ocular damage; chronic effects include cardiovascular disease, respiratory, liver and kidney disease, reproductive effects, neurological damage, and cancer. For these reasons, it is a high OSHA priority to establish an ongoing regular process that will allow OSHA routinely to update existing PELs and establish limits for previously unregulated substances. The first step in achieving this goal is to publish an air contaminants proposal for a number of substances that will establish streamlined but scientifically sound and defensible procedures for conducting risk assessments and performing feasibility analyses that will permit regular updating and review of permissible exposure limits for air contaminants. The ability to lower existing limits and establish limits for new contaminants is an essential component of OSHA's mandate to protect the health and functional well-being of America's workers.

Summary of the Legal Basis:

The legal basis for the proposed PELs for selected air contaminants is a preliminary determination by the Secretary of Labor that the substances for which PELs are being proposed pose a significant risk to workers and that the new limits will substantially reduce that risk.

Alternatives:

OSHA has considered a variety of nonregulatory approaches to address the problem of the Agency's outdated exposure limits for air contaminants. These include the issuance of nonmandatory guidelines, enforcing lower limits through the "general duty" clause of the OSH Act in cases where substantial evidence exists that exposure presents a recognized hazard of serious physical harm, and the issuance of hazard alerts. OSHA believes, however, that the problem of overexposure to hazardous air contaminants is so widespread, and the Agency's current limits are so out of date, that only a regulatory approach will achieve the necessary level of protection. The regulatory approach also has advantages for employers, because it gives them the information they need to establish appropriate control strategies to protect their workers and reduce the costs of job-related illnesses. This first phase of an ongoing air contaminants updating and revision process will begin to resolve a problem of long-standing and major occupational health import.

Anticipated Costs and Benefits:

The scope of the proposed rule is currently under development, and thus quantitative estimates of costs and benefits have not been determined at this time. Implementation costs associated with the proposed standard include primarily those related to identifying and correcting over-exposures using engineering controls and work practices. Additional costs may be incurred for the implementation of administrative controls and the purchase and use of personal protective equipment. Estimates of the magnitude of the problem of occupational illnesses, both acute and chronic, vary considerably. In 1989, OSHA concluded that its Air Contaminants rule in general industry, which lowered 212 exposure limits and added 164 where none had previously existed, would result in a reduction of approximately 700 deaths, 55,000 illnesses and over 23,300 lost-workday illnesses annually. Chronic effects include cardiovascular disease, respiratory, liver and kidney disease, reproductive effects, neurological damage, and cancer. Acute effects include respiratory and sensory irritation, chemical burns, and ocular effects.

Risks:

Risk assessments for the substances under consideration for this first phase of the air contaminants updating and revision process have not yet been completed.

80. PLAIN LANGUAGE REVISION OF EXISTING STANDARDS (PHASE I)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

29 USC 655(b); 5 USC 553

CFR Citation:

29 CFR 1910.107; 29 CFR 1910.94(c); 29 CFR 1910.94(d); 29 CFR 1910.35; 29 CFR 1910.36; 29 CFR 1910.37; 29 CFR 1910.38

Legal Deadline:

None

Abstract:

The Occupational Safety and Health Administration (OSHA) adopted its initial package of workplace safety and health standards in the 1970's. Section 6(a) of the Act directed OSHA to adopt nationally recognized consensus standards, developed by groups such as the National Fire Protection Association (NFPA) and the American National Standards Institute (ANSI), and existing Federal standards as OSHA standards without public participation or other public comment. Many of these standards have been identified by the regulated community as being overly complex, difficult to read and follow, and out of date with current technology.

This project is part of a Presidential initiative to respond to concerns about the complexity and obsolescence of certain Federal regulations. OSHA believes that some of the Agency's section 6(a) standards in subpart E and subpart H of part 1910 meet the criteria

for critical review set forth in the Presidential initiative. OSHA is initiating two separate rulemakings that will revise two of OSHA's most complex and out-of-date section 6(a) standards. These specific standards address means of egress (exit routes) and spray finishing using flammable and combustible liquids. Section 1910.107 (spray finishing using flammable and combustible liquids) also contains substantive ventilation requirements that duplicate ventilation requirements contained in section 1910.94, paragraphs (c) and (d). The purpose of these rulemakings is to simplify and clarify these standards and to write them in "plain language," as directed by the President's report and the June 1998 Executive Memorandum on Plain Language.

Statement of Need:

These two OSHA standards are being revised as part of the President's initiative on Federal regulations discussed in the U.S. Department of Labor report of June 15, 1995 and in response to the June 1998 Executive Memorandum.

Exposure to flammable and combustible liquids during spray applications creates a variety of safety and health problems, including thermal burns, chemical burns, smoke inhalation, respiratory inflammations and infections, nausea, dizziness, including respiratory allergies, heart disease, lung cancer, decreases in pulmonary function, and other serious injuries and illnesses.

In case of an emergency, proper exit routes are needed both to protect employees from being trapped in hazardous work areas and to guide employees to safety.

Summary of the Legal Basis:

The legal basis for issuing these plain language rules derives from the OSH Act and responds to the Executive Memo issued by the President in June 1998.

Alternatives:

OSHA has considered two alternatives to rewriting these rules in plain language: leaving the rules unchanged and initiating a comprehensive revision and updating of these rules. The first alternative has been rejected because it would leave these complex and specification-driven rules in place, a situation that has led to confusion and misinterpretations in the past. Carrying out the second alternative--conducting comprehensive rulemaking--would take many years, and would, again, allow the current situation to continue. The approach OSHA has taken--conducting rulemaking for the limited but important purpose of rewriting these rules in plain language--is the fastest and least resource-intensive approach to the problems presented by these rules.

Anticipated Costs and Benefits:

Because these plain language revisions are not substantively changing these rules, no cost impacts will be associated with these revisions.

Risks:

Because these revisions are designed solely to simplify and clarify these standards, no assessment of risks is required.

DOL—OSHA

81. REQUIREMENT TO PAY FOR PERSONAL PROTECTIVE EQUIPMENT

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

29 USC 655(b); 29 USC 657; 33 USC 941; 40 USC 333

CFR Citation:

29 CFR 1910 .132; 29 CFR 1915.152; 29 CFR 1917.96; 29 CFR 1918.106; 29 CFR 1926.95

Legal Deadline:

None

Abstract:

Generally, OSHA standards require that protective equipment (including personal protective equipment (PPE)) be provided and used when necessary to protect employees from hazards which can cause them injury, illness, or physical harm. In this discussion, OSHA uses the abbreviation "PPE" to cover both personal protective equipment and other protective equipment. The Agency is proposing to revise its PPE standards to clarify who is required to pay for required PPE and under what circumstances. According to the proposal, employers would be required to provide all OSHA-required PPE at no cost to employees, with the following exceptions: the employer would not need to pay for safety-toe protective footwear or prescription safety eyewear if all three of the following conditions are met: (1) the employer permits such footwear or eyewear to be worn off the job-site; (2) the footwear or eyewear is not used in a manner that renders it unsafe for use off the job-site (for example, contaminated safety-toe footwear would not be permitted to be worn off a job-site); and (3) such footwear or eyewear is not designed for special use on the job. Employers are also not required to pay for the logging boots required by 29 CFR 1910.266(d)(1)(v).

Statement of Need:

OSHA has been issuing health, safety, and construction standards requiring appropriate PPE over a 28-year period. The regulatory language used in OSHA standards has generally clearly stated that the employer must provide PPE and ensure that employees wear it. However, the regulatory language used regarding the employer's obligation to pay for the PPE has varied.

OSHA attempted to clarify its position on the issue of payment for required PPE in a compliance memorandum to its field staff dated October 18, 1994. The memorandum stated that it was the employer's obligation to provide and pay for PPE except in limited situations.

Very recently, the Occupational Safety and Health Review Commission declined to accept this interpretation (Secretary of Labor v. Union Tank Car, OSHRC No. 96-0563). The Commission vacated a citation against an employer who failed to pay for OSHA-required PPE, finding that the Secretary had failed to adequately explain the policy outlined in the 1994 memorandum in light of several inconsistent earlier letters of interpretation from OSHA.

Therefore, the Agency needs to clarify who is to pay for PPE under what conditions, to eliminate any confusion and unnecessary litigation.

Summary of the Legal Basis:

The legal basis for this proposed rule is the need to clarify OSHA's intent with regard to the payment for protective equipment required by OSHA standards promulgated under section 6 of the OSH Act.

Alternatives:

OSHA has considered several alternative approaches to resolving this issue, including leaving this as a labor-management issue, issuing compliance directives to identify what PPE the employer must pay for, or requiring the employer to pay for all PPE. OSHA believes that, in this case, revising the standard to clarify who is to pay for the PPE is the most appropriate way to proceed. It is the only approach that will assure significant public participation in the resolution of this issue, and the codification of that resolution.

Anticipated Costs and Benefits:

At this stage of rulemaking, the Agency has not determined costs or benefits, and will not be able to do this until the language of the proposal is finalized.

Risks:

Substantive requirements for protective equipment are impacted by other standards. This proposed rule is designed solely to clarify OSHA's intent as to what protective equipment must be paid for by the employer. Accordingly, no assessment of risk is required for this proposal.

DOL—OSHA

FINAL RULE STAGE

82. RECORDING AND REPORTING OCCUPATIONAL INJURIES AND ILLNESSES (SIMPLIFIED INJURY/ILLNESS RECORDKEEPING REQUIREMENTS)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

29 USC 657; 29 USC 673

CFR Citation:

29 CFR 1904; 29 CFR 1952.4

Legal Deadline:

None

Abstract:

OSHA requires employers to keep records of illness and injuries. These records are used by OSHA and the Bureau of Labor Statistics (BLS), among others, to develop data on workplace safety and health by industry and across industries. Over the years, concerns about the reliability and utility of these data have been raised by Congress, the National Institute for Occupational Safety and Health (NIOSH), the National Academy of Sciences, the Office of Management and Budget (OMB), the General Accounting Office, business and labor, as well as BLS and OSHA. In the late 1980's, OSHA contracted with the Keystone Center to bring together representatives of industry, labor, government, and academia in a year-long effort to discuss problems with OSHA's injury and illness recordkeeping system. Keystone issued a report with specific recommendations on how to improve the system. In 1995, OSHA held several meetings with stakeholders from business, labor and government in order to obtain feedback on a draft OSHA recordkeeping proposal and to gather related information.

OSHA published a Notice of Proposed Rulemaking (NPRM) in the February 2, 1996 Federal Register that contained revised recordkeeping requirements and recordkeeping forms. The original 90-day public comment period was extended another 60 days and ended July 2, 1996. In addition, two public meetings were held in Washington, DC (March 26-29 and April 30-May 1). Over 450 written comments were entered into the Docket R-02, along with 1,200 pages of input derived from nearly 60 presentations given at the public meetings.

OSHA is now planning to issue a final rule that incorporates changes based on an analysis of the public comments and testimony.

Statement of Need:

The occupational injury and illness records maintained by employers are an important component of OSHA's

program. The records are used by employers and employees to identify and evaluate workplace safety and health hazards, and they provide OSHA personnel with necessary information during workplace inspections. The records also provide the source data for the Annual Survey of Occupational Injuries and Illnesses conducted by the BLS.

All of these uses of the data are affected by the quality of the records employers maintain. Higher quality data lead to higher quality analyses, which in turn lead to better decisions about occupational safety and health matters. To improve the quality of the records and enhance the utility of the information for all the entities using the data, OSHA needs to provide clearer guidance to employers, simplify the recordkeeping forms, and provide employees with access to the information.

Summary of the Legal Basis:

The legal basis for issuance of this final rule is Section 8(c)(1) of the Act, which requires employers to record and report such records as are necessary for the enforcement of the Act and for developing information on the cases and prevention of occupational accidents and illnesses, as required by regulation, and section 24(a) of the Act, which requires OSHA to develop an effective program of occupational safety and health statistics to further the purposes of the Act.

Alternatives:

One alternative to publication of a final rule is to take no action and continue to administer the injury and illness recordkeeping system using the current regulation, forms and guidelines. Another alternative is to revise the current rule to expand its coverage and scope (i.e., eliminate the current rule's small employer and Standard Industrial Classification exemptions).

The first alternative is unacceptable because it does not address the problems with the current system identified by participants in the Keystone dialogue and other OSHA stakeholders. The second alternative is also unacceptable because it would require many employers, especially small-business employers, in low hazard industries to keep OSHA injury and illness data. This could impose a substantial paperwork burden on those employers without commensurate benefit.

Anticipated Costs and Benefits:

The costs and benefits of the final rule have not yet been determined.

Risks:

Benefits of the proposal would include: (a) a system that is more compatible with and easier for government and employers to use; (b) more reliable and useful records; (c) information for entire construction sites; and (d) greater employee involvement.

BILLING CODE 4510-23-F

DEPARTMENT OF TRANSPORTATION (DOT)

Statement of Regulatory Priorities

The Department of Transportation (DOT) consists of nine operating administrations, the Office of the Secretary, and the Bureau of Transportation Statistics (BTS), each of which has statutory responsibility for a wide range of regulations. For example, DOT regulates safety in the aviation, motor carrier, railroad, mass transit, motor vehicle, maritime, commercial space, and pipeline transportation areas. DOT regulates aviation consumer and economic issues and provides financial assistance and writes the necessary implementing rules for programs involving highways, airports, mass transit, the maritime industry, railroads, and motor vehicle safety. It writes regulations carrying out such disparate statutes as the Americans with Disabilities Act and the Uniform Time Act. It regulates the construction and operation of bridges over navigable waters, the prevention of oil pollution, and the security of commercial aviation and passenger vessels. Finally, DOT has responsibility for developing policies that implement a wide range of regulations that govern internal programs such as acquisition and grants, access for the disabled, environmental protection, energy conservation, information technology, property asset management, seismic safety, security, and the use of aircraft and vehicles.

Although it carries this heavy regulatory workload, the Department has long been recognized as a leader in Federal efforts to improve and streamline the regulatory process and ensure that regulations do not impose unnecessary burdens. A comprehensive internal management and review process for new and existing regulations is codified in the Department's regulatory policies and procedures, which ensure that the Secretary and other appropriate appointed officials review and concur in all significant DOT rules.

For virtually all DOT rules, the initiating office must prepare an analysis that includes a discussion of the problem intended to be addressed, the major alternatives, the reasons for choosing one alternative over another, and the economic and other consequences of the action. The Department has a management process that permits key officials to follow closely the development of significant regulatory projects. The process is intended to ensure that these rulemakings are completed in a timely manner, and it facilitates top management's involvement in these actions.

The Department has adopted a regulatory philosophy that applies to all its rulemaking activities. This philosophy is articulated as follows: DOT regulations must be clear, simple, timely, fair, reasonable, and necessary. They will be issued only after an appropriate opportunity for public comment, which must provide an equal chance for all affected interests to participate, and after appropriate consultation with other governmental entities. The Department will fully consider the comments received. It will assess the risks addressed by the rules and their costs and benefits, including the cumulative effect. The Department will consider appropriate alternatives, including nonregulatory approaches. It will also make every effort to ensure that legislation does not impose unreasonable mandates.

DOT continually seeks ways of improving the way it conducts its regulatory work. The creation of an electronic, internet-accessible docket for the Department; the use of direct final rulemaking; and the increased use of regulatory negotiation are three examples of this.

In responding to other Presidential initiatives, the Department is ensuring that compliance efforts reward results and deemphasize red tape. It is stressing results, and education and training programs, to assist regulators and customers to work together to achieve compliance.

The Department has engaged in a wide variety of activities to help cement the partnerships between its agencies and its customers that will produce good results for transportation programs and safety. These have included summits with front-line regulators and representatives of regulated industries. In addition, the Department's agencies have established a number of continuing partnership mechanisms in the form of rulemaking advisory committees.

The Department of Transportation was a pioneer in creating the regulatory negotiation concept, and it conducted the Federal Government's first negotiated rulemaking. Since that time, DOT has conducted regulatory negotiations on a variety of subjects, such as the Air Carrier Access Act and aspects of the Oil Pollution Act. The Department has also used advisory committees to obtain customer input on regulatory projects, such as the Americans with Disabilities Act rule. Regulatory negotiation projects currently planned, underway, or completed concern such subjects as roadway worker safety (FRA), oxygen use by airline passengers (OST), certification requirement for multistage vehicles (the National Highway Traffic Safety Administration (NHTSA)), incorporating physical fitness determinations in the commercial drivers' license program (FHWA), and qualifications for pipeline personnel and hazardous material standards for unloading cargo tanks in compressed gas service (RSPA).

Throughout the Department, we are also actively engaged in the review of our existing rules to determine whether they need to be revised or revoked. These reviews are in accordance with section 610 of the Regulatory Flexibility Act, the Department's regulatory policies and procedures, Executive Order 12866, and/or the President's directive to "consider writing existing regulations in plain language...."

Office of the Secretary of Transportation (OST)

The Office of the Secretary (OST) oversees the regulatory process for the Department. OST implements the Department's regulatory policies and procedures and is responsible for ensuring the involvement of top management in regulatory decisionmaking. Through the General Counsel's office, OST is also responsible for ensuring that the Department complies with Executive Order 12866 and other legal and policy requirements affecting rulemaking, including a number of new statutes and Executive orders. Although OST's principal role concerns the review of the Department's significant rulemakings, this office also plays an important role in the substance of projects concerning aviation economic rules and those having cross-modal significance.

OST provides guidance for use by regulatory personnel throughout the Department on compliance with requirements concerning the regulatory process. For example, OST provided guidance concerning implementation of the regulatory portions of the Unfunded Mandates Act, the Paperwork Reduction Act of 1995, and the Small Business Regulatory Enforcement Fairness Act of 1996 (including congressional review of rules). It also provides updated information on such matters as compliance with Executive orders, economic analyses, the regulatory agenda and plan, and other regulatory

policy matters. OST provides guidance and training concerning cost-benefit analyses and risk assessments, as well as offering DOT personnel periodic training on regulatory development and process.

OST also leads and coordinates the Department's response to Administration and congressional proposals that concern the regulatory process. The General Counsel's office works closely with representatives of other agencies, the Office of Management and Budget, the White House, and congressional staff to provide information on how various proposals would affect the ability of the Department to perform its safety, infrastructure, and other missions.

OST is incorporating new technology into its rulemaking process. OST initiated the effort to consolidate nine Department rulemaking (and adjudicatory) docket facilities into one centrally managed facility. OST worked with the other DOT agencies to accomplish the consolidation and the phased transition from a paper-based docket system to storage of electronic images in unalterable form. This includes all rulemaking and support documents, public comments, and other documents included in the public docket. This electronic docket is accessible via the internet, and we expect to permit electronic filing in the near future.

OST is redesigning its internet home page and the General Counsel's office now includes hyperlinks to other useful DOT regulatory websites, including the public rulemaking dockets, and contacts for many issues of special interest to the public. (http://www.dot.gov/ost/ogc/regulation/c-50/)

Finally, some OST offices provide commonly requested regulations, informational documents, guidance, and updates through fax on-demand systems.

United States Coast Guard (USCG)

The United States Coast Guard performs multimission functions which include protecting the marine environment, enforcing U.S. laws and international treaties, performing search and rescue, and ensuring marine safety and security. The Coast Guard maintains over 200 separate parts in titles 33 and 46 of the CFR and publishes hundreds of regulatory actions in the Federal Register each year. The majority of these are routine and frequent regulations, often effective for only a limited time, that allow local Coast Guard units to ensure safety during marine events, respond to accidents and natural disasters, or maintain the operation of the U.S. maritime transportation system.

The Coast Guard issues approximately 30 regulations annually that set national requirements or respond to specific statutory mandates. The Coast Guard's Marine Safety Council, a group of Coast Guard Admirals, approves each of these rulemaking projects, monitors the Coast Guard's regulatory program, and advises the Commandant on regulatory matters.

The Coast Guard's regulatory program is aligned with the Department's regulatory philosophy. The Coast Guard is an active member of the Vice President's Plain English Network and has used plain language, including question/answer format and graphical displays, to propose changes to existing regulations on fees charged to merchant mariners for work credentials and to issue regulations implementing international safety requirements. The Coast Guard is issuing all new regulations and revisions to whole parts of the CFR in plain language to meet the Presidential Memorandum on Plain Language. Early public involvement in rulemaking is encouraged through a variety of public meetings and the ongoing work of nine advisory committees. In addition, recognizing that regulations should be issued only when necessary, the Coast Guard has developed a broad Prevention Through People Program, which develops and encourages a wide variety of voluntary actions by industry and individuals to improve marine safety. To support this effort, the Coast Guard has several Quality Partnerships. Finally, to insure that all regulations are necessary, each agenda item is identified as supporting at least one of the goals in the Coast Guard's Strategic Plan.

Federal Aviation Administration (FAA)

Title 49, United States Code, subtitle VII—Aviation Programs, charges the Administrator of the FAA with promoting safety of flight of civil aircraft in air commerce. The stated FAA mission is to provide a safe, secure, and efficient global aviation system. The agency relies on its regulatory plan to provide that system.

In response to the mandate of the Vice President's National Performance Review to streamline the regulatory process, the FAA currently is implementing a reengineered rulemaking process. The Rulemaking Business Process Reengineering approach is more efficient, ensures effective communication and decisionmaking among all parties, is flexible to manage crises, and allows for the effective use of personnel. Other related actions include:

- Supporting the FAA's Safety Agenda on Safer Skies. This agenda is based on a comprehensive review of the causes of aviation accidents and is designed to bring about a five-fold (80 percent) reduction in fatal accidents. The reengineered rulemaking process supports this agenda by giving rulemaking projects identified the agency's highest priority for resources. Projects related to controlled flight into terrain, loss of control of an aircraft, uncontrolled engine failures, runway incursions, weather, pilot decisionmaking, and cabin safety are some of the focus areas identified that may result in rulemaking, advisory and guidance materials.
- Continuing to involve the aviation community early in the regulatory process to obtain input, both on the rule and the economics, from affected parties prior to publishing a proposed regulation. The Aviation Rulemaking Advisory Committee represents members from all aviation interests and is presently working on the resolution of more than 63 issues. To date, the ARAC has accomplished the issuance of more than 35 rulemaking documents.
- Continuing to harmonize the U.S. aviation regulations with those of other countries. The harmonization of the U.S. regulations with the European Joint Aviation Regulations (JAR) is the FAA's most comprehensive long-term rulemaking effort. The differences worldwide in certification standards, practices and procedures, and operating rules must be identified and minimized to reduce the regulatory burden on the international aviation system. The differences between the FAA regulations and the requirements of other nations impose a heavy burden on U.S. aircraft manufacturers and operators. Harmonization and standardization should help the U.S. aerospace industry remain internationally competitive. While the overall effort to achieve this is global, it will be accomplished by many small, individual, nonsignificant rulemaking projects.
- Implementing the recommendations of the White House Commission on Aviation Safety and Security. FAA rulemaking actions are continuing in the areas of: 1) Revising repair station requirements and 2) an employment history rule which will require an employment background investigation, with trigger mechanisms to initiate a criminal background check for all airport and airline employees and screeners with access to secure areas.
- Continuing to recognize the needs of small businesses by complying with the Small Business Regulatory Enforcement Fairness Act by addressing small business concerns whenever appropriate in rulemaking documents. In response to the Act the FAA has established a Small Entity Contact, a web site on FAA's home page, a toll free number, and an e-mail address for receipt of inquiries. To date, the FAA has received approximately 7,950 inquiries concerning small businesses.
- Ensuring that the congressional mandates for rulemaking deadlines established by the FAA Reauthorization Act of 1996, such as the issuance of a final rule 16 months after the close of comment on the proposed rule, are met.
- Supporting the President's June 1, 1998, memorandum on "Plain Language in Government Writing." The FAA has produced a Plain English Guide (October 31, 1997) and is actively monitoring current documents to ensure that they follow the principles contained in the guide. In a related effort, the FAA has also produced guidance material on performance-based regulations to ensure that rules are written in a simplified format that is easily understood and that compliance with the regulation imposes the least burden required for the desired level of safety.

Top regulatory priorities for 1998-1999 include a background criminal history check if warranted; a duty limitations and rest requirements rule to ensure that pilots are sufficiently rested for duty; a terrain awareness and warning system requirement; and an overflight of the national parks rulemaking effort to reduce or prevent the negative effects of aircraft noise in our national parks.

Federal Highway Administration (FHWA)

The FHWA anticipates that its priority for fiscal year 1999 will be implementation of the Transportation Equity Act for the 21st Century (TEA-21), which reauthorizes the surface transportation programs administered by the FHWA. The FHWA will seek to implement this legislation in the least burdensome and restrictive way possible consistent with the FHWA's mission. The FHWA will also pursue regulatory reform in areas where project development can be streamlined or accelerated, duplicative requirements can be consolidated, recordkeeping requirements can be reduced or simplified, and the decisionmaking authority of our State and local partners can be increased.

Another major area in which the FHWA will initiate or continue significant rulemaking actions is the ongoing zero-base review of the Federal Motor Carrier Safety Regulations. The goals and objectives of the zero-base review project are to (a) focus on those areas of enforcement and compliance which are most effective in reducing motor carrier accidents, (b) reduce compliance costs, (c) encourage innovation, (d) clearly and succinctly describe what is required, and (e) facilitate enforcement. Through the zero-base review, the FHWA intends to develop a unified, performance-based regulatory system that will enhance safety on our Nation's highways while minimizing the burdens placed on the motor carrier industry. In addition, the FHWA is currently redrafting the Rules of Practice for Motor Carrier Safety and Hazardous Materials Proceedings. It plans to simplify the current process to facilitate responses by the accused motor carriers and drivers and to offer alternative means of adjudicating the claims. It also intends to promulgate comprehensive rules covering the entire enforcement process from initial contact with the motor carrier to the final disposition of the claim.

National Highway Traffic Safety Administration (NHTSA)

The statutory responsibilities of the National Highway Traffic Safety Administration (NHTSA) include reducing and mitigating motor vehicle crashes and related fatalities and injuries, providing motor vehicle information to consumers, and improving automotive fuel efficiency. The Agency pursues policies that encourage the development of nonregulatory approaches when feasible in meeting its statutory mandate; issues new standards and regulations or amendments to existing standards and regulations when appropriate; ensures that regulatory alternatives reflect a careful assessment of the problem and a comprehensive analysis of the benefits, costs, and other impacts associated with the proposed regulatory action; and considers alternatives consistent with the Administration's regulatory principles.

In addition to numerous programs that focus on the safety and performance of the motor vehicle, the Agency is engaged in a variety of programs to improve driver behavior. These programs emphasize the human aspects of motor vehicle safety and recognize the important role of the States in this common pursuit. This goal is accomplished by a number of means, including encouraging initiatives in such areas as safety belt usage, motorcycle helmet usage, child safety-seat usage, activities aimed at combating drunk driving and driving under the influence of other drugs, and consumer information activities.

NHTSA is conducting several program evaluations that are designed to review and evaluate the actual benefits, costs, and overall effectiveness of existing standards and regulations. For example, the Agency will continue evaluating Standard 208's new measures to improve the safety performance of air bags, Standard 214's dynamic side-impact requirements, and Standard 108's requirement for reflective marking on heavy truck trailers to enhance their detectability at night or under other conditions of reduced visibility. NHTSA will continue evaluating the implementaiton of the American Automobile Labeling Act, which requires new passenger cars, pickup trucks, vans, and sport utility vechicles to carry labels providing information on their domestic and foreign parts content. The agency will begin to evaluate the efficacy of child safety seat registration for increasing consumer response to recalls of defective seats.

NHTSA's regulatory program includes additional proposals that will be undertaken in order to allow design flexibility, promote new technology, and encourage market competition and consumer choice.

Federal Railroad Administration (FRA)

The Federal Railroad Administration (FRA) exercises regulatory authority over all areas of railroad safety. The Federal Railroad Safety Act of 1970 is the primary source of this authority.

FRA promotes safe, environmentally sound, and successful railroad transportation to meet the current and future needs of all its customers. It encourages policies and investment in infrastructure and technology to enable rail to reach its full potential.

FRA seeks to develop a regulatory program that is based on the regulatory principles enunciated in Executive Order 12866 and that satisfies the Order's basic criteria for such programs.

FRA's vision is of a regulatory program that protects the health and safety of all persons affected by railroading in America and enhances the environment without imposing unreasonable costs on society. FRA seeks to create regulations that are as "effective, consistent, sensible, and understandable" as those envisioned by the President in his Order.

While railroad safety has improved substantially over the past decade due to the implementation of easy and obvious risk reduction measures, significant risk remains due to the nature of rail transportation. Fashioning solutions that have favorable benefit-to-cost ratios, and that, where feasible, incorporate flexible performance standards, requires cooperative action by all affected parties. Interested parties have traditionally approached rail safety rulemakings in an adversarial manner, however, which greatly inhibited the development of the best regulatory approaches to resolve difficult safety issues.

FRA began addressing these concerns when it decided to use negotiated rulemaking to create a rule addressing the safety of roadway workers. Begun early in 1995, the negotiated rulemaking advisory committee reached a consensus agreement about how best to ensure the safety of roadway workers.

Building on its success with this collaborative rulemaking experience, FRA established the Railroad Safety Advisory Committee (RSAC) in late March 1996. Making collaborative rulemaking a new way of doing business at FRA is essential to future improvements in public and railroad employee safety. RSAC provides the foundation for accomplishing this objective because it represents a rare commitment on the part of labor unions, railroads, and private associations to work together, and with FRA, on the establishment of regulatory priorities, the gathering and analysis of safety data, and the development of standards which are necessary to ensure that maximum safety levels are both obtained and maintained. As such, it is important to the creation of trust, both between the Agency and the industry, as well as among industry members.

The purpose of RSAC is to develop consensus recommendations for regulatory action on issues referred to it by FRA. Where consensus is achieved, and FRA believes it serves the public interest, the resulting rule is very likely to be better understood, more widely accepted, more cost-beneficial, and more correctly applied. Where consensus cannot be achieved, however, FRA will fulfill its regulatory role without the benefit of RSAC's recommendations.

The RSAC has met on a quarterly basis so far and currently has working groups addressing the following tasks: (1) The development of regulations governing track, motor vehicle, and roadway worker equipment; (2) the revision of the regulations governing radio standards and procedures; (3) the revision of the regulations governing locomotive inspection standards for steam-powered locomotives; (4) the review of FRA regulations for their applicability to historic railroads; (5) the development of safety standards for locomotive crashworthiness; (6) the development of safety standards for locomotive working conditions; (7) the development of locomotive event recorder accident survivability standards; (8) the development of regulations governing the use of positive train control (PTC) systems; and (9) the revision of the regulations governing locomotive engineering certification. FRA is currently in the process of drafting NPRMs on inspection standards for steam locomotives and locomotive engineer certification based on RSAC recommendations.

In addition to RSAC, FRA continues to use collaborative rulemaking to address passenger safety issues. The Federal Railroad Safety Authorization Act of 1994 allows FRA to consult with the National Railroad Passenger Corporation (AMTRAK), public authorities, passenger organizations, and rail labor organizations without being subject to the Federal Advisory Committee Act requirements when establishing standards for the safety of cars used by railroad carriers to transport passengers. FRA established a working group to develop Passenger Equipment Safety Standards and published an NPRM in the first phase of this rulemaking initiative in September 1997 based on its recommendations. Following a public hearing in November 1997, and subsequent working group meetings, FRA expects to issue a final rule and also begin work on the second phase of the rule, with a goal of publishing an NPRM in 1999. FRA also published a final rule on Passenger Train Emergency Preparedness in May 1998 based on the recommendations of a working group.

FRA is also involved in extensive outreach to the public in an effort to develop regulations regarding the use of train whistles in certain areas and plans to publish an NPRM in late 1998 or early 1999.

Finally, in order to assure safety in connection with future mergers, consolidations, acquisitions of control and start-up operations, FRA and the Surface Transportation Board (STB) are developing a joint rulemaking to require railroads to file detailed safety integration plans for all major transactions.

Federal Transit Administration (FTA)

The Federal Transit Administration (FTA) provides financial assistance to State and local governments for mass transportation purposes. The regulatory activity of FTA focuses on establishing the terms and conditions of Federal financial assistance available under the Federal transit laws.

FTA's policy regarding regulations is to:

- Implement statutory authorities in ways that provide the maximum net benefits to society;
- Keep paperwork requirements to a minimum;
- Allow for as much local flexibility and discretion as is possible within the law;
- Ensure the most productive use of limited Federal resources;
- Protect the Federal interest in local investments; and
- Incorporate good management principles into the grant management process.

As mass transportation needs have changed over the years, so have the requirements for Federal financial assistance under the Federal transit laws and related statutes. FTA's regulatory priority for 1998 is to begin rulemakings required under the Transportation Equity Act for the 21st Century (TEA-21). FTA will initiate a rulemaking to implement the criteria prescribed by that Act for the evaluation of new starts.

FTA will also initiate a rulemaking to implement the new Clean Fuels Formula Grant Program, which requires FTA to issue grants for the purchase or lease of clean fuel vehicles and related equipment and facilities, the improvement of existing mass transportation facilities to accommodate clean fuel vehicles, to repower pre-1993 engines with clean fuel technology that meets the current urban bus emission standards, or to retrofit or rebuild pre-1993 engines if before their half-life.

FTA will amend the Capital Leases and Buy America regulations and, with FHWA, amend the Planning and Assistance Standards and the Environmental Impact and Related Procedures regulations.

Maritime Administration (MARAD)

MARAD administers Federal laws and programs designed to promote and maintain a U.S. merchant marine capable of meeting the Nation's shipping needs for both national security and domestic and foreign commerce.

MARAD's regulatory objectives and priorities reflect the Agency's responsibility for ensuring the availability of adequate and efficient water transportation services for American shippers and consumers. To advance these objectives, MARAD issues regulations, which are principally administrative and interpretive in nature, when appropriate, in order to provide a net benefit to the U.S. maritime industry.

In 1998, and continuing into 1999, priority will be given to updating existing regulations to reduce unnecessary burden on the public. For example, MARAD will be updating and streamlining existing regulations and administrative practices governing the following areas: 1) The ship financing guarantee process; 2) standards for evaluation and approval of applications; and 3) the process and documentation for closing of commitments to guarantee obligations issued under these regulations.

Research and Special Programs Administration (RSPA)

The Research and Special Programs Administration (RSPA) has responsibility for rulemaking under two programs. Through the Associate Administrator for Hazardous Materials Safety, RSPA administers regulatory programs under Federal hazardous materials transportation law and the Federal Water Pollution Control Act, as amended by the Oil Pollution Act of 1990. Through the Associate Administrator for Pipeline Safety, RSPA administers regulatory programs under the Federal pipeline safety laws and the Federal Water Pollution Control Act, as amended by the Oil Pollution Act of 1990.

In the area of hazardous materials transportation, the regulatory priority is to update and consolidate requirements in the hazardous materials regulations for the manufacture, maintenance, requalification, repair, and use of compressed gas cylinders. In this rulemaking, RSPA intends to recognize advances in cylinder manufacturing technology and to clarify and simplify regulatory requirements. Another priority is to clarify, through rulemaking action, the applicability of the regulations to the loading, unloading, and storage of hazardous materials incidental to their movement in commerce. Clarifying the applicability of the regulations will facilitate compliance with them and also clarify when other requirements of Federal, State, local, and tribal governments apply.

The regulatory priorities in the pipeline area are to manage the risks inherent in pipeline transportation through strategies directed at prevention, detection, and mitigation activities. Specific regulatory actions to implement these activities include the use of emergency flow-restricting devices and other mechanisms to detect and locate pipeline ruptures and minimize releases, excavation damage prevention programs, mandating participation in one-call notification systems, increased inspection requirements using instrumented internal inspection devices, and prescribing risk-based approaches to pipeline safety regulations.

Bureau of Transportation Statistics (BTS)

The Bureau of Transportation Statistics (BTS) is responsible for compiling, analyzing, and making accessible information on the Nation's transportation systems; collecting information on intermodal transportation and other areas as needed; and enhancing the quality and effectiveness of the statistical program of DOT through research, the development of guidelines, and the promotion of improvements in data acquisition and use.

One of BTS's regulatory priorities is to completely review its motor carriers of property financial data collection program. The data are collected under recently revised statutory authority, which requires BTS to give consideration to: (1) Safety needs; (2) the need to preserve confidential business information and trade secrets and prevent competitive harm; (3) private sector, academic, and public use of information in the reports; and (4) the public interest. Further, the statute calls for BTS to "streamline and simplify" reporting requirements to the "maximum extent practicable." Among the issues BTS plans to address are: Which motor carriers should report, what data items should be collected, and how often should data be collected.

BTS's Office of Airline Information (OAI), collects airline passenger, cargo, traffic, and financial data. This information gives the Government consistent and comprehensive economic and market data on individual airline operations and is used, for instance, in supporting policy initiatives, negotiating international bilateral aviation agreements, awarding international route authorities, and meeting international treaty obligations. The aviation, travel, and tourism communities value this information for a variety of purposes, such as conducting analyses of on-time performance, denied boardings, and market trends.

BTS's long-range regulatory priority in the aviation area is to conduct a complete review and modernization of the passenger origin and destination survey. BTS can make significant improvements by providing data for the needs of DOT and other users in a way that takes advantage of the information revolution and matches the dramatically changing airline industry.

BTS, in conjunction with the Office of the Secretary, also plans to perform a zero-base review of the financial and traffic data to determine what, if any, revisions can be made to the current data collections to ensure that these collections fully support the Department's mandated aviation responsibilities. Moreover, the review will seek to identify potential savings to the affected air carriers and the Government that can be accomplished through the application of advanced information technologies to the collection, processing, validation, and dissemination of aviation data. BTS's review and modernization of the passenger origin and destination survey will be incorporated as part of this zero-base review.

Saint Lawrence Seaway Development Corporation (SLSDC)

The Saint Lawrence Seaway Development Corporation (SLSDC) is a wholly owned Government corporation created by Congress in 1954. The primary operating service of the SLSDC is the safe transit of commercial and noncommercial vessels through the two U.S. locks and the navigation channels of the St. Lawrence Seaway System. The SLSDC works jointly with its Canadian counterpart to operate and maintain this deep draft waterway between the Great Lakes and the Atlantic Ocean.

The SLSDC also works jointly with its Canadian counterpart on all matters related to rules and regulations, overall

operations, vessel inspection, traffic control, navigation aids, safety, operating dates, and trade development programs.

The regulatory priority of the SLSDC is to provide its customers with the safest, most reliable, and most efficient Seaway System possible.

DOT—U.S. Coast Guard (USCG)

PROPOSED RULE STAGE

83. +FACILITY RESPONSE PLANS FOR HAZARDOUS SUBSTANCES (CGD 94-048)

Priority:

Other Significant

Unfunded Mandates:

Undetermined

Legal Authority:

33 USC 1321(j); PL 101-380

CFR Citation:

33 CFR 154

Legal Deadline:

None

Abstract:

This project would implement provisions of the Oil Pollution Act of 1990 that require an owner or operator of a marine transportation-related facility transferring bulk hazardous substances to develop and operate in accordance with an approved response plan. The regulations would apply to marine transportation-related facilities that, because of their location, could cause harm to the environment by discharging a hazardous substance into or on the navigable waters or adjoining shoreline. A separate rulemaking under RIN 2115-AE88 would address hazardous response plan requirements for tank vessels. This project supports Coast Guard strategic goals of marine safety and protection of the marine environment by reducing the amount of chemicals entering the environment, as well as reducing the consequence of pollution incidents. This action is considered significant because of substantial public and industry interest.

Statement of Need:

This rulemaking is intended to reduce the impact from hazardous substance spills from vessels and marine transportation-related facilities.

Summary of the Legal Basis:

Section 4202(a) of the Oil Pollution Act of 1990 (OPA 90), codified at 33 U.S.C. 1321(j)(5), mandates that the President issue regulations requiring the preparation of oil and hazardous substance discharge response plans. Although section 4202(b)(4) of OPA 90 established an implementation schedule for these response plans for oil, it did not establish a deadline for submission or approval of hazardous substances response plans. The Coast Guard has issued separate final rules governing response plan requirements for vessels carrying oil in bulk as cargo and facilities that handle, store, or transport oil in bulk. Under 33 U.S.C. 1321, "hazardous substances" are designated by the Administrator of the Environmental Protection Agency. The Administrator has designated 297 chemicals as hazardous substances under this section. The Coast Guard has identified 84 hazardous substances currently carried in bulk by vessels, and transferred to or from marine transportation-related facilities.

Alternatives:

The Coast Guard intends to determine what types of response strategies would be required to address spills of different types of hazardous substances. For some substances, containment and recovery may be the appropriate response. However, some spilled substances may not be recoverable from the water and other actions may be necessary. Plans would be required, by statute, to address responses to a "worst case discharge." For facilities, a "worst case discharge" is "the largest foreseeable discharge in adverse weather conditions."

Anticipated Costs and Benefits:

The potential costs of this rulemaking may include the costs of developing and implementing a hazardous substance response plan, maintaining contracts for response resources, reviewing and updating hazardous substance response plans, maintaining any required equipment, and training and exercising response personnel. Potential benefits include reduced risk of human exposure and enhanced environmental quality from improved ability to respond to, contain, and recover spilled hazardous substances. The draft analysis indicates that this project will not be economically significant. The Coast Guard expects this rule's potential monetary cost to the regulated public to total less than ten million dollars. The Coast Guard anticipates benefits that include increased safety of human life and property on navigable waters of the United States.

Risks:

Response plans are required by statute. A response plan will not prevent a discharge of a hazardous substance, but it may improve the response and help to minimize personal injury and damage to the environment. This rule should not affect the economic viability of facilities involved in transferring hazardous substances in bulk or have a significant impact on the volume of hazardous substances shipped by marine transportation-related facilities. Most facilities involved in transferring hazardous substances in bulk have developed plans, but there have not been requirements for standardization.

84. +TANK VESSEL RESPONSE PLANS FOR HAZARDOUS SUBSTANCES (CGD 94-032)

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

33 USC 1231; 33 USC 1321(j); PL 101-380

CFR Citation:

33 CFR 155

Legal Deadline:

None

Abstract:

This project would implement provisions of the Oil Pollution Act of 1990 that require an owner or operator of a tank vessel carrying bulk hazardous substances to develop and operate in accordance with an approved response plan. The regulations would apply to vessels operating on the navigable waters or within the Exclusive Economic Zone (EEZ) of the U.S. that carry bulk hazardous substances. A separate rulemaking under RIN 2115-AE87 would address hazardous substances response plan requirements for marine transportation-related facilities. This project supports Coast Guard strategic goals by reducing the amount of chemicals entering the environment, as well as reducing the consequences of pollution incidents. This project is considered significant because of substantial public and industry interest.

Statement of Need:

This rulemaking is intended to reduce the impact from hazardous substance spills from vessels.

Summary of the Legal Basis:

Section 4202(a) of the Oil Pollution Act of 1990 (OPA 90), codified at 33 U.S.C. 1321(j)(5), mandates that the President issue regulations requiring the preparation of oil and hazardous substance discharge response plans. Although 4202(b)(4) of OPA 90 established an implementation schedule for these response plans for oil, it did not establish a deadline for submission or approval of hazardous substances response plans. The Coast Guard has issued separate final rules governing response plan requirements for vessels carrying oil in bulk as cargo and facilities that handle, store, or transport oil in bulk. Under section 1321, "hazardous substances" are designated by the Administrator of the Environmental Protection Agency. The Administrator has designated 297 chemicals as hazardous substances under this section. The Coast Guard has identified 84 hazardous substances currently carried in bulk.

Alternatives:

The Coast Guard intends to determine what types of response strategies would be required to address spills of different types of hazardous substances. For some substances, containment and recovery may be the appropriate response. However, some spilled substances may not be recoverable from the water and other actions may be necessary. Plans would be required, by statute, to address responses to a "worst case discharge." For vessels, a "worst case discharge" is "a discharge in adverse weather conditions of its entire cargo."

Anticipated Costs and Benefits:

The potential costs of this rulemaking may include the costs of developing and implementing a hazardous substance response plan, maintaining contracts for spill-response resources, reviewing and updating hazardous substance response plans, maintaining any required equipment, and training and exercising response personnel. Potential benefits include reduced risk to human health, enhanced environmental quality from improved ability to respond to, contain, and recover spilled hazardous substances and a reduction in the severity of the impact of accidental hazardous substance discharges. The Coast Guard does not yet have sufficient information to estimate the potential monetary costs and benefits of this rule. A key element in developing effective regulations for hazardous substance response plans will be the development of an approach for addressing different types of hazardous substances.

Risks:

Response plans are required by statute. A response plan will not prevent a discharge of a hazardous substance, but it may improve the response and help to minimize personal injury and damage to the environment. This rule should not affect the economic viability of vessels involved in transferring hazardous substances in bulk, or have a significant impact on the volume of hazardous substances shipped by vessel. Most vessels carrying hazardous substances in bulk have developed response plans, but there have not been requirements for standardization.

DOT—Federal Aviation Administration (FAA)

PROPOSED RULE STAGE

85. +OVERFLIGHTS OF UNITS OF THE NATIONAL PARK SYSTEM

Priority:

Other Significant

Legal Authority:

49 USC 106(g); 49 USC 40103; 49 USC 40113; 49 USC 40120; 49 USC 44101; 49 USC 44701; 49 USC 44702; 49 USC 44705; 49 USC 44709; 49 USC 44711 to 44713; 49 USC 44715; 49 USC 44716; 49 USC 44717; 49 USC 44722; 49 USC 46306

CFR Citation:

14 CFR 91; 14 CFR 93; 14 CFR 121; 15 CFR 135

Legal Deadline:

None

Abstract:

The FAA and National Park Service (NPS) have established a joint working group which is tasked with developing a notice of proposed rulemaking to reduce or prevent adverse effects of aircraft noise over our national park system. At the same time, the working group is charged with affording those persons who wish to visit our national parks from the air the opportunity to

do so. The working group met from May to November 1997, and developed a concept paper that was approved by the Aviation Rulemaking Advisory Committee and the NPS Advisory Board in December 1997. The working group is now developing a notice of proposed rulemaking with the FAA and NPS. This rulemaking is significant because of substantial public interest.

Statement of Need:

The need to reduce or prevent the adverse effects of aircraft noise over the national parks is apparent for the preservation of a valuable national resource. In its Report to Congress, the National Park Service identified 98 parks that potentially have an overflight problem. The FAA recognizes its role both to provide for the safe and efficient use of airspace and to enhance the environment by minimizing the adverse effects of aviation in the national parks.

Summary of the Legal Basis:

The FAA has broad authority and responsibility to regulate the operation of aircraft and the use of the airspace and to establish safety standards for and regulate the certification of airmen, aircraft, and air carriers. (49 U.S.C. 40101, et. seq.) The FAA also has responsibility to protect persons and property on the ground. The President's Memorandum of April 22, 1996, directed the FAA, working with the National Park Service, to issue a notice of proposed rulemaking for the management of sightseeing aircraft in those national parks where it is deemed necessary to reduce or prevent the adverse effects of noise from such aircraft.

Alternatives:

During its working sessions, the working group considered a variety of criteria for defining an air tour, various triggering events for determining which parks are at risk, and various means for the NPS and FAA to work together to develop an air tour management plan.

Anticipated Costs and Benefits:

Undetermined.

Risks:

This rulemaking addresses the risk of destruction of valuable national resources: the right to enjoy the natural quiet in our national parks. At the same time, taking this risk has to be balanced against any potential safety problems that restrictions on overflights might create. Both the National Park Service and FAA are confident that a solution can be reached whereby all visitors to the park may be accommodated through an agreed upon park airspace management plan.

86. +FLIGHT CREWMEMBER DUTY PERIOD LIMITATIONS, FLIGHT TIME LIMITATIONS, AND REST REQUIREMENTS

Priority:

Other Significant

Legal Authority:

49 USC 106(g); 49 USC 40113; 49 USC 40119; 49 USC 44101; 49 USC 44701 to 44701; 49 USC 44705; 49 USC 44709 to 44711; 49 USC 44712; 49 USC 44713; 49 USC 44715; 49 USC 44716 to 44717; 49 USC 44722; 49 USC 44901; 49 USC 44903 to 44904; 49 USC 44912

CFR Citation:

14 CFR 121; 14 CFR 135

Legal Deadline:

None

Abstract:

This rulemaking would amend the regulations to establish one set of duty period limitations, flight time limitations, and rest requirements for flight crewmembers engaged in air transportation. The FAA has determined that rulemaking is required as a result of public and congressional interest in regulating flight crewmember rest requirements, NTSB Safety Recommendations, petitions for rulemaking, and scientific data. The FAA has asked the Aviation Rulemaking Advisory Committee (ARAC) to accept the task of proposing recommendations for pilots on reserve status. At the same time, an internal FAA team will be developing a supplemental notice of proposed rulemaking. This action is considered significant because of substantial public interest.

Statement of Need:

The aviation community requires 24-hour activities to meet operational demands. Growths in long-haul, regional, overnight cargo, and short-haul domestic operations are increasing. Therefore, shift work, night work, irregular work schedules, and time zone changes will continue to be commonplace.

With this growth, the scientific knowledge about sleep, sleep disorders, circadian physiology, fatigue, and performance decrements has also grown. Some of the scientific knowledge has indicated that aviators experience performance-impairing fatigue from sleep loss resulting from current flight and duty practices. A primary purpose is to base the rule on scientific knowledge.

In addition, industry and individuals have told the FAA that the current regulations are confusing and difficult to enforce. Therefore, a second purpose of the rulemaking is to establish consistent and clear duty period limitations and rest requirements for all types of operations.

Summary of the Legal Basis:

Section 44701, Title 49 of the United States Code states that the Administrator shall promote safety of flight of civil aircraft in air commerce by prescribing minimum standards required in the interest of safety.

Alternatives:

One obvious alternative would be to continue with the current rules, which would be very expensive for the industry. In reviewing the comments, the FAA is also considering other reserve alternatives that would not penalize certain segments of the industry, such as the air ambulance operators. There is no overall alternative to rest and duty regulations; however, there may be some alternatives that would lend flexibility for operators. To explore these alternatives, the FAA has established a Reserve Duty/Rest Requirements Working Group under the Aviation Rulemaking Advisory Committee.

Anticipated Costs and Benefits:

Undetermined.

Risks:

Although there has been only one identifiable accident due to pilot fatigue, fatigue is increasingly becoming the focus of possible causes following all accidents. Pilot reports of being fatigued to the point of incapacity are not uncommon, and intuitively, it is reasonable, given the sheer volume of air traffic, to expect fatigue to be a factor in future accidents if the regulations are not corrected.

87. +TERRAIN AWARENESS AND WARNING SYSTEM (TAWS)

Priority:

Other Significant

Legal Authority:

49 USC 106(g); 49 USC 40103; 49 USC 40113; 49 USC 40120; 49 USC 44101; 49 USC 44111; 49 USC 44701; 49 USC 44709; 49 USC 44712; 49 USC 44715; 49 USC 44716 to 44718; 49 USC 44722; 49 USC 46306; 49 USC 46315; 49 USC 46316; ...

CFR Citation:

14 CFR 91; 14 CFR 121; 14 CFR 135

Legal Deadline:

None

Abstract:

This rulemaking would issue rules that would prohibit the operation of turbine-powered U.S. registered civil airplanes of six or more passenger seats, exclusive of pilot and co-pilot seating, unless that airplane is equipped with an FAA-approved enhanced ground proximity warning system (GPWS). This proposed rule is intended to further reduce the risk of controlled flight into terrain (CFIT) accidents. This rule is significant because of substantial public interest.

Statement of Need:

As a result of the Gore Commission and NTSB recommendations and a number of studies, it was found that CFIT accidents could have been avoided if an enhanced warning device was used.

Summary of the Legal Basis:

49 USC 44701 empowers the Administrator to prescribe regulations and minimum standards in the interest of safety for aircraft and equipment.

Alternatives:

The FAA considered regulatory options to identify the least intrusive and most cost-effective means of achieving the goal of reducing the probability of CFIT accidents. The alternatives considered fall under two general groupings: 1) require different levels of TAWS or GPWS technologies for different subsegments of the regulated population; and 2) impose different compliance deadlines on different subsegments of the regulated population.

Anticipated Costs and Benefits:

The discounted costs of this rule are estimated at $774 million; the benefits are estimated at $2.8 billion. The benefit/cost ratio is 3.65 to 1. This total includes adding the equipment to all in-service airplanes and to all newly manufactured airplanes over the next 10 years.

Risks:

The purpose of this rulemaking is to expand and enhance the safety benefits of the current ground proximity warning system. TAWS provides an earlier time for verbal warning along with a visual warning (situational display) that will allow the flight crew to see approaching terrain. The combination of the increased warning times and situational awareness of flight crews decreases the risk of controlled flight into terrain accidents.

DOT—Federal Highway Administration (FHWA)

PROPOSED RULE STAGE

88. +HOURS OF SERVICE OF DRIVERS (SECTION 610 REVIEW)

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

Undetermined

Legal Authority:

PL 104-88

CFR Citation:

49 CFR 395

Legal Deadline:

Other, Statutory, March 1, 1996. See sections 103 and 408 of PL 104-88.

Abstract:

This action would propose revision of the FHWA's hours of service regulations. This action is mandated by the ICC Termination Act of 1995. The rulemaking also will address NTSB Safety Recommendations, petitions for rulemaking, and scientific data. The rulemaking has a great deal of public and congressional interest in regulating medium- and heavy-duty truck and bus drivers' sleep, off-duty, and working periods of time. The FHWA will propose new rules based upon comments and scientific data submitted to the advance notice of proposed rulemaking docket, an initial regulatory flexibility analysis, a cost-benefit analysis, an unfunded mandates analysis, and a paperwork reduction analysis. This action is considered significant because of substantial public and congressional interest.

Statement of Need:

The motor carrier industry requires 24-hour activities to meet the operational demands of a healthy U.S. economy. Growth in long-haul, regional, overnight, and local operations is increasing with the growth of the U.S. economy. Therefore, night work, shift work, and irregular work schedules will continue to be commonplace.

With this growth, the scientific knowledge about sleep, sleep disorders, circadian physiology, fatigue, and performance decrements has also grown. Some of the scientific knowledge has indicated that medium- and heavy-duty truck and bus drivers may experience performance-impairing fatigue from sleep loss resulting from current motor carrier duty and operational practices. A primary purpose of this rulemaking is to incorporate as much of the scientific knowledge as possible into the applicable regulations.

In addition, industry, safety advocates, and individuals have told the FHWA that the current regulations constrain productivity, are confusing, and focus enforcement on sloppy recordkeeping practices rather than on violations of the underlying hours-of-service rules. Therefore, a second purpose of the rulemaking is to establish enforceable, consistent, and clear work duty periods and sleep requirements for all types of operations.

Summary of the Legal Basis:

Title 49 United States Code, Section 31502 allows the Secretary of Transportation to prescribe maximum hours-of-service regulations for employees of motor carriers when needed to promote the safety of operations.

Section 408 of the ICC Termination Act of 1995 (Pub. L. 104-88, December 29, 1995) requires the Federal Highway Administration to issue an advance notice of proposed rulemaking, a notice of proposed rulemaking, and a final rule dealing with a variety of fatigue-related issues pertaining to commercial motor vehicle safety (including 8 hours of continuous sleep after 10 hours of driving, loading and unloading operations automated and tamper-proof recording devices, rest and recovery cycles, fatigue and stress in longer combination vehicles, fitness for duty, and other appropriate regulatory and enforcement countermeasures for reducing fatigue-related incidents and increasing driver alertness).

Alternatives:

One alternative is to continue the current rules. Other alternatives may include replacing the current daily maximum 15-hour on-duty, maximum 10-hour-driving, minimum 8-hour-off-duty periods and weekly 60-hour-in-seven-day sliding week with an alternative set of rules based upon scientific knowledge and submitted comments. The FHWA will consider "one-size-does-not-fit-all" types of regulations. The FHWA will consider different regulations for different types of drivers, operations, or classification of vehicles.

Finally, the FHWA will consider modifying the information collection burdens upon the motor carrier industry, including the following types of record keeping methods. 1) Reducing the required items on the record of duty status (log book). 2) Adding automated on-board recording devices to commercial motor vehicles. 3) Adding global positioning system on-board recording devices to commercial motor vehicles. 4) Eliminating all FHWA hours-of-service record keeping requirements while relying exclusively on the duplicative hours-of-service record keeping system of records required by the U.S. Department of Labor under the Fair Labor Standards Act of 1938, as amended.

Anticipated Costs and Benefits:

Undetermined. A cost-benefit analysis completed in 1981 based upon a 1978 notice of proposed rulemaking calculated national costs between $10.6 and $11.5 billion with possible societal benefits of about $450 million, a benefit-to-cost ratio under one. (In 1997 dollars, this would be national costs between $20.67 and $22.43 billion with possible societal benefits of about $878 million.) A new cost-benefit analysis is underway and will be conducted and reported in compliance with OMB Circular A-94, "Discount Rates to be Used in Evaluating Time-Distributed Costs and Benefits." The FHWA believes it can develop a rule with a benefit-to-cost ratio of more than one for this rulemaking. The FHWA is planning to develop a rule that will produce a "win-win" outcome (increased safety and unchanged or increased productivity).

The FHWA will also attempt to analyze additional costs resulting from higher transportation rates and disruptions on ongoing business operations, though these costs will be difficult to assess. These might include rates and disruptions to just-in-time deliveries, manufacturing, warehousing, distribution, wholesale and retail deliveries, and individual participants' lives (e.g., increases in consumer prices and road congestion).

Risks:

The U.S. Department of Transportation's National Highway Traffic Safety Administration's databases show fatigue as a contributing factor in 306 to 1,163 annual police-reported crashes nationally. Some scientific research suggests the number may be closer to 364 to 4,070 of all crashes (police-reported and non-police-reported). Fatigue is increasingly becoming the focus of possible causes contributing to all crashes. Driver reports of being tired and sleepy to the point of incapacity are not uncommon, and it is reasonable, given the sheer volume of motor carrier traffic, to expect drowsy, unalert drivers to be a factor in future crashes.

DOT—National Highway Traffic Safety Administration (NHTSA)

PROPOSED RULE STAGE

89. +ROLLOVER PROTECTION

Priority:

Other Significant

Legal Authority:

49 USC 30111; 49 USC 30115; 49 USC 30117; 49 USC 30166; 49 USC 322

CFR Citation:

49 CFR 571

Legal Deadline:

None

Abstract:

The agency has initiated research to focus on exploring whether it can develop a practicable, repeatable and appropriate dynamic emergency handling test that assesses a vehicle's propensity for involvement in an on-road, un-tripped rollover crash. The agency also has granted a petition for rulemaking on this subject. This action is considered significant because of substantial public interest.

Statement of Need:

Rollover crashes account for over 9,000 traffic fatalities annually. A portion of all rollover crashes are un-tripped or "maneuver-induced." Although past agency efforts have addressed all types of rollovers, the agency is focusing its current rollover activities on un-tripped rollover crashes. Currently, there is a requirement that most sport utility vehicles of under 10,000 pounds gross vehicle weight rating (GVWR) have a warning label. On April 13, 1998 (63 FR 17974 - RIN 2127-AG53) in a separate rulemaking, the agency proposed upgrading the label with better graphics and stronger wording. However, there is no safety standard or rating test for rollovers.

Summary of the Legal Basis:

Section 30111, Title 49 of the United States Code states that the Secretary shall prescribe motor vehicle safety standards. section 30117, title 49 of the United States Code states that the Secretary may require each manufacturer of a motor vehicle to provide technical information related to performance and safety to purchasers. Authority to take these actions has been delegated to the NHTSA Administrator by 49 CFR 501.2

Alternatives:

In addition to a potential safety standard, the rollover prevention effort could result in a consumer information or rating program which would involve notices and public comment. Another alternative might be long-term research on rollover dynamics. Long-term research would be necessary if the current effort indicates that existing test methods are inadequate for measuring rollover propensity.

Anticipated Costs and Benefits:

The anticipated costs and benefits of this action have not yet been estimated.

Risks:

Crash data (1992-1996 NASS CDS annualized national estimates) indicate that, on average, 23 percent of single vehicle crashes involving all types of light vehicles are rollovers, or approximately 178,000 rollover crashes per year. For particular types of light vehicles, the percentage of single vehicle crashes that are rollovers varies significantly: for passenger cars, it is below average (17%); for vans, it is about average (22%); and for both pickups and SUVs, it is above average (38% and 49%, respectively). Pickups and SUVs together account for 41 percent of the rollovers per year (73,500) even though they account for only 24 percent of single vehicle crashes. It is anticipated that a new rollover safety standard or consumer rating program would bring the pickup and SUV rollover rates down closer to the rates for other types of light vehicles.

Additional Information:

A notice of availability of a planning document for this rulemaking was published 09/29/92 (57 FR 44721). As part of its comprehensive efforts to address the problem of light vehicle rollover, the agency proposed a new consumer information regulation that would require that passenger cars and light multipurpose passenger vehicles and trucks be labeled with information about their resistance to rollover. In the NPRM, the agency terminated rulemaking to establish a vehicle stability standard. The agency denied petitions for reconsideration of this termination on 06/05/96 (61 FR 28560). The comment period for the NPRM was reopened after publication of a related study by the National Academy of Sciences (NAS). (This notice was inadvertently published under RIN 2127-AC54.) At the same time the agency published the grant notice on the petition for rulemaking, NHTSA

published, in a separate notice, its response to the NAS study and requested comments by 08/18/97 (05/20/97, 62 FR 27578). See RIN 2127-AG53 for related information on warning labels for sport utility vehicles.

DOT—NHTSA

90. +ADVANCED AIR BAGS

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect the private sector under PL 104-4.

Legal Authority:

49 USC 322; 49 USC 30111; 49 USC 30115; 49 USC 30117; 49 USC 30166

CFR Citation:

49 CFR 571.208

Legal Deadline:

None

Abstract:

The agency is proposing to upgrade its occupant protection standard to require advanced air bags. The proposal includes performance tests for advanced air bags. The proposal would require that advancements be made in the ability of air bags to cushion and protect occupants of different sizes, belted and unbelted, and would require air bags to be designed to minimize risks to infants, children, and other occupants. This action is considered significant because of the degree of congressional and public interest in this subject and because of potential costs.

Statement of Need:

While current air bags have been shown to be highly effective in reducing overall fatalities, they sometimes cause fatalities to out-of-position occupants, especially children. As part of NHTSA's program to mitigate adverse effects of current-design air bags, the agency has stated that the next step in the evolution of air bags would be systems that automatically prevent those effects. As of June 1, 1998, the agency was aware of 61 children and 44 adults who had been killed by current air bags. The agency has already required more graphic warning labels on all new air-bag-equipped vehicles, enhanced manufacturers' flexibility to reduce the aggressivity of current-design air bags, allowed consumers in certain defined risk groups to install retrofit on-off switches for air bags, and participated in public programs to increase safety belt and child restraint use, to reduce fatalities. This program will pursue the next step: air bags incorporating advanced technologies.

Summary of the Legal Basis:

Section 30111, Title 49 of the United States Code, states that the Secretary shall prescribe motor vehicle safety standards. Section 7103 of the National Highway Traffic Safety Administration Reauthorization Act of 1998 requires the Secretary to issue amendments to improve occupant protection for occupants of different sizes, belted and unbelted, under Federal Motor Vehicle Safety Standard No. 208, while minimizing the risk to infants, children, and other occupants from injuries and deaths caused by air bags, by means that include advanced air bags. Authority to prescribe such standards is delegated to the Administrator by 49 CFR 1.50.

Alternatives:

The agency has been participating with motor vehicle manufacturers, equipment suppliers, the insurance industry, and academia through the Advanced Air Bag Technology Working Group of NHTSA's Motor Vehicle Research Advisory Committee. The agency has been utilizing the resources of this partnership in identifying alternatives for this proposed rulemaking. Moreover, the agency joined with the National Aeronautics and Space Administration in a comprehensive state-of-the-art assessment for near-term air bag technology. As a result of these partnerships and due to its own internal research efforts, the agency is aware of the various advanced air bag technologies currently being seriously considered by the vehicle manufacturers. The proposed rule would permit the use of these technologies which include: suppression systems that could include weight sensors and/or proximity or positioning sensors, low-risk air bags that could include dual or multi-stage inflators, added or redesigned crash sensors, and/or modified fold patterns.

Anticipated Costs and Benefits:

The agency estimates that the costs of the proposed rule would be up to $162 per vehicle, for an estimated total of up to $2.5 billion for 15.5 million vehicles per year. Property damage savings could exceed $2.4 billion annually depending on the extent to which manufacturers use air bag suppression systems. Several hundred lives could be saved annually, as well as a currently unquantified number of serious injuries.

Risks:

Air bags have been shown to substantially reduce fatalities in traffic crashes. When fully implemented, NHTSA estimates that air bags will save 3,000 lives per year and prevent about 34,000 moderate-to-critical injuries. However, current air bags deploy the same way for all occupants, regardless of their size or location at the time of deployment and regardless of crash severity. As a result of the designs of current air bags, there have been adult and child fatalities caused by the air bag. Therefore, the development and introduction of advanced air bags is being pursued aggressively by both the industry and the agency.

DOT—Federal Railroad Administration (FRA)

PROPOSED RULE STAGE

91. • +REGULATIONS ON SAFETY INTEGRATION PLANS GOVERNING RAILROAD CONSOLIDATIONS, MERGERS, ACQUISITIONS OF CONTROL AND START-UP OPERATIONS

Priority:

Other Significant

Legal Authority:

49 USC 20103; 49 USC 20107; 49 USC 21301; 28 USC 2461

CFR Citation:

49 CFR 244; 49 CFR 1.49

Legal Deadline:

None

Abstract:

This proposed rule would require a railroad to file a Safety Integration Plan with the Federal Railroad Administration (1) whenever a Class I railroad, the National Railroad Passenger Corporation, or a railroad providing commuter service proposes to merge, consolidate or acquire control of one another; (2) whenever a railroad proposes to start operations as a railroad; (3) whenever a Class II railroad proposes to consolidate, merge, or acquire control of another Class II railroad with which it would directly interchange freight, or (4) whenever a railroad merger, consolidation or acquisition of control would result in operations that generate revenue in excess of the Class I threshold. The proposed rule would prescribe content and subject matter areas that must be addressed in each plan before FRA may approve of such plan. FRA is working with the Surface Transportation Board to conduct coordinated rulemaking actions covering these transactions within the framework of each agency's jurisdiction.

Statement of Need:

This rule is necessary to ensure advance planning of operations to promote rail safety. Given the safety problems encountered in previous transactions and the need for the merging or acquiring railroad to integrate and harmonize information systems, training, operational practices and safety procedures on a massive scale, the need to require detailed plans setting forth the manner in which the parties intend to safely implement integration plans became apparent to FRA.

Summary of the Legal Basis:

Because this rule concerns rail safety, FRA is vested with statutory authority to issue regulations governing these regulated transactions. See 49 USC 20101 et seq.

Alternatives:

The proposed rule would authorize a railroad carrying out a regulated transaction to petition for a waiver of compliance. The railroad would have to follow the procedures prescribed in 49 CFR 211 in filing such a petition. FRA may grant the petition if waiver of compliance is consistent with the public interest and railroad safety.

Anticipated Costs and Benefits:

FRA has not yet determined the anticipated costs and benefits of this action.

Risks:

The problems that surfaced after the merger of the Union Pacific and the Southern Pacific indicated that safety could be significantly compromised in implementing a consolidation unless the parties addressed the safety issues specifically, formally and systematically, particularly if the merger was large and complex. To address safety-related problems stemming from a merger, FRA needed a projection into the future of the safety consequences of consolidating the systems. To accomplish this, in response to the proposed acquisition of Conrail by Norfolk Southern and CSX Transportation, FRA suggested, and the STB required, that the merger applicants develop and submit well-defined Safety Integration Plans (SIPs) as part of the merger application process. The proposed rule would require, as a matter of FRA regulations, that such Plans be filed by certain railroads in the context of proposed mergers and acquisitions and similar circumstances.

DOT—FRA

FINAL RULE STAGE

92. +PASSENGER EQUIPMENT SAFETY STANDARDS

Priority:

Other Significant

Legal Authority:

49 USC 20103; 49 USC 20133; 49 USC 20111 to 20113; 49 USC 20301 to 21311; PL 103-440, sec 215

CFR Citation:

49 CFR 238

Legal Deadline:

Final, Statutory, November 2, 1997.

Final, Statutory, November 2, 1999.

Abstract:

This action will establish comprehensive Federal safety standards for railroad passenger equipment in a two-phased rulemaking effort, pursuant to the Federal Railroad Safety Authorization Act of 1994. This action will address inspection, testing, and maintenance of passenger equipment; equipment design and performance criteria related to passenger and crew survivability in the event of a train accident; and the safe operation of passenger train service, supplementing existing railroad safety standards. This

is considered significant due to public interest. A final rule in the first phase of the rulemaking is expected to be published this year. FRA will then convene a working group to help develop a second Notice of Proposed Rulemaking for publication in 1999. The second phase of the rulemaking will draw on the results of ongoing research and industry-led passenger safety efforts.

Statement of Need:

Effective Federal safety standards for freight equipment have long been in place, but equivalent Federal standards for key aspects of railroad passenger equipment do not exist. Further, the rail passenger environment is rapidly changing. Worldwide, operating speeds are increasing, and several passenger trainsets have been proposed for operation at high speeds in the United States. A clear set of Federal safety standards for passenger equipment is needed to provide for the safety of the nation's rail passenger service.

Summary of the Legal Basis:

This rulemaking is required by section 215 of the Federal Railroad Safety Authorization Act of 1994, PL 103-440.

Alternatives:

There was no alternative to initiating this rulemaking, as it is required by Federal statute. Nevertheless, FRA considers what specific safety standards to prescribe in the context of the rail passenger industry's own safety efforts. In particular, FRA expects that its consideration of what safety standards to prescribe in the second phase of the rulemaking will be significantly influenced by the American Public Transit Association's own safety standards for rail passenger equipment, currently under development.

Anticipated Costs and Benefits:

The first phase of the rulemaking is not expected to have any significant net economic impact on the rail passenger industry. FRA expects that costs will be offset by economic savings resulting from reducing current regulatory burdens involving the inspection, testing and maintenance of power brakes for passenger trains, while still ensuring safety. Further, safety benefits will accrue as rail accidents are prevented or their effects are mitigated due to the rule's requirements, including restrictions on operating passenger equipment not having necessary structural or emergency features for the safety of passengers and crewmembers.

Risks:

In the last seven years there have been at least six passenger train accidents which resulted in more than one train occupant fatality. Notably, on February 16, 1996, a Maryland Rail Commuter Service (MARC) train collided with an Amtrak train near Silver Spring, Maryland, resulting in the deaths of three crewmembers and eight passengers on board the MARC train. Further, passenger trains are exposed to risks from operating commingled with very heavy and long freight trains, as well as from operating over track with frequent grade crossings used by heavy highway equipment. However, comprehensive Federal safety standards governing the design, maintenance, and safety planning of rail passenger equipment do not currently exist.

DOT—Research and Special Programs Administration (RSPA)

PROPOSED RULE STAGE

93. +REQUIREMENTS FOR CYLINDERS (SECTION 610 REVIEW)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

49 USC 5101 to 5127

CFR Citation:

49 CFR 172; 49 CFR 173; 49 CFR 178

Legal Deadline:

None

Abstract:

This rulemaking will propose to amend the Hazardous Materials Regulations (HMR) to update and consolidate requirements for the manufacture, maintenance, requalification, repair, and use of compressed gas cylinders. RSPA intends to provide for the manufacture of compressed gas cylinders to certain new DOT specifications and to revise requirements applicable to the maintenance, requalification, and repair of all DOT specification cylinders (including those cylinders that may no longer be manufactured). RSPA also proposes to simplify the requirements for filling cylinders and consolidate and revise requirements applicable to persons who requalify cylinders. This rulemaking will recognize advances in cylinder manufacturing technology and clarify and simplify regulatory requirements. This rulemaking, which will affect persons who manufacture, requalify, repair, refill and use compressed gas cylinders, is of significant interest to the compressed gas industry. As part of this action, a small entities review under 5 USC section 610 will be included.

Statement of Need:

This rulemaking action is the first comprehensive review and revision of the cylinder requirements since the first cylinder specification was adopted in the early 1900's. Since that time, additional cylinder specifications and related requirements for cylinder requalification and use have been added on a piecemeal basis in response to the development of new construction materials, accidents and incidents, shipping experience, and the development of industry consensus standards. RSPA seeks to improve the integrity of cylinders by adopting manufacturing and testing standards based more on performance than detailed design requirements. RSPA has received over 25 petitions for rulemaking and has issued numerous exemptions relating to requirements for cylinders and for the transportation of hazardous materials in cylinders. The merits of these petitions and the need to convert provisions of exemptions into regulations of general applicability will be considered in this rulemaking action.

Summary of the Legal Basis:

Section 5103 of Title 49 U.S.C. specifies that the Secretary shall prescribe regulations for the safe transportation of hazardous materials in intrastate, interstate, and foreign commerce. These regulations apply to persons transporting or causing to transport hazardous materials in commerce, and persons manufacturing, fabricating, marking, maintaining, repairing or testing packagings that are represented, marked, certified, or sold by such persons as qualified for use in transporting hazardous materials in commerce.

Alternatives:

The proposed rule is expected to incorporate a variety of alternatives to provide greater flexibility to cylinder manufacturers, refillers and users. There will be proposals to allow harmonizing of the manufacturing practices between the U.S. and other countries, to provide greater flexibility in the filling of cylinders based on performance criteria, and to simplify the regulations by streamlining the commodity sections and by standardizing the new cylinder specifications.

Anticipated Costs and Benefits:

A preliminary regulatory evaluation is being developed. The potential costs and benefits of this action have not yet been determined. A major industry association has indicated that this rulemaking could result in significant cost reductions for the cylinder manufacturing industry.

Risks:

Improving the integrity of cylinders will reduce the risk of leakage in overturns and other accidents. In addition, simplifying the regulations will reduce misunderstandings and the possibility of processing errors that may adversely affect safety.

RIN: 2137–AA92

DOT—RSPA

94. +HAZARDOUS MATERIALS: SAFETY STANDARDS FOR UNLOADING CARGO TANK MOTOR VEHICLES IN LIQUEFIED COMPRESSED GAS SERVICE

Priority:

Other Significant

Legal Authority:

49 USC 5101 to 5127

CFR Citation:

49 CFR 171; 49 CFR 173; 49 CFR 178; 49 CFR 180

Legal Deadline:

None

Abstract:

This rulemaking would enhance the safety of cargo tank motor vehicles in liquefied compressed gas service by clarifying and revising existing hazardous materials regulations and by adding new requirements and alternatives regarding emergency discharge control systems, hose management, and vehicle attendance requirements. This action will affect all operators of cargo tank motor vehicles in liquefied compressed gas service and is expected to generate substantial public interest; it is therefore a significant rulemaking.

Statement of Need:

This rulemaking action responds to numerous incidents involving the release of liquefied compressed gas during the unloading of cargo tank motor vehicles and resulting in injuries and deaths. It is based on comments received to an advance notice of proposed rulemaking, published in the Federal Register, on August 18, 1997, and on a Convening Report, by the Mediation Consortium, that recommended RSPA use regulatory negotiation to develop alternative safety standards for preventing and mitigating unintentional releases of hazardous materials during the unloading of cargo tank motor vehicles in liquefied compressed gas service. The negotiated rule will reflect the consensus of those persons who represent the interests affected by this action, such as businesses that transport and deliver propane, anhydrous ammonia, and other liquefied compressed gases; manufacturers of DOT specification MC 330 and MC 331 cargo tank motor vehicles used to transport liquefied compressed gases; Federal safety regulatory agencies; and state and local public safety and emergency response agencies. Section 5103 of title 49 U.S.C. requires the Secretary to prescribe regulations for the safe transportation of hazardous materials in intrastate, interstate and foreign commerce. Section 5102(a) specifies that transportation includes unloading incidental to the movement of hazardous materials.

Summary of the Legal Basis:

The negotiated rulemaking process is conducted in accordance with the Federal Advisory Committee Act and the Negotiated Rulemaking Act of 1990.

Alternatives:

The negotiated rule is expected to improve the safe unloading of liquefied compressed gases. This rulemaking action is key to proposing recommendations that can achieve DOT's safety goal as well as providing regulations that recognize industry practices. RSPA has rejected the

alternative of proceeding to write a proposed regulation itself because it believes the negotiated rulemaking process is more likely to result in a safety-promoting, practical, cost-beneficial rule. In addition this negotiated rulemaking will make it less likely that petitions for reconsideration are filed and that the final rule is legally challenged.

Anticipated Costs and Benefits:

The negotiated rulemaking committee will develop a preliminary regulatory evaluation to assess the potential costs and benefits of the negotiated rule.

Risks:

This rulemaking is intended to save lives and prevent injuries, property damage, and environmental degradation by reducing the rise of accidental release of compressed gases and of fires or explosions that can result from such releases.

BILLING CODE 4910-62-F

DEPARTMENT OF THE TREASURY (TREAS)

Statement of Regulatory Priorities

The primary missions of the Department of the Treasury are: Protecting and collecting the revenue under the Internal Revenue Code and customs laws; supervising national banks and thrift institutions; managing the fiscal operations of the Federal Government; enforcing laws relating to counterfeiting, Federal Government securities, firearms and explosives, money laundering, foreign commerce in goods and financial instruments, and smuggling and trafficking in contraband; administering the Community Development Financial Institutions Program; protecting the President, Vice President, and certain foreign diplomatic personnel; training Federal, State, and local law enforcement officers; and producing coins and currency.

Consistent with these missions, most regulations of the Department and its constituent bureaus are promulgated to interpret and implement the laws as enacted by the Congress and signed by the President. Unless circumstances require otherwise, it is the policy of the Department to issue a notice of proposed rulemaking (NPRM) and carefully consider public comments before adopting final regulations. Also, in particular cases, the Department invites interested parties to submit views on rulemaking projects while the NPRM is being developed and to hold public hearings to discuss a proposed rule.

To the extent permitted by law, it is the policy of the Department to adhere to the regulatory philosophy and principles set forth in Executive Order 12866 and to develop regulations that maximize aggregate net benefits to society while minimizing the economic and paperwork burdens imposed on persons and businesses subject to those regulations.

During FY 1999, the Department will aggressively implement the President's June 1, 1998, memorandum directing agencies to use "plain language" in new proposed and final rulemaking documents.

Internal Revenue Service

The Internal Revenue Service (IRS), working with the Office of the Assistant Secretary for Tax Policy, promulgates regulations that interpret and implement the Internal Revenue Code and related tax statutes. In developing these regulations, every effort is made to carry out the tax policy determined by Congress in a fair, impartial, and reasonable manner, taking into account the intent of Congress, the realities of relevant transactions, the need for the Government to administer the rules and monitor compliance, and the overall integrity of the Federal tax system. The goal is to make the regulations practical and as clear and simple as possible.

Most IRS regulations interpret tax statutes to resolve ambiguities or fill gaps in the tax statutes. This includes interpreting particular words, applying rules to broad classes of circumstances, and resolving apparent and potential conflicts between various statutory provisions.

On July 22, 1998, the President signed into law the Internal Revenue Service Restructuring and Reform Act of 1998. During fiscal year 1999, the IRS will issue several regulations addressing the implementation of this law. In addition, the IRS will be addressing a number of other priority regulatory projects including the following:

- *Stock Transfer Rules Under Section 367.* Section 367 of the Internal Revenue Code governs the application of the corporate nonrecognition rules to transactions involving foreign corporations. The IRS published proposed regulations under section 367(a) and (b) of the Code on August 26, 1991. Various portions of these regulations involving transfers of stock by U.S. persons to foreign corporations were finalized on December 30, 1996, and June 19, 1998. The IRS expects to finalize the remainder of the proposed regulations in fiscal year 1999.
- *Excise Taxes on Excess Benefit Transactions.* The Taxpayer Bill of Rights 2 (Public Law 104-168, July 30, 1996) added section 4958 to the Code. Section 4958 provides for excise taxes on excess benefit transactions and is effective for transactions occurring on or after September 14, 1995. Disqualified persons and, in some instances, organization managers are liable for these new taxes. A disqualified person is any person who was, at any time during the 5-year period ending on the date of the excess benefit transaction, in a position to exercise substantial influence over the affairs of the tax-exempt organization involved in the transaction. Only transactions with section 501(c)(3) (except private foundations) or section 501(c)(4) organizations are subject to the taxes. An excess benefit transaction is any transaction in which an economic benefit is provided by an applicable organization directly or indirectly to, or for the use of, any disqualified person if the value of the economic benefit provided exceeds the value of the consideration (including the performance of services) received for providing the benefit. The taxable excess benefit amount is the excess of the benefit over the value of the consideration. On July 30, 1998, proposed regulations were issued to clarify certain definitions and rules contained in section 4958 of the Code. The IRS expects to finalize these rules in fiscal year 1999.
- *Amortization of Intangible Assets.* The Omnibus Budget Reconciliation Act of 1993 (OBRA 1993) added section 197 to the Code, which provides for a 15-year amortization of goodwill and certain other intangible assets. OBRA 1993 also amended Code section 167 to provide specified amortization periods for certain computer software and mortgage servicing rights. These provisions are generally effective for intangibles acquired after August 10, 1993. On January 16, 1997, proposed regulations were issued implementing these two Code sections and providing guidance to taxpayers on the meaning and scope of certain provisions of the statute and its anti-churning rules. The IRS expects to finalize these rules early in fiscal year 1999.
- *Credit for Increasing Research Activities.* Section 41 of the Code provides a tax credit equal to a percentage of the amount by which a taxpayer's qualified research expenses for a taxable year exceeds its base amount for that year. To be qualified research, the research activities must not only satisfy the requirements of section 174 of the Code but must be undertaken for the purpose of discovering information that is technological in nature, the application of which is intended to be useful in the development of a new or improved business component of the taxpayer, and substantially all of the activities of which must constitute a process of experimentation pertaining to the functional aspects, performance, reliability, or quality of a business component. The regulations under section 41 of the Code will explain the term "qualified research" and the exclusions from research credit eligibility. The IRS expects to propose these rules early in fiscal year 1999.
- *Euro Conversion.* On January 1, 1999, 11 members of the European Union

will replace their national currencies with the euro. On July 29, 1998, the IRS published proposed and temporary regulations relating to certain of the more significant U.S. Federal income tax consequences that arise for taxpayers operating, investing, or otherwise conducting business in a currency that is converting to the euro. The IRS expects to finalize these rules in fiscal year 1999.

- *Software.* Section 861 of the Internal Revenue Code provides general rules regarding the determination of whether income is from sources within the United States. In general, different rules apply to income from services, income from tangible property, and income from intangible property. Transactions involving computer software have been difficult to classify because such transactions do not in all cases fit neatly into one box or the other. The IRS published proposed regulations in November 1996 that would establish a comprehensive framework for characterizing computer software transactions for purposes of the international provisions of the Code. The IRS expects to finalize the regulations early in fiscal year 1999.

Office of the Comptroller of the Currency

The Office of the Comptroller of the Currency (OCC) charters, regulates, and supervises national banks to ensure a safe, sound, and competitive national banking system that supports the citizens, communities, and economy of the United States. The substantive content of the OCC's regulations reflects four organizing principles that support this mission:

- The OCC's regulations help ensure safety and soundness by establishing standards that set the limits of acceptable conduct for national banks.
- The OCC's regulations promote competitiveness by facilitating a national bank's ability to develop new lines of business, subject to any safeguards that are necessary to ensure that the bank has the expertise to manage risk effectively and adapt its business practices to deal responsibly with its customers.
- Regulations can also affect national banks' ability to compete by contributing significantly to their costs. The OCC's goal is to improve efficiency and reduce burden by updating and streamlining its regulations and eliminating those that no longer contribute significantly to the fulfillment of its mission.
- The OCC's regulations help assure fair access to financial services for all Americans by removing unnecessary impediments to the flow of credit to consumers and small businesses, by encouraging national banks' involvement in community development activities, and by implementing Federal laws designed to protect consumers of financial services.

Important final rules that the OCC has published since the preparation of the fiscal year 1998 regulatory plan (or expects to publish before October 1998) include the following:

- *Risk-Based Capital Guidelines (12 CFR part 3):*

Servicing Assets. In 1995, the Federal banking agencies published an interim rule to eliminate the distinctions between originated mortgage servicing rights and purchased mortgage servicing rights and to clarify that both originated and purchased mortgage servicing rights are subject to the deduction requirements for regulatory capital. (A reference in this regulatory plan to the "Federal banking agencies" or "the agencies" means the OCC, together with the Office of Thrift Supervision (OTS), the Federal Deposit Insurance Corporation (FDIC), and the Board of Governors of the Federal Reserve System.) This interim rule was developed in response to the Financial Accounting Standards Board (FASB) Financial Accounting Statement (FAS) 122, which addressed mortgage servicing rights. Subsequent to the interim rule, FASB published FAS 125, which eliminated the distinction between excess and normal servicing fees relating to servicing rights. Since the last regulatory plan, the agencies issued a proposed rule and final rule on capital treatment of excess servicing fees and mortgage servicing rights.

Transfers of Small Business Loan Obligations With Recourse. This rule, which implements section 208 of the Riegle Community Development and Regulatory Improvement Act of 1994, Public Law 103-325 (Sept. 23, 1994) (CDRIA), generally permits banks to hold capital against the face amount of recourse obligations (rather than the amount of the asset transferred with recourse) on qualifying small business loans if the bank establishes a reserve equal to the bank's reasonable estimated liability under the recourse obligation.

Unrealized Holding Gains on Certain Equity Securities. The OCC and the other Federal banking agencies issued a joint notice of proposed rulemaking to amend the risk-based capital guidelines to permit a bank to include up to 45 percent of unrealized revaluation gains on available-for-sale equity securities in Tier 2 capital. This proposed rule is consistent with the International Convergence of Capital Measurement and Capital Standards as adopted by the Basle Committee on Banking Regulations and Supervisory Practices (Basle Accord) and would make the risk-based capital treatment of unrealized revaluation gains uniform among the banking agencies.

Risk-Based Capital Guidelines Generally. The OCC and the other Federal banking agencies have proposed several amendments to their respective risk-based capital guidelines to eliminate certain interagency differences in capital treatment. The amendments would affect (1) junior and senior liens on one-to-four family residential mortgages, (2) presold one-to-four family construction loans, and (3) mutual funds.

- *Expanded Examination Cycle for Certain Institutions (12 CFR part 4).* This rule makes eligible for an 18-month exam cycle a national or State bank that (1) has total assets of $250 million or less; (2) is well capitalized; (3) is well managed; (4) received a CAMELS 1 or 2 at its most recent exam; (5) is not subject to a formal enforcement order; and (6) has not had a change in control during the previous 12-month period. A separate interim rule allows the OCC to examine Federal branches and agencies of foreign banks every 18 months if the branches and agencies meet criteria that are comparable to those applicable to national banks.
- *Assessment of Fees (12 CFR part 8).* The OCC has adopted two final rules since the last regulatory plan was prepared. The first imposed a surcharge on banks that receive a rating of 3, 4, or 5 under the Uniform Financial Institutions Rating System. The second adopted as final the changes made in (1) an interim rule published in 1994 governing trust fees and (2) an interim rule published in 1996 governing assessment reductions for non-lead national banks.
- *Prohibition Against Deposit Production Offices (12 CFR part 25).* This rule implemented section 109 of the Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994, which is intended to prevent banks from using their new interstate branching authority to extract deposits from communities in which they are not reasonably helping to meet credit needs. Under that law, a bank with branches in a State other than its home State must meet either a "level of lending" test in the State where the branch is located (whereby its loans to customers in the host State relative to deposits from customers in the host State is at least half the loan-to-deposit ratio for all banks based in that State) or a "credit needs" test (whereby the appropriate Federal banking agency determines if a bank is meeting the credit needs of the communities served by the branch in question).
- *International Banking Activities (12 CFR part 28).* This rule removed the lengthy discussion of the accounting treatment for fees earned on international loans found in the previous rule and inserted in its place a brief provision stating that the accounting should conform to generally accepted accounting principles (GAAP).
- *Lending Limits (12 CFR part 32).* In a final rule published in April of 1998, the OCC made several technical amendments to the lending limits rule intended to clarify, for instance, the effective date for newly calculated lending limits.

The OCC's regulatory priorities for fiscal year 1999 include the continuation of the OCC's work with the other Federal banking agencies to update the risk-based capital standards, maintain and, where necessary, improve consistency in the agencies' rules. Regulatory projects in this area include the following amendments to 12 CFR part 3:

- *Risk-Based Capital Treatment of Recourse and Direct Credit Substitutes.* The Federal banking agencies published a proposal to amend the risk-based capital guidelines to provide consistency between the capital treatment for recourse arrangements and for direct credit substitutes. The proposal described several approaches that would enable banks to match the risk-based capital assessment more closely to an institution's relative risk of loss in asset securitization.
- *Market Risk.* This rule would eliminate the 50 percent floor for specific risk under the market risk capital requirements. An interim rule was published in December of 1997.
- *Collateralized Transactions.* The rule would conform the rules of the other banking agencies to the OCC's rule regarding the risk-based capital treatment of loans collateralized in cash or OECD government securities. Consistent with existing law, the rule would assign a zero risk weight for the portion of claims collateralized by cash on deposit in a bank or securities issued or guaranteed by the U.S. Government or its agencies or the central government of an OECD country, provided that certain conditions are met.
- *Claims on Securities Firms.* This rule would reduce the risk weighting for claims on securities firms from 100 to 20 percent.

In addition, the OCC's regulatory priorities for fiscal year 1999 include projects in the following areas:

- *Know Your Customer.* The proposal, which is being prepared with the other Federal banking agencies and with the participation of Treasury's Financial Crimes Enforcement Network (FinCEN), would require each regulated institution to develop a program designed to identify its customers; determine its customers' source of funds; determine its customers' normal and expected transactions; monitor customers' transactions to determine if such transactions are consistent with their normal and expected transactions; and report any transactions of its customers that are determined to be unusual or suspicious, in accordance with the agencies' existing suspicious activity reporting regulations.
- *Codification of the Interagency Statement on Retail Sales of Nondeposit Investment Products ("Interagency Statement").* This rulemaking would codify part or all of the Interagency Statement that was adopted February 15, 1994.
- *Interpretive Rulings (12 CFR part 7).* This rulemaking would codify recent OCC interpretations concerning the following: The definition of "interest"; messenger services; ownership of stock by a director; the oaths of directors; acquisition and retention by a bank of its shares; bank holidays; the power to guaranty liabilities for foreign activities; insurance agency activities by national banks; the ability of national banks to have ATMs without being subject to geographic restrictions; and annuity sales.
- *Year 2000.* The OCC expects to publish two rules affecting banks' efforts to address computer problems associated with the year 2000 (Y2K). The first, amending 12 CFR part 4, would allow the OCC to disclose, without a request, non-public OCC information to supervised entities and other persons as necessary to carry out the OCC's statutory responsibilities. The second would add an appendix to 12 CFR part 30 to provide interagency guidelines establishing Y2K safety and soundness standards.
- *Management Official Interlocks (12 CFR part 26).* This joint proposed rule would amend each agency's regulation to conform to recent changes to the Depository Institutions Management Interlocks Act ("DIMIA"). The Economic Growth and Regulatory Paperwork Reduction Act of 1996 ("EGRPRA") amended DIMIA to permit the agencies to grant exemptions to the interlocks prohibition for any interlock that would not result in a monopoly or substantial lessening of competition. EGRPRA also amended DIMIA to raise the asset thresholds for the "major assets" prohibition to apply only to interlocks involving a depository institution having assets of at least $2.5 billion and an unaffiliated depository institution having assets of at least $1.5 billion.

Office of Thrift Supervision

As the primary Federal regulator of the thrift industry, the Office of Thrift Supervision (OTS) has established regulatory objectives and priorities to effectively and efficiently supervise thrift institutions. These objectives include maintaining and enhancing the safety and soundness of the thrift industry; a flexible, responsive regulatory structure that enables savings associations to provide credit and other financial services to their communities, particularly housing credit; and a risk-focused, proactive approach to supervision. The objectives and priorities of OTS are consistent with those established by the President.

Under the auspices of the Federal Financial Institutions Examination Council (FFIEC), OTS continues to implement, with the other Federal banking agencies, section 303(a)(2) of the Riegle Community Development and Regulatory Improvement Act of 1994 (CDRIA), which requires the Federal banking agencies to make uniform all regulations and guidelines implementing common statutory provisions or supervisory policies.

Interagency capital-related projects underway include amendments concerning:

- The leverage capital standard and the risk-based capital standards for certain loans involving residential

properties and investments in mutual funds.
- Capital standards for servicing assets.
- Risk-based capital standards for collateralized transactions.
- Risk-based capital standards for unrealized gains on equity securities.
- Risk-based capital standards for recourse obligations and direct credit substitutes that expose institutions to credit risk.
- Risk-weight of claims on securities firms.

It is anticipated that final rules will be issued regarding the first four capital-related issues outlined above by early FY 1999. A proposed or interim rule regarding the risk-weight of claims on securities firms is expected to be issued by the first quarter of fiscal year 1999. The agencies continue to consider risk-based capital requirements for recourse obligations and direct credit substitutes. A resolution of these issues is likely to be issued in fiscal year 2000.

The FFIEC member agencies are also preparing enforceable safety and soundness standards that will provide Year 2000 guidelines to insured depository institutions under section 39 of the Federal Deposit Insurance Act.

Other interagency projects are also underway on two proposed rules. The Management Official Interlocks project would implement recent statutory changes, modernize the existing rules, and reduce burden. The "Know Your Customer" rule would require institutions to develop programs designed to reduce the likelihood that they will become unwitting participants in the illicit activities of their customers. The agencies should publish a proposed rule on "Know Your Customer" and a final rule on Management Official Interlocks by the first quarter of fiscal year 1999. The OTS is also working on a final rule on Agency Disapproval of Officers and Directors, which would conform OTS rules to the rules of the other banking agencies implementing recent statutory changes, clarify the existing OTS rules, and reduce burden. A rule should be finalized by the first quarter of fiscal 1999.

Several regulatory projects issued in proposed form during fiscal year 1998 are likely to be issued in final form during fiscal year 1999. The Electronic Operations rule, published in October 1997, addresses the appropriate use of electronic banking technology. OTS would like to ensure that its rules are sufficiently flexible to accommodate technological changes in the marketplace and ensure that the regulated industry uses technology within the boundaries of safety and soundness standards. OTS expects to continue the rulemaking process in this area by issuing a supplemental notice of proposed rulemaking during the fourth quarter of fiscal year 1998 and a final rule during fiscal year 1999.

Other rules issued as proposals in fiscal year 1998 and likely to be issued in final form during fiscal year 1999 include a capital distributions rule updating and streamlining OTS regulations to reflect the implementation of prompt corrective action; a rule clarifying the treatment of reverse repurchase agreements under the transactions with affiliates prohibitions in section 11 of the Home Owners Loan Act (HOLA); a charter and bylaws rule expanding the range of votes that a Federal mutual savings association may allow a member to cast; and a financial management policies rule comprehensively revising outdated regulations on financial derivatives.

During fiscal year 1999, OTS intends to publish a number of proposed rules as part of its ongoing effort to review and streamline its regulations. These projects include revisions to OTS regulations concerning types of offices, securities brokerage, nondiscrimination, officers and directors, guarantees and letters of credit, and assessments.

A project to revise OTS regulations on types of offices would evaluate current definitions of the terms "home office," "branch office," "agency," and OTS rules on relocations and redesignations. The project is designed to ensure that OTS rules reflect how modern thrifts conduct their operations. The securities brokerage rule would revise and update OTS regulations on the sale of non-deposit investment products. The rule concerning directors and officers would streamline OTS regulations on indemnification, savings association boards of directors, compensation, employment contracts, extensions of credit to insiders, conflicts of interest, and corporate opportunity. A project updating rules on guarantees and letters of credit would clarify that a Federal savings association may act as guarantor or surety, issue letters of credit, and act as escrow agent.

OTS currently has underway a project to amend its method of calculating its assessments of savings associations. The rule would more closely tailor assessments with supervisory costs than the current regulation allows. Other assessment and fee matters would be clarified, and the entire regulation would be put into the "plain language" format.

The OTS also plans to revise its conversion regulations (12 CFR 563b) and to undertake a regulatory project on exempt multiple holding companies claiming unitary status based on acquisitions.

United States Customs Service

The United States Customs Service is responsible, among other things, for administering laws concerning the importation of goods into the United States. This includes inspecting imports, collecting applicable duties, overseeing the activities of persons and businesses engaged in importing, and enforcing the laws concerning smuggling and trafficking in contraband. The regulatory priorities of Customs for fiscal year 1999 are to continue to facilitate procedures for legitimate commercial transactions and to provide further obstacles to the flow of narcotics and other contraband into the United States.

During fiscal year 1998, one of Customs' priorities was to continue the reinvention of its regulatory procedures begun under the authority granted by the Customs Modernization provisions of the North American Free Trade Implementation Act ("Customs Mod Act"). Customs reinvention efforts, in accordance with the principles of E.O. 12866, have involved and will continue to involve much input from the importing public. Two key regulatory packages that are integral to implementation of the Customs Mod Act, after consultations with the public and proposed rulemakings, were published as final rules during the past fiscal year. These packages were a revision of the Customs regulations regarding drawback and a revision of the Customs regulations regarding the recordkeeping responsibilities of those involved with Customs transactions.

During fiscal year 1999, Customs will continue to move forward with amendments implementing the Customs Mod Act. Priority will be accorded to revising the procedures by which Customs will issue administrative rulings answering requests of prospective importers as to how Customs will treat their transactions and to revising the regulations pertaining to customs brokers.

During the fiscal year 1999, Customs also plans to undertake several other regulatory actions that will affect the traveling and importing public, customs brokers, carriers, and commercial importers. Customs will accord priority to several regulatory actions focusing on the development of a more automated environment to expedite the entry, processing, and release of imported commercial merchandise and the clearance of merchandise for export. These regulations will benefit the importing and exporting public by streamlining the work of Customs officers and the trade community. Among the actions that Customs will pursue in this regard, which will improve the efficiency of Customs operations, reduce paperwork, and administrative costs are:
- *Liquidations.* Customs will propose regulations allowing paperless procedures for extension and suspension of liquidation notices, improving and clarifying the administrative process and simplifying the regulations pertaining to liquidations and extensions and suspensions of liquidation.
- *Entry Reconciliation.* Customs will propose regulations allowing a "reconciliation" process that will allow elements of an entry (other than those relating to the admissibility of merchandise) that are undetermined at the time an entry summary or an import activity summary statement is required to be submitted, to be provided to Customs at a later date. A "reconciliation" will permit importers to submit information not available at the time of entry that is necessary for the importer and Customs to determine the correct amount of duty on a shipment. The procedure will allow Customs to finalize the duty assessment process by liquidating the underlying entry as to all merchandise covered by the entry, except the merchandise identified by the importers as requiring the submission of additional information.
- *Commercial Laboratories.* Customs will finalize regulations to provide standards and procedures for accrediting commercial laboratories that will permit them to analyze a wide range of commercial products for Customs purposes. This change will facilitate the release of merchandise because it will enable importers to receive laboratory results earlier.
- *Remote Location Filing.* Customs will propose regulations allowing electronic filing of entries with Customs from locations in the United States other than the port of arrival of the merchandise or the place at which the merchandise is examined. Remote location filing will provide entry filers (such as brokers and couriers) with greater flexibility and will allow Customs to make more efficient use of its resources.

Bureau of Alcohol, Tobacco and Firearms

The Bureau of Alcohol, Tobacco and Firearms (ATF) issues regulations to enforce the Federal laws relating to the manufacture and commerce of alcohol products, tobacco products, firearms and explosives.

ATF's regulations carry out these missions and are designed to:
- Curb illegal traffic in, and criminal use of, firearms and to assist State, local, and other Federal law enforcement agencies in reducing crime and violence;
- Facilitate investigations of violations of Federal explosives laws and arson-for-profit schemes;
- Regulate the alcohol, tobacco, firearms, and explosives industries, including the issuance of licenses and permits;
- Assure the collection of all alcohol, tobacco, firearms, and ammunition taxes and obtain a high level of voluntary compliance with all laws governing those industries;
- Suppress commercial bribery, consumer deception, and other prohibited practices in the alcoholic beverage industry;
- Suppress the illicit manufacture, sale, or diversion of alcoholic beverages and tobacco products for which Federal tax has not been paid; and
- Assist the States in their efforts to eliminate interstate trafficking in, and the sale and distribution of, cigarettes in avoidance of State taxes.

ATF has accomplished the majority of its goals under the President's regulatory reform initiative. In addition, ATF has reduced the administrative burden associated with the current basic permit application process for producers, wholesalers, and importers of alcohol beverages. A reduced and simplified basic permit application form is now in use.

ATF will continue as a top priority during fiscal year 1999 the multi-faceted regulatory project governing various modifications to its regulations governing commerce in explosives. ATF published a general notice soliciting public comments on January 10, 1997, and subsequently issued an expanded notice of proposed rulemaking that addressed additional explosives issues. Analysis of the comments received in response to both documents resulted in a final rule that clarified explosives terminology, eliminated duplication in licensing, relaxed the licensing requirements for on-site manufacturers, and updated the hotline number for reporting the theft or loss of explosives. ATF is further analyzing its regulations governing storage requirements for explosives, including fireworks explosive materials, and plans to issue a notice of proposed rulemaking as described in detail in part II of this regulatory plan.

Financial Management Service

The Financial Management Service (FMS) issues regulations to improve the quality of Government financial management and to administer its payment, collections, debt collection, and Governmentwide accounting programs. FMS' regulatory priority for fiscal year 1999 is to further implement the provisions of the Debt Collection Improvement Act of 1996 (DCIA). A key provision of the DCIA requires that, effective January 2, 1999, all Federal payments (other than payments under the Internal Revenue Code) must be made using electronic funds transfer (EFT 99). Other important provisions of the DCIA pertain to the Federal Government's debt collection efforts.

In fiscal year 1999, FMS will assist Federal program agencies in implementing the final rule that promulgates the DCIA's EFT 99 provisions. This rule establishes categories of waivers, provides for a low-cost Treasury-designated account to be made available to certain recipients, establishes requirements for accounts to which Federal payments may be sent by EFT, and sets forth responsibilities of Federal agencies and recipients with respect to the EFT mandate.

FMS also will promulgate regulations to implement the DCIA's debt collection tools, including the administrative offset of Federal payments for the collection of debts owed to Federal agencies and States and the collection of past-due child support. FMS' goal for fiscal year 1999 is to publish as final rules many of the proposed and interim debt collection rules that were published in fiscal year 1998. These rules concern, among other issues, the offset of Federal payments, including benefit payments and salary payments; the transfer of debts to Treasury for collection; and barring delinquent debtors from obtaining direct and indirect Federal loan assistance. Additionally, FMS, in conjunction with the Department of Justice, will finalize the rule concerning the Federal Claims Collection Standards that sets forth Governmentwide debt collection standards.

FMS also plans to publish a final revision to its rule governing the Federal Government's participation in the Automated Clearing House (ACH), the dominant electronic funds transfer system used by Federal agencies. These revisions will provide the basis for broader use of the ACH system to meet future payment and collection needs.

The DCIA also provided the Department of the Treasury with new program authority concerning claims brought by and against the Federal Government in connection with Treasury checks and established a permanent and indefinite appropriation for the Check Forgery Insurance Fund. FMS plans to revise its rule that governs the processing of claims on Treasury checks that are lost or stolen and then paid over forged or unauthorized endorsements.

Finally, FMS plans to issue a revised final rule to implement the DCIA provisions governing the Treasury Check Offset program, which authorizes collection by offset of amounts owed by financial institutions to the Federal Government.

Bureau of the Public Debt

The Bureau of the Public Debt (BPD) administers regulations governing transactions in Government securities by Government securities brokers and dealers and regulations that implement Treasury's borrowing authority, including rules governing the sale and issue of marketable Treasury securities. In December 1997, BPD assumed responsibility for administering the regulatory provisions governing the types and valuations of collateral that are acceptable to secure deposits of public monies and other financial interests of the Federal Government.

The Government Securities Act of 1986 (GSA) authorizes the Secretary of the Treasury to prescribe rules governing financial responsibility, the protection of customer funds and securities, recordkeeping, reporting, audit, and large position reporting for all Government securities brokers and dealers, including financial institutions. These rules fulfill the Treasury's statutory responsibility to safeguard the efficient functioning of the Government securities market and are designed to prevent fraudulent and manipulative acts and practices and to protect the integrity, efficiency, and liquidity of the market. The Department and BPD are committed to implementing rules that make sense from both a regulatory and market efficiency perspective. Accordingly, the Department and BPD seek to balance the benefits of regulation with the compliance costs imposed on the Government securities market and its participants.

The rules setting out the terms and conditions for the sale and issue by the Department to the public of marketable book-entry Treasury bills, notes, and bonds are also known as the uniform offering circular. These rules apply to securities held in accounts in the book-entry system established by the Department and operated by the Federal Reserve Banks, known as the Treasury/Reserve Automated Debt Entry System, as well as to securities held in accounts directly with Treasury in the TREASURY DIRECT system. The uniform offering circular describes the types of securities offered for sale, the auction methods by which they are sold, the process by which bidders submit bids, the process for awarding securities to successful bidders, and the authorized payment methods.

Financial Crimes Enforcement Network

The regulations of the Financial Crimes Enforcement Network (FinCEN) constitute the core of Treasury's anti-money laundering initiative and an essential component of Treasury's anti-narcotics effort. The Bank Secrecy Act (BSA) authorizes the Secretary of the Treasury to issue regulations requiring financial institutions to keep records and file reports that are determined to have a high degree of usefulness in criminal, tax, or regulatory proceedings and to implement counter-money laundering programs and compliance procedures.

Since mid-1994, FinCEN has been engaged in a thorough review of its regulatory policies and has been building a partnership between Government and the financial sector to fight money laundering. The keystone of that partnership is the recognition that only a cooperative relationship between Government and industry can provide a way to implement a three-pronged strategy of prevention, detection, and enforcement against those who seek to use the financial system to promote or further illegal activity. FinCEN recognizes that BSA compliance imposes costs on the financial community and that recordkeeping and reporting should be required only when the benefits to law enforcement efforts are clear.

During fiscal year 1999, FinCEN will continue to review and revise its existing regulations. FinCEN will continue to work with the financial community to reduce administrative burdens associated with complying with the law while enhancing the usefulness of BSA information for law enforcement, financial regulators, and policymakers. FinCEN is continuing a general revision and simplification of all of its regulations and will accord priority to the following projects:

- *Money Services Businesses.* FinCEN will issue final rules based on three notices of proposed rulemaking issued in May 1997. The first proposed rule, responding to a specific statutory directive, set forth the terms and conditions under which certain non-bank financial institutions—or money services businesses—must register with the Treasury Department. The second would require suspicious transactions reporting by certain money services businesses, and the third would require money transmitters and their agents to report and retain records (and verify customer identity) for currency transactions in amounts between $750 and $10,000 in connection with a transmission or other transfer of funds to a person outside the United States.
- *Suspicious Transaction Reports.* In addition to the proposed rule noted above, FinCEN will issue a final rule based on a 1998 notice of proposed rulemaking requiring the reporting of suspicious transactions by casinos and card clubs, and it will issue a notice of proposed rulemaking requiring the reporting of suspicious transactions by brokers and dealers in securities.
- *Special Currency Transaction Reporting.* FinCEN will finalize a May 1997 proposed rule to require money transmitters and their agents to report and retain records of currency transactions in amounts between $750 and $10,000 in connection with a transmission or other transfer of funds to a person outside the United States and to verify the identity of the senders of such transmissions or transfers.
- *Exemptions from Cash Transaction Reporting (CTR) Requirements.* As required by legislation enacted in 1994, FinCEN is seeking to reduce by 30 percent the number of CTRs required to be filed. In September 1997 FinCEN finalized an interim rule that exempts many transactions from the CTR filing requirement and issued a notice of proposed rulemaking to exempt additional transactions. FinCEN will finalize this proposal.
- *Foreign Bank Drafts.* FinCEN expects to finalize its rulemaking to expand the definition of "monetary instrument" to include certain foreign bank drafts for purposes of the reporting of cross-border transportation. This expansion will implement only as much of the broad authority granted by a 1994 amendment to the BSA as FinCEN believes is required to address the issue of the sale of these foreign bank drafts.
- *"Know Your Customer" and Other Anti-Money Laundering Programs.* FinCEN plans to issue proposed regulations to require banks and other financial institutions to implement certain "Know Your Customer" and other anti-money laundering programs. These programs are closely related to the requirement to report suspicious transactions.

Community Development Financial Institutions Fund

The Community Development Financial Institutions Fund (Fund) was established by the Community Development Banking and Financial Institutions Act of 1994 (12 U.S.C. 4701 et seq.). The primary purpose of the Fund is to promote economic revitalization and community development through investments in and assistance to community development financial institutions (CDFIs), principally through the CDFI Program. The Fund administers the Bank Enterprise Award (BEA) Program, which encourages insured depository institutions to engage in certain eligible development activities and to make equity investments in CDFIs. The Fund also administers the Presidential Awards for Excellence in Microenterprise Development, which recognize outstanding microenterprise development and support programs in an effort to advance an understanding of "best practices" in the field of domestic microenterprise development.

The Fund's regulatory priority for fiscal year 1999 is to continue to streamline the application and review process for the CDFI and BEA programs.

TREAS—Bureau of Alcohol, Tobacco and Firearms (BATF)

PROPOSED RULE STAGE

95. REVISION OF BREWERY REGULATIONS AND ISSUANCE OF REGULATIONS FOR TAVERNS ON BREWERY PREMISES (BREWPUBS)

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

26 USC 5051 to 5056; 26 USC 5401 to 5417; 27 USC 205

CFR Citation:

27 CFR 7; 27 CFR 25

Legal Deadline:

None

Abstract:

ATF intends to streamline regulations applying to breweries. ATF will eliminate obsolete regulatory provisions. A formula system for manufactured beer products will replace statements of process attached to the brewers notice. The annual notice for small brewers to pay reduced rate of tax will be eliminated. Separate regulations for brewpubs will be added to part 25. A section will be added to part 25 to authorize and regulate the alternating use of brewery premises by different brewers. Regulations authorizing the operation of brew-on-premises facilities will be added to part 25.

Statement of Need:

ATF intends to streamline its regulations applying to the brewing industry. These changes will simplify brewery reports and operations and eliminate obsolete regulatory provisions. Specific changes would include the implementation of a formula system for the breweries to replace the statement of process; the establishment of a separate subpart containing simplified regulations for brewpubs; authorizing alternating brewery premises among different proprietors; eliminating the annual notice to pay reduced rate of tax for most breweries; authorizing brewers to file the Brewer's Report of Operations on a quarterly basis; and authorizing many brewers to take inventories quarterly rather than monthly. The rule will also propose minimum production standards for beer thereby reducing formula filings and a revised statement of net contents requirement for certain container sizes.

Summary of the Legal Basis:

ATF has undertaken this review of brewery regulations as part of the President's Regulatory Initiative. These regulations are issued under the general authority of the Secretary of the Treasury to promulgate regulations to implement the Internal Revenue Code and the Federal Alcohol Administration Act.

Alternatives:

Not applicable. ATF believes that industry will support these regulatory changes because they will streamline regulatory requirements applying to the brewing industry.

Anticipated Costs and Benefits:

The proposed regulations will benefit the brewing industry by reducing required inventories, notices, and other submissions to ATF.

Risks:

Not applicable.

96. COMMERCE IN EXPLOSIVES (INCLUDING EXPLOSIVES IN THE FIREWORKS INDUSTRY)

Priority:

Other Significant

Legal Authority:

5 USC 552(a); 18 USC 847; 18 USC 921 to 930; 18 USC 1261; 19 USC 1612 to 1613; 19 USC 1618; 26 USC 7101; 26 USC 7322 to 7326; 31 USC 9301; 31 USC 9303 to 9304; 40 USC 304(k)

CFR Citation:

27 CFR 55

Legal Deadline:

None

Abstract:

Pursuant to section 610 of the Regulatory Flexibility Act, ATF published a notice on January 10, 1997 seeking public comments on whether it should revise its regulations codified at 27 CFR part 55, governing Commerce in Explosives (Including Explosives in the Fireworks Industry). Based on comments received, ATF plans to initiate a rulemaking to revise these regulations in 1998.

Statement of Need:

This notice of proposed rulemaking will address many of the issues in part 55 - Commerce in Explosives, especially the issues in requirements for explosives, including fireworks explosive materials. Pursuant to the periodic review requirements of the Regulatory Flexibility Act (5 U.S.C. 610), ATF published on January 10, 1997 a General Notice initiating the review of a final rule published in 1990 concerning the storage of fireworks explosives materials. The 1990 rule, which was issued as a result of the number and severity of explosions occurring on the premises of special fireworks plants, amended certain regulations codified at 27 CFR part 55, generally concerning the recordkeeping and storage of fireworks explosive materials. The regulations also codified two fireworks related rulings issued in 1979 and 1985, and the provisions of Pub. L. 99-308 relating to black powder. As a result of the public comments received in response to the General Notice and further study of this issue, ATF will issue a notice of proposed rulemaking covering this and related commerce and storage of explosives issues.

Summary of the Legal Basis:

Section 847 of title 18, United States Code, grants the Secretary of the Treasury broad discretion to promulgate regulations necessary for the importation, manufacture, distribution and safe storage of explosives materials. Section 846 of title 18, United States Code, authorizes the Secretary to prescribe precautionary measures to prevent the recurrence of accidental explosions in which explosive materials were involved. The General Notice and upcoming notice of proposed rulemaking are also being issued pursuant to section 610 of the Regulatory Flexibility Act (5 U.S.C. 610), which requires an agency to review within ten years of publication rules for which an agency prepared a final regulatory flexibility analysis addressing the impact of the rule on small businesses or other small entities.

BILLING CODE 4810-25-F

DEPARTMENT OF VETERANS AFFAIRS (VA)

Statement of Regulatory Priorities

The Department of Veterans Affairs (VA) is the custodian and administrator of important public obligations to those who served this Nation. The VA's regulatory responsibility is almost solely confined to carrying out the mandates of the laws enacted by Congress relating to programs for veterans and their beneficiaries. The VA's major regulatory objective is to implement these laws with fairness, justice, and efficiency.

Most of the regulations issued by the VA involve three VA components: The Veterans Benefits Administration, the Veterans Health Administration, and the National Cemetery System. The basic goal of the Veterans Benefits Administration is to provide high-quality and timely nonmedical benefits to eligible veterans and their beneficiaries. The principal goal of the Veterans Health Administration is to provide high-quality health care on a timely basis to eligible veterans through its system of medical centers, nursing homes, domiciliaries, and outpatient medical and dental facilities. The National Cemetery System's primary mission is to bury eligible veterans, members of the Reserve components, and their dependents in VA National Cemeteries and to maintain those cemeteries as national shrines in perpetuity as a final tribute of a grateful Nation to honor the memory and service of those who served in the Armed Forces.

BILLING CODE 8320-01-F

ENVIRONMENTAL PROTECTION AGENCY (EPA)

Statement of Regulatory Priorities

An Era of Opportunity

During the past 28 years, the Nation made great headway in cleaning up the air, water, and land. But as the next century approaches, we are finding that many problems remaining are more complex than those of the past, and they require more sophisticated, tailor-made remedies. EPA has begun a wholesale effort to rethink its current public health and environmental strategies to better meet the challenges of today and the future. And because this effort comes at the same time the President and Vice President are calling for a Government that works better and costs less, EPA has had an unprecedented opportunity to develop tough, new protections that not only solve today's difficult problems but do so in cheaper and smarter ways.

Building a Better System

EPA's efforts to develop a system that works better and costs less are focused on five areas: Greater public access to information; more regulatory flexibility to obtain better results; stronger partnerships with States and industries; more compliance assistance; and less paperwork and red tape. We are pursuing this through every possible venue, internally and externally, and we can already see results.

Internally, EPA has streamlined its management, restructured programs, and given EPA employees broader responsibilities. For example, enforcers are emphasizing compliance assistance, permitters are paying more attention to pollution prevention and market mechanisms, and rule writers are developing public health and environmental protections that include alternatives proposed by regulated entities. These are innovative alternatives that are less costly but which still meet environmental and public health protection goals.

Externally, EPA is bringing together stakeholders from businesses, State and local governments, tribal governments, and labor and public interest groups so that all interested parties can participate in the design of innovative, less costly approaches to environmental and public health protection. This stakeholder involvement increases flexibility, promotes local stewardship, and helps establish and strengthen partnerships between the public and private sectors—all without sacrificing environmental or public health protection. And as compliance with today's environmental laws comes to be regarded as a "floor to maintain" rather than a "ceiling to be reached," EPA is offering flexibility that encourages facilities to go beyond the minimum baseline requirements and continuously improve environmental performance.

As EPA develops this new regulatory system, it will increase its focus on protecting the health of children, taking into account their unique characteristics and vulnerabilities. EPA has developed Agency guidance for carrying out President Clinton's Executive Order 13045 "Protection of Children from Environmental Health and Safety Risks." This guidance will result in an evaluation of children's environmental health for economically significant regulations. Further, following an inclusive public process, the Children's Health Protection Advisory Committee (established under the Federal Advisory Committee Act), EPA has recommended to the Administrator five existing regulations for reevaluation to ensure that they sufficiently protect children's health.

Providing Greater Public Access to Information

With more than a million hits every business day on our Internet site, EPA has seen public demand for environmental information expand exponentially. In response, the Agency has used rulemaking as well as nonregulatory approaches to develop new information programs and tools. Through rulemaking, EPA has expanded the Toxic Release Inventory to include information on seven additional industry sectors—as a result, this year, 6,400 more facilities are reporting on toxic chemical releases in their communities. Another recent EPA rule requires realtors and landlords to give home buyers and renters information on lead hazards before they move into a home. The Agency has also proposed a rule that will require water suppliers to provide specific information—consumer confidence reports—to their customers at least once a year on the quality of their drinking water, thereby empowering consumers to make important health decisions for themselves and their families.

This past spring, Vice President Gore announced the Chemical Right-to-Know Initiative in response to the finding that most commercial chemicals have very little, if any, toxicity information on which governments and the public can make sound judgments about potential risks. This Initiative will rely on a combination of partnership programs and rule-writing to accomplish its goals.

In early August, EPA publicly launched its new online Center for Environmental Information and Statistics (CEIS), which gives users a single, convenient source of reliable, comprehensive information on environmental quality, status, and trends in their community. For the first time ever, users can request environmental profiles on air quality, drinking water systems, surface water quality, hazardous waste, and reported toxic releases—just by typing in a zip code or clicking on a State or county. These profiles are based on data from national reports EPA prepares under Federal environmental laws.

In 1996, President Clinton directed EPA to create a new program to bring up-to-date environmental information to people in ways they could understand and use every day. Through an EPA program called Environmental Monitoring for Public Access and Community Tracking—EMPACT—Americans will be able to get "real-time" answers to questions about environmental quality in 86 large metropolitan areas. EPA has already launched a number of EMPACT pilots, including AIRNOW and BEACH Watch Internet sites, which provide real-time information; EMPACT will be fully operative by the year 2001.

More Regulatory Flexibility

In an effort to obtain better results, EPA is also giving businesses and communities more flexibility with how they fulfill their public health and environmental protection responsibilities. For example, a new rule for the pulp and paper industry—the Agency's first-ever integrated, multi-media rulemaking—allows companies to delay compliance with new water-pollution control requirements if they commit to going beyond compliance and installing more advanced technologies. In a similar vein, EPA will offer increased regulatory flexibility to the synthetic organic chemical industry through a proposed rule, forthcoming late this summer, that will consolidate and simplify 16 existing rules.

Through an experimental program called Project XL, EPA encourages companies to receive flexibility to use alternative regulatory strategies if they agree to go beyond compliance—and involve stakeholders along the way.

Stronger Partnerships with States and Industry

EPA recognizes that a new and improved system of environmental protection must include stronger partnerships between the public and private sectors and between the States and the Federal Government. It would also include a greater role for citizens in local, community-based decisionmaking. The Agency has taken several steps to improve these relationships and involve citizens. For example, the Agency offers Brownfields grants and Sustainable Development Challenge grants that give communities the resources necessary to clean up contamination, especially from abandoned industrial sites, and to restore environmental quality and provide environmentally sound economic opportunities. In addition, by providing better public access to environmental data, as discussed above, EPA is working to empower citizens so that they can be informed participants in environmental decisionmaking processes at national, State, or local levels.

EPA and the States are reinventing their working relationship to strengthen management of the Nation's environmental programs. Under the National Environmental Performance Partnership System (NEPPS), EPA has negotiated agreements with 32 States. NEPPS is designed to give States greater flexibility to direct resources where they are needed most, based on environmental conditions and program needs, and to tailor EPA's oversight and technical assistance to each State's particular situation. As part of the partnership effort, EPA and States are collaborating in the development of core performance measures that should strengthen EPA's ability to measure environmental progress over the long term. The core measures include a mix of activity and environmental measures and will be refined over time, particularly to increase the focus on environmental results as environmental indicators become more available. In another move to strengthen State/EPA partnerships, in March 1998, EPA and the States approved a formal agreement on how to manage testing of innovative environmental management strategies within the current regulatory framework.

To strengthen the relationship between the private and public sectors, EPA now is consulting with regulated industries earlier in its rule development processes. EPA sometimes employs formal consensus-based rulemaking, such as regulatory negotiations. More frequently, however, the Agency depends on informal outreach to potentially affected parties. The Agency has paid particular attention to its relationship with small businesses and, in fact, EPA has long been prominent among Federal agencies in its outreach to these small entities. The Agency not only rigorously carries out the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA) and the Regulatory Flexibility Act (RFA), but it also uses its Small Business Ombudsman and its Office of State and Local Relationships to reach out to small entities.

More Compliance Assistance

Once EPA establishes public health and environmental protection rules, the Agency must ensure that businesses and others can understand and comply with them. This is particularly important for small businesses and communities that have limited staff and resources. To help these small entities, EPA is taking several steps. First, the Agency is establishing compliance assistance centers to serve as direct, readily available sources of information on the latest regulatory requirements for small businesses. EPA has established five centers for five sectors: Printed wiring board manufacturing, auto service and repair, printing, agriculture, and metal finishing. Before the year is over, centers for another four sectors will have opened: Transportation, local government, chemical manufacturing, and paints and coatings.

EPA is also offering to reduce or eliminate penalties for violations if small businesses establish programs to detect, publicly disclose, and fix problems—if the violation does not involve criminal activity or a serious risk to public health or the environment. Besides making life easier for businesses and other regulated facilities, these steps can help prevent pollution and lessen the burden and expense of cleanup. As of June 1998, 247 companies had voluntarily disclosed violations at more than 760 facilities.

Streamlining Regulatory and Paperwork Burdens

The Agency continues to examine existing environmental regulations and paperwork to simplify and streamline compliance for the regulated community. This is consistent with the President's announcement in February 1995 that all Federal agencies must conduct line-by-line reviews of their regulations and eliminate those that are obsolete or redundant. EPA has already made changes to more than 70 percent of its regulations and eliminated approximately 1,400 pages of obsolete rules from the Code of Federal Regulations (CFR), some 10 percent of EPA's total CFR regulations. In March 1995, EPA set a goal of reducing by 25 percent paperwork burden associated with requirements in effect on January 1, 1995. By September 30, 1995, EPA had achieved six million hours in reductions from this baseline. Following reauthorization of the Paperwork Reduction Act starting in October 1995, EPA revised its goal while reaffirming its commitment to the reduction of paperwork burdens. In the Information Streamlining Plan of April 1997, EPA projected an additional 26 million hours of reductions during the 3-year period from October 1, 1995, through September 30, 1998, and EPA is on target to meet this goal. Reductions during this period will be offset by the addition of approximately 30 million burden hours from new regulations and upward revisions of previous burden estimates. More than two-thirds of this offset is due to strengthening of the community right-to-know initiative.

EPA is creating several opportunities for regulatory and paperwork streamlining. For example, under the umbrella of its Reinventing Environmental Information (REI) initiative, the Agency is working in partnership with the States to develop a "one-stop" environmental reporting system that will allow facilities to submit required environmental permitting and compliance data on-line. This can save businesses and other regulated facilities time and money, help bring about quicker decisions on permitting and compliance actions, improve data accuracy, and create better access to information for the public.

In the area of clean water regulation, an innovative streamlining policy allows facilities to significantly cut routine water quality monitoring and reporting, as long as they achieve and maintain strong compliance records. In pesticide regulation, a new self-certification procedure allows pesticide registrants to make limited changes to their product registration with a simple notification to the Agency rather than filing an application for a formal amendment to registration.

Highlights of EPA's Regulatory Plan for 1998

EPA's regulatory plan for 1998 reflects the Agency's continuing commitment to create new environmental protection strategies that better protect public

health and the environment at lower cost. Here are some of the highlights from each program office:

Office of Air and Radiation Highlights

EPA is committed to taking advantage of the flexibility granted by the Clean Air Act that enables companies, States, and communities to meet clean air goals with innovative, low-cost approaches. The Office of Air and Radiation continues to reinvent major existing rules and regulations and is drafting future rules to reflect the common-sense principles of the reinvention effort. Here are a few examples:

- EPA recently established more stringent air quality standards for ozone and particulate matter based on new scientific and technical information. While the new standards offer increased protection for public health and the environment, EPA is also pursuing an implementation strategy that gives States and industry flexibility with which they can meet these air quality goals. The implementation strategy:
  - Respects agreements already reached by communities and businesses and does not disrupt current progress toward improving air quality;
  - Recognizes the need to adopt regional approaches toward addressing air pollution and finds that the most cost-effective mechanism for doing so is an emissions trading plan for utilities;
  - Gives areas that adopt these regional control measures a "transitional" status and allows EPA to devise an approach that eliminates unnecessarily burdensome planning and pollution reduction requirements;
  - Provides ample time for developing cost-effective control plans and for compliance.
- EPA, building on successful State programs, has been working with stakeholders to develop a more streamlined way for facilities to get operating permit updates from State or local agencies. Depending on the environmental significance of the change, States would have greater flexibility to decide the appropriate amount of EPA and public review for most permit revisions. An example of this new approach is the issuance this July of a final rule significantly reducing emissions of air toxics from the pharmaceutical production industry. In this industry, companies frequently change their operations as their products change. In order to avoid costly, time-consuming revision of air pollution permits every time a plant changes its production process, the facility will be allowed to choose from a menu of permit options already pre-approved by the permitting authority and reviewed by EPA and the public.
- EPA will continue its program to reduce emissions of nitrogen oxides, hydrocarbons, and particulate matter from engines that power both highway and "off-highway vehicles" (called "nonroad" engines). A landmark rule on highway engines was issued in final form last November, and a related final rule covering nonroad engines will be released this fall. The Agency brought together potentially affected industries, States, regional air management organizations, and public health and environmental interest groups to participate in the development of these rules. This outreach effort included the conducting of a small-business panel review of the nonroad proposal under the Small Business Regulatory Enforcement Fairness Act (SBREFA), which yielded a number of recommendations for burden relief, which EPA accepted and incorporated into the proposal.
- The Agency has proposed changes to simplify and streamline the New Source Review Program, which requires newly built facilities or those undergoing major modification to obtain a permit to ensure that emissions will not cause or contribute to air pollution problems.
- From discussions with affected industries, EPA has learned that many companies find it difficult to know what we expect of them given the growing complexity of the regulatory system during the last 25 years. In many cases, regulations may be duplicative, overlapping, or inconsistent, especially in the areas of monitoring, recordkeeping, and reporting. In response to these problems, EPA will propose a rule intended to consolidate and synchronize all Federal air regulations that apply to the synthetic organic chemical manufacturing industry. If this pilot program proves successful, we will expand it to cover other industries.

Office of Water Highlights

- In February 1998, a team of nine Federal agencies released the Clean Water Action Plan in response to direction from the President and Vice President to revitalize the work that had started in 1972 with the passage of the original Clean Water Act. The Clean Water Action Plan was conceived as an innovative way to focus many existing Federal programs on the most important remaining problems affecting our water resources. The main theme behind the Plan is to coordinate the activities of nine key Federal agencies to better support; provide technical, educational, and financial assistance; and participate in locally led watershed restoration and protection efforts. The plan contains more than 100 action items that focus efforts on:
  - Assessing the health of all watersheds and establishing restoration priorities,
  - Reducing public health threats from fish and shellfish, beaches, and drinking water sources,
  - Improving private and public stewardship of natural resources,
  - Strengthening polluted runoff controls,
  - Restoring and protecting wetlands and coastal waters, and
  - Making water quality information more accessible to the public.

In addition, the Plan seeks to better coordinate our watershed restoration and preservation efforts with our efforts to provide safe drinking water to all Americans.

- On August 6, 1996, President Clinton signed the Safe Drinking Water Act Amendments of 1996. The amendments are bringing substantial changes to the national drinking water program for EPA, States, and water utilities and will provide greater protection and information for the 240 million Americans served by public water systems. To carry out the 1996 amendments EPA is: Working with stakeholders to develop a new program to protect water sources; helping the States implement a billion-dollar drinking water State revolving fund; and developing regulations that will protect human health by ensuring the chemical integrity of drinking water and notifying the public when that integrity may be compromised. Below are several regulatory actions required by the 1996 amendments:
  - Disinfectant/Disinfection By-Products Rule and the Interim Enhanced Surface Water Treatment Rule together address the tradeoffs between pathogens and disinfection byproducts.
  - The Ground Water Rule will establish a framework to identify public water systems that use only ground water sources and are vulnerable to microbial contamination. This rule will also develop risk control strategies for these water systems that will include but not be limited to disinfection.
  - The National Primary Drinking Water Rule for Radon will reduce the risk of radon to public health, both from ingestion via drinking water and inhalation of radon discharged through normal household water use, such as showering. This rule will also address additional requirements of the 1996 Amendments that require EPA to withdraw our 1991 proposal and to include work with the National Academy of Sciences to do an assessment of risk and an assessment of health risk reduction benefits associated with various mitigation methods of reducing radon in indoor air. It would also require EPA to develop an alternative maximum contaminant level (MCL) in certain cases.
  - Revisions to the Public Water System Public Notification Regulation will tailor the frequency and content of public notices about lapses in drinking water integrity to the relative risks to public health. This will teach consumers, at their option, to make timely choices about the risk to them from drinking water.
- To provide more regulatory flexibility, EPA is streamlining two of its water-related programs: National Pollutant Discharge Elimination System (NPDES) permits and the pretreatment program. The following are highlights of efforts underway.
  - In the NPDES permits program (part 122), EPA is removing outdated requirements; streamlining permit application, modification, and appeal procedures; and reducing monitoring and reporting requirements. For example, EPA continues to consolidate and revise industrial and municipal permit application forms and streamline the application process.
  - Through proposed changes to the existing regulations (proposal planned for fall 1998), EPA will streamline various provisions of the General Pretreatment Regulations for Existing and New Sources of Pollution codified at 40 CFR part 403 to improve the regulatory programs' effectiveness while maintaining or improving the programs' focus on protection of public health and the environment. The goal of this initiative is to provide greater flexibility, reduce burden, and achieve greater environmental results at less cost. To this end, EPA is committed to streamlining the National Pretreatment Program to reduce the burden of technical and administrative requirements that affect industrial users and Publicly Owned Treatment Work (POTW) and State Control Authorities. In addition to this streamlining effort, EPA recently published a Federal Register notice (June 23, 1998; 63 FR 34170) requesting proposals from POTWs interested in implementing alternative local pretreatment programs. EPA is not proposing a change to the regulations at this time. Instead, in response to the findings of stakeholder studies regarding measures of performance, EPA is requesting POTWs interested in carrying out environmental performance-based programs to submit Project XL proposals explaining how they would change their pretreatment program.

Office of Prevention, Pesticides, and Toxic Substances Highlights

- EPA will continue to improve the public's right to know about toxic chemicals in their community through the Toxic Release Inventory (TRI) program of the Emergency Planning and Community Right-to-Know Act (EPCRA). The TRI is a data base that gives communities information on releases to air, water, and land for approximately 600 toxic chemicals and on other waste management activities for these chemicals, such as treatment and recycling. Armed with this information, communities can better understand the nature of toxic releases at the local level, assess risk, and decide local priorities. The Chemical Right-to-Know Initiative has three key components, each of which EPA is implementing rapidly. These are: Baseline toxicity testing for 3,000 widely used commercial chemicals; additional health effects testing for chemicals to which children are disproportionately exposed; and the listing and lowering of reporting thresholds for persistent, bioaccumulative, toxic chemicals reported to TRI.
- For chemicals that are highly toxic at very low dose levels, persist for extended periods in the environment, and/or bioaccumulate through the food chain, EPA is evaluating under TRI whether to lower the reporting threshold amount—the amount of a chemical a facility uses, manufactures, or processes before it must report releases. In addition, EPA is working with stakeholders to simplify the chemical reporting forms to make them less burdensome for regulated entities. The Agency is also simplifying its annual reports to make them easier to understand.
- The Food Quality Protection Act (FQPA), signed into law on August 3, 1996, overhauls U.S. pesticide laws to regulate pesticides on foods and better protect children. EPA is engaged in an intensive implementation effort, including developing new regulations, guidance, and programs. One such effort is the Endocrine Disruptor Screening and Testing Program. EPA established an advisory committee to consider human health and ecological effects; estrogenic, androgenic, anti-estrogenic, anti-androgenic, and thyroid effects of pesticides, industrial chemicals, and drinking water contaminants. Another is the Pesticide Tolerance Reassessment Program that looks at aggregate and cumulative exposures to pesticides and emphasizes the protection of infants and children.
- Childhood lead poisoning is a pervasive problem, with almost a million young children with more than 10 ug/dl of lead, which is the Center for Disease Control's level of concern, in their blood. Elevated blood-lead levels can lead to reduced intelligence and neuro-behavioral problems in young children, and can cause other health problems in children and adults. EPA is working on a final regulation to replace the existing interim guidance that identifies lead-based paint, lead-contaminated dust, and lead-contaminated soil hazards. We are also working on rules to address lead risks from renovation and remodeling activities and to address the disposal of lead-based paint debris.
- Currently, we require chemical manufacturers to report the names of the chemicals they produce, the quantity produced, and the locations of manufacturing facilities. EPA plans to propose expanding the TSCA Inventory to include information on public exposure to the chemicals and how the chemicals are used (e.g., in manufacturing processes). This allows EPA and others to identify chemicals of highest concern so that the Agency can set goals for chemical assessment, risk management, and prevention programs. The action will also encourage pollution prevention by identifying safer chemical substitutes.

- EPA is working on proposals to clarify and reduce the burden of the Asbestos-Containing Materials Rules and to harmonize them with the Occupational Safety and Health Administration's asbestos rules.
- Because certain pesticides have high groundwater contamination potential, EPA is considering a requirement for EPA-approved Pesticide Management Plans (PMP) for these pesticides. A PMP is a State's or Tribe's commitment to EPA and the public to manage the use of a certain pesticide in a way that avoids unreasonable risks to groundwater that would otherwise warrant cancellation of the use.

Office of Solid Waste and Emergency Response Highlights

The Office of Solid Waste and Emergency Response (OSWER) is planning to propose a number of actions to streamline and simplify compliance under the Resource Conservation and Recovery Act (RCRA), the Federal law governing hazardous waste management. As part of its effort to refocus hazardous waste regulation on high-risk wastes, EPA is undertaking a number of actions to tailor standards to the nature or degree of risk posed by particular wastes. One example of this is the development of management standards for cement kiln dust. The proposed standards for this large volume waste will be tailored to protect public health and the environment while imposing minimal burden on the regulated community.

- EPA is streamlining the regulation of listed hazardous waste. Certain regulations are overly broad in that they apply regardless of the concentrations of the listed wastes or the mobility of the toxicant in the waste. As a result, they regulate certain low-risk wastes (in particular, treatment residuals) as if they posed high risk. EPA's common-sense approach would exempt these low-risk wastes from the full management requirements designed for high-risk hazardous wastes.
- EPA also plans to establish new emissions standards for hazardous waste combustors under joint Clean Air Act and RCRA authority. These revised standards will avoid duplicative Agency effort and piecemeal regulation of the hazardous waste management industry while protecting public health and the environment from chlorinated dioxins, mercury, and other hazardous air pollutants.
- The Agency is revising the RCRA Hazardous Waste Manifest system because of how much paperwork burden is associated with the manifest. Reduction in paperwork burden is part of the Administration's Regulatory Reinvention goal of cutting Government "red tape." The Agency wants to standardize the manifest program across the States by introducing a truly uniform manifest tracking form. The chief goal of the manifest system is to facilitate the safe transportation of offsite shipments of hazardous waste to appropriate RCRA management facilities.
- EPA is considering regulatory changes to the RCRA hazardous waste storage and disposal requirements for low-level mixed waste (LLMW). EPA will determine whether the disposal of LLMW in facilities designed to address radiological hazards, which are licensed by the Nuclear Regulatory Commission (NRC) (but are not self-regulated), will provide adequate protection of human health and the environment with respect to chemical hazards.
- Over the past 2 years, the Agency has worked with stakeholders from State agencies, industry, and the environmental community to develop recommendations to improve the Agency's permitting programs. These stakeholders concluded that permitting activities should be commensurate with the complexity of the activity and that permit programs should be flexible enough to allow streamlined procedures for routine permitting activities. The stakeholders recommended that regulations be developed to allow "standardized permits" for on-site storage and non-thermal treatment of hazardous waste in tanks, containers, and containment buildings. As a result of this recommendation, the Agency is proposing to revise the RCRA regulations to allow this type of permit.

Office of Administration and Resources Management Highlights

- In 1995, EPA and States agreed to develop and carry out the National Environmental Performance Partnership System (NEPPS) to: Promote joint planning and priority setting by EPA and the States; give States greater flexibility to direct resources where they need them most; foster use of integrated and innovative strategies for solving water, air, and waste problems; achieve a better balance in the use of environmental indicators and traditional activity measures for managing programs; and improve public understanding of environmental conditions and the strategies being used to address them.
- The Agency is working to change our grant rules to promote State-EPA collaboration, provide opportunities for innovation and reduce paperwork while ensuring sound fiscal management and accountability for environmental performance consistent with NEPPS. These changes will help build more effective State-EPA partnerships and improve environmental conditions by giving States increased flexibility to direct resources where they need them most to address environmental and public health needs.
- We are also developing a Performance Partnership Grant Rule for Indian Tribes. This program would provide more flexibility to Tribes to spend their resources on their top priorities and to achieve administrative savings. It would accomplish this by letting Tribes apply for and administer one environmental program grant instead of many separate grants.

Summary

In developing all of these actions, EPA is committed to flexible, cost-effective regulatory programs that offer increased protections for public health and the environment. EPA welcomes suggestions from the public to help the Agency in this effort.

EPA

PRERULE STAGE

---

97. HAZARDOUS WASTE STORAGE AND DISPOSAL REGULATION RELATED TO LOW LEVEL MIXED WASTE; PROPOSED MODIFICATIONS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 6905; 42 USC 6912(a); 42 USC 6921; 42 USC 6922; 42 USC 6924; 42 USC 6926

CFR Citation:

40 CFR 261.4; 40 CFR 262.34

Legal Deadline:

NPRM, Judicial, October 31, 1999.

Abstract:

EPA is considering a regulatory exemption from the RCRA hazardous waste disposal requirements for low level mixed waste (LLMW). EPA will determine whether the disposal of LLMW in facilities designed to address radiological hazards which are licensed by the Nuclear Regulatory Commission (NRC) will provide adequate protection of human health and the environment with respect to chemical hazards. If the Agency decides that such disposal is protective, EPA will propose that for the purposes of disposal these wastes be conditionally exempted from the RCRA subtitle C disposal requirements. EPA is formulating the scope and form of the exemption, and will propose the action in the regulatory proposal.

Commercial LLMW is regulated under multiple authorities: by RCRA, as implemented by EPA or authorized States for chemically hazardous constituents, and by the Atomic Energy Act (AEA) for radiological constituents of mixed waste, as implemented by either NRC or its agreement States. Commercial mixed waste generators, particularly nuclear power plants, have raised the concern that AEA and RCRA requirements for mixed waste overlap, and are potentially inconsistent, costly, and unnecessary. Nuclear power plants contend that NRC regulations covering design, licensing and operation of low level radioactive waste disposal facilities offer human health and environmental protection similar to that required by EPA requirements governing chemical hazards under RCRA regulations. Furthermore, there is a serious shortage of disposal capacity for LLMW. The waste acceptance criteria of the very few facilities having both a RCRA permit and an NRC license severely limit the activity levels of radionuclides they can dispose. EPA is also considering alternatives to current EPA regulations applicable to mixed waste storage. NRC regulations also apply to storage of commercial mixed waste. Current RCRA regulation prohibits indefinite storage of waste containing hazardous constituents, despite the lack of treatment technology or disposal capacity for some mixed wastes. Through this rulemaking action, EPA seeks to explore regulatory alternatives that could provide regulatory relief for LLMW from hazardous waste storage requirements while waste is subject to NRC regulations and licensing conditions.

Statement of Need:

An Advance Notice of Proposed Rulemaking (ANPRM) is needed to gather both preliminary comments to EPA's approach for regulatory relief using contingent management, and also voluntary data to be used in the regulatory impact assessment. The Proposed Rulemaking is needed due to: the lack of mixed waste treatment and disposal facilities nationwide; industry concerns regarding the potential for duplication under EPA and NRC regulatory requirements; and follow through on comments relating to mixed waste management received from industry on the Hazardous Waste Identification Rule proposal of December 1995, and the mixed waste storage guidance of August 1995.

Summary of the Legal Basis:

The Proposed Rulemaking is required by the settlement agreement reached with the Edison Electric Institute, and other litigants and intervenors, in April 1997.

Alternatives:

EPA is considering a number of alternatives including 1) use of Hazardous Waste Identification Rule (HWIR) health based exit levels for chemical constituents in conjunction with NRC disposal requirements; 2) applicability of HWIR exit concentration levels and associated requirements for chemical constituents; 3) conditional exemption for stored mixed waste subject to NRC regulatory requirements; and 4) allowing storage-for-decay as provided by NRC for some mixed wastes to limit worker exposure to radionuclides.

Anticipated Costs and Benefits:

Cost-benefit information is not available; it will be developed as part of the economic analysis for the proposed rulemaking.

Risks:

This rule would maintain current levels of risk protection for alternatives 1 through 3. For alternative 4, there would be a reduction in risk due to reduced exposure of workers to radionuclides mixed with hazardous wastes.

EPA

PROPOSED RULE STAGE

---

98. REVISION TO 40 CFR 35 SUBPART A AND PROMULGATION OF PERFORMANCE PARTNERSHIP (STATE) GRANT REGULATION

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

PL 104-134; PL 105-65

CFR Citation:

40 CFR 35

Legal Deadline:

None

Abstract:

This proposed regulation: (1) updates, clarifies, and streamlines requirements governing environmental program grants; (2) establishes requirements for the new Performance Partnership Grant (PPG) program; and (3) establishes

requirements for grant programs that began after the original rule was published. (A regulation governing environmental program grants to Indian tribes and tribal consortia is published elsewhere in this issue of the Federal Register.)

Statement of Need:

Since EPA was formed in 1970, State capacity and responsibility for implementing environmental and public health protection programs has grown steadily. Until 1996, State and interstate agencies could receive EPA assistance in carrying out their environmental programs only through a variety of categorical environmental grants, such as grants for water pollution control, air pollution control, and hazardous substance control. Meanwhile, environmental problems and their solutions have grown more complex and solutions to these complex problems often crossed EPA program lines. In light of this complexity, State and EPA leaders recognized that continued environmental progress could be best achieved if EPA and States worked together more effectively as partners and environmental programs were made more flexible in terms of their coverage.

In response, EPA asked Congress for new authority that would provide that needed flexibility. In 1996, Congress authorized the award of Performance Partnership Grants (PPGs), in which State and interstate agencies can choose to combine two or more environmental program grants.

This proposed rule will implement the PPG program which promotes State-EPA collaboration; provides opportunities for innovation; and reduces paperwork. EPA expects the rule will foster joint planning and priority-setting by explicitly requiring that State priorities and needs be considered, along with national and Regional guidance, in negotiating grant work plans, consistent with the National Environmental Performance Partnership System (NEPPS). Under this rule, a State can choose to organize its grant work plans in accord with environmental goals and objectives or in other new ways rather than using categories pre-defined by EPA. The length of a grant budget period will be negotiable. These opportunities afforded by the PPG program and this rule are available to all States.

This rule accommodates all potential variations in how EPA and individual States work to build partnerships. The rule also minimizes duplicative effort by allowing for multiple uses of information or processes wherever appropriate. The regulation advances ongoing efforts to build more effective State-EPA partnerships and to improve environmental conditions by providing States with increased flexibility to direct resources where they are needed most to address environmental and public health needs.

Summary of the Legal Basis:

Not required by law or court order.

Alternatives:

EPA can continue to award PPGs under guidance prepared by the agency and announced in the Federal Register.

Anticipated Costs and Benefits:

The rule does not result in any new costs. It is expected to allow cost and administrative savings for States by reducing the amount of grant paperwork and by simplifying accounting requirements that do not require recipients to account for expenditures in accordance with their original funding sources. With PPGs, recipients can negotiate work plans with EPA that direct Federal funds where the recipients need them most to address environmental and public health problems. Recipients can also try new multi-media approaches and initiatives, such as children's health protection programs, multi-media inspections, compliance assistance programs, and ecosystem management, that were difficult to fund under traditional categorical grants.

EPA

99. REVISION TO 40 CFR 35 SUBPART A AND PROMULGATION OF PERFORMANCE PARTNERSHIP (TRIBAL) GRANT RULE

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

PL 104-134; PL 105-65

CFR Citation:

40 CFR 35

Legal Deadline:

None

Abstract:

This proposed regulation will: (1) update, clarify, and streamline requirements governing environmental program grants; (2) establish requirements for the new Performance Partnership Grant (PPG) program; and (3) establish requirements for grant programs that were developed after the original rule was published. (EPA is also issuing a regulation governing environmental program grants to State and Interstate agencies.)

Statement of Need:

This regulation provides a tribal-specific subpart which is intended to be easy to use; optimizes the administration of tribal assistance programs through increased flexibility; and removes procedural impediments to effective environmental programs for Indian tribes.

Since EPA was formed in 1970, tribal capacity and responsibility for implementing environmental and public health protection programs has grown steadily. Until 1996, tribes and Intertribal Consortia could receive EPA assistance in carrying out their environmental programs only through a variety of categorical environmental grants, such as grants for water pollution control, air pollution control, and safe drinking water. During that time, environmental problems and their solutions grew more complex and solutions to those complex problems often crossed EPA program lines. In light of this complexity, tribal and EPA leaders recognized that continued environmental progress could be best achieved if EPA and the tribes worked together more effectively as partners and environmental programs were made more flexible in terms of their coverage.

In response, EPA asked Congress for new authority that would provide that needed flexibility. In 1996, Congress authorized the award of Performance Partnership Grants (PPGs), in which tribes and Intertribal Consortia can choose to combine two or more environmental program grants.

This proposed rule will implement the PPG program which promotes tribal-EPA collaboration; provides opportunities for innovation; and reduces paperwork. EPA expects the rule will foster joint planning and priority-setting by explicitly requiring that tribal priorities and needs be considered, along with national and regional guidance, in negotiating grant work plans, consistent with the National Environmental Performance Partnership System (NEPPS). Under this rule, a tribe can choose to organize its grant work plans in accord with environmental goals and objectives or in other new ways rather than using categories pre-defined by EPA. The length of a grant budget period will be negotiable. These opportunities afforded by the PPG program and this rule are available to all tribes which receive grants under more than one EPA environmental program.

This rule accommodates all potential variations in how EPA and individual tribes work to build partnerships. The rule is also minimizes duplicative effort by allowing for multiple uses of information or processes wherever appropriate. The regulation advances ongoing efforts to build more effective tribal-EPA partnerships and to improve environmental conditions by providing tribes with increased flexibility to direct resources where they are needed most to address environmental and public health needs.

Summary of the Legal Basis:

Not required by law or court order.

Alternatives:

EPA can continue to award PPGs under guidance prepared by the agency and announced in the Federal Register.

Anticipated Costs and Benefits:

The rule does not result in any new costs. It is expected to achieve cost and administrative savings for tribes by reducing the amount of grant paperwork and by simplifying accounting requirements that do not require recipients to account for expenditures in accordance with their original funding sources. With PPGs, recipients can negotiate work plans with EPA that direct Federal funds where the recipients need them most to address environmental and public health problems. Recipients can also try new multi-media approaches and initiatives, such as children's health protection programs, multi-media inspections, compliance assistance programs, and ecosystem management, that were difficult to fund under traditional categorical grants.

Risks:

There are no known risks.

EPA

100. IMPLEMENTATION OF OZONE AND PARTICULATE MATTER (PM) NATIONAL AMBIENT AIR QUALITY STANDARDS (NAAQS) AND REGIONAL HAZE REGULATIONS

Priority:

Other Significant

Legal Authority:

PL 95-95; PL 101-549

CFR Citation:

40 CFR 51; 40 CFR 81

Legal Deadline:

None

Abstract:

EPA recently issued new, updated air quality standards for ozone (62 FR 38856) and particulate matter (PM) (62 FR 38652). Pursuant to President Clinton's implementation strategy as outlined in a memorandum to EPA Administrator Carol Browner, EPA is developing guidance and rules for sensibly and cost-effectively meeting the new standards. To help develop the guidance and rules, EPA, between September 1995 and December 1997, sought significant stakeholder involvement through a committee established under the Federal Advisory Committee Act. Consistent with the schedule outlined in a memorandum from President Clinton dated July 16, 1997, EPA will publish guidance and rules by the end of 1998 designed to give States, local governments, and businesses the flexibility they'll need to meet protective public health standards in a reasonable, cost-effective manner.

For ozone, the implementation plan will emphasize a regional, State-sponsored approach that addresses the long-distance transport of ozone. On October 10, 1997, EPA issued a proposal (sometimes referred to as the OTAG SIP Call) to require broad regional emissions reductions of nitrogen oxides (NOx) gases which contribute to the formation of ozone (62 FR 60318, November 7, 1997). EPA will work with the affected States to develop a regional NOx emissions cap-and-trade program modeled after the program used to achieve sulfur dioxide reductions in the acid rain program.

In order to help areas covered by EPA's regional plan avoid burdensome measures associated with noncompliance, EPA will create a new transitional classification. Areas that attain the 1-hour standard but not the new 8-hour standard as of the time EPA

promulgates designations for the 8-hour standard could obtain this new classification if they participate in a regional strategy and/or opt to submit early plans addressing the new 8-hour standard. Because many areas will need little or no additional new local emission reductions to reach attainment, beyond the reductions that will be achieved through the regional control strategy, and will come into attainment earlier than otherwise required, EPA will exercise its discretion under the law to eliminate unnecessary local planning requirements for such areas. EPA will revise its rules for new source review (NSR) and conformity so that States will be able to comply with only minor revisions to their existing programs in areas classified as transitional. (cont)

Statement of Need:

Development of programs for ozone and PM are necessary to implement any revised NAAQS under title 1 of the Clean Air Act.

Alternatives:

This entry comprises the set of actions the Agency plans to take to implement the new ozone and fine particulate standards. The major alternative facing the Agency was whether to implement the standards strictly on a state-by-state basis, as bas been the norm in the past, or to take Federal action to address the fact that emissions from one State affect the ability of other States to achieve the standards. The Agency chose the latter course, embodied in the NOx Regional Strategy described above. The other major set of alternatives involved various possible strategies for infrastructure design, such as the designations of nonattainment areas and the requirements that will apply to them. The major issues in this area were settled by the July 1997 issuance of a Presidential Directive setting out a flexible implementation policy, the elements of which are summarized in the abstract above.

Anticipated Costs and Benefits:

EPA is in the process of preparing a regulatory impact analysis (RIA) for implementing new ozone and PM NAAQS, as well as a regional haze reduction program. The RIA will be available at the time the implementation strategy is proposed in the Federal Register. The current schedule calls for publication of the notice of proposed rulemaking on Phase I of the implementation strategy in mid-1997.

Additional Information:

SAN No. 3553

ABSTRACT CONT: In a final rule promulgated on June 5, 1998, EPA identified areas that have air quality meeting the 1-hour air ozone standard and revoked that standard for those areas (63 FR 31013, June 5, 1998). A subsequent final rule for additional ozone areas attaining the 1-hour standard was promulgated on July 22, 1998 (63 FR 39432).

For PM10, EPA revised the set of standards that had existed since 1987. Given that health effects from coarse particles are still of concern, the overall goal during this transition period is to ensure that PM10 control measures remain in place to maintain the progress that has been achieved toward attainment of the PM10 NAAQS (progress which also provides benefits for PM2.5) and protection of public health. To ensure that this goal is met, the pre-existing PM10 NAAQS will continue to apply until certain critical actions by EPA and by States and local agencies have been taken to sustain the progress already made. For areas not attaining the existing PM10 NAAQS when the revised standards go into effect, those existing standards remain in effect until EPA has completed a section 172(e) rulemaking to prevent backsliding. EPA will propose this rulemaking in the spring of 1998. For areas attaining the pre-existing PM10 NAAQS, EPA will retain that standard until the State submits and EPA approves the section 110 SIP which States are required to submit within 3 years of a NAAQS revision. Once those areas have an approved SIP, EPA will take action so that the pre-existing PM10 standard no longer applies. In addition, EPA will take action within 3 years to designate areas for the revised PM10 standards.

EPA's approach to addressing regional haze was proposed concurrently with the promulgation of the final ozone and PM NAAQS. The public comment period on this proposal closed on December 5, 1997. EPA plans to promulgate the regional haze rulemaking in the fall of 1998.

EPA

101. ENVIRONMENTAL RADIATION PROTECTION STANDARDS FOR YUCCA MOUNTAIN, NEVADA

Priority:

Other Significant

Legal Authority:

Energy Policy Act sec 801

CFR Citation:

40 CFR 197

Legal Deadline:

NPRM, Statutory, August 1, 1996.

Abstract:

This rulemaking is in response to section 801 of the Energy Policy Act of 1992 which directs the Administrator to promulgate public health and safety standards for protection of the public from releases from radioactive materials stored or disposed of in the repository at the Yucca Mountain site. The only regulated entity is the U.S. Department of Energy.

Statement of Need:

In 1985, the Agency issued generic standards for the management and disposal of spent nuclear fuel and high-level radioactive waste. The Nuclear Waste Policy Amendments Act of 1987 mandated the study of Yucca Mountain, Nevada to determine its suitability to be a repository for spent nuclear fuel and high-level radioactive waste. The Waste Isolation Pilot Plant Land Withdrawal Act of 1992 exempted Yucca Mountain from coverage under the 1985 generic standards. Concurrently, the Energy Policy Act of 1992 gave EPA the responsibility of setting site-specific, radiation-protection standards for Yucca Mountain.

Summary of the Legal Basis:

The legal authority is derived from the Energy Policy Act of 1992.

Alternatives:

Since this action is legally mandated, there are no alternatives.

Anticipated Costs and Benefits:

Since the potential cost is dependent upon several factors whose determination has not yet been made, a precise assessment of the economic impact of the rulemaking is not possible at this time. Likewise, the benefits, i.e., the adverse effects averted (which are required to complete a cost-benefit analysis), cannot be determined in a meaningful manner at this time since the effect of these standards is to avert potential adverse health effects that may occur during very long periods into the future and are, therefore, quantifiable only with a high degree of uncertainty.

Risks:

The potential risks which would be allowed under these standards is dependent upon the level of protection and the regulatory time frame which is selected. Since the standards have not yet been proposed, it is not possible to estimate the potential risks.

EPA

102. CONSOLIDATED FEDERAL AIR RULE FOR THE SYNTHETIC ORGANIC CHEMICAL MANUFACTURING INDUSTRY

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 7401 et seq

CFR Citation:

40 CFR 60; 40 CFR 61; 40 CFR 63

Legal Deadline:

None

Abstract:

Over the past 25 years, EPA has issued a series of national air regulations, many of which affect the same facility. Some facilities are now subject to five or six national rules, sometimes affecting the same emission points. Each rule has emission control requirements as well as monitoring, recordkeeping, and reporting requirements.

These requirements may be duplicative, overlapping, difficult to understand, or inconsistent. It is often difficult for plant managers to determine compliance strategies to satisfy all requirements and for State and local permitting agencies to determine the applicability of different requirements for permitting purposes. Resources are often wasted by both industry and States and localities in sorting out and complying with the panoply of multiple requirements.

All existing Federal air rules applicable to an industry sector will be reviewed to determine whether their provisions can be consolidated into a single new rule. Affected industries, State agencies, and other stakeholders will be consulted to identify duplicative and conflicting provisions and to provide assistance in drafting the single rule. The chemical industry and State representatives have agreed to work on a pilot project with EPA's air programs to explore this approach. If the approach is successful with the chemical industry, it may be expanded to air rules for other industry sectors.

Statement of Need:

Both industry and regulatory agencies have expressed a great desire to streamline and simplify rules. This rule streamlines and simplifies by consolidating and collapsing the numerous Federal rules that apply to the chemical industry, with resulting improved compliances.

Alternatives:

The main alternative is to do nothing and let the many rules with their many provisions remain the only compliance mechanism.

Anticipated Costs and Benefits:

This rule will result in considerable savings to the affected industry. There is significant burden reduction associated with recordkeeping and reporting. The rule will be easier to follow and understand. There will be no change in applicability of the rules being consolidated.

Risks:

This rulemaking deals with consolidated reporting to simplify existing rules. The risks addressed by each of these existing rules were addressed in those individual rulemakings.

RIN: 2060–AG28

EPA

103. • TIER II LIGHT-DUTY VEHICLE, LIGHT-DUTY TRUCK, AND HEAVY-DUTY GASOLINE VEHICLE EMISSION STANDARDS AND GASOLINE SULFUR STANDARDS

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

42 USC 7521

CFR Citation:

40 CFR 86 (revision)

Legal Deadline:

Other, Statutory, December 31, 1999, Determine need - tech. feasibility and cost effectiveness of more stringent standards.

Abstract:

EPA is mandated by the Clean Air Act Amendments of 1990 to study whether or not further reductions in emissions from light-duty vehicles and light-duty trucks should be required through lowering tailpipe emissions standards. EPA submitted a report to Congress on July 31, 1998. The report determined that there was a need for further reductions in emissions and that cost-effective technology is available to meet more stringent standards. This rulemaking will propose the next generation of emission standards for light-duty vehicles, light-duty trucks, and gasoline heavy-duty vehicles. The primary focus of this action will be reducing emissions of nitrogen oxides and non-methane hydrocarbons, pollutants which contribute to ozone pollution. Highway vehicles are significant contributors to ozone pollution, though tighter standards will also have additional air quality benefits. The light-duty vehicle and light-duty truck standards cannot go into effect before the 2004 model year, as per Clean Air Act requirements. EPA is also planning on addressing more stringent standards for heavy-duty gasoline engines, effective no earlier than model year 2007, in this rulemaking since many of the technologies used to achieve better emissions performance of light-duty trucks could also be used to reduce emissions from heavy-duty gasoline engines. The rulemaking will also propose limitations on the sulfur content of gasoline available nationwide. Sulfur has a detrimental impact on catalyst performance and could be a limiting factor in the introduction of advanced technologies on motor vehicles.

Statement of Need:

Ozone pollution poses a serious threat to the health and well-being of millions of Americans and a large burden to the U.S. economy. This rulemaking will address additional national control measures to reduce emissions, including emissions of nitrogen oxides and hydrocarbons, from new motor vehicles, heavy-duty gasoline-powered trucks, and sulfur levels in gasoline in order to protect the public health and welfare. There are also additional benefits associated with new controls on these emission sources.

Summary of the Legal Basis:

New motor vehicle controls, effective no earlier than model year 2004, are authorized under section 202 of the Clean Air Act. Controls on heavy-duty engines and gasoline sulfur levels are also done under the authority of the Clean Air Act.

Alternatives:

Various control programs will be analyzed.

Anticipated Costs and Benefits:

The costs and benefits associated with this rule will be evaluated.

Risks:

The risks have not been determined at this time.

EPA

104. NAAQS: SULFUR DIOXIDE (REVIEW AND IMPLEMENTATION)

Priority:

Economically Significant

Legal Authority:

42 USC 7409; Clean Air Act sec 109

CFR Citation:

40 CFR 50.4; 40 CFR 50.5

Legal Deadline:

NPRM, Judicial, November 1, 1994.

Final, Judicial, April 22, 1996.

Abstract:

On November 15, 1994, the Environmental Protection Agency (EPA) proposed not to revise the existing 24-hour and annual primary standards. The EPA sought public comment on the need to adopt additional regulatory measures to address the health risk to asthmatic individuals posed by short-term peak sulfur dioxide exposure.

On March 7, 1995, EPA proposed implementation strategies for reducing short-term high concentrations of sulfur dioxide emissions in the ambient air.

On May 22, 1996, EPA published its final decision not to revise the primary sulfur dioxide NAAQS. The notice stated that EPA would shortly propose a new implementation strategy to assist States in addressing short-term peaks of sulfur dioxide. The new implementation strategy - the Intervention Level Program - was proposed on January 2, 1997. In July 1996, the American Lung Association and the Environmental Defense Fund petitioned the U.S. Court of Appeals for the D.C. Circuit for a judicial review of EPA's decision not to establish a new 5-minute NAAQS. On January 30, 1998, the court found that EPA did not adequately explain its decision and remanded the case so EPA could explain its rationale more fully. EPA published a schedule for responding to the remand in the May 5, 1998 Federal Register. The schedule calls for a final response to the remand by December 2000. Any final action on the intervention level program would occur no sooner than December 2000.

Statement of Need:

Brief exposures to elevated concentrations of sulfur dioxide cause bronchoconstriction, sometimes accompanied by symptoms (coughing, wheezing, and shortness of breath), in mild to moderate asthmatic individuals. The existing sulfur dioxide National Ambient Air Quality Standard (NAAQS) provides substantial protection against short-term peak sulfur dioxide levels. At issue is whether additional measures are needed to further reduce the health risk to asthmatic individuals.

Alternatives:

The March 7, 1995, proposal notice sought public comment on three alternatives to further reduce the public health risk to asthmatic individuals posed by short-term peak sulfur dioxide exposures. These included: (a) a new 5-minute NAAQS; (b) a new program under section 303 of the Act; and (c) a targeted monitoring program to ensure sources likely to cause or contribute to high 5-minute peaks are in attainment with the existing standard. The January 2, 1997, notice proposed an alternative program under section 303 of the Act that will assist States in addressing high 5-minute peaks.

Anticipated Costs and Benefits:

A draft regulatory impact analysis was completed and made available for public comment at the time of the January 2, 1997 proposal.

Risks:

Exposure analyses indicate from the national perspective that the likelihood of exposure to high 5-minute sulfur dioxide concentrations is very low. Asthmatic individuals in the vicinity of certain sources or source categories, however, may be at higher risk of exposure than the population as a whole.

EPA

105. • PESTICIDE TOLERANCE REASSESSMENT PROGRAM

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

21 USC 346a(q)

CFR Citation:

40 CFR 180; 40 CFR 185; 40 CFR 186

Legal Deadline:

Other, Statutory, August 3, 1999, See additional information.

Abstract:

EPA will reassess pesticide tolerances and exemptions for raw and processed foods established prior to August 3, 1996, to determine whether they meet the "reasonable certainty of no harm" standard of the Federal Food, Drug and Cosmetic Act (FFDCA). FFDCA sec. 408(q), as amended by the Food Quality Protection Act, requires that EPA conduct this reassessment on a phased 10-year schedule. Based on its reassessment, EPA will take a series of regulatory actions to modify or revoke tolerances that do not meet the reasonable certainty of no harm standard.

Statement of Need:

The Federal Food, Drug and Cosmetic Act (FFDCA), as amended by the Food Quality Protection Act of 1996, requires EPA to reassess all pesticide tolerances and exemptions established before August 3, 1996. EPA is to reassess tolerances to determine whether they meet the statutory "reasonable certainty of no harm" standard of FFDCA sec 408(b). That standard requires that a pesticide tolerance may be established or remain in effect only if the tolerance is "safe". "Safe" means that there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, based upon all anticipated dietary exposures and all other exposures for which there is reliable information. The statute emphasizes the protection of infants and children in determining the safety of a pesticide tolerance, and requires that EPA evaluate the cumulative risks of all pesticides having a common mode of action.

Summary of the Legal Basis:

The tolerance reassessment program is mandated by FFDCA sec. 408(q).

Alternatives:

EPA is required to take action to ensure that all existing tolerances meet the safety standard. If tolerances must be modified or revoked, EPA will consider a variety of factors in determining which tolerances should be modified or revoked. These factors are yet to be determined, but could include public health considerations, minor use considerations, lack of available alternatives, or level of risks to infants and children, to workers, or to the environment.

Anticipated Costs and Benefits:

Analysis of costs will be conducted as part of an economic analysis of the revocation/modification actions proposed. The FFDCA allows EPA to consider benefits only in a very limited manner in determining whether to retain or modify a pesticide tolerance.

Risks:

Actions taken as a result of the tolerance reassessment program will ensure that dietary exposures to pesticides, taking into account aggregate exposure from food, water and non-occupational sources, and considering the cumulative effects of substances having a common mode of toxicity, will be safe. A series of regulatory actions will be issued over 10 years.

EPA

106. • ENDOCRINE DISRUPTOR SCREENING AND TESTING PROGRAM

Priority:

Other Significant

Legal Authority:

21 USC 346A (P) FQPA; 7 USC 136 FIFRA; 15 USC 2603 TSCA; 42 USC 300J-17 SDWA

CFR Citation:

Not yet determined

Legal Deadline:

NPRM, Statutory, August 3, 1998.

Other, Statutory, August 3, 1998, See additional information.

Abstract:

The Food Quality Protection Act (FQPA) requires EPA to screen pesticides for estrogenic effects on human health. The Safe Drinking Water Act authorizes EPA to screen chemicals found in drinking water sources in similar manner. The FQPA mandates that EPA propose the screening program by August 1998, implement it by August 1999 and report to Congress in August 2000. EPA established the Endocrine Disrupter Screening and Testing Advisory Committee (EDSTAC) in October 1996, to provide advice and counsel to the agency in implementing the screening and testing program. EDSTAC was comprised of 43 members representing industry, government, environmental and public health groups, labor, academia, and other interested stakeholders. EPA was represented on EDSTAC by OPPTS, ORD and ODW. EDSTAC has held its final meeting in June 1998. The Committee considered human health and ecological effects; estrogenic, androgenic, anti-estrogenic, anti-androgenic and thyroid effects in its deliberations and extended its scope to include industrial chemicals, drinking water contaminants and important mixtures as well as pesticides. EDSTAC will submit its final report to EPA in August 1998. EPA will propose its screening and testing strategy in August 1998 and will propose a more detailed implementation plan for public comment in fall of 1998.

Statement of Need:

The Endocrine Disruptor Screening and Testing Program fulfills the statutory mandate to screen pesticides and drinking water contaminants for their potential to disrupt the endocrine system and adversely affect human health. This program is also needed to identify commercial chemicals that may affect human health and wildlife via disruption of their endocrine systems.

Summary of the Legal Basis:

The mandate to screen pesticides for estrogenic effects that may affect human health is in the Food Quality Protection Act (21 U.S.C. 346a(p)). Discretionary authority to test drinking water contaminants is in the Safe Drinking Water Act as amended in 1996 (42 U.S.C. 300j-17). General authority to test chemicals and pesticides is in TSCA (15 U.S.C. 2603) and FIFRA (7 U.S.C. 136) respectively.

Alternatives:

There is no alternative to leadership of the Federal government on this issue to ensure that pesticides, commercial chemicals and contaminants are screened and tested for endocrine disruption potential. A limited amount of testing may be conducted voluntarily, but this will fall far short of the systematic screening which is necessary to protect public health and the environment and ensure the public that all important substances have been adequately evaluated.

Anticipated Costs and Benefits:

It is too early to project the costs and benefits of this program accurately. However, as a rough estimate, the screening battery is estimated to cost $200,000 per chemical. It is too early to determine how many chemicals will be screened in Tier 1 much less tested in Tier 2. It is also too early to tell the benefits on how many chemicals will be identified that are endocrine disruptors and their exposure reduced either by formal risks management or by voluntary exposure reduction or product substitution.

Risks:

Evidence is continuing to mount that wildlife and humans may be at risk from exposure to chemicals operating through a endocrine mediated pathway. Preliminary studies show decreases on IQ tests and increases in aggression and hyperactivity in children. Severe malformations of the genitals of boys has increased steadily over the last two decades. Although increases in cancers of endocrine sensitive tissues have been reported, no link has been made to show that chemicals are the cause. Wildlife effects have been more thoroughly documented. Abnormalities in birds, marine mammals, fish and shellfish have been documented in the U.S., Europe, Japan, Canada, and Australia which have been linked to specific chemical exposures. Evidence is sufficient for the U.S. to proceed on a two track strategy: research on the basic science regarding endocrine disruption and screening to identify which chemicals are capable of interacting with the endocrine system. The combination of research and test data developed by this program will enable EPA to take action to reduce chemical risks.

EPA

107. • CHEMICAL RIGHT-TO-KNOW INITIATIVE

Priority:

Other Significant

Legal Authority:

15 USC 4 TSCA; 15 USC 5 TSCA; 15 USC 8 TSCA; 7 USC 136 FIFRA; 42 USC 313 EPCRA

CFR Citation:

Not yet determined

Legal Deadline:

Other, Judicial, December 31, 1999, Final Actions must be completed by 12/31/99.

Abstract:

The Chemical RTK Initiative was announced by Vice President Gore on EPA's Earth Day 1998 in response to the finding that most commercial chemicals have very little, if any, toxicity information on which to make sound judgments about potential risks. There are three key components to this initiative, each of which is being rapidly implemented by EPA. These are: baseline toxicity testing for 3,000 widely used commercial chemicals; additional health effects testing for chemicals to which children are disproportionately exposed; and the listing and lowering thresholds for persistent, bioaccumulative, toxic chemicals reported to TRI. This Initiative will involve several separate activities, with any regulatory related actions included as separate entries in the Regulatory Agenda. This entry will not appear in the Agenda, but the Agenda items are listed below.

Statement of Need:

The Chemical Right to Know Initiative grew out of the finding of an EPA study that there is very little reliable information on the health and environmental effects of even the most widely used commercial chemicals. Less than 7 percent of the 3,000 high production volume chemicals have a full set of baseline testing information, while almost 50 percent have no information whatsoever. The Chemical Right to Know Initiative is designed to close these information gaps, and to make new information available to the public. This initiative was requested by Vice President Gore.

Summary of the Legal Basis:

To the extent that rulemaking is required to implement the chemical Right-to-Know Initiative, EPA will utilize the testing authorities available under TSCA and the chemical reporting authorities of EPCRA section 313 (the Toxics Release Inventory).

Alternatives:

The Chemical Right-to-Know Initiative will rely on a combination of partnership programs and rule-writing to accomplish its goals. For instance, an HPV Challenge Program will ask industry to voluntarily conduct testing on high production volume chemicals, while an HPV test rule would act as a backstop to require testing of those chemicals for which no company stepped forward to volunteer.

Anticipated Costs and Benefits:

The benefits of the Chemical Right-to-Know Initiative are substantial, as no one in the environmental community -- whether in industry, government, or the public -- can make reasoned risk management decisions in the absence of reliable health and environmental information. The cost of the baseline testing is well-established, and runs about $200,000 per chemical for a full set of tests. More detailed testing, as envisioned for the Children's Health testing portion of this initiative, is more expensive, but has not yet been costed out.

EPA

108. TSCA INVENTORY UPDATE RULE AMENDMENTS

Priority:

Other Significant

Legal Authority:

15 USC 2607(a)

CFR Citation:

40 CFR 710

Legal Deadline:

None

Abstract:

This action would amend the current Toxic Substances Control Act (TSCA) Inventory Update Rule (IUR) to require chemical manufacturers to report to EPA data on exposure-related information and the industrial and consumer end uses of chemicals they produce or import. Currently, EPA requires chemical manufacturers to report the names of the chemicals they produce, as well as the locations of manufacturing facilities and the quantities produced. About 3,000 facilities reported data on about 9,000 unique chemicals during the last reporting cycle under the IUR. Data obtained would be used by EPA and others to: better understand the potential for chemical exposures; screen the chemicals now in commerce and identify those of highest concern; establish priorities and goals for their chemical assessment, risk management and prevention programs, and monitor the programs' progress; encourage pollution prevention by identifying potentially safer substitute chemicals for uses of potential concern; and enhance the effectiveness of chemical risk communication efforts. EPA has held meetings with representatives of the chemical industry, environmental groups, environmental justice leaders, labor groups, State governments and other Federal agencies to ensure public involvement in the TSCA Inventory Update Rule Amendments Project.

Statement of Need:

There are more than 75,000 chemicals in commerce listed on the TSCA Inventory. EPA faces the challenge of sorting through these chemicals to identify the ones of most concern, then taking the appropriate steps to mitigate unreasonable risks of those chemicals. The current IUR collects some key data, such as production volume, used to identify the chemicals of most concern. However, other exposure-related information is essential to more accurately identify the chemicals with the greater risk potential. Information on how a chemical is manufactured, processed, and used is needed to determine possible exposure routes and scenarios of these chemicals. This action will propose to modify the inventory update process to collect the exposure-related data necessary for an effective TSCA Inventory Screening program; the information will be collected in a format that makes the information easy to use to screen thousands of chemicals.

In addition to the addition of exposure-related information, EPA will consider other amendments to the IUR. These include removing the inorganic chemical exemption; providing the information to better assess and manage risks of inorganic chemicals; improving the linkage of IUR data to other data sources to enhance the data's usefulness; and altering confidential business information (CBI) claim procedures to reduce the frequency of CBI claims, allowing the public greater access to relevant data on toxic chemicals.

A national report will make data collected via the amended IUR publicly available. This report will not contain any information claimed to be confidential.

Summary of the Legal Basis:

Toxic Substances Control Act (TSCA).

Alternatives:

Although data on the use of specific chemicals can be found in varying sources, there is no national, comprehensive, current searchable database providing consistent information on a wide variety of chemicals. EPA has examined alternate sources of the information including State information, Federal databases and privately collected information. EPA can find no information comparable to the data anticipated to be collected through amendments to the IUR.

Anticipated Costs and Benefits:

EPA anticipates costs of this action to be well under $100 million for the first year of reporting. Total costs of this action depend on the amendments to IUR that are contained in a proposed rule. The amended IUR will assist EPA in screening chemicals in commerce and identifying those of highest concern; establishing priorities and goals for its chemical assessment, risk management and prevention programs and monitoring their progress; identifying potentially safer substitute chemicals for uses of potential concern; and enhancing the effectiveness of chemical risk communication efforts.

Risks:

This action will secure data on describing how chemicals in commerce are used; this data is essential to determine possible exposure routes and scenarios. Using these exposure estimates, EPA's toxics program will be able to better focus on chemical risks of most concern.

EPA

109. LEAD; RULEMAKINGS UNDER TSCA SECTION 402, LEAD-BASED PAINT ACTIVITIES

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

15 USC 2683

CFR Citation:

40 CFR 745

Legal Deadline:

Final, Statutory, April 28, 1994, (Sections 402(a) - 404).

Other, Statutory, October 28, 1996, Section 402(c)(3)).

Abstract:

The Residential Lead-Based Hazard Reduction Act of 1992 (title X) amended TSCA by adding a new Title IV. TSCA section 402, Lead-Based Paint Activities Training and Certification directs EPA to promulgate a number of regulations intended to address the nation's need for a qualified and properly trained workforce to assist in the prevention, detection, and elimination of hazards associated with lead-based paint. EPA is required to promulgate (a) regulations governing lead-based paint activities to ensure that individuals engaged in such activities are properly trained, that training programs are accredited, and that contractors engaged in such activities are certified (section 402(a); (b) a Model State program which may be adopted by any State which seeks to administer and enforce a State Program for the requirements established under TSCA section 402 (section 404); (c) a rule addressing lead risks from renovation and remodeling activities or state why no regulation is necessary (section 402(c)(3)); and (d) a rule establishing a fee schedule for the lead-based paint training, certification, and accreditation activities addressed in the rules developed under TSCA section 402 (section 402(a)(3)). Additionally, in response to other Federal agencies and several States and advocacy groups who were concerned that the high costs of disposing of lead-based paint debris as a RCRA hazardous waste were discouraging residential lead abatements, EPA is using its authority under TSCA section 402(a) to address the disposal of lead-based paint debris that will result from the lead-based paint activities regulated under TSCA section 402. To minimize duplication of waste management requirements, EPA is developing a companion RCRA rule to suspend temporarily hazardous waste management regulations (i.e., Toxicity Characteristic Rule) applicable to lead-based paint debris which will be subject to the new TSCA standards. These rules are listed separately in the Regulatory Agenda.

Statement of Need:

Childhood lead poisoning is a pervasive problem in the United States, with almost a million young children having more than 10 ug/dl of lead in their blood, Center for Disease Control's level of concern. Although there have been dramatic declines in blood-lead levels due to reductions of lead in paint, gasoline, and food sources, remaining paint in older houses continues to be a significant source of childhood lead poisoning. These rules will help ensure that individuals and firms conducting lead-based paint activities will do so in a way that safeguards the environment and protects the health of building occupants, especially children under 6 years old.

Summary of the Legal Basis:

These regulations are mandated by TSCA section 402.

Alternatives:

Alternatives to each of the mandated activities will be analyzed.

Anticipated Costs and Benefits:

For the section 402(a)/404 (Residential) rule, the costs have been provided in the final economic impact analysis that was prepared in conjunction with the final rule. For the remainder of the section 402 rules, costs will be estimated in the draft economic impact analyses that will be prepared for the proposed rules. Since benefits depend on private sector implementation of certain lead hazard abatement activities which are not mandated by any of these rules, benefits will be difficult to quantify.

Risks:

These rules are aimed at reducing the prevalence and severity of lead poisoning, particularly in children.

EPA

110. ASBESTOS; AMENDMENTS TO THE ASBESTOS-CONTAINING MATERIALS IN SCHOOLS RULE, MODEL ACCREDITATION PLAN, AND WORKER PROTECTION RULE

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

15 USC 2605 TSCA sec 6; 15 USC 2607 TSCA sec 8; 15 USC 2647 TSCA sec 7

CFR Citation:

40 CFR 763

Legal Deadline:

None

Abstract:

EPA is proposing to amend the Asbestos-Containing Materials in Schools Rule in order to improve harmony with the Occupational Safety and Health Administration's regulations and to provide clarifications regarding several definitions, air clearance monitoring techniques, and response actions. As a part of this effort, the Agency is also developing proposals to amend the Asbestos Model Accreditation Plan (RIN 2070-AC51) and the Asbestos Worker Protection Rule (RIN: 2070-AC66). These activities are already included in the Regulatory Agenda as separate items, but have been combined for the purposes of highlighting this reinvention activity in the Regulatory Plan for FY 1999.

Statement of Need:

EPA has become aware of several inconsistencies between the TSCA asbestos regulations and the OSHA Construction Standard for Asbestos. This rulemaking will resolve most of the inconsistencies while improving the clarity of the existing regulation and reducing burdens.

Summary of the Legal Basis:

TSCA section 203 requires EPA to promulgate regulations on the proper management of asbestos-containing materials in school buildings. TSCA section 206 requires EPA to establish a model accreditation plan for professionals who wish to conduct asbestos inspection and abatement activities in schools or public or commercial buildings. TSCA section 6 permits EPA to regulate activities which pose an unreasonable risk of injury to human health or the environment.

Alternatives:

EPA will be proposing several alternatives for the protection of state and local government workers who disturb asbestos-containing material. EPA will also be providing state program administrators with additional flexibility in designing and implementing appropriate state asbestos programs.

Anticipated Costs and Benefits:

EPA believes that the costs imposed by increased stringency in worker protection requirements will be insignificant, while upgrading protection to levels comparable to that offered the private sector by the existing OSHA regulations. In addition, EPA will be reducing the recordkeeping requirements on schools, which should result in some cost savings.

Risks:

This rulemaking will further reduce risks to state and local government workers who disturb asbestos. The health risks for general building occupants, including school children, will not change as a direct result of this rulemaking.

EPA

111. • PCBS; POLYCHLORINATED BIPHENYL; USE AUTHORIZATIONS

Priority:

Economically Significant. Major under 5 USC 801.

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

15 USC 2605(e) TSCA sec 6(e)

CFR Citation:

40 CFR 761

Legal Deadline:

None

Abstract:

The notice of proposed rulemaking that published on December 6, 1994, covered the manufacture (including import), processing, distribution in commerce, export use, disposal, and marking of PCBs. On June 29, 1998, EPA issued a final rule involving the disposal related provisions. The other provisions, regarding use authorizations and imports, will be addressed in separate actions.

Statement of Need:

This rulemaking is the result of the first comprehensive review of the PCB regulations in the 19-year history of the program. The Agency has become aware of a number of instances where

the existing regulations do not allow for activities which do not pose an unreasonable risk of injury to health and the environment or where they require unreasonable, unrealistic, or non-cost-effective solutions to PCB problems.

Summary of the Legal Basis:

TSCA section 6(e) bans the manufacture, processing, distribution in commerce and use (except in a totally enclosed manner) of PCBs. It also directs EPA to establish standards for disposal and marking of PCBs. However, section 6(e) allows the EPA to modify these bans, through rulemaking, where it finds no unreasonable risk of injury to health and the environment.

Alternatives:

On December 6, 1994, EPA proposed a number of alternatives to the existing statutory bans in section 6(e). The proposal also included new options and standards for disposal (including remediation) of PCBs.

Anticipated Costs and Benefits:

The EPA projects significant cost savings from authorizations for existing uses and the disposal of large-volume wastes such as PCB-contaminated environmental media. In addition, the relaxation of certain administrative requirements should increase the speed of remediation of contaminated sites and accelerate the removal from use of PCBs. EPA projects minimal implementation costs and is reviewing comments which highlight areas for additional cost savings over the proposal.

Risks:

The EPA estimates that millions of tons of PCB-contaminated environmental media will be remediated under this rule, thus preventing large quantities of this long-lived, bioaccumulating chemical from entering the food chain.

RIN: 2070–AD27

EPA

112. TRI; POLLUTION PREVENTION ACT INFORMATION REQUIREMENTS

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 11013 Pollution Prevention Act

CFR Citation:

40 CFR 372

Legal Deadline:

None

Abstract:

Section 6607(b) of the Pollution Prevention Act of 1990 (PPA) (Pub. L. 101-508) requires the addition of several data elements to the Toxic Chemical Release Inventory (TRI) reporting requirements as promulgated under section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) (Pub. L. 99-499). Section 313 of EPCRA requires owners or operators of certain facilities that manufacture, process, or otherwise use listed toxic chemicals to annually report their releases of these chemicals to each environmental medium. The PPA mandates that section 313 covered facilities also report on source reduction and recycling activities relating to the toxic chemicals beginning with the 1991 reporting year. Since 1991 covered facilities have been providing this information to EPA in section 8A, Source Reduction and Recycling Activities, of EPA Form R. On September 25, 1991 (56 FR 48475), EPA proposed regulations which would provide definitions and instructions for reporting the PPA data elements on the EPA Form R. In this action, EPA will amend certain aspects of the September 25, 1991, proposed rule.

Statement of Need:

TRI is the most complete and accessible source of information for the public on toxic chemical releases in communities across the United States. The intention of Congress was for TRI, and indeed all of EPCRA, to provide information to local communities. Communities need this information to better understand the nature of the releases at the local level. The intent of TRI has been to share information on toxic chemical releases with local communities to help in their assessments of the potential risks associated with such releases. This basic local empowerment is the cornerstone of the right-to-know program. Beginning with the 1991 reporting year, the PPA has mandated the collection of source reduction and recycling information on the Form R. Without complete instructions and definitions for the terms used, facilities across the nation have been reporting this information inconsistently. These inconsistencies severely compromise the data quality of the information reported. This action will improve the understanding, awareness, and decision-making related to the collection, provision, and distribution of these required data elements.

Summary of the Legal Basis:

Section 6607(b) of the Pollution Prevention Act of 1990 (PPA) (Pub. L. 101-508) requires the addition of several data elements to the Toxic Chemical Release Inventory (TRI) reporting requirements as promulgated under section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 (EPCRA) (Pub. L. 99-499).

Alternatives:

EPA recognizes the reporting burden inherent in TRI and the PPA, and is continuing to take every reasonable opportunity to minimize related burdens, while ensuring the public's right-to-know. Providing guidance to facilities on how to properly report the PPA data will reduce their overall reporting burden.

Anticipated Costs and Benefits:

EPA estimates that industry currently incurs a cost of $61.3 million annually to report PPA data on the Form R. This estimate does not include the costs related to the seven industries newly subject to EPCRA 313. The cost to EPA to process source reduction and waste management data equals $2.7 million each year. This action is not expected to add to these existing costs, and may actually result in a reduction to the overall industry burden and costs.

Risks:

Because of the inconsistencies in the PPA data currently reported on the Form R, communities are unable to accurately compare the risks related to release and recycling activities between different facilities. By providing covered facilities with clear guidance for reporting this information, the public will be better equipped to determine and compare the risks associated with toxic chemicals being released and managed in their community.

EPA

113. TRI; CHEMICAL EXPANSION; FINALIZATION OF DEFERRED CHEMICALS

Priority:

Other Significant

Legal Authority:

42 USC 11013; 42 USC 11023; 42 USC 11048; 42 USC 11076; EPCRA 313

CFR Citation:

40 CFR 372

Legal Deadline:

None

Abstract:

On November 30, 1994, EPA added 286 chemicals and chemical categories to EPCRA section 313 list, including 39 chemicals as part of two delineated categories. Each chemical and chemical category was found to meet the statutory criteria described in EPCRA section 313(d)(2)(A)-(C). At this time, EPA deferred final action on 40 chemicals and one chemical category until a later date. These were deferred because the comments received on them raised difficult technical or policy issues which required additional time to address. EPA chose not to delay final action on the 286 chemicals and chemical categories because of the additional time needed to address the issues surrounding the smaller group of 40 chemicals and one chemical category; rather, EPA believed it to be in the spirit of community right-to-know to proceed with the final rulemaking of the additional chemicals and chemical categories.

Statement of Need:

The original Toxic Release Inventory (TRI) chemical list consisted of 320 chemicals and chemical categories. In an effort to provide the public with a broader picture of chemicals in their communities, EPA, in accordance with EPCRA section 313(d), is expanding the original toxic chemical list. By providing the public with information on these chemicals, they can participate in informed environmental decisionmaking to reduce risks to human health and the environment. On January 12, 1994 (59 FR 1788), EPA published a proposed rule to add 313 chemicals and chemical categories to the TRI chemical list. Of the 313 chemicals and chemical categories proposed, there are approximately 160 pesticide active ingredients. The chemicals being proposed were selected from numerous other regulatory lists and meet the criteria for human health and environmental toxicity in EPCRA section 313(d)(2). In addition, the chemicals passed a production volume screen to ensure that reports would be received if they are added to the TRI list. Part of this activity included the review of 17 chemicals, previously described in RIN 2070-AC40/SAN 3007. Sixteen of these chemicals are from a list of hazardous air pollutants subject to requirements of the Clean Air Act Amendments of 1990, and one was considered for addition due to its extreme aquatic toxicity. Of these 17 chemicals nine were included in the proposed rule.

Summary of the Legal Basis:

EPCRA section 313(d) authorizes EPA to add or delete chemicals from the TRI list and sets forth the criteria for these actions.

Alternatives:

EPA recognizes the reporting burden inherent in TRI, and is continuing to take every reasonable opportunity to minimize this burden while ensuring the public's right-to-know. As such, all alternatives will be identified and evaluated.

Anticipated Costs and Benefits:

The final total costs are not yet known, since the final listing decisions have not yet been made. However, estimates of the potential costs were provided as part of the economic analysis that was prepared for the proposed action. Undoubtedly, the addition of any of these chemicals or the chemical category will result in additional costs to the reporting community. The additional information reported in TRI increases the public's knowledge regarding the levels of pollutants released to the environment and pathways of exposure, improving scientific understanding of the health and environmental risks of toxic chemicals. It allows the public to make informed decisions on where to work and live; enhances the ability of corporate lenders and purchasers to more accurately gauge a facility's potential liabilities; and assists Federal, State, and local authorities in making better decisions on acceptable levels of toxics in communities.

Risks:

With more information, communities will be empowered to determine whether they need to take action to reduce risks potentially associated with the chemicals being released in their communities. Without such information, local communities would not be aware of potential risks to the environment and human health that may result from the chemical releases of local facilities. The public can also use this data to evaluate potential risks from these chemicals and to determine how to avoid these risks.

EPA

114. TRI; REPORTING THRESHOLD AMENDMENT; TOXIC CHEMICALS RELEASE REPORTING; COMMUNITY RIGHT-TO-KNOW

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

EPCRA 313; 42 USC 11013; 42 USC 11023; 42 USC 11048; 42 USC 11076

CFR Citation:

40 CFR 372

Legal Deadline:

None

Abstract:

The Toxics Release Inventory (TRI) currently requires reporting from facilities which manufacture or process at least 25,000 pounds of a listed chemical, or otherwise use 10,000 lbs of a listed chemical. These thresholds were initially established under the Emergency Planning and Community Right-to-Know Act (EPCRA) section 313(f)(1). Section 313(f)(2) of EPCRA gives the Administrator the power to establish a threshold amount for a toxic chemical different from the amount established by paragraph (1) and that such altered thresholds may be based on classes of chemicals. EPA is considering lowering the thresholds for those chemicals which it determines to be highly toxic at very low dose levels and/or have physical, chemical, or biological properties that make the chemicals persist for extended periods in the environment, and/or bioaccumulate through the food chain. Persistent bioaccumulative toxic chemicals are of particular concern in ecosystems such as the Great Lakes Basin due to the long retention time of the individual lakes and the cycling of the chemicals from one component of the ecosystem to another. EPA is currently conducting an analysis to determine which chemicals present the specific problems described above, and to determine what the altered threshold value(s) should be.

Statement of Need:

TRI is the most complete and accessible source of information for the public on toxic chemical releases in communities across the United States. The intention of Congress was for TRI, and indeed all of EPCRA, to provide information to local communities. Communities need this information to better understand the nature of the releases at the local level. The intent of TRI has been to share information on releases with local communities to help in their assessments of the risks. This basic local empowerment is the cornerstone of the right-to-know program.

Yet because of the current reporting thresholds, TRI does not collect release and transfer data on small quantities of chemicals that may persist and bioaccumulate in the environment. Even small releases of such chemicals can have significant impacts on human health and the environment. Congress gave EPA the authority to adjust reporting thresholds, because it recognized that this might be necessary in order to address the American public's right to know what is happening to the environment near their homes, schools, and businesses.

Summary of the Legal Basis:

42 USC 11013; 42 USC 11023; 42 USC 11048; 42 USC 11076; EPCRA S313

Alternatives:

EPA recognizes the reporting burden inherent in TRI, and is continuing to take every reasonable opportunity to minimize this burden while ensuring the public's right-to-know. As such, all available alternatives will be identified and evaluated.

Anticipated Costs and Benefits:

The anticipated costs related to this action are unknown at present. At this point the Agency is still unsure how low to set reporting thresholds or for what specific list of chemicals the lower reporting thresholds should apply. The information reported in TRI increases the knowledge levels of pollutants released to the environment and pathways to exposure, improving scientific understanding of the health and environmental risks of toxic chemicals; allows the public to make informed decisions on where to work and live; enhances the ability of

corporate lenders and purchasers to more accurately gauge a facility's potential liability; and assists Federal, State, and local authorities in making better decisions on acceptable levels of toxics in communities.

Risks:

Currently communities do not have access to TRI data on chemicals that, although released in relatively small quantities, pose a potential risk to human health and the environment because they persist and bioaccumulate. By lowering the reporting thresholds for such chemicals, the public will be able to determine if such chemicals are being released into their communities and whether any action should be taken to reduce potential risks.

RIN: 2070–AD09

EPA

115. TRI; REVIEW OF CHEMICALS ON THE ORIGINAL TRI LIST

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 1101 et seq

CFR Citation:

40 CFR 372

Legal Deadline:

None

Abstract:

When TRI was established by Congress in 1986, the statutory language placed 309 chemicals and 20 categories of chemicals on the TRI list; that is referred to as the original TRI list. The chemicals on the original list were taken from two existing lists of toxic substances: the Maryland Chemical Inventory Report List of Toxic or Hazardous Substances, and the New Jersey Environmental Hazardous Substances list. This action constitutes the first systematic review of toxicology and environmental data for all the chemicals on the original TRI list to determine whether data for those chemicals conform with the statutory criteria for listing of chemicals on TRI. Chemicals for which data do not meet the statutory criteria will be delisted.

Statement of Need:

When chemicals on the original TRI list have been subjects of petitions for delisting, thorough reviews have been carried out of toxicity and environmental data for the chemicals to determine whether the chemicals should be retained on TRI or should be delisted. Although petitions for delisting have resulted in reviews of a substantial number of chemicals on the original TRI list, this action is the first systematic review of toxicity and environmental data for all the chemicals on the original list. This action is needed to ensure that TRI lists chemicals for which data on toxicity and environmental harm meet the statutory criteria, therefore justifying the burden placed on entities required to report for the TRI program.

Summary of the Legal Basis:

Section 313(d) of EPCRA authorizes EPA to add or delete chemicals from the TRI list, and sets forth criteria for these actions.

Alternatives:

EPA recognizes the reporting burden inherent in compliance with TRI, and takes all reasonable opportunities to minimize the burden while ensuring that the public receives information necessary for protection of health and the environment. Reporting burdens would be reduced if chemicals are taken off the TRI list as a result of the data review. The possibility that chemicals will be delisted as a result of the data review is an alternative to retaining chemicals on the TRI list.

Anticipated Costs and Benefits:

The anticipated costs to industry related to this action are unknown at present. Costs to industry would be reduced if chemicals are removed from the TRI list. Benefits would result from any reduction in reporting burden as a result of the delisting of a chemical.

Risks:

TRI provides information to industry, governments and the public on chemicals that can cause harm to health or the environment. The review of toxicology and environmental data for all chemicals on the original TRI list will ensure that the list focuses only on those chemicals that pose meaningful possibilities of risks to human health or the environment, increasing the effectiveness of the TRI.

EPA

116. TRI; ADDITION OF OIL AND GAS EXPLORATION AND PRODUCTION TO THE TOXIC RELEASE INVENTORY

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

42 USC 11013 EPCRA 313; 42 USC 11023; 42 USC 1108; 42 USC 11076

CFR Citation:

40 CFR 372

Legal Deadline:

None

Abstract:

The original Toxics Release Inventory (TRI) required reporting from facilities in Standard Industrial Classification (SIC) codes 20-39. These SIC codes cover facilities whose primary economic activity was classified as manufacturing. This requirement was specified under the Emergency Planning and Community Right-To-Know Act (EPCRA) section 313(b)(1)(A). EPCRA section 313(b)(1)(B) and (b)(2) provide the Administrator with the authority to add or delete SIC codes and the discretion to add particular facilities based on a broad set of factors. The Environmental Protection Agency (EPA) has recently expanded this original list of covered industries. EPA began additional analyses to determine whether facilities which perform exploration and production of oil and gas should also be added to the list of facilities covered under EPCRA section 313. Facilities recently added include certain electric generating facilities, waste management facilities, metal and coal mining, hazardous waste treatment facilities, solvent recyclers, and wholesale distributors of chemicals and petroleum products.

Statement of Need:

The Emergency Planning and Community Right-To-Know Act (EPCRA) was passed to better plan for and prevent chemical accidents and emergencies and to provide the public with access to information regarding the release and disposition of toxic chemicals in their communities. The public access requirements of EPCRA originally covered facilities operating within the manufacturing sector. It has come to EPA's attention that industry groups not classified within the manufacturing sector also manage toxic chemicals and that information concerning their management practices is limited and generally not publicly available in the manner provided by EPCRA section 313. EPA believes that activities conducted by oil and gas exploration and production facilities involve toxic chemicals and may be associated with wastes that are managed for which limited information is publicly available. EPA believes that information related to the management of wastes associated with oil and gas exploration and production activities may significantly contribute to the public's knowledge of the release and disposition of toxic chemicals in the environment.

Summary of the Legal Basis:

This requirement was specified under the Emergency Planning and Community Right-To-Know Act (EPCRA) section 313(b)(1)(A). EPCRA section 313(b)(1)(B) and (b)(2) provide the Administrator with the authority to add or delete SIC codes and the discretion to add particular facilities based on a broad set of factors. The statute as originally passed required reporting from facilities in Standard Industrial Classification (SIC) codes 20-39 only. The Environmental Protection Agency (EPA) has recently expanded this original list of covered industries.

Alternatives:

Based on currently available information, existing sources of information are incomplete and do not satisfy the need of making publicly available information on the release and disposition of toxic chemicals in communities.

Anticipated Costs and Benefits:

Based on the current status of the project, anticipated costs are unknown. Estimated costs for compliance with EPCRA section 313 reporting requirements are available, but until further evaluation is completed no estimates are available for the impact of the resulting requirements. Equally true, until further evaluations are performed, estimated benefits cannot be accurately calculated. Generally, anticipated benefits will be in the form of making available more complete information regarding the release and disposition of toxic chemicals in the environment.

EPA

117. STANDARDIZED PERMIT FOR RCRA HAZARDOUS WASTE MANAGEMENT FACILITIES

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will

revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 6905; 42 USC 6912; 42 USC 6924; 42 USC 6925; 42 USC 6927; 42 USC 6939; 42 USC 6974

CFR Citation:

40 CFR 124; 40 CFR 267; 40 CFR 270

Legal Deadline:

None

Abstract:

This rulemaking will allow a type of general permit, called a standardized permit, for facilities that generate waste and routinely manage the waste on-site in tanks, containers, and containment buildings. Under the standardized permit, facility owners and operators would certify compliance with generic design and operating conditions set on a national basis. The permitting agency would review the certifications submitted by the facility owners or operators. The permitting agency would also be able to impose additional site-specific terms and conditions for corrective action or other purposes, as called for by RCRA. Ensuring compliance with the standardized permit's terms and conditions would occur during inspection of the facility after the permit has been issued.

Statement of Need:

The Agency convened a special task force in 1994 to look at permitting activities throughout its different programs and to make specific recommendations to improve these permitting programs. This task force, known as the Permits Improvement Team (PIT), spent two years working with stakeholders from the Agency, State permitting agencies, industry, and the environmental community. The PIT stakeholders mentioned, among other things, that permitting activities should be commensurate with the complexity of the activity. The stakeholders felt that current Agency permitting programs were not flexible enough to allow streamlined procedures for routine permitting activities.

Currently, facilities that store, treat, or dispose of hazardous waste must obtain site-specific "individual" permits prescribing conditions for each "unit" (e.g., tank, container area, etc.) in which hazardous waste is managed. Experience gained by the Agency and states over the past 15 years has shown that not all waste management activities are at the same level of complexity. Some activities, such as thermal treatment or land disposal of hazardous waste, are more complex than storage of hazardous waste. The Agency believes that thermal treatment and land disposal activities continue to warrant "individual" permits, prescribing unit-specific conditions. However, the Agency believes that some accommodation can be made for hazardous waste management practices in standardized units such as tanks, container storage areas, and containment buildings. The Agency's Permit Improvement Team tentatively recommended, among other things, that regulations be developed to allow "standardized permits" for on-site storage and non-thermal treatment of hazardous waste in tanks, containers, and containment buildings. The Agency is proposing to revise the RCRA regulations to allow this type of permit.

Summary of the Legal Basis:

Facilities that manage hazardous waste are required under RCRA to obtain a permit and carry out corrective action as necessary (see: RCRA Section 3004, 3005, 3008 and 3010). EPA has discretion under these statutory provisions to apply different permitting procedures to different types of facilities, as EPA is proposing to do here. No aspect of this streamlining action is required by court order.

Alternatives:

Several significant alternatives or options that have been considered concern the scope of the rule and corrective action alternatives. The scope of the proposed rule is expected to be limited to facilities that generate waste and manage it on-site. The Agency considered, however, and plans to ask for comment on, whether coverage of the rule should be expanded to facilities that generate waste at operations in more than one location and want to manage the waste at one location. The Agency also plans to ask for comment on the option of allowing a facility's RCRA corrective action activities to be postponed if corrective action is being carried out under an approved State remedial program.

Anticipated Costs and Benefits:

The following cost/benefit information is based on preliminary estimates and is being provided for informational purposes only; it is subject to change. The RCRA standardized permit proposal is an optional rule designed to streamline the regulatory burden to EPA/States as well as to private sector facilities covered by the rule, by reducing the amount of information collected, submitted and reviewed for permit actions (i.e. new permit applications, permit modifications, and permit renewals). Because the rule proposes to streamline existing RCRA regulation, rather than add new RCRA regulation, implementation of the rule by the EPA and by States with EPA-authorized permitting programs is expected to result in economic benefits in the form of national cost savings from reducing both government and private sector resources required for the RCRA permit process. Based on a preliminary economic analysis, the EPA estimates that the potential average annual cost savings to eligible facilities resulting from implementation of this rule, will range from approximately $1,000 to $4,600 per permit action, depending on the type of permit and the type of treatment and storage equipment. The expected national cost savings benefit to the private sector for RCRA permitting is between $4.2 and $8.8 million annually. In addition, this rule is expected to produce an average annual cost savings benefit for streamlined EPA/State administrative review of $2.0 million, representing a total annual national cost savings benefit of $6.2 to $10.8 million. Potential cost savings benefits are incremental to the average annual cost associated with the current RCRA permitting program. Compared to the magnitude of potential benefits, the costs to EPA/States of implementing the standardized permit option are considered minimal, and therefore have not been estimated by the EPA.

Risks:

A description of risks is not applicable to the rule. The purpose of this rule is to streamline existing RCRA permit application and issuance procedures. Since facilities covered by this rule are currently already required to obtain RCRA permits, this rule will have minimal effects on incremental risk reduction.

118. HAZARDOUS WASTE MANIFEST REGULATION

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 6922 Resource Conservation Recovery Act sec 3002; 42 USC 6923 Resource Conservation Recovery Act sec 3003; 42 USC 6926 Resource Conservation Recovery Act sec 3006

CFR Citation:

40 CFR 260; 40 CFR 261; 40 CFR 262; 40 CFR 263; 40 CFR 264; 40 CFR 265; 40 CFR 270; 40 CFR 271

Legal Deadline:

None

Abstract:

The Uniform Hazardous Waste Manifest (Form 8700-22) is a multi-copy form used to identify the quantity, composition, origin, routing, and destination of hazardous waste during its transportation. The manifest system's reliance on paper results in significant paperwork and cost burden to waste handlers and States who collect manifest information. The Agency intends to pursue an optional approach to redesign the manifest system so that it utilizes automated technologies to increase access to manifest related information, and to facilitate the manifest process, including the form's preparation, transmission, and recordkeeping, thereby lessening the total burden on waste handlers and States.

Statement of Need:

The Agency is revising the RCRA manifest system because of the amount of paperwork burden associated with the manifest. Reduction in paperwork burden is part of the Administration's Regulatory Reinvention goal of cutting government "red tape." The Agency wants to standardize the manifest program across the States by introducing a truly uniform manifest tracking form. The chief goal of the manifest system is to facilitate the safe transportation of offsite shipments of hazardous waste to appropriate RCRA management facilities. Furthermore, the manifest promotes accountability throughout the generation, transportation, and disposal cycle of a hazardous waste shipment; and the manifest also provides essential hazard information to handlers and emergency responders.

Alternatives:

The Agency has looked at three alternatives to revising the manifest system. The first alternative is to revise and standardize the manifest form itself. The second alternative is to introduce the option of automated technologies (electronic commerce) to reduce paperwork and make the manifest system more efficient. The third alternative is to develop alternative requirements for certain types of hazardous waste handlers which will reduce some of the paperwork burden. The Agency has chosen to combine the three alternatives into one cohesive package which will preserve the positive features of the current manifest system (maintaining the necessary controls to protect human health and the environment) and at the same time substantially reducing the burden on industry.

Anticipated Costs and Benefits:

The overall costs of this action should be minimal to the regulated industry since the new Federal manifest system should reduce the overall number of elements on the manifest form. Additionally, uniformity in data required across the U.S. will benefit the transportation industry by reducing the burden associated with obtaining various State requirements for wastes traveling through multiple States. Other hazardous waste handlers will benefit from having the option to use automation to complete, send, receive, and store manifest information. Some States may have to modify their data systems in response to his action. The Agency is currently conducting an analysis to determine the costs and benefits of the rule.

Risks:

This rule reduces the burden of the manifest on the public without reducing protectiveness to the public.

Abstract:

CKD is a high volume material by-product of the cement manufacturing process. While it contains potentially hazardous constituents such as lead, cadmium and chromium, it has been exempted since November 1980 from hazardous waste regulation under RCRA Subtitle C by the Bevill Amendment, which modified Section 3001 of RCRA to exempt certain special wastes until further studies could be completed and any applicable regulations were promulgated. In December 1993, EPA submitted a Report to Congress with its findings on the nature and management practices associated with CKD. This was followed in January 1995 by an EPA regulatory determination published in the Federal Register (60 FR 7366, 2/7/95), which concluded that additional control of CKD is warranted. In the regulatory determination EPA committed to develop additional tailored regulations under RCRA Subtitle C and, if necessary, the Clean Air Act. As part of its regulatory development effort, the Office of Solid Waste within EPA's Office of Solid Waste and Emergency Response has initiated further studies and has held informal discussions with stakeholders interested in regulations under RCRA Subtitle C for the management of CKD. The proposed regulations will be tailored to protect human health and the environment while limiting burden on the regulated community.

Statement of Need:

This action follows EPA's RCRA mandated regulatory determination on CKD, published in the Federal Register (60 FR 7366, 2/7/95), which concluded that additional control of CKD is warranted in order to protect human health, and to prevent environmental damage associated with current disposal practices for this waste.

Alternatives:

EPA will develop a range of landfill management standards for sensitive and non-sensitive environments, each involving protections for groundwater and air pathways. It is anticipated that the base standards would be performance based, and form the basis for a conditional exemption from Subtitle C regulation. If an owner/operator complied with the base performance standards, his CKD waste would not be subject to Subtitle C regulation. Alternatively, an owner/operator could comply with default technical requirements under Subtitle C.

It is anticipated that the conditions for exemption and the default technical requirements would be similar and would include: fugitive dust controls, provisions and restrictions for landfills located in sensitive environments, groundwater monitoring requirements, performance standards for liners and caps, metals limits for CKD used as agricultural lime, and corrective action for currently active units. The Agency hopes to afford States considerable flexibility in setting and tailoring requirements in their own programs.

Anticipated Costs and Benefits:

Analysis of costs and benefits will be conducted as part of the economic analysis for this rule as required under Executive Order 12866.

Risks:

As explained in the regulatory determination for CKD, EPA believes that subjecting CKD waste to the full RCRA Subtitle C program would be prohibitively burdensome on the cement industry. EPA believes it is appropriate to apply only those components of Subtitle C that are necessary, based on our current knowledge of the cement industry and the human health and environmental concerns associated with CKD, thereby achieving a common sense result with respect to the hazards posed by CKD on a site-specific basis. EPA anticipates that any such standards would be designed to be protective, yet minimally burdensome, and may not necessarily apply to all facilities, or may not apply to all facilities in the same manner or to the same extent.

120. BEST TECHNOLOGY AVAILABLE (BTA) FOR COOLING WATER INTAKE STRUCTURES UNDER SECTION 316(B) OF THE CLEAN WATER ACT

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

33 USC 1311 CWA sec 301; 33 USC 1316 CWA sec 306; 33 USC 1326 CWA sec 316; 33 USC 1361 CWA sec 501

CFR Citation:

40 CFR 125; 40 CFR 401

Legal Deadline:

NPRM, Judicial, July 2, 1999.

Final, Judicial, August 13, 2001.

Abstract:

EPA is developing regulations to minimize the adverse environmental impact of cooling water intake structures (e.g., to minimize the impact on aquatic organisms).

Statement of Need:

State implementation of section 316(b) of the Clean Water Act has been inconsistent, in several instances allowing significant impacts on aquatic ecosystems. Literally tons of fish and other aquatic organisms are cropped annually as a result of inadequate controls of cooling water intake.

Summary of the Legal Basis:

This action is required under consent decree in settlement of Cronin, et al. v. Reilly, 93 Civ. 0314 (AGS) (U.S.D.C., Southern District of New York, October 10, 1995).

EPA

121. REVISION OF NPDES INDUSTRIAL PERMIT APPLICATION REQUIREMENTS AND FORM 2C—WASTEWATER DISCHARGE INFORMATION

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

33 USC 1342 Clean Water Act sec 402

CFR Citation:

40 CFR 122.21(g)

Legal Deadline:

None

Abstract:

All existing manufacturing, commercial, mining, and silvicultural operations requiring a National Pollutant Discharge Elimination System (NPDES) permit must submit an application in order to obtain a permit. The existing industrial application form has not been revised since 1984 and needs to be updated to reflect statutory and regulatory changes in the NPDES program, advances in analytical methods and an increased emphasis on toxic control. The purpose of this action is to revise and consolidate existing application forms and requirements for industries, and to streamline the permit application process for these facilities. The Agency seeks to establish a unified process that minimizes the need for additional information from applicants while providing permit writers the necessary information, including toxics data, to ensure that permits adequately address concerns of permittees and environmental protection. The Agency will seek to allow the use of existing data to the extent possible and to avoid unnecessary reporting. The Agency is also considering how to utilize electronic data submission. Although these forms will increase the burden on permittees not already required to provide these data, many other permittees are already required to submit the data. The Agency is reviewing ways to minimize the need for information from small dischargers, including tribal facilities. EPA will also seek to minimize and reduce the burden on States through improvements to the application forms.

Statement of Need:

Section 402(a) of the CWA, as amended, authorizes the EPA to issue permits under the National Pollutant Discharge Elimination System (NPDES) permits program for the discharge of any pollutants or combination of pollutants. Form 2C is the NPDES permit application for discharges from manufacturing, commercial, mining and silviculture operations. Form 2C has not been revised since 1984 despite many amendments to the CWA and to the regulations under the Act which have significantly changed the permitting strategy of the NPDES program. The proposed rule will finalize changes to the regulations at sections 122.21(d) and 122.21(g) and to Form 2C that will make a number of improvements to the Form 2C permitting process. The proposed rule will consolidate application requirements and clarify the process for permit applicants, thereby reducing redundant reporting and reducing permitting burden on facilities. It will effectively provide permit writers with the information necessary to develop appropriate NPDES permits consistent with requirements of the CWA. Additionally, the proposed rule will meet the updated NPDES requirements, scientific advancements, and current socioeconomic concerns.

Summary of the Legal Basis:

Not required by law or court order.

Alternatives:

The Form 2C workgroup identified several key issues to be addressed and revised. For each key issue several options were suggested and consensus was reached on these options during an April 1996 initial Form 2C workgroup closure meeting. The proposed rule reflects the options selected.

Anticipated Costs and Benefits:

It is anticipated that the rule will reduce permitting application burden to facilities and improve the permit writer's ability to evaluate discharges because of improvements made to information and data submission requirements. Generally, it is anticipated that the rule will clarify the permitting application requirements. As a whole, such changes to the rule and Form 2C will enable it to serve its regulatory purpose more efficiently, thereby benefiting the environment and human health.

Risks:

The application form rule will allow permit writers to better evaluate industrial discharges, and the better a permit writer can evaluate the discharge, the better EPA can protect the environment and human health.

EPA

122. STREAMLINING THE GENERAL PRETREATMENT REGULATIONS FOR EXISTING AND NEW SOURCES OF POLLUTION

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

33 USC 1314 Clean Water Act sec 304; 33 USC 1317 Clean Water Act sec 307; 33 USC 1342 Clean Water Act sec 402j; 33 USC 1361 Clean Water Act sec 501

CFR Citation:

40 CFR 403

Legal Deadline:

None

Abstract:

The National Pretreatment Program was established in 1972. The Office of Water is exploring ways to reduce federally mandated activities under the program that don't result in benefits to the environment and to improve program efficiencies. For example, this rule will consider appropriate exclusions or variable requirements for numerous smaller facilities that contribute insignificant amounts of pollutants.

Statement of Need:

Many POTWs and smaller industrial users have identified problems with the effectiveness of some requirements of the Pretreatment Program. Reducing the administrative and monitoring costs for these entities will provide greater flexibility in the use of program resources to achieve environmental protection.

Summary of the Legal Basis:

This action is not required by law or court order.

Alternatives:

None known.

Anticipated Costs and Benefits:

Undetermined as of this date; a very preliminary estimate of the burden reduction is 1 percent to 10 percent of the total annual burden. The principal benefit is to provide POTWs and industrial users with additional flexibility in conducting their pretreatment program activities.

Risks:

None known.

EPA

123. NATIONAL PRIMARY DRINKING WATER REGULATIONS: RADON

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

42 USC 300 Safe Drinking Water Act sec 1412

CFR Citation:

40 CFR 141; 40 CFR 142

Legal Deadline:

Other, Statutory, February 6, 1999, Publish radon health risk reduction and cost analysis.

NPRM, Statutory, August 6, 1999.

Final, Statutory, August 6, 2000.

Abstract:

Radon in drinking water increases risk to public health, both from inhalation of radon discharged through normal household water use, such as showering, and from ingestion of water. In 1991, EPA estimated that radon in public drinking water supplies causes about 192 avoidable cancer cases each year. EPA does not currently regulate radon in drinking water. On July 18, 1991, EPA proposed a Maximum Contaminant Level (MCL) for radon in drinking water at 300 pCi/L, to address radon in public water supplies (systems serving over 25 individuals or with greater than 15 service connections). EPA withdrew the proposed radon regulation on August 6, 1997 (62 FR 42221). This rule will impact small entities, including small public water supplies and municipalities. Tribal governments will be affected if they provide water through systems meeting the definition of public water supply. States with primacy will implement the final regulation, and will be asked to assist EPA in developing guidelines for multi-media mitigation programs.

The 1996 Amendments to the Safe Drinking Water Act add new radon requirements. Congress directed EPA to: (1) Withdraw the 1991 proposed rule; (2) Work with the National Academy of Sciences (NAS) to conduct a risk assessment for radon in drinking water and an assessment of the health risk reduction benefits associated with various mitigation methods of reducing radon in indoor air; (3) Publish a radon health risk reduction and cost analysis for possible radon MCLs for public comment, by February 1999; (4) Propose MCL Goal and National Primary Drinking Water Regulation (NPDWR) for radon by August 1999; and (5) Publish MCL Goal and Final NPDWR for radon, by August 2000.

Pursuant to 1412 (b)(13) of SDWA, EPA promulgates an MCL more stringent than necessary to reduce the contribution to radon in indoor air from drinking water to a concentration that is equivalent to the national average concentration of radon in outdoor air, the Agency must establish an alternative MCL. The level of the alternative MCL is linked to average outdoor radon levels. If an alternative MCL is established, EPA must publish guidelines for States to develop multimedia radon mitigation programs. If EPA approves a State multimedia mitigation program, public water supply systems within the State may comply with the alternative MCL. EPA shall evaluate multimedia radon mitigation programs every 5 years.

Statement of Need:

Radon in drinking water increases risk to public health, both from inhalation of radon discharged through normal water use, such as showering, and from ingestion of water.

Summary of the Legal Basis:

Pursuant to the Safe Drinking Water Act, as amended in 1996, section 1412(b)(13), EPA is required to: (1) Withdraw the 1991 proposed radon in drinking water rule; (2) Work with the National Academy of Sciences to conduct a risk assessment for radon in drinking water and an assessment of the health risk reduction benefits associated with various mitigation methods of reducing radon in indoor air; (3) Publish a radon health risk reduction and cost analysis for possible radon Maximum Contaminant Levels (MCLs) for public comment, by February 1999; (4) Propose an MCL Goal and National Primary Drinking Water Regulation (NPDWR) for radon by August 1999; and (5) Publish an MCL Goal and Final NPDWR for radon by August 2000.

In addition, if EPA promulgates an MCL more stringent than necessary to reduce the contribution to radon in indoor air from drinking water to a concentration that is equivalent to the national average concentration of radon in outdoor air, the Agency must establish an alternative MCL (AMCL). The AMCL is to be set at a level which would result in a contribution of radon from drinking water to radon levels in indoor air equivalent to the national average concentration of radon in outdoor air. If an alternative MCL is established, EPA must publish guidelines for States to develop multimedia radon mitigation programs. EPA shall approve State multimedia mitigation programs if they are expected to achieve equivalent or greater health risk reduction benefits than would be achieved through compliance with the MCL. If EPA approves a State multimedia mitigation program, public water supply systems within the State may comply with the AMCL. If a State does not have an approved multimedia mitigation program, any public water system may submit a program for approval by EPA according to the same criteria, conditions, and approval process that would apply to a State program. EPA shall evaluate multimedia mitigation programs every 5 years.

Alternatives:

EPA will consider a range of MCL options for radon in drinking water in the Health Risk Reduction and Cost Analysis (HRRCA) (to be published by February 1999). EPA will also develop guidelines for a State or public water system to develop a multimedia mitigation program in order for it to comply with the AMCL. The National Academy of Sciences will provide information on key factors (the water to air transfer factor and the national average outdoor radon level) that EPA will use in setting the AMCL.

Anticipated Costs and Benefits:

EPA is currently developing estimates of the anticipated costs and benefits. Among other things, we will be evaluating the unit risk information (with the input of the National Academy of Sciences), the occurrence of radon in public water systems, the unit costs of various types of radon in water treatment systems, the characterization of the flows associated with "model" systems, the number of systems in various size categories, the costs and benefits associated with the health effects of radon, and models for integrating much of these data. Most of this information and supporting calculations are expected to be available by the time the Health Risk Reduction and Cost Analysis is published (February 1999).

Risks:

In accordance with the Safe Drinking Water Act, the National Academy of Sciences (NAS) is conducting a risk assessment for radon in drinking water and will be producing a consensus report by August 1998. The NAS report, which is expected to include the unit risk (risk per pCi/L) associated with exposure to radon in drinking water, will be used along with other available information to develop a national risk estimate for radon in drinking water.

EPA

124. NATIONAL PRIMARY DRINKING WATER REGULATIONS: GROUND WATER RULE

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

42 USC 300 Safe Drinking Water Act sec 1412

CFR Citation:

40 CFR 141; 40 CFR 142

Legal Deadline:

Final, Statutory, May 31, 2002.

Abstract:

The Safe Drinking Water Act as amended in 1996 directs EPA to promulgate regulations requiring disinfection "as necessary" for ground water systems. The intention is to reduce microbial contamination risk from public water systems relying on ground water. To determine if treatment is necessary, the rule will establish a framework to identify public water supplies vulnerable to microbial contamination and to develop and implement risk control strategies including but not limited to disinfection. Development and implementation of the rule will involve local, tribal, State and Federal governments. The structure of the draft rule is a series of barriers to microbial contamination. The proposed barriers are source water protection and vulnerability assessment; assessment and maintenance of the well, treatment facility and distribution system; disinfection where necessary; and monitoring.

Statement of Need:

Public water systems (PWSs) that use ground water as their sole source of water, as opposed to surface water PWSs, are not federally regulated as to treatment for microorganisms. There is data that indicates that a number of ground water PWSs are contaminated with microorganisms of fecal origin that can and have caused illness.

Summary of the Legal Basis:

Section 1412(b)(1)(A) of the Safe Drinking Water Act (SDWA) requires EPA to establish National Primary Drinking Water Regulations for contaminants that may have an adverse public health effect and that present a meaningful opportunity for health risk reduction. This general provision is supplemented with an additional requirement under section 1412(b)(8) that EPA also develop regulations specifying the use of disinfectants for ground water systems as necessary.

EPA

125. PUBLIC WATER SYSTEM PUBLIC NOTIFICATION REGULATION

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 300f et seq

CFR Citation:

40 CFR 141.32; 40 CFR 142.14; 40 CFR 142.15; 40 CFR 142.16

Legal Deadline:

None

Abstract:

This action revises an existing regulation to incorporate the new public notification provisions in section 1414(c) of the Safe Drinking Water Act. The basic requirement for public water systems with violations of drinking water standards to give public notification is not changed by the 1996 SDWA amendments. A Public Water System is required under section 1414(c) of the SDWA to provide notification to its customers whenever: (1) a violation of certain drinking water regulations occurs (including MCL, treatment technique, and monitoring/reporting requirements); (2) a variance or exemption to those regulations is in place or the conditions of the variance or exemption are violated; or (3) results from unregulated contaminant monitoring required under section 1445 of the SDWA are received. The Administrator is required under this statute to prescribe by regulation the manner, frequency, form, and content for giving notice. The existing regulation is in 40 CFR section 141.32. States are required to adopt this rule to retain primacy under 40 CFR section 142.10.

The 1996 amendments significantly revise the public notification requirements. The amendments: (1) require notice within 24 hours for violations posing a serious public health risk from short term exposure and give EPA discretion to set the timing of the notification for all other violations; (2) give EPA discretion to set the method of delivery of the notices as long as the public notice reaches all persons served; (3) establish a specific requirement for EPA consultation with the States in issuing revised regulations; (4) allow the primary States to prescribe alternative notification requirements by rule with respect to the form and content of the notice. One other new requirement -- for public water systems to prepare an annual consumer confidence report -- is being implemented under a separate regulatory action.

The benefits of the revised public notification regulations will be to streamline the existing requirements, provide quicker and more effective notification of violations that have a serious adverse effect, and better inform the customers of public water systems of the quality of their drinking water and the risk to their health.

Statement of Need:

The public notification rule is being revised to incorporate the legislative changes contained in the 1996 SDWA amendments under sections 1414(c)(1) and (2). The new provisions require EPA to tailor the frequency and content of the public notice to the relative risks to public health and otherwise streamline the process currently in place. The statute requires EPA to promulgate regulations, after consultation with the states, to implement this section.

Summary of the Legal Basis:

The 1996 SDWA amendments require EPA to promulgate public notification regulations to implement new sections 1414(c)(1) and (2). There is no statutory deadline.

Alternatives:

Within the statutory obligation to issue revised public notification regulations, EPA is developing regulatory options that balance the need to protect public health with the need to provide flexibility in local implementation and a reduced reporting burden. Options are being considered related to the frequency of notices for violations not posing a risk to health from short term exposure, how best to ensure that notices reach all persons served, what the notice should contain to be most effective, and how the public notice provisions could be integrated into the parallel requirement for an annual consumer confidence report.

Anticipated Costs and Benefits:

Not available at this time.

Risks:

The public notification regulations require water systems to notify all persons served of any violation of drinking water standards. Consumers not notified of violations may put themselves at risk from drinking the water and otherwise will be unable to make informed choices about whether to continue drinking the water. Risks are largest when the violation is for a contaminant that poses a risk from short-term exposure or for subpopulations vulnerable to the contaminants in the drinking water. Compliance with the public notification rule allows consumers, at their option, to make timely choices about the risk from their drinking water. Public notification is one of several Federal barriers protecting consumers from exposure to harmful contaminants from their drinking water.

EPA

FINAL RULE STAGE

---

126. NEW SOURCE REVIEW (NSR) REFORM

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

Clean Air Act Amendments of 1990, title I

CFR Citation:

40 CFR 51.160 to 51.166; 40 CFR 52.21; 40 CFR 52.24

Legal Deadline:

None

Abstract:

The purpose of this action is to revise the Clean Air Act new source review (NSR) regulations, which govern the preconstruction air quality review and permitting programs that are implemented by States and the Federal Government for new and modified major stationary sources of air pollution. This rulemaking will deregulate, that is, exclude from major NSR program requirements those activities of sources that, with respect to air pollution, have little environmental impact. The rulemaking will encourage pollution control and pollution prevention projects at existing sources. Control technology requirements will be clarified with respect to when and how they apply to sources that are covered. The action seeks to more clearly define the appropriate roles and requirements of sources, permitting authorities and Federal land managers and EPA in the protection of air-quality-related values in Federal Class I areas (i.e., certain national parks and wilderness areas) under the new source review regulations. State, local, and tribal permitting agencies will be given more flexibility to implement program requirements in a manner that meet their specific air quality management needs. Consequently, the rulemaking decreases the number of activities that are subject to NSR requirements and also expedites the permitting process for those sources that are subject to NSR. This action is designed to reduce the regulatory burden over all industries without respect to commercial size or capacity; therefore, it should have no detrimental impact on small businesses. Finally, this action also addresses several pending petitions for judicial review and administrative action pertaining to new source review applicability requirements and control technology review requirements.

Regulations that will be affected are State implementation plan requirements for review of new sources and modifications to existing sources (40 CFR 51.160-166), the Federal prevention of significant deterioration program (40 CFR 52.21), and Federal restriction on new source construction (40 CFR 52.24) to be proposed in another rulemaking action.

Statement of Need:

In August 1992, EPA voluntarily initiated a comprehensive effort to reform the NSR process. This effort was initiated to examine complaints from the regulated community that the current regulatory scheme is too complex, needlessly delays projects, and unduly restricts source flexibility. Currently there are no applicable statutory or judicial deadlines for the NSR reform rulemaking effort. The goal of this effort is to address industries' concerns without sacrificing the environmental benefits embodied in the present approach; that is, protecting and improving local air quality, and stimulating pollution prevention and advances in control technologies.

In July 1993, the New Source Review (NSR) Reform Subcommittee was formed under the auspices of the Clean Air Act Advisory Committee. The Subcommittee's purpose is to provide independent advice and counsel to EPA on policy and technical issues associated with reforming the NSR rules. The Subcommittee was composed of representatives from industry, State/local air pollution control agencies, environmental organizations, EPA headquarters and regions, and other Federal agencies (Federal Land Managers, National Park Service and Forest Service, Department of Energy, and the Office of Management and Budget).

Summary of the Legal Basis:

There are no applicable statutory or judicial deadlines for the NSR reform rulemaking effort. However, the rule will address three outstanding settlement agreements: CMA Exhibit B, Top-down BACT, and the applicability test for modifications at utilities ("WEPCO"). The pending settlement on WEPCO will impose a judicial deadline on the rulemaking.

Alternatives:

The Subcommittee discussed numerous options for implementing NSR reform. However, EPA's primary focus has been to consider the specific recommendations developed by the Subcommittee and, where appropriate, use them in this rulemaking effort. In January 1996, EPA, as part of another regulatory streamlining measure, merged portions of a separate rulemaking to implement the 1990 CAA Amendments with the Reform effort. The combined package was proposed in the Federal Register on July 23, 1996. On July 24, 1998, EPA issued another Federal Register Notice seeking comment on revised alternatives for two applicability provisions.

Anticipated Costs and Benefits:

From a cost perspective, this rulemaking represents a decrease in applications and recordkeeping costs to

industry of at least $13 million per year, as compared to the preexisting program, based primarily on the fact that fewer sources will need to apply for major source permits. In addition, the cost to State and local agencies will be reduced by approximately $1.4 million per year. The Federal Government should realize a savings of approximately $116,000 per year. Additional cost reductions, which are difficult to quantify, will be realized due to the streamlining effect of the rulemaking on the permitting process, for example, the opportunity costs for shorter time periods between permit application and project completion and reduced uncertainty in planning for future source growth.

Risks:

This is a procedural rule applicable to a wide variety of source categories. Moreover, it applies to criteria pollutants for which NAAQS have been established. This action is considered environmentally neutral. However, any potential risks are considered in the NAAQS rulemaking from a national perspective.

CFR Citation:

40 CFR 70; 40 CFR 51

Legal Deadline:

None

Abstract:

In response to litigation on the part 70 regulations, to provide more effective implementation of part 70, and to address comments provided in response to notices of proposed rulemaking, parts 51 and 70 are being revised. In part, the changes include the following: streamlined procedures for revising stationary-source operating permits issued by State and local permitting authorities under title V of the Clean Air Act; changes to the certification of compliance that is required to be submitted as part of the permit documentation; clarification of the title I and title V permitting requirements for research and development facilities; and changes in public participation requirements for minor new source review actions under title I of the Act.

Statement of Need:

These revised rules will allow more streamlined procedures for revising many operating permits. These revisions reflect the principles articulated in the President's and the Vice President's March 16, 1995 report Reinventing Environmental Regulation. That report established as goals for environmental regulation the building of partnerships between EPA and State and local agencies, minimizing costs, providing flexibility in implementing programs, tailoring solutions to the problem, and shifting responsibility to State and local programs.

Alternatives:

The Clean Air Act requires that EPA develop regulations which set minimum standards for State operating-permit programs. In response to concerns expressed in comments on the draft final rulemaking, the EPA talked with representatives from State and local permitting authorities, industry and environmental groups to hear their implementation concerns, and then asked for public comments on a revised draft final rule. This action will incorporate many of those comments and recommendations into a final rule.

Anticipated Costs and Benefits:

The administrative cost of implementing the final rules by permitting authorities, EPA, and permitted sources was estimated. Administrative costs include a range of costs which cover the source's preparing an application through EPA's and the permitting authority's effort to complete the process. The administrative costs are estimated to be approximately $33 million. By comparison, the cost of implementing the current part 70 permit revision system is approximately $118 million. Implementing the revised regulations will reduce costs by about $85 million.

Risks:

All major sources of air pollution are required to have a permit to operate by the Clean Air Act. No adverse effect on the public health or ecosystems should result from this action, because the rule will require permit revisions with significant environmental impact to undergo public and EPA review.

128. AMENDMENTS—INTEGRATED NESHAP AND EFFLUENT GUIDELINES: PULP AND PAPER

Priority:

Economically Significant

Legal Authority:

42 USC 7412 Clean Air Act Amendments of 1990 sec 112; 42 USC 7414 Clean Air Act Amendments of 1990 sec 114; 42 USC 7601 Clean Air Act Amendments of 1990 sec 301; 33 USC 1314 Clean Water Act sec 304; 33 USC 1316 Clean Water Act sec 306-308; 33 USC 1317; 33 USC 1318; 33 USC 1361 Clean Water Act sec 301; Clean Water Act sec 501

CFR Citation:

40 CFR 63; 40 CFR 430

Legal Deadline:

None

Abstract:

The Clean Air Act (CAA) Amendments of 1990 direct the Environmental Protection Agency (EPA) to set National Emission Standards for Hazardous Air Pollutants (NESHAP) for new and existing sources under section 112 and to base these standards on maximum achievable control technology (MACT). The Clean Water Act (CWA) directs EPA to develop effluent guidelines for certain categories and classes of point sources. These guidelines are used for setting discharge limits for specific facilities that discharge to surface waters or municipal sewage treatment systems. On April 15,1998, the EPA promulgated signed an integrated regulation for the pulp and paper industry that includes both effluent guidelines and air emission standards to control the release of pollutants to both the water and the air. At the same time, the EPA proposed MACT standards for the chemical recovery combustion sources. The regulations were developed jointly to provide greater protection to human health and the environment, to promote the concept of pollution prevention, and to enable the industry to more effectively plan compliance via a multimedia approach.

Next Steps will be to issue final effluent guidelines for Phase II and Phase III mills. Phase II will address the effluent from mills not covered in the Final Phase I effluent guidelines (except dissolving grade mills) plus will set limits for reserved parameters for chemical oxygen demand (COD) and chloroform at Phase I mills. Phase III will set final effluent limits for dissolving grade mills.

This Regulatory Plan entry also includes RIN 2040-AB53, Effluent Guidelines and Standards for the Pulp, Paper, and Paperboard Category, reported in full in part III of this issue of the Federal Register.

Statement of Need:

This action limits surface water discharges of toxic, conventional, and nonconventional pollutants and emissions of hazardous air pollutants (HAPs) from pulp and paper mills. The NESHAP limits the release of HAPs such as chloroform, formaldehyde, acetaldehyde, and methanol. The effluent guidelines will limit the discharge of dioxin, furan, and other toxic and conventional pollutants to rivers and other surface waters. The Statutory authorities and deadlines are cited above. Additionally, EPA promulgated these effluent guidelines to satisfy a provision in a Consent Decree entered in settlement of Environmental Defense Fund and National Wildlife Federation v. Thomas, Civ. No. 85-0973 (D.D.C.).

Alternatives:

Both the CAA and the CWA specify that these regulations be established on a technology basis. The CAA specifies that MACT for existing sources can be no less stringent than the average emission limitations achieved by the best-performing similar source. The CWA specifies that effluent limitations guidelines and standards be based on specific technology levels, such as the best available technology economically achievable. For the integration of air and water standards, EPA developed regulatory alternatives from combinations of process changes and pollution control technologies. The Agency considered the combined costs and impacts of these alternatives while remaining responsive to the statutory requirements under both laws.

Anticipated Costs and Benefits:

The promulgated integrated air and water rules comprise effluent guidelines for pulp and paper mills and MACT standards for the noncombustion sources at all kraft, soda, sulfite, and semi-chemical pulp and paper mills. At the same time these standards were promulgated, the Agency proposed MACT standards for the kraft, soda, sulfite, and semi-chemical mills. For the rulemaking components that have been promulgated and proposed, the Agency estimated total annualized costs of $277 million (1995 dollars).

The types of benefits associated with the proposed integrated rule include improvements to air and water quality and reduced human health risks. The estimated reductions in HAP emissions exceed 155,000 tons per year. An estimated reduction in volatile organic compound emissions of 485,000 tons per year; a reduction in total reduced sulfur emissions of 165,000 tons per year; and a reduction in particulate matter emissions of 26,000 tons per year are also projected to occur as a result of the promulgated and proposed rules. Projected reductions in chloroform and chlorinated phenolics effluent discharges are approximately 100 tons per year; adsorbable organic halides (AOX) reductions of 31,000 tons per year are projected. Dioxins and furan effluent levels will be reduced to 12 grams nationally. Ultimately all dioxin fish consumption advisories associated with the 96 bleached paper grade mills will be eliminated. Some categories of the benefits can be expressed in monetary terms; they are in the range of $730 million to $1,500 million.

The Agency has received public comments on the proposed MACT standard for chemical recovery combustion sources and is in the process of developing the promulgation rule.

Risks:

Two types of pollutants found in pulp and paper wastestreams, dioxin and furan, are of particular concern due to their carcinogenic risk and their toxicity to aquatic life. Reducing the discharge and emission of these and other toxic pollutants reduces the exposure risks to human health and the environment.

EPA

129. VOC REGULATION FOR ARCHITECTURAL COATINGS

Priority:

Other Significant

Legal Authority:

42 USC 7401 Clean Air Act sec 183

CFR Citation:

40 CFR 59

Legal Deadline:

Final, Judicial, August 15, 1998.

Abstract:

This regulation will control volatile organic compound (VOC) emissions from architectural coatings. These coatings are applied to stationary structures and their appurtenances, to portable buildings, to pavements, or to curbs. Traditional VOC limitations, market-based approaches, and phased-in approaches are all being considered. The EPA is working with coating manufacturers and other stakeholders to ensure that this rule is based on the best possible understanding of the industry and that it affords the flexibility to achieve the necessary emission reductions in the most sensible, cost-effective ways.

Statement of Need:

This regulation will establish VOC content limits for over 50 categories of architectural coatings. These limits will reduce the VOC emissions from architectural coatings and will reflect best available controls, as defined by section 183(e) of the Clean Air Act (CAA). The architectural coatings category is a significant contributor of VOC emissions in ozone nonattainment areas.

Summary of the Legal Basis:

Section 183(e) of the CAA requires that the EPA list those categories of consumer and commercial products (CCP) that account for at least 80 percent of VOC from all CCP in ozone nonattainment areas and establish a schedule for regulating the categories. The architectural coatings category was included on the list and schedule published March 23, 1995, and is in the group of categories to be regulated by March 1997.

Alternatives:

There are many alternatives to the proposed rule that were or are being considered, including: alternative VOC content limits for some types of coatings; issuance of a control techniques guideline in lieu of a national rule; low-volume exemptions; payment of fees, if desired, to exceed the VOC content limits; variances based on economic hardship; and an incentive to recycle paint. The requirements in the proposed rule are based on product reformulation, a pollution prevention method.

Anticipated Costs and Benefits:

The rule will impose an estimated cost of $28 million per year for coating manufacturers and would reduce VOC emissions from architectural coatings by an estimated 113,500 tons per year. VOC emissions are a main component in formation of ground-level ozone which can damage lung tissue and cause serious respiratory illness.

Risks:

In the past, the CAA has focused on reducing VOC emissions from mobile sources (cars and trucks) and stationary sources, such as power plants and factories. Requiring additional controls on these sources may be very costly for the emissions reductions achieved. Regulating consumer and commercial products may prove to be a more cost-effective way of substantially reducing VOC emissions nationwide. Consumer and commercial products, such as surface coatings, personal care products, and household cleaning products, contribute about six million tons (approximately 30 percent) annually of VOC emissions nationwide. The architectural coating category is one of the largest contributors.

RIN: 2060–AE55

EPA

130. NATIONAL VOC EMISSION STANDARDS FOR CONSUMER PRODUCTS

Priority:

Other Significant

Legal Authority:

42 USC 7401 et seq

CFR Citation:

40 CFR 59

Legal Deadline:

Final, Judicial, August 15, 1998.

Abstract:

This regulation will reduce volatile organic compound (VOC) emissions from 24 types of consumer products which are currently regulated by California and several other States. The EPA is working with consumer product manufacturers and other stakeholders to ensure that this rule is based on the best possible understanding of the industry and that it affords the flexibility to achieve the necessary emission reductions in the most sensible, cost-effective ways.

Statement of Need:

This regulation will establish VOC content limits for 24 types of consumer products. These limits will reduce the VOC emissions from these products and will reflect best available controls, as defined by section 183(e) of the Clean Air Act. The consumer products category is a significant contributor of VOC emissions in ozone nonattainment areas.

Summary of the Legal Basis:

Section 183(e) of the CAA requires that the EPA list those categories of consumer and commercial products (CCP) that account for at least 80 percent of VOC from all CCP in ozone nonattainment areas and establish a schedule for regulating the categories. The consumer products category was included on the list and schedule published March 23, 1995, and is in the group of categories to be regulated by March 1997.

Alternatives:

Alternatives to requirements in the proposed rule that were or are being considered, include alternative VOC content limits; issuance of a control techniques guideline in lieu of a national rule; variances based on economic hardship; and an incentive for innovative product development. The requirements in the proposed rule are based on product reformulation, a pollution prevention method.

Anticipated Costs and Benefits:

The rule would impose an estimated cost of $27 million per year for consumer product manufacturers and would reduce VOC emissions from the products by an estimated 90,000 tons per year. VOC emissions are a main component in formation of ground-level ozone which can damage lung tissue and cause serious respiratory illness.

Risks:

In the past, the CAA has focused on reducing VOC emissions from mobile sources (cars and trucks) and stationary sources, such as power plants and factories. Requiring additional controls on these sources may be very costly for the emissions reductions achieved. Regulating consumer and commercial products may prove to be a more cost-effective way of substantially reducing VOC emissions nationwide. Consumer and commercial products, such as surface coatings, personal care products, and household cleaning products, contribute about six million tons (approximately 30 percent) annually of VOC emissions nationwide. The consumer products category is one of the largest contributors.

RIN: 2060–AF62

EPA

131. CONTROL OF EMISSIONS OF AIR POLLUTION FROM HIGHWAY HEAVY-DUTY ENGINES AND DIESEL ENGINES

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

Clean Air Act sec 202(a), sec 211(c), sec 213(a), sec 301(a)

CFR Citation:

Not yet determined

Legal Deadline:

Final, Judicial, August 29, 1997.

Abstract:

The primary focus of this action will be reducing emissions of nitrogen oxides (NOx), non-methane hydrocarbon (NMHC), and particulate matter (PM) from diesel and gasoline fueled engines used in highway trucks and buses and in nonroad equipment and vehicles. Nitrogen oxides are a significant contributor to urban ozone pollution (smog), acid rain, and particulate pollution. Particulates, including those emitted directly and secondary particulates formed in the atmosphere, have been associated with increased death and illness rates as well as impaired visibility. Non-Methane hydrocarbons also contribute to ozone pollution. Highway and nonroad engines and vehicles are very significant contributors to these air-quality problems. This initiative has been marked by an unprecedented degree of cooperation between EPA, the State of California, and the engine manufacturing industry, as well as the involvement of States, regional air-management organizations, and public interest and environmental organizations. The result has been a plan for very stringent new emission standards that have the support of the industry. EPA has proposed new standards for highway truck and bus engines, as well as nonroad diesel engines. In 1999, the Agency will complete a technical review to determine whether the highway standards should be adjusted further.

Statement of Need:

Ozone pollution poses a serious threat to the health and well-being of millions of Americans and a large burden to the U.S. economy. Many ozone nonattainment areas face great difficulties in reaching and maintaining attainment of the ozone health-based air quality standards in the years ahead. Recognizing this challenge, States, local governments, and others have called on the Environmental Protection Agency (EPA) to promulgate additional national measures to reduce nitrogen oxides (NOx), hydrocarbons, and particulate matter in order to protect the public from the serious health effects of ozone pollution.

Summary of the Legal Basis:

Clean Air Act sec 202(a), Clean Air Act sec 211(c), Clean Air Act sec 213(a), Clean Air Act sec 301(a)

Alternatives:

EPA will consider alternatives for this rule as part of the notices of proposed rulemaking (NPRMs) planned for this initiative.

Anticipated Costs and Benefits:

By 2020, the proposed standards will reduce NOx by 50 percent, VOC by 15 percent, and particulate matter by 20 percent, compared with emissions under current standards. The cost-effectiveness will be about $300 per ton for VOC and NOx, and about $1500 per ton for particulate matter.

Risks:

Oxides of nitrogen comprise a family of highly reactive gaseous compounds that contribute to air pollution in both urban and rural environments. NOx is directly harmful to human health and the environment, contributes to particulate pollution, and plays a critical role in the formation of atmospheric ozone. Based on studies of human populations exposed to high concentrations of particles and laboratory studies of animals and humans, there are major human health concerns associated with PM. These include deleterious effects on breathing and respiratory systems, aggravation of existing respiratory and cardiovascular disease, alterations in the body's defense systems against foreign materials, damage to lung tissue, carcinogenesis, and premature death.

EPA

132. NONROAD SPARK-IGNITION ENGINES AT OR BELOW 19 KILOWATTS (25 HORSEPOWER) (PHASE 2)

Priority:

Other Significant. Major under 5 USC 801.

Legal Authority:

42 USC 7547 Clean Air Act sec 213

CFR Citation:

40 CFR 90

Legal Deadline:

None

Abstract:

This action will establish the second phase of emissions standards for new nonroad spark-ignition engines at or below 19 kilowatts (25 horsepower), as required by section 213(a)(3) of the Clean Air Act as Amended. The Environmental Protection Agency (EPA) had been developing the second phase of small-engine regulations through a negotiated rulemaking, with representation by engine manufacturers, equipment manufacturers, emissions control manufacturers, equipment dealers, environment and public health interests, and State air programs. The negotiations came to an end on February 16, 1996 with no consensus reached. EPA will now develop the rulemaking through other means.

The affected engines are used in lawn, garden, and utility equipment, such as lawnmowers, string trimmers, chain saws, and small pumps and generators. The first phase was established July 3, 1995 (60 FR 34582), effective for the 1997 model year, and was very similar to the tier 1 small-engine regulations developed by California for the same engines. Regulated pollutants are hydrocarbons, carbon monoxide, and oxides of nitrogen.

Statement of Need:

Nonroad engines contribute significantly to total ozone precursor and CO emissions in areas that have failed to attain the National ambient air quality standards (NAAQS) for ozone and CO. Requirements for emissions reductions will help many areas achieve the NAAQS. The second phase will include additional controls not achievable in the time frame of the first phase, which are necessary for continued attainment of NAAQS.

Summary of the Legal Basis:

Clean Air Act section 213

Alternatives:

Regulation of this category of engines was split into two phases on the recommendation of the regulated industry, in order to obtain some early reductions quickly while providing sufficient lead-time to develop and implement an appropriate second phase. The regulatory negotiation committee was convened for the second phase to ensure that all possible options for achieving appropriate emissions reductions from this sector were considered.

Anticipated Costs and Benefits:

The regulatory negotiation committee is developing the rule, including setting of emissions standards levels, based on a cost/benefit analysis that considers cost per ton of emissions reduced as well as cost per engine. Until that process is complete, the specific costs and benefits are unknown. The benefits of phase 1 were a 32 percent reduction in hydrocarbons and a 7 percent reduction in carbon monoxide from these engines, at a cost of $266 per ton of hydrocarbons reduced.

Risks:

Over 89 million small engines contribute to unhealthy ozone and carbon monoxide levels in nearly 100 cities across the country. An estimated 6.8 million tons of air pollution are generated from lawn and garden equipment each year. Carbon monoxide is an odorless, colorless poisonous gas. Hydrocarbons and oxides of nitrogen contribute to the formation of ground-level ozone, which is a noxious pollutant that impairs lung functioning and is a key ingredient in smog.

EPA

133. GROUND WATER AND PESTICIDE MANAGEMENT PLAN

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

7 USC 136a; Federal Insecticide, Fungicide, and Rodenticide Act sec 3

CFR Citation:

40 CFR 152.170

Legal Deadline:

None

Abstract:

This regulation would establish Pesticide Management Plans (PMPs) as a new regulatory requirement for certain pesticides. Absent an EPA-approved Plan specifying risk-reduction measures, use of the chemical would be prohibited. The rule would also specify procedures and deadlines for development, approval and modification of plans.

Statement of Need:

EPA proposed to make specific pesticides subject to the provisions of EPA-approved Pesticide Management Plans (PMPs) because of their strong ground-water contamination potential. The rule will establish PMPs as an "other regulatory restriction" and define the minimum requirements and procedures for developing, approving and managing PMPs. Upon promulgation of this rule, the labels of the designated pesticides will be changed to require use in conformance with EPA-approved PMPs, and to prohibit sale and use in States or Indian Country without such approved Plans (after a period allowed for development and EPA review of these Plans). A PMP is a State's or tribe's commitment to EPA and the public to manage the use of a certain pesticide in such a way as to avoid unreasonable risks to ground water that would otherwise warrant cancellation of the use. An approved plan will embody a combination of educational, scientific, and regulatory tools to fulfill the State's ground-water protection goals, developed through a process of public participation. A plan will include a process for disseminating this information to pesticide users and marketers, and for monitoring the effectiveness of the plan through the development of appropriate indicators of environmental improvement and/or protection.

Summary of the Legal Basis:

The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) generally requires EPA to regulate pesticide use in such a manner as to prevent unreasonable risks to human health and the environment. Specifically, 7 USC 136a authorizes EPA to prescribe by regulation "other regulatory restrictions" for pesticides that may generally cause unreasonable risks to the environment (such as those that are associated with ground-water contamination potential) without those restrictions.

Alternatives:

This Rule is a direct outgrowth of the Pesticides and Ground Water Strategy, published in October 1991 (after extensive consultation with States, localities, and other affected stakeholders). In publishing the Strategy EPA conducted an analysis of three different alternatives to the regulation of pesticides' ground-water risks. One option was to rely exclusively on orthodox national-level pesticide regulatory tools (tantamount to a "baseline"), which would entail tolerating or remediating a certain level of ground-water contamination. At the other extreme, outright cancellation of candidate pesticides with significant ground-water contamination potential was considered to provide full assurance that no further ground water contamination would occur (taking into account the high economic losses due to the removal of the pesticide from the market). The analysis concluded that a "partnership" approach, providing a mechanism for more tailored management of pesticide use (i.e., taking into account the prevailing influence of highly variable hydrologic "sensitivity" factors), would be simultaneously a more effective and least costly alternative.

Anticipated Costs and Benefits:

EPA anticipates four categories of costs entailed in requiring PMPs. Federal Program Costs are those of administering ground-water protection activities, such as the review of State or tribal proposals. State Program Costs entail both capital and annual costs. Registrant and user impacts are the economic losses ascribed to the reduced use of the classified pesticides, as well as the costs (to the registrants) of complying with Federal, State and tribal provisions. Benefits accrue from the reduced levels of pesticide residues in ground water, and a corresponding reduction in: 1) human and ecological risk (see below); and 2) threats to the economic and intrinsic values of the ground-water resource. Enormous uncertainties attend the quantification of these benefits, however.

Risks:

The pesticides under consideration are those most frequently detected (sometimes at concentrations exceeding health-based reference points) of currently-registered pesticides, and display physical and chemical characteristics associated with a ground-water contamination potential. The level of potential contamination (and related risk to both human health and the environment) represent a potential unreasonable risk to the environment in the absence of local management measures. State management measures are expected to avert these risks substantially. Because the Food Quality Protection Act (FQPA) requires that EPA consider drinking water as part of dietary exposure, the Agency is analyzing implications for this regulation.

EPA

134. LEAD; TSCA SECTION 403; IDENTIFICATION OF DANGEROUS LEVELS OF LEAD

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

15 USC 2683

CFR Citation:

40 CFR 745

Legal Deadline:

NPRM, Judicial, May 26, 1998.

Other, Statutory, May 26, 1998, Consent Decree: NPRM signed.

Abstract:

The Residential Lead-Based Paint Hazard Reduction Act of 1992 (title X) amended TSCA by adding a new title IV. TSCA section 403 requires EPA to promulgate regulations that identify lead-based paint hazards, lead-contaminated dust and lead-contaminated soil for the purposes of TSCA title IV as well as for the entire Title X. EPA developed an interim guidance document in July 1994, to provide public and private decision-makers with guidance on identifying and prioritizing lead-based paint hazards for control. This interim guidance, which was subsequently published in 1995 (60 FR 47248, 9/11/95), will continue to serve as EPA's official policy until the final TSCA section 403 rule is promulgated.

Statement of Need:

Childhood lead poisoning is a pervasive problem in the United States, with almost a million young children having more than 10 ug/dl of lead in their blood, Center for Disease Control's level of concern. Elevated blood-lead levels can lead to reduced intelligence and neurobehavioral problems in young children, as well as causing other adverse health effects in children and adults. Although there have been dramatic declines in blood-lead levels due to reductions of lead in paint, gasoline, and food sources, remaining paint in older houses remains the significant source of childhood lead poisoning. This regulation is a focal point of the Federal lead program and supports the implementation of regulations already promulgated (e.g., lead hazard disclosure in real estate transactions) as well as others under development (e.g., worker training and certification). By supporting the implementation of the national lead program, this rule would help prevent lead poisoning in children under the age of six.

Summary of the Legal Basis:

This action is mandated by TSCA section 403.

Alternatives:

Alternatives were discussed in the proposed rule. Alternatives will be further considered as part of the proposed rule's comment review.

Anticipated Costs and Benefits:

Although this action doesn't require any action, the costs associated with the establishment of these levels were estimated in a draft economic impact analysis that was prepared for the proposed rule. Since benefits depend on private sector implementation of certain lead hazard abatement activities which are not mandated by any of these rules, benefits will be difficult to quantify. During its review of the NPRM under EO 12866, OMB attributed the potential impact of all of the lead regulations to this rule and determined that this action should be classified as economically significant.

Risks:

This rule is aimed at reducing the prevalence and severity of lead poisoning, particularly in children.

EPA

135. REVISED STANDARDS FOR HAZARDOUS WASTE COMBUSTION FACILITIES

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

42 USC 6924 Resource Conservation Recovery Act sec 3004; 42 USC 6925 Resource Conservation Recovery Act sec 3005; Clean Air Act sec 112; Clean Air Act sec 114

CFR Citation:

40 CFR 60; 40 CFR 63; 40 CFR 260; 40 CFR 261; 40 CFR 264; 40 CFR 265; 40 CFR 266; 40 CFR 270; 40 CFR 271

Legal Deadline:

Final, Judicial, February 1999.

Settlement agreements: industrial furnaces and incinerators. See Additional Information.

Abstract:

The Environmental Protection Agency's (EPA's) strategy for hazardous waste minimization and combustion and a judicial settlement agreement commit EPA to upgrade its standards for burning hazardous waste in incinerators, boilers, and industrial furnaces.

Statement of Need:

Under the Clean Air Act (CAA) Amendments of 1990, EPA is required to establish National Emission Standards for Hazardous Air Pollutants (NESHAPs) for most hazardous waste combustors (HWCs) (i.e., incinerators, cement kilns, boilers, and some types of smelting furnaces). In addition, under the Resource Conservation and Recovery Act (RCRA), EPA is required to establish standards for all HWCs as necessary to ensure protection of human health and the environment. EPA is concerned that its current RCRA standards for HWCs may not be adequately protective given that the standards do not take into account indirect pathways of exposure and that there have been advances both in risk assessment and control technologies since promulgation of the current standards.

Consequently, the Agency plans to establish new emissions standards for HWCs under joint CAA and RCRA authority. This will avoid duplicative Agency effort and piecemeal regulation of the hazardous waste combustion industry.

Alternatives:

Under provisions of the CAA, the Agency plans to consider the cost-effectiveness of emission limits more stringent than the minimum limits mandated by the statute. Further, the Agency plans to evaluate approaches to reduce emissions of hazardous air pollutants by improving good operating practices (e.g., controlling the way in which problematic materials such as toxic metals are introduced into the combustor).

Anticipated Costs and Benefits:

EPA's analysis of the recommended standards for the final rule indicate that some combustion facilities may experience a substantial change in the per ton cost of burning waste, but that this change is likely to have a limited impact on the overall combustion market. In terms of effects on waste-burning cost structure, cement kilns and lightweight aggregate kilns (LWAKs) are most affected by the regulation. This is primarily a product of their relatively low baseline costs of burning, meaning that incremental compliance costs represent a large increase in their overall cost of burning waste. For incinerators, compliance costs are lower, represent smaller additions to baseline costs, and change little across regulatory options. The analysis concludes that cement kilns have the lowest waste burning costs even after regulation, and so will continue to have the greatest flexibility in marketing their services.

To the extent that compliance costs cannot be passed through to generators and fuel blenders, the profitability of waste burning in kilns will fall. Nonetheless, waste burning kilns are expected to have healthy operating profit margins after the rule. Market exit in all sectors is concentrated among facilities that burn small quantities of hazardous waste. Approximately 15 combustion facilities may stop burning hazardous wastes as a result of the planned maximum achievable control technology (MACT) options. The small quantities these facilities burn suggest that market dislocations will be minor.

Overall, the social costs of the rule are balanced by a set of potentially substantial benefits. Given the severity of the potential adverse health effects from dioxin and mercury (cancer, adverse developmental effects in children, severe neurological effects in adults, and bioaccumulation in ecosystems), EPA believes the substantial reductions of these pollutants from hazardous waste burning sources under the MACT standard justifies moving ahead with the final recommended standards.

Risks:

EPA has estimated that hazardous waste incinerators and hazardous-waste burning cement and lightweight aggregate kilns currently emit (1997 base year) a total of 40g toxicity equivalent (TEQ) of TCDD and TCDF (isomers of dioxin) per year. Therefore, hazardous waste burning sources represent about 1.5 percent of total anthropogenic emissions of dioxins in the U.S.

EPA estimates that dioxin emissions from hazardous waste-burning sources will be reduced to approximately 12g TEQ per year at the recommended standard. These reductions would result in decreases to approximately 0.4 percent of total estimated anthropogenic U.S. emissions. EPA expects that reductions in dioxin emissions will help reduce dioxin levels over time in foods used for human consumption and, therefore, reduce the likelihood of adverse health effects, including cancer, occurring in the general population.

EPA has estimated that hazardous waste incinerators and hazardous waste-burning cement and lightweight aggregate kilns currently emit a total of 6Mg of mercury per year. Based on these estimates, hazardous waste-burning sources represent about 4.4 percent of total anthropogenic emissions of mercury in the U.S.

EPA estimates that mercury emissions from hazardous waste-burning sources will be reduced to 2.3Mg per year at the current floor levels. These reductions would result in reductions of total anthropogenic U.S. emissions to approximately 1.6 percent. EPA expects that reductions in emissions from mercury-emitting sources will help reduce mercury levels in fish over time.

SAN No. 3333

On October 25, 1993, the Agency reached a settlement agreement with the following parties: Citizens for a Safe Environment; Saucon Association for a Viable Environment, Inc.; Citizens Aware and United for a Safe Environment; Clean Water Fund of North Carolina; Natural Resources Defense Council; Sierra Club, Inc.; Hazardous Waste Treatment Council; and National Solid Wastes Management Association. In summary, that agreement requires:

Notice and comment rulemaking on air emission standards for hazardous waste (HW) incinerators and HW-burning cement kilns and lightweight kilns by September 20, 1995;

Final rulemaking for HW incinerators and HW-burning kilns by December 15, 1996;

Notice and comment rulemaking on air emission standards for HW-burning boilers and other industrial furnaces by December 15, 1998; and

Final rulemaking for HW-burning boilers and industrial furnaces by December 15, 1999.

The Agency's current schedule is significantly behind that outlined in the

settlement agreement. The Agency has had informal discussions with the petitioners concerning the present schedule.

33 USC 1318 Clean Water Act sec 308;
33 USC 1342 Clean Water Act sec 402;
33 USC 1361 Clean Water Act sec 501

CFR Citation:

40 CFR 122; 40 CFR 123; 40 CFR 124; 40 CFR 125

Legal Deadline:

None

Abstract:

On February 21, 1995, President Clinton issued a directive requesting that Federal agencies review their regulatory programs to eliminate any obsolete, ineffective, or unduly burdensome regulations. In response to that directive, the Office of Wastewater Management plans to issue a comprehensive rulemaking package revising certain NPDES requirements in parts 122, 123 and 124 to eliminate redundant regulations, provide clarification, and remove or streamline unnecessary procedures which do not provide any environmental benefits. Some of these revisions include: 1) consolidating regulatory definitions; 2) removal of part 124, subpart F, non-adversary panel hearings; 3) possible removal of storm water group application requirements; 4) streamlining permit termination procedures; and 5) removing part 124 evidentiary hearing procedures.

This rulemaking is expected to affect entities who operate the NPDES program or who are regulated by it. This includes small businesses and State and local governments. Most of these effects are expected to be deregulatory or streamlining in nature.

Statement of Need:

This rule is in response to the President's directive.

Summary of the Legal Basis:

This action is not being taken as a result of a court order and is not required by law.

Alternatives:

Alternatives are being considered as part of the proposed rule's comment review.

Anticipated Costs and Benefits:

The proposed rule is expected to provide savings for the regulated entities and permit issuing authorities in respect to costs and labor. It is not expected to result in any increased costs to those entities.

Risks:

Risks to the environment are expected to be minimal.

EPA

137. EFFLUENT GUIDELINES AND STANDARDS FOR THE INDUSTRIAL LAUNDRIES POINT SOURCE CATEGORY

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

33 USC 1311 Clean Water Act sec 301;
33 USC 1317 Clean Water Act sec 307;
33 USC 1314 Clean Water Act sec 304;
33 USC 1361 Clean Water Act sec 501;
33 USC 1316 Clean Water Act sec 306;
33 USC 1318 Clean Water Act sec 308

CFR Citation:

40 CFR 441

Legal Deadline:

Final, Judicial, June 30, 1999.

Abstract:

EPA is developing pretreatment standards for industrial laundries (facilities that launder industrial textile items, such as shop and printer towels, mops, mats). These standards include limitations on toxic and nonconventional pollutants, and are anticipated to reduce the annual discharge of pollutants to waters of the United States by 5 million pounds.

Statement of Need:

Control of wastewater discharge by local authorities has been inconsistent, in some cases encouraging facilities to shift processing of the most contaminated items to localities with the least stringent requirements and allowing the unnecessary discharge of pollution that could be economically eliminated by the industry.

Summary of the Legal Basis:

This action is required under consent decree in settlement of NRDC et al v. Browner (D.D.C. Civ. No. 89-2980, January 31, 1992, as modified).

Alternatives:

Options considered in the proposed rule included a small facility exclusion (based on pounds of production); limitations applying to the treatment of all facility wastewaters or only those from the laundering of heavily contaminated items based on performance of the following technology options in addition to gravity settling, screening, equalization, pH adjustment, sludge dewatering, and pollution prevention: chemical emulsion breaking of wastewater from the washing of heavily contaminated industrial items, chemical precipitation technology, dissolved air flotation technology; and a "no regulation" option.

Anticipated Costs and Benefits:

Estimated post-tax compliance costs incurred by industry based upon the proposal are $93.9 million annually. Estimated social costs of the proposal are $139.4 million per year; estimated monetized benefits are $2.9 to $10.6 million per year. Additional benefits that could not be monetized include reduced noncancer health effects, and reduced POTW operating and maintenance costs.

Risks:

Regulation expected to result in the avoidance of no more than 1 cancer case a year and eliminate excursions of ambient water quality criteria for the protection of human health on 7 river reaches.

EPA

138. NPDES WASTEWATER PERMIT APPLICATION FORMS AND REGULATORY REVISIONS FOR MUNICIPAL DISCHARGES AND SEWAGE SLUDGE USE OR DISPOSAL

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

33 USC 1342 Clean Water Act sec 402;
33 USC 1314 Clean Water Act sec 304;
33 USC 1318 Clean Water Act sec 308;
33 USC 1345 Clean Water Act sec 405;
33 USC 1361 Clean Water Act sec 501

CFR Citation:

40 CFR 122.21(j); 40 CFR 122.21(q)

Legal Deadline:

None

Abstract:

The purpose of this action is to revise and consolidate existing application forms and requirements for Publicly Owned Treatment Works (POTWs) and other Treatment Works Treating Domestic Sewage (TWTDS), and to streamline the application process for these facilities. The Agency seeks to establish a unified process that minimizes the need for additional information from applicants while providing permit writers the necessary information, including toxics data, to ensure that permits adequately address concerns of permittees and environmental protection. The Agency seeks to allow the use of existing data and to avoid unnecessary reporting. The Agency is also considering how to utilize electronic data submission. Although these forms will increase the burden on permittees not already required to submit these data, the Agency is minimizing the need for information from small entities, including tribal facilities. The burden on States would be minimized because of improvements to the application forms.

Statement of Need:

Section 402(a) of the CWA, as amended, authorizes the EPA to issue permits for the discharge of any pollutant or combination of pollutants. The content of the application forms 2A (standard form A) and 2S (short form A) is derived from the requirements in proposed sections 122.21(j) and 122.21(q). Currently POTWs submit these forms (based on size) for wastewater discharges and the interim sewage sludge application form for sludge discharges. EPA has not revised the wastewater forms since 1973, despite many amendments to the CWA and to the regulations under the Act which have significantly changed the permitting strategy of the NPDES program. Increased wastewater treatment required by the CWA has resulted in increased generation of sewage sludge. The interim sludge application form was developed in 1993 in response to regulatory changes to the part 503 sewage sludge regulations.

This rule will finalize changes to the regulations at sections 122.21(j) and 122.21(q) and forms 2A and 2S to provide permit writers with sufficient data to develop appropriate permit limitations that will be effective in ensuring that permittees meet the requirements of the regulations.

Summary of the Legal Basis:

This action is not required by law or court order.

Alternatives:

In preparation of the proposed rulemaking several scenarios for data collection were evaluated for both 2A and 2S. EPA looked at several options for the collection in 2A including all POTWs reporting the maximum data elements. In the end the proposal required two levels of data collection for form 2A.

Proposed form 2S was also evaluated for various levels of data collection. In the proposed rule Class 1 facilities complete the most information and the sludge-only facilities complete the least.

Anticipated Costs and Benefits:

This rule is a streamlining rule. It is anticipated that overall the final rule will decrease burden on facilities from the existing application burden. The burden reduction will come from streamlined application procedures which will decrease the number of 308 letters necessary.

The costs of the final rule will be decreased from the proposal. The proposed rule costs included a lot of testing which will be eliminated in the final rule.

Risks:

The application forms rule will allow permit writers to better evaluate discharges from POTWs and other TWTDS. The better the permit writer can evaluate the discharge, the better EPA can protect the environment and public health with appropriate limits and necessary conditions in the permits.

EPA

139. NPDES COMPREHENSIVE STORMWATER PHASE II REGULATIONS

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

33 USC 1311 Clean Water Act sec 301; 33 USC 1318 Clean Water Act sec 308; 33 USC 1342 Clean Water Act sec 402; 33 USC 1361 Clean Water Act sec 501

CFR Citation:

40 CFR 122; 40 CFR 123

Legal Deadline:

NPRM, Judicial, December 15, 1997.

Final, Judicial, March 1, 1999.

Abstract:

EPA proposed changes to the stormwater regulations for the remaining unregulated dischargers that require regulation. Also known as Phase II dischargers, these sources potentially could have included all stormwater discharges from municipal separate storm sewer systems serving populations of less than 100,000 and construction activities resulting in the land disturbance of less than 5 acres. Data collected under sections 305(b) and 402(p)(5) of the CWA indicate that benefits will be derived from addressing these discharges under the Phase II program. Urban stormwater runoff is a real cause of water quality use impairment. EPA has invited stakeholders to participate in the development of comprehensive Phase II rules under the Federal Advisory Committee Act (FACA). This FACA subcommittee is assisting in the development of the rule. Currently, all Phase II dischargers are required to have stormwater permits by 2001. EPA proposed to limit the universe of designated Phase II sources and proposed an approach that would promote the use of general permits for most Phase II sources. The proposed changes would also provide regulatory relief by waiving Phase I facilities that have no exposure to stormwater from otherwise applicable permit requirements.

Statement of Need:

Data collected under sections 305(b) and 402(p)(5) of the CWA indicate that uncontrolled stormwater discharges from municipalities serving populations less than 100,000 and construction sites that result in the disturbance of less than 5 acres of land cause water quality use impairment. The proposed changes to the NPDES stormwater regulations would address these currently unregulated stormwater discharges. The proposed changes would also provide needed regulatory relief to Phase I facilities that have no exposure to stormwater and do not cause water quality use impairment.

Summary of the Legal Basis:

CWA sec. 402(p)(6) requires EPA, in consultation with States and local officials, to issue regulations for the designation of the remaining unregulated discharges to be regulated to protect water quality. The United States Court of Appeals for the Ninth Circuit remanded EPA's de minimis exemption of construction sites below 5 acres and the no exposure exemption for category (XI) industrial facilities under the Phase I rule (NRDC v. EPA, 966 F.2d 1292 (9th Cir. 1992)). This remand requires EPA to examine construction sites below 5 acres for possible designation. EPA is also currently subject to a court order to propose supplemental rules under CWA sec. 402(p)(6) by September 1, 1997, and finalize these rules by March 1, 1999 (NRDC v. Browner, Civ. No. 95-634 PLF (D.D.C., April 6, 1995)).

Alternatives:

The proposed changes to the NPDES stormwater regulations are being developed with significant input from the FACA subcommittee. Alternative options, as well as successive drafts of the proposed changes, were distributed to FACA members for comment. The language of the proposed changes are the result of extensive stakeholder input. The Agency plans to solicit comments on alternative approaches in the preamble to the proposed rule.

Anticipated Costs and Benefits:

EPA estimated that the proposed rule would result in a mean annual cost of $511 million, with expected mean annual monetized benefits from implementation of the requirements of $310 million. EPA also estimated that the "no exposure" waiver for Phase I industrial facilities would result in minimum annual cost savings of $88 million. EPA is in the process of revising these estimates as the Agency develops the final rule.

Risks:

The proposed changes to the NPDES stormwater regulations will reduce adverse water quality impacts from stormwater, thereby reducing risks to aquatic habitat and public health.

EPA

140. NATIONAL PRIMARY DRINKING WATER REGULATIONS: STAGE I DISINFECTANT/DISINFECTION BY-PRODUCTS RULE

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

42 USC 300 Safe Drinking Water Act sec 1412

CFR Citation:

40 CFR 141; 40 CFR 142

Legal Deadline:

Final, Statutory, November 30, 1998.

Abstract:

The 1996 SDWA amendments require EPA to promulgate an Interim Enhanced Surface Water-Treatment Rule (IESWTR) and a Stage 1 Disinfectants/Disinfection Byproducts (DBP) Rule by November 1998. EPA proposed both rules in 1994 as a result of formal regulatory negotiations. The regulations, along with a long-term ESWTR and Stage 2 DBP Rule that will be promulgated later, are intended to expand existing public health protections and address concerns about risk trade-offs between pathogens and disinfection byproducts.

EPA is working under an expedited schedule to meet the November 1998 deadline for the final IESWTR and Stage 1 Rule. The Agency issued a Notice of Data Availability (NODA) for public comment in the fall of 1997 as part of this schedule. The NODA detailed the recommendations made by the DBP Advisory Committee (established under the Federal Advisory Committee Act (FACA)) on a number of key elements in the rule. The Agency issued another NODA in March 1998 that detailed EPA's analysis of new health effects research and possible regulatory applications.

Statement of Need:

EPA's Science Advisory Board (SAB), an independent panel established by Congress, cited drinking water contamination as one of the highest ranking environmental risks as recently as 1990. The SAB reported that microbiological contaminants (e.g., bacteria, protozoa, viruses) are likely the greatest remaining health risk management challenge for drinking water suppliers. Therefore, utilities usually apply some form of contaminant control. Disinfection is one important and widespread practice used to meet the public health goal of providing safe water to the public.

Over 200 million people in the United States are served by public water systems that apply a disinfectant (e.g., chlorine) to water in order to provide protection against microbial contaminants. While these disinfectants are effective in controlling many harmful microorganisms, they combine with organic matter in the water and form DBPs, some of which may pose health risks. Some of these byproducts, including those that are the subject of this rule (total trihalomethanes-TTHMs- and haloacetic acids-HAAs), are potentially associated with health risks, such as cancer, and reproductive and developmental effects. Therefore, EPA believes, that the Stage 1 DBR is needed for protection of public health from exposure to DBPs and meeting the requirements of the 1996 SDWA.

Alternatives:

The central requirement of regulatory analyses under Executive Order 12866 is to perform an analysis of net benefits and to consider the regulatory alternatives in light of a criterion of maximizing net benefits. The preliminary regulatory analysis focused on two options, Option 1 and Option A. Option 1 proposed a total trihalomethane (TTHM) maximum contaminant level (MCL) of 80 and a total haloacetic acid (HAA) MCL of 60 for large water systems (and a simple TTHM standard of 100 for small systems). Option A called for the use of precursor removal technology to reduce the level of total organic carbon (TOC). Alternative levels of TOC were considered, ranging from 4.0 to 0.5.

After additional analysis, two additional options, or hybrids (Option A), were added to the mix: the 80/60/4 and 80/60/5 options represented an attempt to merge concepts of TOC removal and MCLs of 80 for TTHM and 60 for HAAs. These also represented the first detailed considerations of a staged approach to DBP regulation.

Option 1 (100/80/60) and the two hybrids under Option A (80/60/4 and 80/60/5) were carried forward after a review of the reductions in exposure and a comparison of national costs arising from the options. Option 1 would have required treatment changes in 45 percent of plants, whereas the 80/60/4 option would have required changes in 56 percent of plants and the 80/60/5 option would require changes in 43 percent of plants.

National cost estimates developed at the time indicated that total capital cost of the three Stage 1 options ranged from $3.7 billion for the Option 1 to $8 to $9 billion for Option A. The small (serving populations of less than 10,000) systems share of the national capital cost of the Stage 1 options ranged from $0.8 billion for Option 1 to $3.1 to $3.2 billion for Option A. Reduced exposure to TOC was considerable in Option A hybrids but not present in Option 1. The major cost difference between Option 1 and the Option A hybrids stems from the requirement to reduce TOC.

The DBP Committee convened in 1997 to review assumptions and new data and to lay the groundwork for the promulgation of the final rule in November of 1998. Costs were modified based on new unit costs estimates and revised assumptions about the compliance forecast.

Anticipated Costs and Benefits:

Cost-benefit data is under development.

EPA

141. NATIONAL PRIMARY DRINKING WATER REGULATIONS: INTERIM ENHANCED SURFACE WATER TREATMENT RULE

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

42 USC 300 Safe Drinking Water Act sec 1412

CFR Citation:

40 CFR 141; 40 CFR 142

Legal Deadline:

Final, Statutory, November 30, 1998.

Abstract:

The 1996 SDWA amendments require EPA to promulgate an Interim Enhanced Surface Water Treatment Rule (IESWTR) and a Stage 1 Disinfectants/Disinfection Byproducts (DBP) Rule by November 1998. EPA proposed both rules in 1994 as a result of formal regulatory negotiations. The regulations, along with a long-term ESWTR and Stage 2 DBP Rule that will be promulgated later, are intended to expand existing public health protections and address concerns about risk trade-offs between pathogens and disinfection byproducts.

EPA is working under an expedited schedule to meet the November 1998 deadline for the final IESWTR and Stage 1 Rule. The Agency issued a Notice of Data Availability (NODA) for public comment in the fall of 1997 as part of this schedule. The DBP Advisory Committee (established under the Federal Advisory Committee Act (FACA)) met from March through July 1997 to discuss, evaluate, and provide advice on data, analysis and approaches related to the two rules. On July 15, 1997, the committee formally reached consensus and signed an agreement that includes recommendations, also included in the 11/97 NODA, to EPA on a number of key rule elements.

Statement of Need:

EPA's Science Advisory Board (SAB), an independent panel established by Congress, cited drinking water contamination as one of the highest ranking environmental risks as recently as 1990. The SAB reported that microbiological contaminants (e.g., bacteria, protozoa, viruses) are likely the greatest remaining health risk management challenge for drinking water suppliers. Therefore, utilities usually apply some form of contaminant control. Disinfection is one important and widespread practice used to meet the public health goal of providing safe water to the public. Disinfection, however, may pose risks of its own. Disinfectants and their byproducts are associated with potential health risks that include cancer and reproductive and developmental effects. EPA has identified ways to significantly lessen the potential risks associated with microbial contaminants without increasing the use and potential risks posed by disinfectants at reasonable costs and minimal burden. To implement these changes, EPA is publishing a final Interim Enhanced Surface Water Treatment Rule (IESWTR) as mandated by Congress in the Safe Drinking Water Act (SDWA) Amendments of 1996.

The primary goal of the IESWTR is to improve public health by increasing the level of protection from exposure to Cryptosporidium and other pathogens in drinking water supplies. The SDWA requires the setting of drinking water standards at contaminant levels designed to avoid adverse effects on health while allowing for a margin of safety. The rule is expected to reduce the level of Cryptosporidium and other pathogen contamination in finished drinking water supplies through improvements in filtration at water systems. The rule is also expected to provide a larger margin of safety, particularly by reducing the likelihood of the occurrence of Cryptosporidium outbreaks.

Alternatives:

Because Cryptosporidium is particularly resistant to inactivation using chlorine, physical removal by filtration is extremely important in controlling this organism. Filtration requirements under the Surface Water Treatment Rule (SWTR) mandate achieving a 0.5 Nephelometric Turbidity Units (NTU) for combined filter effluent (CFE) in 95 percent of monthly samples, with levels never exceeding 5 NTU. To improve filtration performance, EPA considered alternative tightened turbidity levels and monitoring of individual filtration performance. The final IESWTR includes revised filtration requirements, individual filter monitoring, disinfection benchmarking requirements intended to prevent significant decreases in existing microbial protection while systems comply with the Stage 1 Disinfectant/Disinfection Byproducts Rule, a sanitary survey requirement, a requirement to cover all new finished water reservoirs, and the rule adds Cryptosporidium to the watershed control requirements for unfiltered systems as well as the definition of ground water under the direct influence of surface water.

Anticipated Costs and Benefits:

As reflected in the November 1997 Interim Enhanced Surface Water Treatment Rule Notice of Data Availability, EPA estimated that the national capital and annualized costs (amortized capital and annual operating costs) of possible IESWTR provisions (based on a 10 percent interest rate) would be $730 million and $312 million, respectively. These figures include costs associated with improved treatment, turbidity monitoring, a disinfection benchmark, and sanitary surveys. Mean estimated benefits of the provisions range from $244.8 million to $844.2 million, depending upon varied baseline and improved cryptosporidium removal assumptions with corresponding reduced cases of cryptosporidiosis illness ranging from 136,000 to 469,000. EPA is currently revising these estimates as part of a final Regulatory Impact Analysis that will be published this fall when the final IESWTR is promulgated.

BILLING CODE 6560-50-F

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION (EEOC)

Statement of Regulatory and Deregulatory Priorities

The Equal Employment Opportunity Commission (EEOC) enforces six statutes prohibiting discrimination in employment. Title VII of the Civil Rights Act of 1964, as amended, prohibits employment discrimination on the basis of race, color, sex, religion, or national origin. The Equal Pay Act of 1963, as amended, prohibits the payment of different wages to women and men working in the same establishment, performing equal work that requires equal skill, effort, and responsibility under similar working conditions, unless the pay differential is based on factor(s) other than sex. The Age Discrimination in Employment Act of 1967, as amended (ADEA), prohibits employment discrimination on the basis of age against people age 40 and older. Title I of the Americans with Disabilities Act of 1990, as amended (ADA), prohibits employment discrimination against qualified individuals with disabilities. Sections 501 and 505 of the Rehabilitation Act of 1973, as amended, prohibit Federal agencies from discriminating in employment against qualified individuals with disabilities and require agencies to accommodate the special needs of persons with disabilities. The Government Employee Rights Act of 1991 extends protections against employment discrimination to certain employees who were not previously covered.

The mission of the Agency is to ensure equality of opportunity by vigorously enforcing Federal legislation prohibiting discrimination in employment. Enforcement is accomplished through investigation, conciliation, alternative methods of dispute resolution, litigation, coordination, and regulation, as well as by education, policy research, and technical assistance. In pursuing its mission of eradicating discrimination in the workplace, the Commission intends that its enforcement be certain and predictable and that its remedies be preventive and remedial in scope.

One important step toward these ends is to make sure that employees, employers, and union representatives understand their rights and obligations under the Federal laws prohibiting employment discrimination. In accordance with the President's national regulatory principles, EEOC develops regulations necessary to inform employees and employers of their rights and obligations under the statutes if enforces. EEOC further educates the public on an ongoing and proactive basis through interpretive guidelines, policy documents, management directives, and other public guidance programs.

EEOC is currently considering one significant action of a regulatory nature, which has been published for public comment.

The Commission proposes to amend 29 CFR part 1614 to change the Federal sector complaint process. The proposed changes are designed to correct the perception of unfairness or inefficiency in the Federal sector complaint process. In addition, the proposed changes accomplish the National Performance Review goals of removing unnecessary layers of review and delegating decisionmaking authority to front-line employees.

(Consistent with section 4(c) of Executive Order 12866, this statement was reviewed and approved by the Chairman of the Agency. The statement has not been reviewed or approved by the other members of the Commission.)

EEOC

FINAL RULE STAGE

142. FEDERAL SECTOR EQUAL EMPLOYMENT OPPORTUNITY PROCEDURES

Priority:

Other Significant

Reinventing Government:

This rulemaking is part of the Reinventing Government effort. It will revise text in the CFR to reduce burden or duplication, or streamline requirements.

Legal Authority:

42 USC 2000e-16; 29 USC 206(d); 29 USC 633a; 29 USC 791; 29 USC 794a

CFR Citation:

29 CFR 1614

Legal Deadline:

None

Abstract:

Commission staff has reviewed part 1614 to assess its effectiveness and conformity with National Performance Review principles. As a result, several changes are being proposed to streamline the process and eliminate unnecessary layers of review.

Statement of Need:

The Equal Employment Opportunity Commission (EEOC or Commission) is proposing to revise the Federal sector complaints process to increase its overall efficiency and integrity. Two specific goals are to motivate agencies to take early corrective action and encourage individuals to fully utilize the administrative process.

As part of an ongoing effort to evaluate and improve the effectiveness of the EEOC's operations, former Chairman Gilbert F. Casellas established the Federal Sector Workgroup to review the Federal sector equal employment opportunity process. The Workgroup, composed of representatives from offices throughout the Commission, evaluated the Commission's administrative processes governing its enforcement responsibilities in the Federal sector and developed recommendations to improve its effectiveness. In addition the review sought to implement the goals of Vice President Gore's National Performance Review (NPR), including eliminating unnecessary layers of review, delegating decisionmaking authority to front-line employees, developing partnership between management and labor, seeking stakeholder input when making decisions, and measuring performance by results.

The Federal Sector Workgroup issued a report entitled "The Federal Sector EEO Process...Recommendations for Change" in May 1997. The report contained numerous recommendations for changing the Federal sector complaint process, including changes to the part 1614 regulations, changes to EEOC's Management Directive 110 which contains additional guidance and instructions on the Federal complaint process, and changes to EEOC's internal procedures. The Commission proposes to amend part 1614 to implement the regulatory recommendations. The proposed changes address the continuing perception of unfairness and inefficiency in the Federal sector complaint process. In addition, the proposals accomplish the National Performance Review goals of removing unnecessary layers of review and delegating decisionmaking authority to front-line employees.

EEOC spent over a year and a half in the development of this NPRM. During that time period, EEOC consulted

extensively with all stakeholders in the Federal sector process. On April 22, 1996, prior to the development of any recommendations, the EEOC's Federal Sector Workgroup held a meeting with Federal EEO and Civil Rights personnel organized by the President of the Council of Federal and Civil Rights Executives. On May 21, 1996, then-Chairman Casellas wrote to the EEO Directors of all departments and agencies requesting their written comment on a number of subjects related to the Federal sector complaint process. We received comments from 27 agencies, all of which were fully considered in developing the recommendations contained in the Workgroup's report. On September 26, 1997, the Workgroup held a briefing for EEO Directors on the Workgroup's recommendations. The Commission coordinated the draft NPRM with all Federal agencies pursuant to Executive Order No. 12067 (1978).

Summary of the Legal Basis:

The proposed revisions are not required by statute or court order. The changes are proposed to improve the existing procedural regulations that were issued under the Commission's authority to issue such regulations as it deems necessary and appropriate to carry out its responsibilities under 42 USC 2000e-16, 29 USC 206(d), 29 USC 633a, 29 USC 791, 29 USC 794a, and Executive Order No. 11478.

Alternatives:

This proposal contains numerous changes to the Federal sector processing regulations. The agency has consulted widely with all stakeholders in developing these proposals and will consider all alternatives offered by them and the public commenters.

Anticipated Costs and Benefits:

The anticipated costs and benefits for each of the major changes are:

Alternative Dispute Resolution (ADR) in the pre-complaint process. Many agencies have existing ADR programs and consequently this proposal will result in no or minimal increased costs. Agencies without such programs may have start-up costs or incur costs to purchase such services. We believe that ADR will result in better and earlier resolutions, thereby saving investigation and litigation costs, and potentially result in fewer filings.

Dismissals. We propose to add two new bases for dismissals of complaints: dissatisfaction with the EEO process and abuse of the EEO process. The two new bases for dismissal will enable agencies to save administrative processing and litigation costs where complainants are dissatisfied with the processing of complaints or abuse the process. We believe this will result in a net cost savings to the agencies with no detriment to those with good faith claims.

Offer of Resolution. We propose to eliminate the dismissal for failure to accept full relief and to replace it with an offer of resolution whereby the amount of recoverable attorney's fees will be limited when a complainant rejects an agency's offer of relief but subsequently obtains less relief through the administrative process. The dismissal for failure to accept full relief has become less useful as a result of the availability of compensatory damages. We believe this alternative will provide an incentive to complainants to accept reasonable settlement offers.

Partial Dismissals. We propose to eliminate interlocutory appeals when an agency dismisses only a part of a complaint. This has resulted in fragmentation of complaints and delays in processing. As proposed, a complainant can obtain review of the agency's partial dismissal from an EEOC administrative judge if a hearing is requested, or from EEOC if an appeal is filed. We believe that eliminating these appeals will save considerable resources, and that the elimination of fragmentation and delays will benefit both parties.

Hearings. Requests for hearings will be made directly by complainants to EEOC rather than to the agency, which would then transmit it to EEOC. This will relieve the agencies of this burden and eliminate the delay incident to that two-step process. The administrative judges (AJs) will be given the authority to dismiss cases rather than having to remand the cases to the agency for dismissal. This should save time for all parties and save costs to the agency. The AJs will be able to issue decisions without hearings in appropriate cases where the record is sufficient and credibility determinations are not at issue. This will save costs and time. Finally, the AJs will issue final decisions. This will save the agencies the costs of writing their own decisions and avoid the appearance of conflict of interest that accompanies the issuance of a decision on the matter by the same agency that is accused of committing the discrimination.

Class Complaints. Because very few class complaints are filed or certified at the administrative level, some complainants wait to raise class allegations in court. This deprives the agencies of the ability to resolve these matters early in the process and denies victims a prompt remedy. The changes to these provisions are intended to remove unnecessary barriers to the filing of class complaints and to insure fairness of remedies. Any increase in costs due to increased filings should be offset by earlier resolution.

Appeals. We propose to amend some time frames to shorten the process thereby eliminating delays. We are changing the appellate standard of review from de novo to substantial evidence and revising the reconsideration standards to increase deference to administrative judges' decisions and to avoid a second level of appeal. This will eliminate duplication of EEOC's efforts and unnecessary layers of review and permit decisionmaking at an earlier stage.

Risks:

This regulation does not address risks to public health, safety, or the environment. The proposed regulatory changes, however, will lessen the risks of undue delay and of the perception of unfairness in the processing of EEO complaints. The Commission has a significant interest in addressing these risks because they undermine the integrity of the EEO process and, to the extent they deter individuals from filing EEO complaints or fully exhausting the EEO process, deprive agencies of the opportunity to take early corrective action. EEOC proposes to minimize delays by increasing the opportunities for early resolution of complaints, eliminating interlocutory appeals, dismissing complaints because of abuse or dissatisfaction with the EEO process, permitting administrative judges to issue dismissals in appropriate circumstances instead of remanding cases to the agency for dismissal, allowing offers of resolution, making hearing requests directly to EEOC, and shortening some of the appellate time frames. EEOC addresses the perception of unfairness by authorizing administrative judges to issue final decisions instead of recommendations that the agency can reject, having partial dismissals reviewed by administrative judges, eliminating unnecessary barriers to the filing of class complaints, and changing the standard of appellate review from de novo to substantial evidence.

GENERAL SERVICES ADMINISTRATION (GSA)

Statement of Regulatory and Deregulatory Priorities

The General Services Administration (GSA) establishes policy for and provides economical and efficient management of Government property and records, including construction and operation of buildings, procurement and distribution of supplies, utilization and disposal of property, and transportation, traffic, and communications management.

GSA's regulatory priorities for fiscal year 1999 are to continue to ensure our regulations reflect the President's philosophy of being consistent, sensible, and understandable and do not place an undue burden on the public.

GSA issues the Federal Property Management Regulations (FPMR) to prescribe Governmentwide regulations for real property, for personal property, and for other programs and activities within GSA's regulatory authority. The FPMR is intended to keep agencies abreast of the policies, regulatory requirements, and specific procedures, information, and standards that apply to the management of property and administrative services.

An agencywide review of the FPMR found the regulation was in need of improvement to streamline and clarify its contents. As a result, the FPMR is being converted into a new Federal Property and Administrative Services Regulation (FPASR). The FPASR will contain the policies and regulatory requirements which GSA issues for managing property and administrative services. Materials will appear in a plain language question and answer format. Nonregulatory materials, such as guidance, procedures, and standards currently found in the FPMR, will be available in separate documents, such as customer guides. These content changes will help conform the FPASR to the recommendations of Vice President Gore's National Partnership for Reinventing Government to reduce regulations and use plain language in regulatory documents.

Additionally, working with Vice President Gore's National Partnership for Reinventing Government, GSA has already issued parts of the Federal Travel Regulation (FTR) in the new plain language question and answer format that is easier for customers to use and understand.

BILLING CODE 6820-34-F

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION (NASA)

Statement of Regulatory Priorities

The National Aeronautics and Space Administration (NASA) was established by the National Aeronautics and Space Act of 1958, which laid the foundation for NASA's mission. It directs NASA to conduct space activities devoted to peaceful purposes for the benefit of all humankind. We are to preserve the leadership of the United States in aeronautics and space science and technology, and we are to expand knowledge of the Earth and space. To carry out this mission, NASA is authorized to conduct research for the solution of problems of flight within and outside the Earth's atmosphere; to develop, construct, test, and operate aeronautical and space vehicles for research purposes; to operate a space transportation system including the space shuttle, upper stages, space station, and related equipment; and to perform such other activities as may be required for the exploration of space. NASA conducts activities required for the exploration of space with human-tended and expendable vehicles and arranges for the most effective utilization of the scientific and engineering resources of the United States with other nations engaged in aeronautical and space activities for peaceful purposes.

NASA's mission, as documented in its 1998 Strategic Plan, is to explore, use, and enable the development of space for human enterprise; to advance and communicate scientific knowledge and understanding of the Earth, the solar system, and the universe and use the environment of space for research; and to research, develop, verify, and transfer advanced aeronautics, space, and related technologies.

The following are narrative descriptions of the most important regulations being planned for publication in the **Federal Register** during fiscal year (FY) 1999.

The Federal Acquisition Regulation (FAR), 48 CFR chapter 1, contains procurement regulations that apply to NASA and other Federal agencies. NASA implements and supplements FAR requirements through the NASA FAR Supplement (NFS), 48 CFR chapter 18. Major revisions are not expected in FY 1999, except to conform to FAR changes that are currently being promulgated in part 19, Small Business Programs, and part 45, Government Property.

In a continuing effort to keep the NFS current with NASA initiatives and Federal procurement policy, minor revisions to the NFS may be published. For instance, NASA is developing a risk-centered approach to acquisition that will affect acquisition planning, contract structure, contractor surveillance, and other contract management areas. NASA's implementation is expected to result in NFS revisions.

To reduce the time and cost spent by the Agency and by our science and industry partners in the procurement of basic and applied research, NASA is focusing on streamlining our processes. To go forward in this effort, the Grant and Cooperative Agreement Handbook, 14 CFR parts 1260, 1273, and 1274 will be rewritten to incorporate improvements and streamlining initiatives.

NASA is working on revision of its regulations for implementing the National Environmental Policy Act (NEPA), which are presented at 14 CFR subparts 1216.1 and 1216.3. These changes are being contemplated to streamline and clarify the Agency's NEPA process and conserve time and other resources, while more effectively addressing the purposes of NEPA and developing more responsibility to NASA Centers.

NASA is working on technical amendments to revise, refine, and clarify the cross-waiver of liability in NASA contracts and agreements involving activities such as launch services.

NASA is also in the process of clarifying its claims regulations that implement and provide procedures for exercising its claims authority under 42 U.S.C. 2473(c)(13) of the National Aeronautics and Space Act of 1958, as amended, especially as applied to Agency functions such as launches of NASA missions.

BILLING CODE 7510-01-F

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION (NARA)

Statement of Regulatory Priorities

The National Archives and Records Administration (NARA) promulgates (1) regulations directed to other Federal agencies regarding adequate and proper documentation of the policies and transactions of the Federal Government and for ensuring proper records disposition and (2) regulations directed to the public relating to access to and use of the historically valuable archives, donated historical materials, Nixon Presidential materials, and Presidential records in the National Archives, regional archives, Presidential libraries, and Presidential Materials Projects operated by NARA. NARA also promulgates regulations relating to the National Historical Publications and Records Commission (NHPRC) grant programs.

NARA's regulatory priorities for fiscal year 1999 will be issuance of records management regulations concerning Federal agency electronic records and regulations relating to storage of inactive Federal records. NARA records management regulations must provide agencies with the guidance they need to fulfill their statutory obligation to make and preserve records containing adequate and proper documentation of the agency's business. NARA intends to update and expand its regulation relating to recordkeeping requirements for electronic records. The regulation will help Federal agencies to manage their Federal records created or received in electronic form, including those generated with newer technologies and those in the physical custody of contractors. Records in electronic form may contain information vital to the operation of the Government or records that must be maintained for a lengthy period of time.

NARA also intends to issue revised regulations on facility standards for agency records centers to ensure that Federal records stored in agency- or privately operated records storage facilities are stored in facilities meeting the appropriate environmental, physical security, and fire safety standards to maintain the records for their required retention period. The current regulation does not distinguish between the environmental storage conditions for temporary records and for permanently valuable records, nor does it reflect current fire safety standards. NARA's other high-priority regulation will provide policy and procedures to Federal agencies relating to conversion of NARA's records center operations to a totally reimbursable program on October 1, 1999 (FY 2000).

NARA also intends to review and revise other records management regulations relating to removal of personal documentary materials from agencies, NARA records centers storage procedures, and records declassification procedures, which are discussed in greater detail in the NARA section of the Unified Agenda of Federal Regulatory and Deregulatory Actions.

NARA plans no significant rulemakings in the area of public use of archival records and materials in NARA research rooms in FY 1999. As described in the NARA section of the Unified Agenda, NARA is revising its regulations on research room procedures and use of NARA facilities to reflect changes in policies and procedures. NARA also plans to review and update its fees for reproduction of records and other materials transferred to NARA.

NARA

PROPOSED RULE STAGE

---

143. AGENCY RECORDS CENTERS

Priority:

Other Significant

Legal Authority:

44 USC 2104 (a); 44 USC 3103

CFR Citation:

36 CFR 1228.222

Legal Deadline:

None

Abstract:

NARA is revising the regulations on facility standards for records centers in 36 CFR part 1228, subpart l. The current regulation cites obsolete industry standards and has not been revised since the early 1980's. This rulemaking action revises standards for environmental conditions, with particular emphasis on storage areas for archival material; incorporates standards for the storage of nontextual records; prescribes new physical security and fire detection and suppression standards; and establishes environmental and security requirements for new agency records centers.

Statement of Need:

This regulation is required to ensure that Federal records are stored in facilities meeting the appropriate environmental, physical security and fire safety standards to maintain the records for their required retention period. Permanently valuable records need to be stored in environmental conditions that will preserve the records for extended periods of time while temporary records require a different level of environmental storage conditions. The previous standards did not distinguish between the environmental storage conditions for temporary records and for permanently valuable records. In addition, the previous standards do not reflect current information relative to fire safety or to the proper long term storage of permanently valuable records.

Summary of the Legal Basis:

This regulation reflects the legal requirements for agencies to maintain records in a manner to insure that the records are available for the appropriate retention period. The National Archives and Records Administration (NARA) is required by law to assist Federal agencies in the development of standards and guidelines for the appropriate management of Federal records storage conditions for Federal records. The Archivist of the United States is also statutorily responsible for insuring that Federal agencies are maintaining records in an appropriate manner.

Alternatives:

The current standards in 36 CFR 1228 do not adequately distinguish between storage requirements for temporary records and for permanently valuable records. Further, the draft international standards do not provide the appropriate storage conditions for the preservation and protection of Federal records. An alternative to this regulation change would be to state in the regulations only the statutory requirements for storage of Federal records in the appropriate environmental conditions. Since agencies are permitted to maintain their own records, NARA would then be required to prepare and issue a records storage guide describing the appropriate environmental conditions for records storage facilities. This alternative, however, would reduce the effectiveness of the regulation since the specific environmental limits would be contained in nonmandatory guidance.

Anticipated Costs and Benefits:

There are costs associated with bringing existing facilities up to the new standards and, in some cases, replacing existing facilities that can not be brought up to the performance requirements of the new standards. It is expected that the existing facilities that store permanently valuable records, for the most part, will have to be replaced since replacing the facility is more cost effective than attempting to renovate the facility. For facilities storing temporary records, it is expected that most of these facilities can be renovated to comply with the new standards. Agencies that arrange for their own storage of records will be required to maintain facilities meeting the new standards. The agencies that contract for this service will be required to include the standards in their contracts with private companies.

Risks:

Failure to follow these regulations could result in records that are not properly maintained and, as a result, not available for use when they are required. In the case of permanently valuable records, failure to maintain the records in facilities meeting the revised standards could result in unique, valuable information being permanently lost. Information relative to the expenditure of funds could be lost; documentation of significant decisions with wide ranging effects on the public could be unavailable; and the lack of information could result in inefficient Government operations while trying to recreate the information or in fruitless searches for the information.

NARA

144. • RECORDS CENTER FACILITIES REIMBURSABLE PROGRAM

Priority:

Other Significant

Legal Authority:

44 USC 2907; 44 USC 3103

CFR Citation:

36 CFR 1228

Legal Deadline:

None

Abstract:

NARA's records center program will convert to a totally reimbursable program on October 1, 1999 (FY 2000). This regulation will establish policies and procedures relating to the reimbursable program. The regulation will affect Federal agencies.

Statement of Need:

The Administration has decided that NARA's records center program will become fully reimbursable in FY 2000. In the past, only about 30 percent of NARA's records center program was reimbursable. Seventy percent of the program relied on direct appropriations to provide storage space and records center services to other Federal agencies. This change in policy is intended to ensure that NARA has sufficient resources to provide adequate storage and reference services and to meet increasing demands for records center space and services. Aligning the costs of records center services with those Federal agencies that use the services will lead to greater emphasis on records management activities throughout the Federal Government.

Summary of the Legal Basis:

Under the Federal Records Act (44 U.S.C. 2907) NARA has the authority, but is not required, to operate the records center program. The records center program will continue, but on a reimbursable basis effective October 1, 1999.

Alternatives:

This approach was adopted by the Administration after consideration of all available alternatives. OMB has stipulated that NARA is to be the sole source for agency records center services through FY 2002 for agencies currently using NARA records centers. Agencies currently storing records in agency or private sector records centers may continue to do so. After FY 2002, agencies may choose to store records with NARA, a private sector records center, another agency's records center, or establish its own agency records center pursuant to guidelines that NARA will issue.

Anticipated Costs and Benefits:

While costs will increase for individual agencies, the overall cost to the Government will not increase. The new emphasis on records management may result in lowered costs for the storage of Federal records as records retention periods are reviewed and revised. The reimbursable program will allow for more and higher quality records center storage space and improved services to agencies. NARA's goal is to provide agencies with the best balance of service and cost.

Risks:

Management controls will be established to ensure that the program is achieving its intended objectives. Legislation is required to establish a revolving fund that will be used to finance the records center operations. The reimbursable program will be monitored by NARA staff and audited by OMB.

NARA

145. • STANDARDS FOR AGENCY RECORDKEEPING REQUIREMENTS

Priority:

Other Significant

Legal Authority:

44 USC 2904; 44 USC 2905; 44 USC 3101; 44 USC 3102; 44 USC 3303

CFR Citation:

36 CFR 1220; 36 CFR 1222; 36 CFR 1228; 36 CFR 1234

Legal Deadline:

None

Abstract:

This regulation expands the current emphasis on electronic mail records to records created with all office automation applications, clarifies the records management requirements for electronic records maintained by contractors, and addresses records generated or received using newer electronic technologies.

Statement of Need:

This regulation is needed to ensure that agencies fully recognize the need to manage all Federal records created or received in electronic form, include those generated with newer technologies and those in the physical custody of contractors. Records in electronic form may contain information vital to the operation of the Government or records that must be maintained for a lengthy period of time, yet many times agencies adopt technologies without regard to the need to meet records management requirements that would ensure the preservation and integrity of the records.

Summary of the Legal Basis:

This regulation reflects the legal requirements for agencies to create and maintain records in a manner that ensures that the records are available for the appropriate retention period. The National Archives and Records Administration is required by law to issue standards and guidelines to Federal agencies for the appropriate management of Federal records. The statutory definition of "records" includes "machine readable materials." The law also provides that, among other goals, records management should result in creation of "accurate and complete documentation of the policies and transactions of the Federal Government" and "judicious preservation and disposal of records."

Alternatives:

An alternative to this regulatory change would be to provide guidance to agencies on creation, maintenance, and disposition of records in electronic format. NARA does provide such guidance and has plans for additional guidance addressing general electronic recordkeeping and records generated or received using newer technologies. However, NARA guidance is not mandatory, so it does not provide for adequate controls over the protection of Federal records and for ensuring the integrity of Federal records.

Anticipated Costs and Benefits:

NARA is unable to quantify the costs associated with ensuring that electronic records are properly maintained. For agencies that automate their processes and records with tools that provide records management functionality, the costs will be negligible. In other circumstances, agencies may need to acquire additional automated tools to ensure the protection and preservation of electronic records. Also unquantifiable is the need for agencies to provide training to employees who used office automation applications or other electronic systems that are not integrated with electronic recordkeeping systems.

Risks:

Failure to follow these regulations could result in loss of documentation or an inability to verify the validity of information needed to ensure accountability to oversight agencies, Congress, and the public; protect the legal and financial rights of the Government and of individuals directly affected by Government activities; and preserve institutional memory. Without proper controls over the management of electronic records held by contractors, the Government may fail to acquire useful information that belongs in the public domain.

OFFICE OF PERSONNEL MANAGEMENT (OPM)

Statement of Regulatory Priorities

The Office of Personnel Management's (OPM) regulatory priorities for the coming year will continue to focus on human resource management reforms that will enable the Federal Government to meet the challenges of downsizing, increased use of technology, delayering, decentralization, improved labor-management relationships, and other changes that are reinventing the Federal workforce.

This administration has developed an outstanding record in managing the largest workforce in the Nation—a record that includes reinventing Federal human resource management systems, downsizing the Federal workforce by over 350,000 to its lowest point in 30 years, and at the same time, focusing on improving quality, effectiveness, and customer service. Continued progress toward centrally needed reform now depends largely upon the passage of legislation, which currently is in varying stages of discussion, that would provide the tools needed to make more profound improvements in Federal human resource management. Pending passage of legislation, OPM will continue to use its regulatory authority whenever regulations are the appropriate vehicle to achieve our goal of an effective, merit-based civil service system. However, we are also mindful of the dangers of over-regulating. Excessive regulation in the area of Federal human resources management creates obstacles that stand in the way of the innovation and creativity that Federal managers need to lead and motivate the workforce and to operate programs more effectively. We seek an appropriate balance of minimizing regulation to ensure flexibility, innovation, and excellence, while preserving the merit-based civil service system that serves as the cornerstone of our democracy.

Consistent with this approach and with the President's leadership to create a Government that works better and costs less, our regulatory activity will include proposing regulations to give agencies greater flexibility in designing their internal selection systems and to consolidate, streamline, and clarify the excessive number of hiring and examining authorities that currently exist in Government.

To help focus on excellence in employment, we will permit agencies in appropriate circumstances to use an initial probationary period of up to 3 years while establishing 1 year as the minimum period required to assess performance.

This Administration is justifiably proud of its progress in helping move record numbers of Americans from the hopelessness and despair of welfare to the promise of productive employment. More than 6000 people have already found employment in the Federal Government as part of the President's welfare-to-work initiative. Our regulations this year will facilitate agencies' efforts to promote many of these deserving and fully trained workers commensurate with their duties and performance.

Success in Government downsizing, though difficult, has been achieved with fairness and compassion to those affected. We will continue to balance the need for, and the effects of, downsizing with a clear understanding of equity as necessary jobs are filled in the future. In order to assist agencies in providing displaced employees with maximum reemployment opportunities, regulations will be promulgated to afford those separated by downsizing with the first opportunity for reemployment in their former agency. Similar priority will also be given to former employees who were separated or downgraded due to injury or disability but who have now fully recovered.

In our management of the Federal Employees Health Benefits Program, we will continue to look for opportunities to lead the Nation by implementing policies and regulations that ensure fair and effective treatment of those in need of health care.

Overall, the Office of Personnel Management will continue to improve existing human resource management systems in order to attract and keep the best possible talent, to promote fairness and diversity, and to create a Government that truly serves our citizens.

OPM

PROPOSED RULE STAGE

146. • PROBATION ON INITIAL APPOINTMENT TO A COMPETITIVE POSITION

Priority:

Other Significant

Legal Authority:

5 USC 3321

CFR Citation:

5 CFR 315, subpart H

Legal Deadline:

None

Abstract:

This regulation will permit agencies to use a competitive service probationary period of up to 3 years, when the work of the position cannot be properly evaluated in only 1 year. It will also establish 1 year as the minimum probationary period.

Statement of Need:

A regulatory proposal is necessary because the probationary period is now set at 1 year by regulation. We would also need to prescribe the parameters under which a longer probationary period would be permitted.

Summary of the Legal Basis:

The legal basis for these regulations is 5 U.S.C. 3321, which authorizes the President to prescribe rules, regulations, and directives for a period of probation.

Alternatives:

While it is possible to do this by legislation, it would be more efficient and effective to do it by regulation. Legislation is not really necessary, and regulation allows for future flexibility.

Anticipated Costs and Benefits:

There are no anticipated costs associated with the publication of revised regulations on Competitive Service Probationary Periods. Revised regulations would provide additional flexibility for agencies.

Risks:

None

147. MERIT PROMOTION AND INTERNAL PLACEMENT

Priority:

Other Significant

Legal Authority:

5 USC 3301; 5 USC 3302

CFR Citation:

5 CFR 316; 5 CFR 335

Legal Deadline:

None

Abstract:

In an effort to streamline selection procedures and provide agencies with greater flexibility, the Office of Personnel Management (OPM) is proposing to revise the regulations covering merit promotion and internal placement. These regulations will provide a framework within which agencies may develop merit-based programs for internal selections.

Statement of Need:

A regulatory proposal with request for comment is necessary to give agencies greater flexibility to design merit-based selection programs that are consistent with merit principles and other applicable statutory provisions.

Summary of the Legal Basis:

The legal bases for these regulations are 5 U.S.C. 3301 and 5 U.S.C. 3302, which authorize the President to prescribe rules governing employment in the competitive civil service.

Alternatives:

We intend to include in the regulations only a basic framework to assure agency use of merit-based selection procedures. Alternatives are not appropriate. Concerning other materials for which there is a need, OPM will use other formats, such as handbooks or pamphlets.

Anticipated Costs and Benefits:

There are no anticipated costs associated with the publication of revised regulations on Merit Promotion and Internal Placement.

Risks:

None.

OPM

148. • TAPER EMPLOYMENT - SPECIFIC AUTHORITY FOR WORKER TRAINEE

Priority:

Other Significant

Legal Authority:

5 USC 3301; 5 USC 3302

CFR Citation:

5 CFR 316, subpart B

Legal Deadline:

None

Abstract:

The Office of Personnel Management (OPM) is proposing to revise the regulations to provide for the promotion of worker-trainees up to the GS-4, WG-5, or equivalent grades in the Federal Wage System. Promotions under this authority are currently limited to GS-3, WG-4, or equivalent.

Statement of Need:

A regulatory proposal with request for comment is necessary to update current regulations covering the worker-trainee program in order to allow for the possibility of promotion to higher levels.

Summary of the Legal Basis:

The legal bases for these regulations are 5 U.S.C. 3301 and 5 U.S.C. 3302, which authorize the President to prescribe rules governing employment in the competitive civil service.

Alternatives:

The only reasonable alternative to proposing revisions to these regulations would be to retain the existing regulations unchanged, which would not provide the maximum opportunity for individuals hired into this program.

Anticipated Costs and Benefits:

There are no anticipated costs associated with the publication of these revised regulations. Revised regulations would provide additional benefit to those hired into this program by way of providing increased opportunity for advancement.

Risks:

None.

149. • REEMPLOYMENT PRIORITY LIST

Priority:

Other Significant

Legal Authority:

5 USC 1315; 5 USC 8151

CFR Citation:

5 CFR 330, subpart B

Legal Deadline:

None

Abstract:

The Office of Personnel Management is proposing regulations covering the operation and administration of the Reemployment Priority List (RPL). The RPL provides competitive service employees separated by reduction in force with the first opportunity for reemployment in their former agency over candidates who do not work for the agency. The RPL also provides the same priority to former employees who were separated or downgraded because of a compensable injury or disability and have fully recovered more than one year after compensation began. These proposed regulations would update RPL procedures in order to assist agencies in providing displaced employees with maximum reemployment opportunities.

Statement of Need:

A regulatory proposal with request for comment is necessary to update current Reemployment Priority List regulations.

Summary of the Legal Basis:

The legal bases for these regulations are 5 U.S.C. 3315 and 5 U.S.C. 8151, which allow veterans and injured employees who have recovered to receive preference in consideration for reemployment.

Alternatives:

The only reasonable alternative to proposing revisions to these regulations would be to retain the existing regulations unchanged, which would leave them out of date and less effective in placing former employees in positions.

Anticipated Costs and Benefits:

There are no anticipated costs associated with the publication of revised regulations on reemployment priority. Revised regulations would provide more streamlined and effective means of reemployment consideration for employees and agencies, and take full advantage of technological advances.

Risks:

None.

150. • CLARIFICATION OF HIRING AUTHORITIES

Priority:

Other Significant

Legal Authority:

5 USC 3301; 5 USC 3302

CFR Citation:

5 CFR 330; 5 CFR 332; 5 CFR 333; 5 CFR 337

Legal Deadline:

None

Abstract:

In an effort to consolidate and streamline existing hiring authorities and to clarify existing competitive examining authorities, the Office of Personnel Management is proposing to revise the regulations covering the operation and administration of these authorities.

Statement of Need:

A regulatory proposal with request for comment is necessary to give agencies greater input regarding the structure and clarity of this consolidation effort.

Summary of the Legal Basis:

The legal bases for these regulations are 5 U.S.C. 3301 and 5 U.S.C. 3302, which authorize the President to prescribe rules governing employment in the competitive civil service.

Alternatives:

We intend to consolidate information contained in all or part of these regulations to achieve a more organized approach to regulations dealing with competitive examining. The alternative would be to retain existing regulations unchanged, which would leave them without the benefit of this consolidated approach.

Anticipated Costs and Benefits:

There are no anticipated costs associated with the publication of revised regulations clarifying hiring authorities. Revised regulations would provide more effective means of applying and administering competitive hiring authorities.

Risks:

None.

PENSION BENEFIT GUARANTY CORPORATION (PBGC)

Statement of Regulatory and Deregulatory Priorities

PBGC Insurance Programs

The Pension Benefit Guaranty Corporation (PBGC) administers two insurance programs for privately defined benefit plans under title IV of the Employee Retirement Income Security Act of 1974 (ERISA): A single-employer plan termination insurance program and a multiemployer plan insolvency insurance program. The PBGC protects the pensions of nearly 42 million working men and women in about 45,000 privately defined benefit plans, including about 2,000 multiemployer plans.

Under the single-employer program, the PBGC pays guaranteed and certain other pension benefits to participants and beneficiaries if their plan terminates with insufficient assets (distress and involuntary terminations). At the end of fiscal year 1997, the PBGC was trustee of about 2,500 plans and paid $824 million in benefits to about 206,000 people during 1997. Another 260,000 people will receive benefits when they retire in the future.

Most terminating single-employer plans terminate with sufficient assets to pay all benefits. The PBGC has administrative responsibility for these terminations (standard terminations), but its role is limited to seeing that proper procedures are followed and participants and beneficiaries receive their plan benefits.

The multiemployer program (which covers about 8.8 million workers and retirees in about 2,000 insured plans) is funded and administered separately from the single-employer program and differs in several significant ways. The multiemployer program covers only collectively bargained plans involving more than one unrelated employer. The PBGC provides financial assistance (in the form of a repayable loan) to the plan if the plan is unable to pay benefits at the guaranteed level. Guaranteed benefits are generally less than a participant's full benefit under the plan (and less than the single-employer guaranteed benefit). PBGC financial assistance occurs infrequently.

The PBGC receives no funds from general tax revenues. Operations are financed by insurance premiums, investment income, assets from pension plans trusteed by the PBGC, and recoveries from the companies formerly responsible for the trusteed plans.

To carry out these functions, the PBGC must issue regulations interpreting such matters as the termination process, establishment of procedures for the payment of premiums, and assessment and collection of employer liability.

Objectives and Priorities

PBGC regulatory objectives and priorities are developed in the context of the statutory purposes of title IV: (1) To encourage voluntary private pension plans, (2) to provide for the timely and uninterrupted payment of pension benefits to participants and beneficiaries, and (3) to maintain the premiums that support the insurance programs at the lowest possible levels consistent with carrying out the PBGC's statutory obligations (ERISA section 4002(a)).

The PBGC implements its statutory purposes by developing regulations designed (1) to assure the security of the pension benefits of workers, retirees, and beneficiaries; (2) to improve services to participants; (3) to ensure that the statutory provisions designed to minimize losses for participants in the event of plan termination are effectively implemented; (4) to encourage the establishment and maintenance of defined benefit pension plans; (5) to facilitate the collection of monies owed to plans and to the PBGC, while keeping the related costs as low as possible; and (6) to simplify the termination process.

Legislative Initiatives

On December 8, 1994, the Retirement Protection Act of 1994 was enacted. The Retirement Protection Act (1) accelerates the funding of underfunded single-employer pension plans, (2) phases out the cap on the variable rate portion of the premium paid to the PBGC by underfunded single-employer plans, (3) provides the PBGC with better tools to prevent employers from escaping their plan funding obligations through corporate transactions, (4) requires better information to participants in underfunded plans on plan funding status and PBGC guarantees, and (5) helps assure that workers do not lose pensions because they have lost contact with a terminating pension plan covered by the PBGC.

In May 1996, the President submitted the Retirement Savings and Security Act (RSSA) to Congress. The RSSA would have expanded coverage, increased portability and worker protection, and simplified pension law. The proposal included an increase in the guarantees in the multiemployer insurance program to address inflation since 1980 and expansion of the PBGC's missing participant program to include terminating defined contribution plans and non-PBGC-covered defined benefit plans. The Small Business Job Creation Act of 1996 and the Taxpayer Relief Act of 1997 included many of the RSSA provisions but did not include the increase in the multiemployer guarantee or the expansion of the missing participant program. These provisions are contained in several bills that were introduced in the House and Senate in 1997 and 1998 and remain legislative objectives.

Many workers are not saving enough, through personal savings or a 401(k) or other defined contribution plan, for a secure retirement. About half of all workers have no employment-based pension coverage. In businesses with fewer than 100 employees, only about 20 percent of workers are covered by any retirement plan. Traditional pension plans, i.e., defined benefit plans, provide a predictable lifetime benefit, guaranteed by the PBGC. Yet the defined benefit system is stagnating. We want to revitalize the system so that it can meet the retirement needs of American workers into the future.

In early 1998, the Administration proposed a new, simplified defined benefit plan—the Secure Money Annuity or Retirement Trust (SMART)—for employers with 100 or fewer employees. SMART combines the advantages of traditional defined benefit plans and defined contribution plans, while removing some of the major obstacles that discourage small business from adopting defined benefit plans. (The SMART proposal is contained in the Employee Pension Portability and Accountability Act of 1998 (H.R.3672) and the Retirement Accessibility, Security, and Portability Act of 1998 (S.2249 and H.R.4152).) For workers, SMART provides predictable benefits for life, guaranteed by PBGC, portability, and a chance to share in favorable investment experience. For employers, SMART offers more predictable contributions and reduced administrative costs. The Administration is also looking at ways to revitalize the defined benefit system for larger employers and their workers. The PBGC has made one of its priorities talking with consultants and others trying to market defined benefit plans in order to understand what are the current barriers to expansion of defined benefit plans and what changes are necessary to reinvigorate the defined benefit system.

Regulatory and Deregulatory Initiatives

The PBGC issued regulations implementing the Retirement Protection Act through the end of 1996. In FY 1997 and FY 1998, the PBGC focused on changes that would simplify the rules and reduce regulatory burden. The PBGC:

- Reduced penalties for late premiums that are paid before the PBGC notifies the plan of the delinquency (statement of policy, December 2, 1996).
- Extended the time limits for various actions required to terminate a fully funded single-employer plan in a "standard termination" (final rule, November 7, 1997).
- Stopped the reduction of monthly benefits under its actuarial recoupment method once the nominal amount of the benefit overpayment is repaid (final rule, May 29, 1998).
- Provided participants with benefits valued up to $5,000 in PBGC-trusteed plans with the choice of receiving their benefit in the form of an annuity or a lump sum (final rule, July 17, 1998).

The PBGC is continuing to review its regulations to look for further simplification opportunities.

The PBGC's regulatory plan for October 1, 1998, to September 30, 1999, consists of one significant regulatory action.

PBGC

PROPOSED RULE STAGE

---

151. ALLOCATION OF ASSETS IN SINGLE-EMPLOYER PLANS; VALUATION OF BENEFITS AND ASSETS

Priority:

Other Significant

Legal Authority:

29 USC 1302(b)(3); 29 USC 1341; 29 USC 1301(a); 29 USC 1344; 29 USC 1362

CFR Citation:

29 CFR 4044 subpart B

Legal Deadline:

None

Abstract:

The Pension Benefit Guaranty Corporation is considering amending its benefit valuation and asset allocation regulations by adopting more current mortality tables and otherwise simplifying and improving its valuation assumptions and methods.

Statement of Need:

The PBGC's regulations prescribe rules for valuing a terminating plan's benefits for several purposes, including (1) determining employer liability and (2) allocating assets to determine benefit entitlements. The PBGC's interest assumption for valuing benefits, when combined with the PBGC's mortality assumption, is intended to reflect the market price of single-premium, nonparticipating group annuity contracts for terminating plans. In developing its interest assumptions, the PBGC uses data from surveys conducted by the American Council of Life Insurance. The PBGC currently uses a mortality assumption based on the 1983 Group Annuity Mortality Table in its benefit valuation and asset allocation regulations (29 CFR parts 4044 and 4281). In May 1995, the Society of Actuaries Group Annuity Valuation Table Task Force issued a report that recommends new mortality tables for a new Group Annuity Reserve Valuation Standard and a new Group Annuity Mortality Valuation Standard. In December 1996, the National Association of Insurance Commissioners adopted the new tables as models for determining reserve liabilities for group annuities. The PBGC is now considering incorporating the new tables into its regulations and making other modifications.

Summary of the Legal Basis:

The PBGC has the authority to issue rules and regulations necessary to carry out the purposes of title IV of ERISA.

Alternatives:

Not yet determined.

Anticipated Costs and Benefits:

Cost estimates are not yet available. However, the PBGC expects that this regulation will not have a material effect on costs.

Risks:

Not applicable.

SMALL BUSINESS ADMINISTRATION (SBA)

Statement of Regulatory Priorities

The Small Business Administration (SBA) continues to focus its regulatory efforts towards delivering sound economic development programs to small businesses through streamlined, customer-oriented regulations. SBA began its efforts to streamline SBA regulations in 1994 in response to a Presidential directive to all agencies to review, revise, and eliminate regulations. SBA followed the directive, thoroughly reviewed all regulations, and by 1996, revised the bulk of SBA's regulations. The revised regulations are less burdensome, more "user-friendly," and provide for more efficient operations. The regulations incorporate SBA's mission to ensure access to capital to our Nation's small businesses.

SBA's 1998 Regulatory Plan

Today, SBA regulations are streamlined and current. The SBA expects Congress to enact legislation that will require some alterations to SBA's lending and investment programs (13 CFR 107 and 120). SBA does not anticipate the need to draft substantive regulations for the Agency's 1998 initiatives and therefore submits no new regulations for the 1998 regulatory plan.

SBA's 1999 Regulatory Plan

Section 7(a) of the Small Business Act states that the Small Business Administration may provide financing to small businesses "directly or in cooperation with banks or other financial institutions." Today, SBA guarantees loans through approximately 7,000 lenders. Of these lenders, 14 currently are Small Business Lending Companies (SBLCs) that are not otherwise regulated by Federal or State chartering, licensing, or similar regulatory control. SBA examines or audits these SBLCs periodically. In view of SBA's desire to manage its guaranteed loan portfolio more effectively, along with recent increases in loan volume, SBA expects to increase its SBLC oversight. To that end, SBA will draft regulations that govern the oversight and operation of the SBLC program.

Other than the SBLC regulations, SBA does not anticipate the need to draft substantive regulations for the Agency's 1999 initiatives and therefore submits no further regulations for the 1999 regulatory plan.

SBA

PROPOSED RULE STAGE

---

152. • SMALL BUSINESS LENDING COMPANY EXPANSION AND OVERSIGHT REGULATIONS

Priority:

Other Significant

Legal Authority:

15 USC 634(b)(6); 15 USC 636(a); 15 USC 636(b)

CFR Citation:

13 CFR 120

Legal Deadline:

None

Abstract:

This rulemaking would amend 13 CFR part 120 to update the rules regarding Small Business Lending Company (SBLC) oversight and expand the SBLC Program.

Statement of Need:

Section 7(a) of the Small Business Act states that the Small Business Administration (SBA) may provide financing to small businesses "directly or in cooperation with banks or other financial institutions." Today, SBA guarantees loans through approximately 7,000 lenders. Of these lenders, 14 are Small Business Lending Companies (SBLCs) that are not otherwise regulated by Federal or State chartering, licensing, or similar regulatory control. SBA examines or audits these SBLCs periodically. Congressional and Administration policy to privatize SBA lending and recent increases in loan volume require that SBA increase its SBLC oversight. To that end, SBA will draft regulations that govern the oversight and expansion of the Small Business Lending Company Program.

Summary of the Legal Basis:

Not required by statute or court order.

Alternatives:

This rulemaking amends and expands SBA's existing regulations on the SBLC Program.

Anticipated Costs and Benefits:

This rulemaking is designed to clarify SBA's oversight responsibilities in the SBLC Program. It will also facilitate access by new potential small business lenders to the SBLC Program. No costs to the Government or the SBLCs associated with this rulemaking will result. However, benefits from improving access to the SBLC Program will accrue to the general economy through the creation of greater opportunity for small business loans, creation of jobs, and increased tax revenues.

Risks:

This regulation addresses no risks to the public health and safety or to the environment.

SOCIAL SECURITY ADMINISTRATION (SSA)

Statement of Regulatory Priorities

The Social Security Administration (SSA) administers the retirement, survivors, and disability insurance programs under title II of the Social Security Act (the Act) and the Supplemental Security Income (SSI) Program under title XVI of the Act. For the most part, SSA's regulations do not impose burdens on the private sector or on State or local governments. Our regulations codify the requirements for entitlement to benefits under the programs we administer.

Our nine entries for The Regulatory Plan represent areas of major importance in benefit program administration of the retirement, disability, and supplemental security income programs.

Included in this year's Plan are proposed regulations that will provide more choices for people with disabilities who seek Return-to-Work services so that they may become self-sufficient. These proposed regulations parallel provisions of legislation, The Work Incentives Improvement Act of 1998, presently pending in Congress.

We are currently preparing two final regulations to implement several elements of a major agency initiative known as "process unification," which is designed to produce one set of adjudicative standards for all levels of disability review within SSA. The first, Weight of Disability Determination Service (DDS) Medical Consultant Opinions, will define the specific weight to be given to DDS medical consultant opinions in hearing decisions. The second, Assessment of Residual Functional Capacity, will clarify the guidelines in our regulations used in determining whether an individual under age 50 lacks the capacity to perform less than a full range of sedentary work.

In response to the Reinventing Government Initiative to create a Federal Government that works better and costs less, we list one regulatory initiative—Permit Department of State and the Immigration and Naturalization Service to Collect Information Needed to Assign Social Security Numbers to Aliens. The goal of this process is to coordinate services to customers who, under current procedures, must deal with multiple Federal agencies to establish their status as alien residents of the United States. This regulatory authority will support a project with INS whereby it would transmit data to SSA electronically so that SSA can issue social security numbers to certain resident aliens.

We have also included in this year's Plan a regulation, Administrative Res Judicata, that will set forth principles by which SSA distinguishes its policies on administrative res judicata and administrative collateral estoppel from the common-law doctrines of res judicata and collateral estoppel that courts sometimes apply in Social Security cases.

To improve management in the area of debt collection, we plan to develop regulations to implement the new debt collection tools authorized by recent legislation. Four of the entries in this year's Plan will further our efforts in this initiative. The first, Federal Salary Offset, will enable us to collect qualifying, delinquent title II debts owed by former beneficiaries who are currently Federal employees. The second, Private Collection Agencies, permits us to refer qualifying, delinquent title II debts owed by former beneficiaries to private collection agencies for further debt collection efforts. The third, Administrative Wage Garnishment, will enable us to collect qualifying, delinquent title II and title XVI debts owed by former beneficiaries who are now employed (by other than the Federal Government). The last in this category, Interest Charging/Indexing, will provide us authority to charge interest on qualifying, delinquent title II debts owed by former beneficiaries.

Consistent with the President's Regulatory Reinvention Initiative, we are working diligently to improve our program benefit regulations and to develop partnerships with large segments of the community of stakeholders interested in Social Security programs. We expect that the partnerships will contribute to the successful development of our Regulatory Plan entries.

SSA

PROPOSED RULE STAGE
